Information in this record system may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Records are maintained in file folders.

**Retrievability:** Records are arranged by district, association and name.

**Safeguards:** Records are maintained in an area locked after business hours.

**Retention and disposal:** Records are retained for five years and then destroyed.

**System manager(s) and address:** Director, Administrative Division, Farm Credit Administration, 490 L'Enfant Plaza East, S.W., Washington, D.C. 20578

**Notification procedure:** All inquiries about this system of records shall be addressed to: Director, Administrative Division, Office of Administration, Farm Credit Administration, 490 L'Enfant Plaza East, S.W., Washington, D.C. 20578

**Record access procedures:** Requests for access to a record shall be directed to the Director, Administrative Division, at the above address as provided in 12 CFR 603.310.

**Contesting record procedures:** Request for amendments of a record shall be directed to the Director, Administrative Division, at the above address as provided in 12 C.F.R. 603.330.

**Record source categories:** The individual member-borrower, bank and association employees, FCA employees, Congressmen, and individual complainants.

**Systems exempted from certain provisions of the act:** This system is subjected to a specific exemption pursuant to 5 U.S.C. 552a (k)(2), to the extent there is included in the system investigatory material compiled for law enforcement purposes.

[FR Doc.75-23067 Filed 8-28-75; 10:18 am]

## DEPARTMENT OF LABOR

Office of the Secretary

### NOTICE OF SYSTEMS OF RECORDS

Notice is hereby given that the Department of Labor, in accordance with 5 U.S.C. 552a(e) (4) and (11), sec. 3 of the Privacy Act of 1974 (Pub. L. 93-579) ("Act"). Proposes to adopt the notice of systems of records set forth below. The Department invites public comment on all parts of the notice.

Interested persons are invited to submit written data, views and arguments to Seth Zinman, Associate Solicitor, Division of Legislation and Legal Counsel, Office of the Solicitor, Room N2428, New Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210, on or before September 28, 1975. Written material received from the public through said date will be considered by the Department before taking action on a final notice. Written material received from the public will be available for public inspection at the above address during normal business hours.

This notice was prepared and the systems noticed were selected with major reliance on the Guidelines and Responsibilities for Implementation of the Privacy Act published by the Office of Management and Budget (40 FR 28949, July 9, 1975).

The following remarks are intended to clarify the principles on which the particular systems of records were selected for notice and to clarify the contents of the notice.

The proposed notice is in two parts. The first part is a prefatory statement of general routine uses applicable to all or most of the noticed systems of records and is incorporated by reference into the notice of each system of records unless the text of a particular system indicates otherwise. This method of notice of routine uses is used in order to avoid repetition. Those routine uses which are specifically prescribed by the Act are not reported.

The first part also sets forth those systems of records which are reported by the Department for all agencies. These records are ones which may be found in all agencies, but the Department considers them to be the primary responsibility of the Department.

Three basic criteria were employed to determine those records which constitute a system of records requiring publication of notice in the FEDERAL REGISTER. The first criterion is whether the record is an official record of the Department. The second is whether the information pertaining to an individual is retrieved by means of the name or other personal identifier associated with that individual. The third criterion is whether a particular individual about whom information is available, which information is retrieved by reference to a personal identifier, is viewed in a business capacity.

Applying the above criteria, a survey of the Department's records revealed that many systems of records did not fall

within the definition of that term as it is employed for purposes of the Act. The very nature of the Department's responsibilities involves relationships with private corporations, unions, public bodies and other entities to a greater extent than with individuals in a purely personal capacity. Information about individuals, in many instances, is maintained in Departmental records ancillary to its relationships with entities. Information about an individual is usually retrieved by reference to the name of a company, a union, a contract number, or a project name or number, rather than by reference to a personal identifier. For the same reason, correspondence filed only by date is also not reported.

The business or entrepreneurial capacity standard also appeared frequently in Department records. Such records as the Wage and Hour Division investigative files under the Fair Labor Standards Act are maintained in the name of the company investigated, some of which are sole proprietorships. Sole proprietors offering goods and services to the Department and technical advisors or experts participating in Department programs are considered to be acting in an entrepreneurial capacity. Special note is taken of certain systems of records containing the names of persons applying for certifications such as under the Farm Labor Contractors Registration Act. These persons, although generally unincorporated, are considered to be in the same category as sole proprietors.

Records which are not official records of the Department are those which are not subject to the Department's control or are not required in the conduct of any program or function for which the Department is responsible. This category includes research and reference publications, including directories; personal telephone lists created by an individual employee for his or her own use; employee recreation associations; credit union memberships; and similar files.

This notice does not include particular identification of certain systems of records because other Federal agencies have assumed responsibility for publishing a Government-wide notice. The primary example is the publication of notice for Federal employee personnel records by the United States Civil Service Commission. This notice does include, as a Government-wide notice, all records pertaining to beneficiaries under the Federal Employees' Compensation Act and records pertaining to complaints under E.O. 11246. All records compiled pursuant to these programs are considered to be under the control of the Department of Labor in the same manner that personnel records are considered to be under the control of the Civil Service Commission.

A number of the particular systems of records noticed indicate Social Security numbers in the category of information and individuals are requested to furnish such number. The Department is aware of the provision of section 7 of the Act with regard to the use of Social Security

numbers. The fact is that some systems of records were designed with the Social Security number as a retrieval key. Generally, the Social Security number is used as an identifier to insure that an individual seeking benefits is properly identified so as to prevent duplicate or erroneous payments. In the event that an individual declines to provide his or her number, the Department will make a reasonable effort to respond to the request under the Act and, in the case of the payment of benefits, will not refuse such benefits on this ground.

Effective date. This notice shall be effective August 29, 1975.

Dated: August 29, 1975.

JOHN T. DUNLOP,  
Secretary of Labor.

The Department proposes to adopt the following notices of systems of records.

#### PREFATORY STATEMENT

The following routine uses apply to and are incorporated by reference into each system of records set forth below unless the text of a particular record indicates otherwise.

1. In the event that a system of records, maintained by the Department to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

2. A record from this system of records may be disclosed, as a routine use, to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a Department decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

3. A record from this system of records may be disclosed, as a routine use, to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

4. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate or administrative tribunal, including disclosures to opposing counsel in the course of litigation or settlement negotiations.

5. A record in this system of records does not apply to other medical or DOL/ESA-14—Office of Workers' Compensation Programs, Black Lung, X-ray.

DOI/BLS-1

Administrative Information System Financial Matter

ment Security Agencies. BLS source: States follow BLS instructions to pick a sample, encode the data to cards or tape, and send

5. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving the individual when the individual is a constituent of the Member and has requested assistance from the Member with respect to the subject matter of the record.

6. A record in this system of records which contains medical information may be disclosed, as a routine use, to the medical or health advisor of any individual submitting a request for access to the record if, in the sole judgment of the Department, disclosure could have an adverse effect upon the individual, under the provisions of 5 U.S.C. 552a(f)(3) and implementing regulations.

7. A record in this system of records may be disclosed, as a routine use, to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in the Circular.

#### GOVERNMENT-WIDE RECORDS

The following systems of records are reported by the Department for the Government as a whole because the Department has major responsibility for the program of which the systems of record are a part. The Department recognizes that each federal agency may maintain a record or a part of a record within the agency. However, in order to avoid duplication in reporting, the Department considers it to be its responsibility to report these systems on behalf of all agencies. The Department also considers that it has control over these systems to the same extent as the Civil Service Commission has control over federal employee personnel records.

1. Federal Employees' Compensation Act files: Except for the Panama Canal Zone, all records relating to the injury or death of civilian employees or other persons entitled to benefits under the Federal Employees' Compensation Act are the records of the Office Workers' Compensation Programs of the Department of Labor. The Office asserts control of these records under the provisions of 5 U.S.C. 8149 and Departmental regulations at 20 CFR 10.10. The systems of records for these records is being reported by the Department as a Government-wide notice. This notice, however,

does not apply to other medical or related files not created pursuant to the Federal Employees' Compensation Act which may be in the possession of an agency.

2. Office of Federal Contract Compliance Programs Complaint Files: the Department is responsible for the administration of Parts II and III of E.O. 11246 (Nondiscrimination in Employment by Government Contractors and Subcontractors and Nondiscrimination in Federally Assisted Construction Contracts.) In accordance with this responsibility, the Department considers that it has dominion and control over the complaint files related to these programs. Therefore, the Department is reporting this system of records on behalf of all agencies.

#### ADDRESSES TO WHICH REQUESTS MAY BE DIRECTED

The addresses of the various component units of the Department as well as its field offices are contained in Departmental regulations at 29 CFR 70.36 and 70.43. This general notice is published to avoid unnecessary duplication in reporting addresses in each notice.

DOL/BLS-1—Administrative Information System Financial Master File.

#### DOL/BLS-1

**System name:** Administrative Information System Financial Master File

**System location:** Records stored on computer at National Institutes of Health, Bethesda, Maryland. Access and maintenance usually occur by remote terminal in Room 2115, GAO Building, 441 G Street, N.W., Washington, D.C. 20212.

**Categories of individuals covered by the system:** Regular full- and part-time employees in the BLS National and Regional Offices.

**Categories of records in the system:** Budget and staffing data: name, SSN, organization title, grade, step, cost center, fund, PAS code, etc.

**Authority for maintenance of the system:** 5 USC 301

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Magnetic disk pack

**Retrievability:** Retrievable by any record element including name and SSN.

**Safeguards:** Protected data file can be read only by a few authorized employees and changed by even fewer authorized employees. Monthly staffing patterns are listed and distributed to cost center managers within the Bureau; these are arranged by organization and by grade, do not show SSN and are treated with the same general care as other administrative files.

**Retention and disposal:** Individual records are maintained as long as the individual is employed by BLS. Upon resignation or transfer the record is scratched (erased).

**System manager(s) and address:** Computer Systems Analyst, Room 2115, GAO Building, 441 G Street, N.W., Washington, D.C. 20212.

**Notification procedure:** Mail all inquiries or present in writing to: Commissioner of Labor Statistics, Room 2108, GAO Building, 441 G Street, N.W., Washington, D.C. 20212.

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** Input from official personnel documents (SF-52 and DL-50).

#### DOL/BLS-2

**System name:** Characteristics of the Insured Unemployed File

**System location:** Tapes are stored in Office of ADP Support, Room 2530, GAO Building, 441 G Street N.W., Washington, D.C. 20212. Processing is done by the DOL Directorate of Data Automation, Room 2852, at the same address.

**Categories of individuals covered by the system:** Claimants for State unemployment insurance benefits (sample only for most States)

**Categories of records in the system:** Employment information: age, sex, SSN, duration of unemployment, occupation, industry attachment of last job.

**Authority for maintenance of the system:** 29 USC 1-9

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Mag tape<sup>1/2</sup>

**Retrievability:** By SSN. The SSN is used only as a unique record identifier for editing purposes. The BLS is now investigating other means of unique record identification that could replace the SSN and thereby remove this data file from coverage under the Privacy Act.

**Safeguards:** Physical safeguards: only authorized employees have access to the facilities at any time.

**Retention and disposal:** Retained 10 years, then tapes are erased for re-use.

**System manager(s) and address:** Chief, Division of Industry Employment Statistics, Room 2089, GAO Building, 441 G Street N.W., Washington, D.C. 20212.

**Notification procedure:** Mail all inquiries or present in writing to: Commissioner of Labor Statistics, Room 2108, GAO Building, 441 G Street N.W., Washington, D.C. 20212. Give SSN.

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** Original source: Individual applications for unemployment insurance benefits submitted to State Employ-

ment Security Agencies. BLS source: States follow BLS instructions to pick a sample, encode the data to cards or tape, and send to BLS.

#### DOL/BLS-3

**System name:** Office of Statistical Operations and Processing, Staff Utilization File.

**System location:** Records stored on computer at National Institutes of Health, Bethesda, Maryland. Maintenance is performed by remote terminal in Room 2021, GAO Building, 441 G Street N.W., Washington, D.C. 20212.

**Categories of individuals covered by the system:** Employees of the BLS Office of Statistical Operations and Processing (except the Office of ADP Support), the CPI Revision Management Team, and the Division of Management Systems (Office of Administrative Management)

**Categories of records in the system:** Payroll, accounting and staff utilization data: name, SSN, grade, and step, cost center, PAS home code. For current pay period only: regular and overtime hours worked; compensatory time earned; hours worked by PAS code, by function and by task (function and task specified by each office).

**Authority for maintenance of the system:** 5 USC 301

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Magnetic disk pack

**Retrievability:** Retrievable by any record element including name and SSN.

**Safeguards:** Data file accessible only by authorized employees who know keyword.

**Retention and disposal:** Cumulative file for the last pay period of the fiscal year is stored indefinitely.

**System manager(s) and address:** Executive Assistant to the Deputy Commissioner for Statistical Operations and Processing, GAO Building, 441 G Street N.W., Washington, D.C. 20212.

**Notification procedure:** Mail all inquiries or present in writing to: Commissioner of Labor Statistics, Room 2108, GAO Building, 441 G Street N.W., Washington, D.C. 20212. Give name, SSN, and fiscal years of employment.

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** Input from employees' biweekly Time and Attendance Cards and time distribution forms (DL 1-129, "Project Reporting Form"); SF-52's "Request for Personnel Action"

#### DOL/BLS-4

**System name:** Staff Utilization File

**System location:** Records stored by the DOL Directorate of Data Automation, Room 2852, GAO Building, 441 G Street N.W., Washington, D.C. 20212. Maintenance is directed by the Division of Field Collection Activities, Room 1834, at the same address. Input is mailed in or keypunched by BLS Regional Office Divisions of Operations; file copies of input documents are kept by most Regions.

**Categories of individuals covered by the system:** All BLS Regional Office Division of Operations professional and data collection employees. (Clerical staff are not covered by the system.)

**Categories of records in the system:** Staff utilization data: name, SSN, pay period, hours worked and units accomplished by PAS code for functions such as personal visit, telephone collection, and training.

**Authority for maintenance of the system:** 5 USC 301

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Mag tapes and disks

**Retrievability:** By any data field, including name and SSN.

**Safeguards:** Only authorized employees have access to the tapes/disks, to the programs, and to the Regions' backup documents.

**Retention and disposal:** Fiscal year files are retained indefinitely.

**System manager(s) and address:** Chief, Division of Field Collection Activities, Room 1834, GAO Building, 441 G Street N.W., Washington, D.C. 20212.

**Notification procedure:** Mail all inquiries or present in writing to: Chief, Compliance Programs, 200 Constitution Avenue, N.W., Washington, D.C. 20212.

**System location:** U.S. Department of Labor, Office of Federal Contract Compliance Programs, 200 Constitution Avenue, N.W., Washington, D.C. 20212.

**System location:** U.S. Department of Labor, Office of Federal Contract Compliance Programs, 711 14th Street, N.W., Room 220, Washington, D.C. 20212.

**Safeguards:** Locked file with access by authorized personnel only.

**Notification procedure:** Mail all inquiries or present in writing to: Commissioner of Labor Statistics, Room 2108, GAO Building, 441 G Street N.W., Washington, D.C. 20212. Give name, SSN and dates of employment.

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** "Staff Utilization Report" (form number SO-1) filled out each pay period by each R.O. D/Operations employee (in place of the DL 1-291 "Project Reporting Form")

#### DOL/ESA-1

**System name:** Budget Position Control System

**System location:** Employment Standards Administration, Room C-3307, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

**Categories of individuals covered by the system:** Federal Government employees of the Employment Standards Administration.

**Categories of records in the system:** Budget

**Authority for maintenance of the system:** OMB Circular A-11

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Preparation of Employment Standards Administration budgets and related reports.

**Storage:** Manual

**Retrievability:** By Employment Standards Administration organization.

**Safeguards:** The System is housed in the Division of Budget and Finance and only persons who are authorized by the Division are allowed access to the data.

**Retention and disposal:** There is no set disposal time for data in this system.

**System manager(s) and address:** Chief, Division of Budget and Finance, Employment Standards Administration, New Department of Labor Building, Room C3307, 200 Constitution Avenue N.W., Washington, D.C. 20210.

**Notification procedure:** As above

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** Form DL-50 Notification of Personnel Action.

#### DOL/ESA-2

**System name:** Employment Standards Public Enquiry File

**System location:** Room S3221, New Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

**Categories of individuals covered by the system:** The general public, government officials (usually of State labor departments), and private organizations such as those representing labor, management, or private citizens.

**Categories of records in the system:** Copies of incoming letters and reports of telephone requests.

**Authority for maintenance of the system:** 5 USC 301

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Manual File

**Retrievability:** By subject matter, State chronologically, and name if a private citizen.

**Safeguards:** Building Security Guards.

**Retention and disposal:** Time retained depends on subject matter and importance, varying from 3 to 10 years, and then destroyed.

**System manager(s) and address:** Director, ESA, Office of Program Development and Administration, 200 Constitution Avenue, N.W., Washington, D.C., Room S3325, U.S. Department of Labor.

**Notification procedure:** U.S. Department of Labor, ESA, DSES, Rm. S3321, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Name and approximate date of previous correspondence should be provided.

**Record access procedures:** Same as above

**Contesting record procedures:** Same as above

**Record source categories:** Information voluntarily submitted by correspondent on own initiative.

#### DOL/ESA-3

**System name:** Office of Federal Contract Compliance Programs Complaint File.

**System location:** U.S. Department of Labor, Office of Federal Contract Compliance Programs, 200 Constitution Avenue, N.W., Wash. D.C., Room N3402; U.S. Department of Health, Education and Welfare, National Institutes of Health, Building 12A, Bethesda, Maryland.

**Categories of individuals covered by the system:** Individuals filing complaints of discrimination.

**Categories of records in the system:** Personal demographic information on the complaint and the basis of the complaint they are filing.

**Authority for maintenance of the system:** Executive Order 11246, as amended.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure to compliance agencies that have responsibility of overseeing contractor compliance with Executive Order 11246 to the EEOC which has the authority to investigate complaints of discrimination and to other Federal agencies that may have responsibility for matters referred to in a complaint.

**Storage:** Diebold Power Files, magnetic tapes.

**Retrievability:** By name and/or OFCCP Control Number

**Safeguards:** Files are locked, except during working hours and only authorized personnel have access to files. The computer system has a code used for retrieval.

**Retention and disposal:** Active files retained 2-5 years, referred to storage, destroyed after 5 years.

**System manager(s) and address:** Director, OFCCP, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C.

**Notification procedure:** U.S. Department of Labor, Office of Federal Contract Compliance Programs, 200 Constitution Avenue, N.W., Washington, D.C.

**Record access procedures:** Individual may request in writing regarding information maintained by OFCCP on himself. He may write to the Office of Federal Contract Compliance Programs.

**Contesting record procedures:** Same as above

**Record source categories:** Individuals and employers

#### DOL/ESA-4

**System name:** Office of Federal Contract Compliance Programs Handicapped Worker Complaint File.

**System location:** Room C4321, U.S. Department of Labor, 200 Constitution Avenue N.W., Washington, D.C. 20210. Each Regional Office.

**Categories of individuals covered by the system:** Handicapped Workers

**Categories of records in the system:** Medical, personal, employment

**Authority for maintenance of the system:** 29 USC 793

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure to contracting and compliance agencies.

**Storage:** Manual Files

**Retrievability:** By name

**Safeguards:** Physical Security

**Retention and disposal:** Undecided (program still being developed).

**System manager(s) and address:** Director, Veterans and Handicapped Workers Program Operation Division, Office of Federal Contract Compliance Programs, Room 4321 NDOL, 200 Constitution Avenue, N.W., Washington, D.C. 20210

**Notification procedure:** Head, Handicapped Workers' Task Force, Room C4321 NDOL, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

**Record access procedures:** Same as above

**Contesting record procedures:** Same as above

**Record source categories:** The sources of the information come from the complaint, the contractor's records and files, and other investigative sources as needed, such as medical records, and other employment records at the permission of the complainant.

#### DOL/ESA-5

**System name:** Office of Federal Contract Compliance Programs Internal Complaint File

**System location:** U.S. Department of Labor, Office of Federal Contract Compliance Programs, 711 14th Street, N.W., Room 220, Washington, D.C.

**Categories of individuals covered by the system:** Individuals filing complaints of discrimination.

**Categories of records in the system:** Personal, Demographic information on the complainant and the basis of the complaint.

**Authority for maintenance of the system:** Executive Order 11246, as amended.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Diebold Power Files, Mag Tapes

**Retrievability:** By name and/or OFCCP Control Number

**Safeguards:** Locked Files; Computer system is coded.

**Retention and disposal:** Being determined at this time.

**System manager(s) and address:** Director, Office of Federal Contract Compliance Programs, Room N3402, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

**Notification procedure:** As above

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** Individual complainants.

#### DOL/ESA-6

**System name:** Office of Federal Contract Compliance Programs Veteran's Complaint Files

**System location:** Room N4418, New Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210; each ESA Regional Office.

**Categories of individuals covered by the system:** Disabled veterans, recently discharged veterans

**Categories of records in the system:** Medical, personal, employment

**Authority for maintenance of the system:** S402, Vietnam Era Veterans Readjustment Assistant Act of 1974, PL 93-508.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure to contracting and compliance agencies.

**Storage:** Manual File

**Retrievability:** By name

**Safeguards:** Physical Security

**Retention and disposal:** Undecided (program still being developed).

**System manager(s) and address:** Director, Veterans and Handicapped Worker Program Operations Division, Room N4418 NDOL, Washington, D.C. 20210.

#### DOL/MA-5

**System name:** ESARS 2 percent Sample File

**System location:** Room 2821, GAO Building, 441 G Street, N.W., Washington, D.C.; Room 4410 Patrick Henry Building, 601 D Street, N.W., Washington, D.C.

**Categories of individuals covered by the system:** Employment Service Applicants

**Categories of records in the system:** Characteristics of Individual such as age, sex, race and ES Services provided to him.

**Authority for maintenance of the system:** 29 U.S.C. 49, et. seq.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Magnetic Tape

**Retrievability:** By region, State, SSN

**Safeguards:** Routine computer precautions limiting access to authorized expenditure codes

**Retention and disposal:** 5 years. Destroyed by scratching tape.

**System manager(s) and address:** Chief, Division of ADP Systems, Patrick Henry Bldg., Room 4410, 601 D Street, N.W., Washington, D.C. 20213.

**Notification procedure:** As above

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** All records came from the State Employment Service Offices in the 50 States, P.R. and D.C.

#### DOL/MA-6

**System name:** Exemplary Rehabilitation Certification Program File  
**System location:** Department of Labor, Manpower Administration, Division of Immigration and Rehabilitation Certification, Patrick Henry Building, 601 D Street, N.W., Washington, D.C. 20213.

**Categories of individuals covered by the system:** Ex-servicemen with less than honorable discharges from the U.S. Armed Forces.

**Categories of records in the system:** Personal. Information such as: Local law enforcement reference, fingerprint card, character references, employer references.

**Authority for maintenance of the system:** 10 U.S.C. 26.1; 80 STAT. 1017; P.L. 89-690.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** None

**Storage:** Individual application folders are kept under lock and key from the date application is received to date of retirement of folders to the Federal Records Center.

**Retrievability:** Records are indexed by name, address, serial number, social security number and date of birth.

**Safeguards:** Individual application folders are kept in file cabinets under lock and key.

**Retention and disposal:** Folders are maintained in the Division for at least 2 years. After 2 years, the records are sent to the Federal Records Center for storage. Because of requests for replacements of lost or destroyed certificates, these records are retained permanently.

**System manager(s) and address:** Chief, Division of Immigration and Rehabilitation Certification; Room 8204, Patrick Henry Building, 601 D Street, N.W., Washington, D.C. 20213.

**Notification procedure:** U.S. Department of Labor, Manpower Administration, U.S. Employment Service (METR), Washington, D.C. 20213.

**Record access procedures:** As above

**Contesting record procedures:** As above

**Record source categories:** Upon request, an application packet is sent to the ex-serviceman which includes an application form, employer reference form, character reference forms, local law authority reference form and a fingerprint card. When the completed application forms are returned to the Department of Labor, the fingerprint card is sent to the FBI for investigation. The FBI then returns the fingerprint card and report to the Department of Labor.

#### DOL/MA-7

**System name:** Immigration and Rehabilitation Certification Program File

**System location:** National Office U.S. Department of Labor, Manpower Administration, 601 D Street, N.W., Washington, D.C. 20213; Regional Offices.

**Categories of individuals covered by the system:** Employers who file application for alien employment certification in behalf of aliens and aliens.

**Categories of records in the system:** Information of record consists of employer's type, size and nature of business; offer of employment to alien; and alien's background and qualifications.

**Authority for maintenance of the system:** Public Law 414, Immigration and Nationality Act, as amended by Public Law 89-236

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Any and all materials pertinent to the alien certification program are disclosed to employer's attorneys, aliens, State Department and Immigration and Naturalization Service.

**Storage:** Manual files are stored in the national office, the 10 regional offices and the office in the Virgin Islands.

**Retrievability:** Records are maintained on all applications for alien employment certification filed by means of Immigration Case Record and Transmittal, BES Form 71-30 (Rev. June 1968). Job offer applications are filed alphabetically by employer name, and applications by alien name if filed by alien in his own behalf.

**Safeguards:** Access to records provided only to authorized personnel.

**Retention and disposal:** Case files are to be retained in the individual offices for at least 18 months, at which time they are to be stored in the Federal Records Center, and then destroyed, by shredding, after 2 years or more. The San Francisco Regional Office retains its records for 2 years; storage keeps them for 5 years, and they keep all case files under lock and key. Chicago retains its records for 18 months and then they are destroyed.

**System manager(s) and address:** Chief, Division of Immigration and Rehabilitation Certification, Manpower Administration, U.S. Employment Service, 601 D Street, N.W., Washington, D.C. 20213.

**Notification procedure:** National Office—Regional Offices—Virgin Islands, named areas. Persons must present identifying documents pertinent to the application in order to locate information from the file.

**Record access procedures:** Information may be obtained from certifying officers of national office, regional offices and Virgin Islands office of USES.

**Contesting record procedures:** Same as above

**Record source categories:** Sources of information come from application form completed by employers and aliens, supporting documents, schools, colleges, organizations and publications.

#### DOL/MA-8

**System name:** Job Corps Mainstream and Placement File

**System location:** Room 2821, GAO Building, 441 G Street, N.W., Washington, D.C.; Room 4409, Patrick Henry Building, Washington, D.C.

#### DOL/OASA-3

**System name:** General Investigations file

**System location:** Directorate of Audit and Investigations, OASA, U.S. Department of Labor, 200 Constitution Ave., N.W., Washington, D.C. 20210

**Categories of individuals covered by the system:** Employees, Applicants, Contractors, Subcontractors, Grantees, Subgrantees, Claimants, and individuals threatening DOL employees.

**Categories of records in the system:** Resolution of investigations of criminal or conduct violations, ongoing investigation files, and investigatory index card files.

**Authority for maintenance of the system:** EO 11222 and Title 5 USC 301.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Federal, state, or local government agencies for civil, criminal or regulatory law enforcement; hiring or retention of employee, security clearance, letting of contracts, issuance of licenses, grant or other benefits.

**Storage:** Information in the system is stored in case files and on index file cards alphabetically keyed to records maintained in case files.

**Retrievability:** Information is retrieved by name of respondent.

**Safeguards:** Information is kept in file cabinets in a locked, secured room. Access by key is limited to Office of Investigations staff only.

**Retention and disposal:** No retention and disposal procedure exists for investigative files. However, a proposal has been submitted for National Archives (NARS) approval. This proposal calls for the transfer of investigative files to the Federal Records Center (FRC) five years after the end of the fiscal year in which the last action occurred. The files would be held in the FRC for ten years and then destroyed. Index cards would be retained permanently.

**System manager(s) and address:** Director of Audit and Investigations, OASA, U.S. Department of Labor, 200 Constitution Ave., N.W., Washington, D.C. 20210.

**Notification procedure:** Address inquiries to the Systems Manager above.

**Record access procedures:** Investigatory data compiled for civil or criminal law enforcement purposes are exempt from the access provisions pursuant to 5 USC 552 a (k). Individuals desiring to contest or amend information maintained in the system should direct their requests to the System Manager listed above, stating clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information sought.

**Contesting record procedures:** Same as above

**Record source categories:** The information contained in this system was received from individual complaints, witnesses, respondents, Federal, State, and Local government records, and individual or company records.

#### DOL/OASA-4

**System name:** Occupational Injury and Illness Reporting File

## list of cfr parts affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel  
CHAPTER I—CIVIL SERVICE COMMISSION  
PART 213—EXCEPTED SERVICE  
Council on Wage and Price Stability

Section 213.3199 is amended to show that the expiration date for Schedule A exception of positions on the Council on Wage and Price Stability has been extended to September 30, 1977.

§ 213.3199 Temporary Boards and Commissions.

(r) Council on Wage and Price Stability. (1) Until September 30, 1977, all positions on the staff of the Council.  
(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.  
[FR Doc.75-23832 Filed 9-8-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Department of Defense

Section 213.3206 is amended to show that one position of Net Assessment Coordinator is excepted under Schedule B.  
Effective on September 9, 1975, § 213.3206(a) (5) is added as set out below:  
§ 213.3206 Department of Defense.

(a) Office of the Secretary. . . .  
(5) One Net Assessment Coordinator.  
(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.  
[FR Doc.75-23833 Filed 9-8-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Administrative Office of the United States Courts

Section 213.3272 is amended to show that two positions of Clerks Liaison Officer, GS-13, in the Division of Clerks of Court are excepted under Schedule B.  
Effective on September 9, 1975, § 213.3272(c) is added as set out below:  
§ 213.3272 Administrative Office of the United States Courts.

(c) Two Clerks Liaison Officers, GS-13, in the Division of Clerks of Court.  
(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.  
[FR Doc.75-23831 Filed 9-8-75;8:45 am]

Title 7—Agriculture  
CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 513, Amdt. 1]  
PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling  
This regulation increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period Aug. 29-Sept. 4, 1975. The quantity that may be shipped is increased due to improved market conditions for California-Arizona Valencia oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908.

(a) Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674) and upon the basis of the recommendation and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Valencia Orange Regulation 513 (40 FR 39522). The marketing picture now indicates that there is a greater demand for Valencia oranges than existed

when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Valencia oranges to fill the current demand thereby making a greater quantity of Valencia oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Valencia oranges grown in Arizona and designated parts of California.

(b) Order, as amended. The provisions in paragraph (b) (1) (i), and (ii) of § 908.813 (Valencia Orange Regulation 513 (40 FR 39522)) are hereby amended to read as follows:

- (i) District 1: 233,000 cartons;
- (ii) District 2: 517,000 cartons.

(Sees. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: September 3, 1975.  
CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.  
[FR Doc.75-23843 Filed 9-8-75;8:45 am]

Title 12—Banks and Banking  
CHAPTER V—FEDERAL HOME LOAN BANK BOARD

[No. 75-799]  
PART 523—MEMBERS OF BANKS  
Liquid Assets; Correction

SEPTEMBER 3, 1975.  
Federal Register Document No. 75-375, which amended § 523.10 of the Rules and Regulations for the Federal Home Loan Bank System (12 CFR 523.10) and was corrected by Board Resolution No. 75-535 of June 19, 1975 (40 FR 26672, June 25, 1975) is hereby further corrected by the Federal Home Loan Bank Board to set forth § 523.10(g) (4) (iii), as amended, as follows:

## § 523.10 Definitions.

(g) . . .  
(4) . . .  
(iii) Except for loans of unsecured day(s) funds, such deposits are: (a) Negotiable and have remaining periods to maturity of not more than 1 year, (b) not negotiable and have remaining periods to maturity of not more than 90 days, or (c) not withdrawable without notice and the notice periods do not exceed 90 days;

(Sec. 5A, 47 Stat. 727, as added by Sec. 1, 64 Stat. 256, as amended, Sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1425a, 1437, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48, Comp., p. 1071)

By the Federal Home Loan Bank Board.

[No. 75-809]

## PART 545—OPERATIONS

## Loans in Excess of 90 Percent of Value

SEPTEMBER 3, 1975.

By Resolution No. 75-518 (dated June 11, 1975, and published in the FEDERAL REGISTER on June 17, 1975, at 40 FR 25581), the Board amended § 545.6-1(a) (5) (ii) (12 CFR 545.6-1(a) (5) (ii)) to increase from 10 percent to 15 percent the percentage-of-assets limitation for investment in loans under § 545.6-1(a) (5). Said Resolution 75-518 should also have made a conforming amendment to § 545.6-1(a) (5) (iv) (12 CFR 545.6-1(a) (5) (iv)), which refers to the percentage-of-assets limitation in § 545.6-1(a) (5) (ii).

Accordingly, the Federal Home Loan Bank Board hereby corrects Board Resolution No. 75-518 by amending § 545.6-1(a) (5) (iv) to change the reference to the § 545.6-1(a) (5) (ii) percentage-of-assets limitation from 10 percent to 15 percent, as set forth below, effective June 17, 1975.

In view of the corrective nature of this amendment, the Board hereby finds that notice and public procedure as to this amendment are unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); since publication of this amendment for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date thereof is in the opinion of the Board likewise unnecessary for the same reason, the Board hereby provides that this amendment shall become effective as hereinbefore set forth.

The text of amended § 545.6-1(a) (5) (iv) is as follows:

§ 545.6-1 Lending powers under sections 13 and 14 of Charter K.

(a) . . .  
(5) . . .

(iv) The aggregate of the principal amount of the association's investment

in flexible payment loans under this paragraph and paragraph (a) (4) of this section (exclusive of loans with respect to which the unpaid principal balance has been reduced to an amount not in excess of 80 percent of the value or purchase price of the real estate, whichever is less, determined at the time the loans were made) does not exceed 5 percent of the association's assets, which 5 percent shall be included in the 15 percent of assets limitation set forth in paragraph (a) (5) (ii) of this section and in the 30 percent of assets limitation set forth in paragraph (a) (5) (ii) of this section; and

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48, Comp., p. 1071).

By the Federal Home Loan Bank Board.

## Title 16—Commercial Practices

## CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2713]

## PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

## Commerce Drug Company, Inc. and Del Laboratories, Inc.

Subpart—Advertising falsely or misleadingly; § 13.10 Advertising falsely or misleadingly; § 13.135 Nature of product or service; § 13.170 Qualities or properties of product or service; § 13.170-52 Medicinal, therapeutic, healthful, etc.; § 13.190 Results; § 13.205 Scientific or other relevant facts. Subpart—Corrective actions and/or requirements; § 13.533 Corrective actions and/or requirements; § 13.533-45 Maintain records; § 13.533-45(k) Records, in general. Subpart—Misrepresenting oneself and goods—Goods; § 13.170 Qualities or properties; § 13.170 Results; § 13.1740 Scientific or other relevant facts. Subpart—Offering unfair, improper and deceptive inducements to purchase or deal; § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45, 52)

In the Matter of Commerce Drug Company, Inc., a corporation, and Del Laboratories, Inc., a corporation.

Consent order requiring a Farmingdale, N.Y., producer of vitamins and/or mineral products, and its parent corporation, among other things to cease disseminating unsubstantiated advertisements regarding the efficacy, benefit or need to prospective purchasers of the products.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

1 Copies of the Complaint, Decision and Order, filed with the original document.

## ORDER

It is ordered, That respondents Commerce Drug Company, Inc. and Del Laboratories, Inc., corporations, their successors and assigns, and their officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of the product Revup vitamins or any vitamin and/or mineral product of Commerce Drug Company, Inc. or Del Laboratories, Inc. do forthwith cease and desist from:

A. Disseminating or causing to be disseminated any advertisement by United States mails or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, which represents in writing, orally, visually or in any other manner, directly or by implication, that:

1. The stresses and strains a person undergoes create a condition which will be benefited by consumption of such product;

2. People need such a specially formulated product;

3. Such product is of special benefit to a person or particular group of persons;

4. There is a daily low-energy period in people at any particular time of day, or words of similar import or meaning;

5. Such product will make one feel like a new person, or words of similar import or meaning;

Unless, at the time the statement or representation is made, respondents have a reasonable basis for such representations consisting of competent and reliable evidence.

B. Disseminating or causing to be disseminated by any means, for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase of any such product in commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement containing any representation referred to in Paragraph A above which is not supported by the aforesaid reasonable basis.

It is further ordered, That respondents maintain complete business records relative to the manner and form of their compliance with this order, and shall retain each record for three years after such record is made.

It is further ordered, That the respondents shall forthwith distribute a copy of this order to each of their present and future operating divisions, officers, and directors; and to all present and future agents or representatives engaged in the preparation or placement of advertisements.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporations which may affect compliance obligations arising out of this order.

It is further ordered, That respondents shall, within sixty (60) days after service

upon them of this order, file with the Commission a written report setting forth in detail the manner and form of their compliance with this order.

The Decision and Order was issued by the Commission July 29, 1975.

CHARLES A. TOBIN,  
Secretary.

[Docket No. C-2685]

## PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

## Diamond Shamrock Corp.

Subpart — Interlocking directorates unlawfully; § 13.1106 Interlocking directorates unlawfully.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45; sec. 8, 38 Stat. 732; 49 Stat. 717; 15 U.S.C. 19)

In the Matter of Diamond Shamrock Corporation, a corporation.

Consent order requiring a Cleveland, Ohio, energy company, among other things to cease PERMITTING ANY INDIVIDUAL TO SERVE ON ITS BOARD OF DIRECTORS IF SUCH INDIVIDUAL IS OR WOULD BE AT THE SAME TIME A DIRECTOR OF THE Standard Oil Company, an Ohio Corporation.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

## ORDER

I. It is ordered, That Diamond Shamrock Corporation (Diamond Shamrock), its successors and assigns, do forthwith cease and desist from permitting any individual to serve on its Board of Directors if such individual is or would be at the same time a director of the Standard Oil Company, an Ohio corporation (Sohio).

II. It is further ordered, That Diamond Shamrock shall, within thirty days after service of this Order, and annually for a period ending five (5) years thereafter, request from each member of its Board of Directors a written statement which discloses the name, business, and location of operations of each other corporation of which such member is also a director, exclusive of any corporation in which Diamond Shamrock controls, directly or indirectly through subsidiaries, more than 50 percent of the voting stock; exclusive of any corporation which derives annual gross revenues of less than \$1,000,000 from exploration, production and sale of natural gas and crude petroleum; and exclusive of any corporation not engaged in "commerce"

VI. It is further ordered, That respondent Diamond Shamrock shall, within thirty (30) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order, and shall within sixty (60) days submit copies of those lists provided by all current directors of Diamond Shamrock pursuant to Paragraphs II and III designating all other corporations of which they are directors.

The Decision and Order was issued by the Commission July 17, 1975.

CHARLES A. TOBIN,  
Secretary.

[Docket No. C-2692]

## PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

## General American Oil Company of Texas

Subpart — Interlocking directorates unlawfully; § 13.1106 Interlocking directorates unlawfully.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45; sec. 8, 38 Stat. 732; 49 Stat. 717; 15 U.S.C. 19)

In the Matter of General American Oil Company of Texas, a corporation.

Consent order requiring a Dallas, Texas, energy company, among other things to cease PERMITTING ANY INDIVIDUAL TO SERVE ON ITS BOARD OF DIRECTORS IF SUCH INDIVIDUAL IS OR WOULD BE AT THE SAME TIME A DIRECTOR OF Pauley Petroleum, Inc.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

## ORDER

I. It is ordered, That General American Oil Company of Texas (General American), its successors and assigns, do forthwith cease and desist from permitting any individual to serve on its Board of Directors if such individual is or would be at the same time a director of Pauley Petroleum, Inc.

II. It is further ordered, That General American shall, within thirty days after service of this order, and annually for a period ending five (5) years thereafter, request from each member of its Board of Directors a written statement which discloses the name, business, and location of operations of each other corporation of which such member is also a director, exclusive of any corporation in which General American controls, directly or indirectly through subsidiaries, more than 50 percent of the voting stock; exclusive of any corporation which derives annual gross revenues of less than \$1,000,000 from the exploration, production, and sale of natural gas and crude petroleum; and exclusive of any corporation not engaged in "commerce" as defined in Section 1 of the Clayton Act as amended or Section 4 of the Federal Trade Commission Act.

III. It is further ordered, That for a period ending five (5) years after service of this order, General American shall, at least thirty (30) days prior to any directors' meeting at which one or more directors will be elected or the mailing of proxy statements for any shareholder meeting at which one or more directors will be elected, request from each person who is being considered as a member of the Board of Directors, but has not been a member of the Board of Directors during the previous year, a written statement

1 Copies of the Complaint, Decision and Order, filed with the original document.

ment which discloses the information described in Paragraph II.

IV. *It is further ordered*, That for a period ending five (5) years after service of this order, General American shall not permit on its Board of Directors any person who fails to submit a written statement pursuant to Paragraphs II and III, or any person who is a director of another corporation named in response to the statements required pursuant to Paragraphs II and III when said statement reveals or when a reasonably diligent investigation would reveal to respondent that such other corporation is a competitor of General American by virtue of its business and location of operations in the exploration, production or sale of crude petroleum or natural gas. If compliance with Paragraphs I and IV requires any member of General American's Board of Directors to resign or to be removed from the Board of Directors of either General American or such other corporation, General American shall be allowed a reasonable period of time within which to take any legal or other steps which are necessary to secure compliance with this Order.

V. *It is further ordered*, That General American notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent which may affect compliance obligations arising out of this order, such changes to include, but not be limited to, dissolution, assignment or sale resulting in the emergence of a successor corporation.

VI. *It is further ordered*, That respondent General American shall, within thirty (30) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order, and shall within sixty (60) days submit copies of those lists provided by all current directors of General American pursuant to Paragraphs II and III designating all other corporations of which they are directors.

The Decision and Order was issued by the Commission July 17, 1975.

CHARLES A. TOBIN,  
Secretary.

[Docket No. C-2693]

#### PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

##### Pauley Petroleum, Inc.

Subpart—Interlocking directorates unlawfully: § 13.1106 Interlocking directorates unlawfully.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpretation or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45; sec. 3, 38 Stat. 732; 49 Stat. 717; 15 U.S.C. 19)

In the matter of *Pauley Petroleum Inc., a corporation*.

Consent order requiring a Los Angeles, Calif., energy company, among other things to cease PERMITTING ANY INDIVIDUAL TO SERVE ON ITS BOARD

OF DIRECTORS IF SUCH INDIVIDUAL IS OR WOULD BE AT THE SAME TIME A DIRECTOR OF General American Oil Company of Texas.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

#### ORDER

I. *It is ordered*, That Pauley Petroleum, Inc., (Pauley), its successors and assigns, do forthwith cease and desist from permitting any individual to serve on its Board of Directors if such individual is or would be at the same time a director of General American Oil Company of Texas.

II. *It is further ordered*, That Pauley shall, within thirty (30) days after service of this Order, and annually for a period ending five (5) years thereafter, request from each member of its Board of Directors a written statement which discloses the name, business, and location of operations of each other corporation of which such member is also a director, exclusive of any corporation in which Pauley controls, directly or indirectly through subsidiaries, more than 50 percent of the voting stock; exclusive of any corporation which derives annual gross revenues of less than \$1,000,000 from the exploration, production and sale of natural gas and crude petroleum; and exclusive of any corporation not engaged in "commerce" as defined in Section 1 of the Clayton Act as amended or Section 4 of the Federal Trade Commission Act.

III. *It is further ordered*, That for a period ending five (5) years after service of this Order, Pauley shall, at least thirty (30) days prior to any directors' meeting at which one or more directors will be elected or the mailing of proxy statements for any shareholder meeting at which one or more directors will be elected, request from each person who is being considered as a member of the Board of Directors, but has not been a member of the Board of Directors during the previous year, a written statement which discloses the information described in Paragraph II.

IV. *It is further ordered*, That for a period ending five (5) years after service of this Order, Pauley shall not permit on its Board of Directors any person who fails to submit a written statement pursuant to Paragraphs II and III, or any person who is a director of another corporation named in response to the statements required pursuant to Paragraphs II and III when said statement reveals or when a reasonably diligent investigation would reveal to respondent that such other corporation is a competitor of Pauley by virtue of its business and location of operation in the exploration, production, or sale of crude petroleum or natural gas. If compliance with Paragraphs I and IV requires any member of Pauley's Board of Directors to resign or to be removed from the Board of Directors of either Pauley or such other corporation, Pauley shall be allowed a reasonable period of time within which

\*Copies of the Complaint, Decision and Order, filed with the original document.

to take any legal or other steps which are necessary to secure compliance with this Order.

*It is further ordered*, That Pauley notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent which may affect compliance obligations arising out of this Order, such changes to include, but not be limited to, dissolution, assignment or sale resulting in the emergence of a successor corporation.

VI. *It is further ordered*, That respondent Pauley shall, within thirty (30) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order, and shall within sixty (60) days submit copies of those lists provided by all current directors of Pauley pursuant to Paragraphs II and III designating all other corporations of which they are directors.

The Decision and Order was issued by the Commission July 17, 1975.

Subpart—Offering unfair, improper and deceptive inducements to purchase or deal: § 13.1980 Guarantee, in general; § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpretation or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the matter of *Saxony Pools, Inc., a corporation, and Simon Sax, individually and as an officer of said corporation*.

Consent order requiring a Linden, N.J., seller and distributor of swimming pools, among other things to cease using bait and switch tactics; misrepresenting prices; misrepresenting their product as "maintenance free"; furnishing false or misleading guarantees.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

#### ORDER

*It is ordered*, That respondents Saxony Pools, Inc., a corporation, its successors and assigns, and its officers and Simon Sax, individually and as an officer of said corporation, and respondents' agents, representatives and employees directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale, distribution or installation of swimming pools or any home improvement product, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Using any advertising, sales plan or procedure involving the use of false, deceptive or misleading statements or representations designed to obtain leads or prospects for the sale of other merchandise.

2. Representing directly or indirectly that any products or services are offered for sale when such is not a bona fide offer to sell said products or services.

3. Disparaging any product, installation or service which is advertised or offered for sale by respondents.

4. Representing, directly or by implication, through the use of terms such as special, pre-season, reduced or sale price, or words of similar import and meaning, that a swimming pool or any home improvement product has been reduced in price unless the lower price constitutes a significant reduction from the price at which such merchandise has been sold in substantial quantities by respondents in the recent regular course of business or when the price for such merchandise has not been established by respondents through offering said merchandise for sale in good faith for a substantial period of time in the recent regular course of business; or misrepresenting in any manner that respondents' purchasers or prospective purchasers will be granted reduced prices or will receive discounts, referral fees or allowances of any type.

5. Representing that the swimming pools or any home improvement products sold or offered for sale by respondents are maintenance free, or employing representations of similar meaning and import.

6. Representing directly or indirectly that any of respondents' products, installations or services are warranted or guaranteed, unless the nature and extent of the warranty or guarantee, the identity of the warrantor or guarantor and

\*Copies of the Complaint, Decision and Order, filed with the original document.

the manner in which the warrantor or guarantor will perform thereunder are clearly and conspicuously disclosed in immediate conjunction therewith; and unless respondents promptly and fully perform all of their obligations and requirements, directly or impliedly represented, under the terms of each such warranty or guarantee.

7. Representing, directly or by implication, through the use of the term "Lifetime", or through any other phrase or term, that the filter will last for the period of a lifetime or for any other period of time which is in excess of the time period covered by the filter's guarantee or warranty.

8. Representing directly or indirectly that any saving is afforded in the purchase of merchandise from the respondents' retail price unless the price at which the merchandise is offered constitutes a reduction from the price at which said merchandise is usually and customarily sold at retail by the respondents in the recent regular course of business.

9. Misrepresenting in any manner the amount of savings available to purchasers of respondents' merchandise, or the amount by which the price of merchandise has been reduced either from the price at which it has been usually and customarily sold by respondents in the recent regular course of business, or from the price at which it has been usually and customarily sold at retail in the trade area where the representation is made.

*It is further ordered*, That respondents shall maintain business records adequate to establish that the pricing claims and similar representations of the type referred to in Paragraph 4 of this order constitute a significant reduction from the prices at which such merchandise has been sold in substantial quantities or offered for sale in good faith by respondents for a substantial period of time in the recent regular course of their business.

*It is further ordered*, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

*It is further ordered*, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

*It is further ordered*, That respondents shall forthwith distribute a copy of this Order to all operating personnel, agents or representatives concerned with the promotion, sale, distribution or installation of swimming pools or any home improvement product and secure from

each such person a signed statement acknowledging receipt of said Order.

*It is further ordered*, That the respondents herein shall within sixty (60) days after service upon them of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

The Decision and Order was issued by the Commission July 28, 1975.

CHARLES A. TOBIN,  
Secretary.

#### Title 17—Commodity and Securities Exchanges

##### CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-8902]

#### PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

##### Temporary Rule for ANCSA Corporations

Notice is hereby given that the Securities and Exchange Commission hereby adopts an amendment to temporary rule 6c-2(T) (17 CFR 270.6c-2) under the Investment Company Act of 1940 ("Act") exempting from all provisions of the Act except Sections 9, 17, 36, and 37 (15 U.S.C. 80a-9, 80a-17, 80a-36, 80a-37) corporations organized pursuant to the Alaska Native Claims Settlement Act of 1971 ("ANCSA Corporations") and "Settlement Act," respectively) which register with the Commission pursuant to Section 8(a) of the Act.

Rule 6c-2(T) was adopted by the Commission on February 26, 1974, in the same release as originally proposed Rule 6c-2; and has provided ANCSA Corporations registering with the Commission pursuant to Section 8(a) of the Act substantial interim relief from the provisions of the Act. The Commission declared Rule 6c-2(T) effective as of December 18, 1971, the date of enactment of the Settlement Act, so that ANCSA Corporations registering pursuant to Section 8(a) would not be subject to legal challenge for operating as unregistered investment companies prior to the adoption of the rule. However, the Commission has decided that this purpose may not have effectively been explained, since the rule's retroactive effect was not spelled out in the body of the rule but merely implied by its effective date. To correct this deficiency and to make it clear that registration pursuant to Section 8(a) of the Act is necessary to qualify for the exemptive relief afforded by the rule, the Commission hereby amends Rule 6c-2(T) to provide that all ANCSA Corporations which register pursuant to Section 8(a) will thereby obtain the exemptive relief afforded by the rule as of December 18, 1971, the date of enactment of the Settlement Act.

<sup>1</sup> Pub. L. 92-203, 92d Cong. 85 Stat. 688.  
<sup>2</sup> Investment Company Act Rel. No. 8251, February 26, 1974.

lement Act. The proposed permanent rule, Rule 6c-2, will supersede Rule 6c-2

37 subject to the following conditions: Any company claiming exemptions pur-

or in any way change any existing rule or regulation.

ment of numerous businesses and large numbers of employees and consumers.

producers and of arranging for transportation of the gas by pipelines subject to

Unlike producers' sales for resale which are subject to our rate jurisdiction," producers' sales to non-resale customers are

tlement Act. The proposed permanent rule, Rule 6c-2, will supersede Rule 6c-2 (T), if adopted, but will afford no retroactive relief; ANCSA Corporations registering after the effective date of Rule 6c-2 would be protected, prospectively only, from the date of such registration. Hence, to obtain the relief provided in Rule 6c-2(T) from the date of enactment of the Settlement Act, any ANCSA Corporations which have not yet registered pursuant to Section 8(a) but wish to obtain the retroactive relief afforded by Rule 6c-2(T) should register immediately so as to insure their registration prior to the date Rule 6c-2 takes effect. Such registration will subject the registrant to the more extensive requirements of proposed Rule 6c-2 if that rule is adopted.

The Commission finds that the amendment of Rule 6c-2(T) is appropriate in the public interest and is consistent with the protection of investors and the purposes intended by the policy and provisions of the Act. The Commission further finds in accordance with the provisions of the Administrative Procedure Act<sup>1</sup> that notice of Rule 6c-2(T), as amended, is unnecessary because the terms of substance of the rule have already been given in the notice<sup>2</sup> announcing its original adoption.<sup>3</sup> In addition, since Rule 6c-2(T) is a substantive rule which grants an exemption and the present amendment of the rule is merely a clarification of its meaning and not a substantive change in its provisions, the rule may be made effective immediately.<sup>4</sup>

#### COMMISSION ACTION

Pursuant to the authority in sections 6(c), 38(a) and 39 of the Act, the Securities and Exchange Commission hereby adopts an amendment to § 270.6c-2 under Part 270 of Chapter II of Title 17 of the Code of Federal Regulations, which is a temporary regulation pending consideration of the Commission's proposal to adopt Rule 6c-2 in permanent form, said temporary regulation, as amended hereby, to read as follows:

§ 270.6c-2 (Rule 6c-2(T)) Temporary exemption for corporations organized pursuant to the Alaska Native Claims Settlement Act of 1971.

Any corporation organized pursuant to the Alaska Native Claims Settlement Act of 1971 ("ANCSA Corporation" and "Settlement Act", respectively) which registers with the Commission in the manner prescribed by Section 8(a) of the Act shall, as of December 18, 1971, be temporarily exempt from all provisions of the Act except Sections 9, 17, 36, and

<sup>1</sup> 5 U.S.C. § 551 et seq. (1970).

<sup>2</sup> Investment Company Act Rel. No. 6251. See Sections 553(b)(3) and 553(b)(3)(B) of the Administrative Procedure Act.

<sup>3</sup> Section 553(d) of the Administrative Procedure Act provides, in pertinent part, that the required publication of a substantive rule must be made not less than 30 days before its effective date except in the case of a substantive rule which grants or recognizes an exemption or relieves a restriction. Section 553(d)(1).

37 subject to the following conditions: Any company claiming exemptions pursuant to this rule shall file annually with the Commission copies of the reports required by Sections 7(o) and 8(c) of the Settlement Act and shall maintain and keep current the accounts, books and other documents relating to its business which constitute the record forming the basis for such information and of the auditor's certifications thereto. All such accounts, books and other documents shall be subject at any time and from time to time to such reasonable periodic, special and other examinations by the Commission, or any member or representative thereof, as the Commission may prescribe. Such company shall furnish to the Commission, within such time as the Commission may prescribe, copies of or extracts from such records which may be prepared without undue effort, expense, or delay as the Commission may by order require. (Secs. 6(c), 38(a), 39, 54 Stat. 800, 841, 842, 15 U.S.C. 80a-6(c), 80a-37(a), 80-38).

#### EFFECTIVE DATE

This temporary rule 6c-2(T) shall become effective on August 22, 1975 retroactive to December 18, 1971, the date of enactment of the Settlement Act.

Information concerning the Commission's proposed Rule 6c-2 is found under the heading "Proposed Rulemaking" elsewhere in this issue of the FEDERAL REGISTER. All interested persons are invited to submit their views and comments with respect to that proposed rule in accordance with the directions contained there.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

AUGUST 22, 1975.

#### Title 18—Conservation of Power and Water Resources

##### CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. RM75-25; Order No. 533]

##### PART 2—GENERAL POLICY AND INTERPRETATIONS

##### Certification of Pipeline Transportation Agreements

AUGUST 28, 1975.

Pursuant to the Administrative Procedure Act, 5 U.S.C. 551, et seq. (1967) (APA) and Sections 7, 15 and 16 of the Natural Gas Act (Act),<sup>1</sup> the Commission herein adopts as Section 2.79 of its General Policy and Interpretations, 18 C.F.R. § 2.79, a statement of policy with respect to the transportation by jurisdictional pipelines of natural gas sold by certain producers from the on-shore domain and the off-shore non-federal domain to non-resale industrial and commercial customers for high priority uses. Nothing in this § 2.79 is intended to amend, modify

<sup>1</sup> 52 Stat. 824, 825, 829, 830; 56 Stat. 83, 84; 61 Stat. 459; 15 U.S.C. 717f, 717n, 717o.

or in any way change any existing rule or regulation.

As we stated in our notice in this proceeding issued April 4, 1975 (40 FR 16220, Apr. 10, 1975), information available to the Commission indicates that pipelines subject to our jurisdiction are experiencing such severe supply shortages that their direct and indirect customers who use natural gas for high priority end uses<sup>2</sup> may be, or already are, subject to curtailment.<sup>3</sup> For example, a report issued November 15, 1974, by our Bureau of Natural Gas predicted increasing supply deficiencies of serious proportions.<sup>4</sup> Subsequent experience has confirmed this prediction.<sup>5</sup> Moreover, recent indications are that the level of pipeline curtailment will continue to increase.<sup>6</sup>

This steady increase in curtailment levels has led to a corresponding increase in the number of petitions filed with the Commission for extraordinary relief. These petitions indicate that a wide variety of commercial and industrial products and processes have been affected by curtailments.<sup>7</sup> We have also observed that many of the petitions for extraordinary relief involve high priority uses for which natural gas is essential. Curtailment of deliveries to customers using gas for such purposes could lead to production cutbacks, plant closings, employee layoffs, and resulting shortages of various products and services. Such shortages could in turn result in increased inflation as consumers offer to pay higher prices for the decreasing supply of goods and services available. Such shortages could also lead to dislocations in industries that depend upon the availability of these products and services. In short, unless supplies of natural gas become available to high priority customers, the adverse effects of curtailment could ripple through the economy to the detri-

<sup>2</sup> The high priority uses referred to in our notice are the uses of natural gas covered by the highest end use priorities set forth in § 2.78(a) of the Commission's General Policy and Interpretations, 18 C.F.R. § 2.78(a). Specifically, the uses referred to in our notice are Priority 1 uses, Priority 2 uses, and Priority 3 uses that would otherwise have been Priority 2 uses had the gas been purchased on a firm basis.

<sup>3</sup> See Notice of Proposed Rulemaking to Adopt Policy Statement With Request For Comments, at 3-4.

<sup>4</sup> FPC News Release No. 20849. The report predicted that net curtailments of firm service for the 1974-75 winter would be 919,384,000 Mcf. This represented 12.87 per cent of firm requirements, an increase of 107 per cent over the actual net firm curtailments experienced during the 1973-74 winter. *Id.* at 3.

<sup>5</sup> The recent gas curtailment report issued by our Bureau of Natural Gas on June 6, 1975, shows, for example, that the actual net firm curtailments for the 1974-75 winter totalled 1,019,203,000 Mcf. FPC News Release No. 21454 at 3. Thus, actual curtailments for the 1974-75 winter not only reached the 919,384,000 Mcf level projected in the November 15, 1974 report, *supra*, note 4, they exceeded the predicted level by 99,819,000 Mcf, or 10.9%.

<sup>6</sup> FPC News Release No. 21454, *supra*, note 5.

<sup>7</sup> See, e.g., Notice of Proposed Rulemaking, *supra*, note 3, at 4-6.

ment of numerous businesses and large numbers of employees and consumers.

There may nevertheless be a way for high priority industrial and commercial customers to obtain supplies of natural gas and thus prevent, or at least mitigate, the threatened adverse consequences of deepening levels of pipeline curtailments. As we pointed out in our notice of April 4, high priority customers might be able to buy gas directly from producers. Because such direct sales would not be subject to our rate jurisdiction, high priority customers could compete with the producer's intrastate customers for gas supplies not otherwise available to the interstate market. While the sale would be non-jurisdictional, the transportation of the gas from the producer to the buyer in interstate commerce would be subject to our jurisdiction. Such transportation would require a certificate of public convenience and necessity from the Commission under Section 7 of the Act.

In view of the important role that jurisdictional pipelines would play in such direct sale arrangements, and in further view of the importance of obtaining Commission approval of the transportation of the direct sale gas, we concluded that it might be appropriate for us to issue a statement of policy that would make clear our views on such pipeline transportation arrangements. The need for such a statement of policy is underscored by the fact that in two prior cases in which we denied applications for transportation certificates we may have given the impression that we were predisposed to deny all applications for such certificates. *F.P.C. v. Transcontinental Gas Pipe Line Corp.*, 365 U.S. 1 (1961); and *Arizona Public Service Co. v. F.P.C.*, — U.S.App.D.C. —, 483 F.2d 1275 (1973).

In neither of these cases did we mean to imply that we were, without exception, opposed to the granting of all transportation certificates. On the contrary, our denial of the transportation certificates in *Transco* and *APS* was based upon three factors: (1) the consumer intended to use the gas for boiler fuel—an inferior end use; (2) the pipeline had failed to show that transportation of the gas was not preempting pipeline capacity which would otherwise be available for higher priority uses; and (3) the price of the gas was above the field rates set by the Commission for jurisdictional sales, the effect of which would be a general rise in the field prices, or a reduction in the amount of gas available for customers in the interstate market, particularly for high priority customers. Thus, we recognize that it might be possible for a pipeline to distinguish the *Transco* and *APS* cases and to show that the present and future public convenience and necessity requires certification of a particular transportation arrangement. It was to make our views clear and a matter of public record that we proposed to adopt the policy statement contained in the April 4 notice. By adopting the statement of policy we hoped to encourage high priority customers to explore the possibilities of entering into direct sales contracts with

producers and of arranging for transportation of the gas by pipelines subject to our jurisdiction.

In view of the significance of our deliberations, and in view of the possibility that the proposed policy statement might contain disadvantages as well as advantages, we concluded that before deciding to adopt the policy statement we should afford interested parties the opportunity to file comments and suggestions.<sup>8</sup> Approximately 150 persons including senators, congressmen, governors, public agencies, industrial customers, pipelines, producers, consumer groups and private citizens filed comments.<sup>9</sup> After careful consideration of the comments that were submitted, we have concluded that the policy statement should be adopted. Nevertheless, in view of the comments and suggestions we have made several clarifications and modifications.

We shall not attempt to enumerate or discuss each comment received or suggestion made, but shall set forth the comments generally, and our responses thereto. We discuss first those comments which questioned our authority to implement the policy statement and then discuss the comments and suggestions directed to the wisdom of this policy.

#### THE COMMISSION'S AUTHORITY TO ISSUE AND TO IMPLEMENT THE POLICY STATEMENT

Several persons have questioned our authority to issue, or to implement, the proposed statement of policy. Some of these persons argue that we are required to assert jurisdiction over producer sales to local distributors for resale and to non-resale customers. Failure to regulate these sales, we are told, would constitute deregulation in derogation of our responsibilities under the Act.

Our notice of April 4, 1975, expressly recognized (Mimeo, p. 7) that producer sales to distributors for resale would be subject to our rate regulation. However, for the reasons set forth, *infra*, we have decided not to include direct sales to distributors for resale within the terms of this policy statement. Accordingly, we need not consider such sales further.

<sup>8</sup> Since the policy statement has been adopted under our general power of rulemaking set forth in Section 553 of the APA and Section 18 of the Natural Gas Act, its adoption is not subject to requirements of notice and hearing. Section 553(b), (APA). Nevertheless by seeking public comment we have provided a hearing within the meaning of Section 553(c) of the APA. Accordingly, we do not believe it necessary to grant the request for a public conference made by one of the persons commenting on the proposed policy.

<sup>9</sup> A list of those filing comments is attached hereto as Appendix B. Some of these comments were untimely filed. These comments will nevertheless be accepted for filing. Some persons have filed petitions to intervene. We hereby grant these petitions to intervene. Moreover, we will make those persons who filed comments, but did not file separate petitions to intervene, parties to this proceeding. By taking this action we will insure that any person, who is aggrieved by our action today, will have an opportunity to seek judicial review.

Unlike producers' sales for resale which are subject to our rate jurisdiction,<sup>10</sup> producers' sales to non-resale customers are beyond our authority to regulate. Section 1(b) of the Act limits our jurisdiction to sales for resale:

The provisions of this act shall apply to the transportation of natural gas in interstate commerce, to the sale in interstate commerce of natural gas for resale for ultimate public consumption for domestic, commercial, industrial, or any other use, and to natural gas companies engaged in such transportation or sale, but shall not apply to any other transportation or sale of natural gas or to the local distribution of natural gas or to the facilities used for such distribution or to the production or gathering of natural gas.

Consequently, failure to regulate direct sales rates does not constitute unlawful deregulation. This conclusion finds support in several cases decided by the United States Supreme Court. In *Panhandle Eastern Pipe Line Co. v. Public Service Commission*, 332 U.S. 507 (1947), the Court unequivocally stated (332 U.S. at 516-17) that:

Three things and three only Congress drew within its own regulatory power, delegated by the Act to its agent, the Federal Power Commission. These were: (1) the transportation of natural gas in interstate commerce; (2) its sale in interstate commerce for resale; and (3) natural gas companies engaged in such transportation or sale.

The omission of any reference to other sales, that is, to direct sales for consumptive use, in the affirmative declaration of coverage was not inadvertent. It was deliberate. For Congress made sure its intent could not be mistaken by adding the explicit prohibition that the Act "shall not apply to any other . . . sale . . . ." These words plainly mean that the Act shall not apply to any sales other than sales "for resale for ultimate public consumption for domestic, commercial, industrial, or any other use." Direct sales for consumptive use of whatever sort were excluded.

The line of the statute was thus clear and complete. It cut sharply and clearly between sales for resale and direct sales for consumptive uses. No exceptions were made in either category for particular uses, quantities or otherwise. And the line drawn was that one at which the decisions had arrived in distributing regulatory power before the Act was passed.

This interpretation of Section 1(b) was reiterated by the Court when it cited the above language from *Panhandle* with approval in *F.P.C. v. Louisiana Power & Light Co.*, 406 U.S. 621 (1972). Moreover, this interpretation, we submit, forms the basis upon which the Court correctly recognized in *F.P.C. v. Transcontinental Gas Pipe Line Corp.*, 365 U.S. 1 (1961) that a direct sale between a producer and a non-resale customer "is not subject to the Commission's jurisdiction except insofar as section 7 requires the Commission to certificate the transportation of gas pursuant to the sale." 365 U.S. at 4.

The Court's recognition in *Transco* that the direct sale there was non-jurisdictional has not, we believe, been undermined by the Court's later decision in *California v. Lo Vaca Gathering Co.*, 379

<sup>10</sup> *Phillips Petroleum Co. v. Wisconsin*, 347 U.S. 672 (1954).

U.S. 366 (1965). The Court in *Lo Vaca*

to this argument is the allegation that

ord facts. We are not as a matter of law

intrastate market." We simply do not

Unquestionably, local distribution

U.S. 366 (1965). The Court in *Lo Vaca* held that a producer's sale to a pipeline under contracts that restricted the use of gas to internal company use was a sale for resale and therefore subject to the Commission's jurisdiction. In reaching this result the Court relied upon the fact that the gas sold by the producer would "flow in a commingled stream with gas from other sources and that at least a portion of the gas will in fact be resold out of Texas." 379 U.S. at 368. The fact that the direct sale gas contemplated by our proposed policy statement may be commingled with resale gas in the transporting pipeline has been seized upon in one of the comments to argue that under *Lo Vaca* all of the gas transported in the pipeline, including the direct sale gas, must be treated as resale gas subject to our full rate jurisdiction. We have not been persuaded by this argument. The direct sales contemplated by the instant statement of policy are between a producer and a non-resale customer. As such, these sales, unlike the sales in *Lo Vaca*, are separate nonjurisdictional transactions of a precise amount of gas not-for-resale. As recognized by the Court in *Lo Vaca*, such separate transactions present an entirely different jurisdictional question than do restricted sales of gas to a pipeline.<sup>11</sup> The gas sold to the pipeline in *Lo Vaca*, while purchased under contracts which restricted its use to internal company purposes, was in fact commingled with the pipeline's supply thereby increasing the supply of gas available to the pipeline to satisfy its resale obligations. In those circumstances it was, we submit, proper to subordinate the contractual restrictions contained in the gas sale agreements to the requirements of the Natural Gas Act and to treat the gas as jurisdictional gas which had been sold to the pipeline in contemplation of its resale in interstate commerce. On the other hand, the gas to be sold by producers directly to high priority non-resale customers, will not become part of a larger volume of gas that is subject to resale. While this direct sale gas may be temporarily commingled in transit with resale gas, it is commingled solely for the purpose of transportation and never becomes subject to resale. It therefore appears to us that the direct sales contemplated by the instant policy statement are non-jurisdictional and beyond our regulatory control.

It has also been alleged that even if we lack the authority to regulate the direct rate, we nevertheless have a positive duty to deny a pipeline's application for a transportation certificate if the rate paid to the producer is higher than the highest price that the pipeline could lawfully pay to the producer. Closely related

<sup>11</sup> In this regard, see *United States v. Public Utilities Comm'n*, 346 U.S. 295, 317-18; *City of Hastings v. Federal Power Comm'n*, 221 F.2d 31. These cases indicate some of the factors that are relevant to a determination of whether there is in fact a separate direct sale transaction that should be recognized as non-jurisdictional under the Act.

to this argument is the allegation that transportation agreements cannot be certificated unless the underlying direct sale rate passes muster under the just and reasonable standard. However, any attempt to impose the rate ceilings applicable to jurisdictional sales on direct sale rates, or to make direct sale rates comply with the just and reasonable standard, would constitute regulation of the direct sale rate and would thus exceed the limitations placed upon our jurisdiction by Section 1(b). *Panhandle, supra*; *Transco, supra*; *Louisiana Power & Light, supra*.

This is not to say that we will not consider the direct sale price in determining whether the pipeline's application for a transportation certificate should be granted. In a certificate proceeding under Section 7 we are required by the public convenience and necessity standard to consider all relevant factors. This would certainly include consideration of the direct sale price. Nor do we intend to consider the direct sale price solely against price levels in the interstate market. Consideration would also be given to interstate price levels as well as other important considerations. To make it clear that a transportation certificate will not be issued unless the public convenience and necessity standard has been met, we have amended the policy statement to so provide. Thus, the allegation that we have changed the standards for regulating interstate sales or transportation agreements is without merit. Our policy statement is no more than an announcement that we are prepared to exercise powers expressly granted to us by the Act when the record before us demonstrates that such action is required by the public convenience and necessity. We have issued such certificates in the past, and our power to do so has been judicially recognized. *Transco, supra*; *APS, supra*.

Several persons allege that certification of the transportation of direct sale gas will inevitably result in unlawful discrimination, and that we are therefore precluded as a matter of law from issuing such certificates. The alleged discrimination is essentially of two types. First, we are told that because sales to pipelines and to distributors for resale are subject to Commission established rate ceilings, pipelines and distributors will be unable to compete with non-resale customers for available gas supplies. We are also told that our policy will inevitably discriminate in favor of large non-resale customers, as opposed to small non-resale customers, because the larger customers will be in a better position financially to pay the price necessary to elicit gas supplies. We are not persuaded by these arguments. The Act envisions the issuing of such certificates when Section 1(b) gives the Commission jurisdiction over interstate transportation of gas while at the same time withholding jurisdiction over direct sales in interstate commerce. With respect to the allegation of discrimination against pipelines and distributors, we would point out that neither the Act nor the courts require that a producer's

resale customers be accorded preference over non-resale customers. See *Transco, supra*, 365 U.S. at 30-31. This does not mean that a direct sale could never discriminate unlawfully against a sale to a resale customer. Whether such discrimination would result is, however, more properly a question to be resolved in a specific transportation certificate proceeding. With respect to the allegation that our policy would discriminate in favor of large non-resale customers, we would point out that it is by no means an established fact that small non-resale customers will not be in a position to obtain gas supplies. To the extent that it is necessary for the smaller customers to compete with the larger customers we note that successful competition depends upon a number of factors in addition to size of the particular customer including plant location, competitive position of the particular industry, competitive position within that industry, etc. Moreover, as several persons have pointed out, it may be possible for smaller non-resale customers to form joint ventures to compete with larger customers for available supplies. In any event, the question of discrimination between large and small non-resale customers is a matter that is more properly to be raised in a particular certificate proceeding. We recognize, as pointed out by another person, that joint action by smaller customers may run afoul of the antitrust laws. Again, however, we would point out that the mere possibility that such consequences may follow from some joint actions does not, as a matter of law, prohibit us from adopting or implementing the proposed policy statement. Again, questions of this sort are more appropriately addressed in a specific proceeding. In short, none of the arguments which challenge our statutory authority to adopt the proposed policy statement have persuaded us that we lack such authority, or that we may not in appropriate cases implement the policy.

In a related argument, it was asserted in one of the comments that since gas sold directly to a non-resale customer will not be part of the pipeline's gas supplies, this gas will not be subject to the pipeline's curtailment plan. Therefore, it is alleged that by implementing this policy the Commission will be giving up its power to allocate gas in contravention of its duties under the Natural Gas Act. However, the fact that the gas will not be subject to a pipeline's curtailment plan does not result from any illegal action by the Commission. The Act expressly makes provision for the certification of the transportation of direct sale gas. As already noted, *supra*, neither the Act nor the Courts require the Commission to accord preference to resale customers over non-resale customers. By implementing its policy the Commission will merely be exercising its powers under the Act to certificate the transportation of gas when required by the public convenience and necessity. Whether a particular transportation agreement should be certificated is a question to be decided upon a consideration of all rec-

ord facts. We are not as a matter of law precluded from certificating such agreements simply because the gas transported will not be subject to the transporting pipeline's curtailment plan.

In addition to arguing that the proposed policy statement is illegal, one of the persons filing comments suggests that the Commission should make intrastate gas available to the interstate market by either exercising jurisdiction over intrastate rates and/or by allocating all gas reserves between intrastate and interstate consumption. The authority to do this, we are told, has by virtue of *Houston East & West Texas Ry. Co. v. United States*, 234 U.S. 342 (1914), the so-called *Shreveport* Case, already been given to the Commission in the Natural Gas Act. In *Shreveport* the Supreme Court, in affirming an order of the Interstate Commerce Commission, expressly held (1) that Congress had the constitutional authority to control intrastate charges of an interstate carrier to prevent injurious discrimination against interstate traffic; and (2) that Congress exercised this power when it enacted Section 3 of the Interstate Commerce Act granting the Commission the authority to prevent undue discrimination. It may be that under *Shreveport* Congress has the constitutional authority to control intrastate rates and practices of natural gas companies. However, in enacting the Gas Act Congress did not, as it did in the Commerce Act, exercise whatever constitutional power it had to regulate intrastate rates. Nor did Congress in the Gas Act exercise any constitutional authority to allocate intrastate supplies of gas. The differences between the two acts is striking. As the Supreme Court said in *Shreveport*, the language of Section 3 of the Interstate Commerce Act "is certainly sweeping enough to embrace all the discriminations . . . which it was within the power of Congress to condemn." 234 U.S. at 356. Consistent with this broad grant of authority the Court narrowly interpreted the proviso to Section 3 to withhold from the ICC only the power to regulate purely intrastate matters. Those intrastate matters which were injuriously affecting interstate traffic were, on the other hand, found to be within the ICC's control. In contrast, Section 1(b) of the Gas Act, *supra*, expressly states that the Act "shall apply to the transportation of natural gas in interstate commerce, to the sale in interstate commerce of natural gas for resale . . . but shall not apply to any other transportation or sale of natural gas . . ." Unlike the broad grant of authority in Section 3 of the Interstate Commerce Act (as qualified by the narrow terms of its proviso), the grant of authority in Section 1(b) of the Gas Act is clearly a limited grant, limited to transportation and sales in interstate commerce. In short, *Shreveport* is distinguishable on its facts as are the other cases cited to support our authority to regulate the

intrastate market.<sup>12</sup> We simply do not have the authority under the Gas Act to control intrastate rates or to allocate gas which is not transported or sold in interstate commerce. In any event, the question of the extent of our authority over the intrastate market is entirely beside the point. The question is whether we are authorized to adopt and to implement the proposed policy statement. As shown above, we possess such authority.

#### COMMENTS AND SUGGESTIONS

Several of the comments we received indicate that certain points in our statement of policy require clarification. First, it was our intent in proposing the statement of policy, and it is still our intent, that it apply to direct sales by producers to non-resale high priority customers whether those customers (1) were purchasing directly from a pipeline, or (2) were purchasing from a distributor. In other words, the policy is intended to apply to both direct and indirect customers of curtailing pipelines.

The question arises whether the transportation by a local distributor of direct sale gas received from an interstate pipeline for delivery to the non-resale customer may constitute "the transportation of natural gas in interstate commerce" subject to the Commission's jurisdiction under Section 1(b) of the Act. If our jurisdiction extended to this kind of transportation it would be necessary for the local distributor to either (1) obtain an exemption from the provisions of the Natural Gas Act, pursuant to Section 1(c) of the Act and Part 152 of our regulations, 18 CFR §§ 152.1, *et seq.*, or (2) to obtain a certificate from us authorizing such transportation. We believe that the limits of the jurisdiction of this Commission are carefully circumscribed by Section 1(b), which provides in part that the Act shall not apply to "other (than in interstate commerce) transportation" or to "local distribution" of natural gas. Moreover, the Commission's affirmative grant of jurisdiction extends only to transportation and sale for resale "in interstate commerce." The House report on the Natural Gas Act stated that the "other transportation" and "local distribution" exclusions were "not actually necessary." H.R. Report No. 709, 75th Congress, 1st Session, p. 3. That statement was interpreted by the Supreme Court to mean for purposes of the affirmative grant of jurisdiction that "interstate commerce" terminates at the point at which "local distribution" commences. *East Ohio Gas Co. v. F.P.C.*, 338 U.S. 464, 470-1 (1950). See also, *Public Utilities Commission v. London*, 249 U.S. 236, 244 (1918) ("Interstate movement ended when the gas passed into local mains.")

<sup>12</sup> *Pennsylvania v. West Virginia*, 262 U.S. 553 (1923); *West v. Kansas Natural Gas Co.*, 221 U.S. 229 (1911); *Louisiana Power & Light Co.*, 406 U.S. 621 (1972).

Unquestionably, local distribution companies engage in transportation and sale of natural gas received from interstate commerce on a continuous basis without the necessity of obtaining any authorization from this Commission. We do not consider the transportation by a distribution company contemplated by this policy statement to be jurisdictional. We do not believe that adoption of this policy statement confers jurisdiction when the statute and its history clearly withhold jurisdiction from us. The operative limit on the authority of the Commission is described by the term "interstate commerce" as used by Congress in the Natural Gas Act and interpreted by the Courts. Activity behind the local distribution system is not in "interstate commerce" for purposes of the Natural Gas Act.

We conclude that there is no need for the Commission to require local distribution companies to acquire an exemption under Section 1(b) or certificate under Section 7(c) from this Commission to enable them to engage in the "transportation" to a local customer of natural gas that is transported to the city gate pursuant to the policy expressed in RM75-25.

In our April 4 notice we stated that the proposed policy would apply to the transportation of gas sold directly to high priority non-resale customers for Priority 2 uses or for those Priority 3 uses that would otherwise have been in Priority 2 had the gas been purchased on a firm basis. See § 2.78(a) of our General Policy and Interpretations, 18 CFR § 2.78(a). As we explained in our notice (Mimeo, p. 4), the policy was directed at these customers because natural gas is essential for continued operation of their businesses. To further clarify our original intent, we will amend our proposed policy statement to provide that it will apply only when the direct sale purchasers have no alternate fuel capabilities as defined in § 2.78(c)(10) of our General Policy and Interpretations, 18 CFR § 2.78(c)(10).

Several persons have questioned whether the words "non-federal domain" modify both "on-shore" and "off-shore" or just "off-shore." In proposing the policy statement we intended that it apply to the on-shore domain (whether federal or non-federal) and to the off-shore non-federal domain, i.e., the only domain to which this statement of policy does not apply is the off-shore federal domain. We thought the reason for this restriction was apparent. One of the main goals of our statement of policy is to make gas otherwise sold only in the intrastate market available to the interstate market. The transportation or sale of gas from the off-shore federal domain is by definition transported or sold in interstate commerce. Since gas from the off-shore federal domain is therefore already available to the interstate market, we see no need for making the policy applicable to the off-shore federal domain.

There were several other points which

we were requested to clarify: e.g. whether

ted if the policy statement is success-

shortages in the interstate market have

plement the proposed policy statement.

indicate that service to Priority 1 cus-

dictional pipeline supplier." Several per-

we were requested to clarify: e.g. whether we intended to permit distributors purchasing from a producer to pay a rate in excess of the applicable area or national rate; whether distributors could only purchase for their small commercial Priority 1 customers, or whether they could purchase for their residential Priority 1 customers as well. In view of our elimination of sales by producers to distributors for resale from the operations of the policy statement, *intra*, it is unnecessary to discuss such requests further.

As originally proposed our policy statement was intended to apply to both (1) direct sales by producers to high priority non-resale industrial and commercial customers, and (2) direct sales by producers to local distributors for resale to high priority industrial or commercial customers, or for resale to residential uses. We recognized in our notice of April 4, 1975, that sales to distributors for resale would be jurisdictional and therefore subject to the applicable area or national rate. We further recognized that this might handicap distributors who attempted to make such purchases. Nevertheless, we thought that distributors should be allowed to attempt to enter into direct sales transactions. Numerous comments were received on direct sales to distributors for resale. Some advocated allowing distributors to purchase at rates above the applicable area or national rate, thereby improving their ability to compete with non-resale customers for available gas supplies. We are not prepared to take that course of action. Sales to distributors for resale are jurisdictional sales whose rates are subject to the just and reasonable standard of Sections 4 and 5 of the Act. We are not authorized by the Act to exempt sales to distributors for resale from the operation of Sections 4 and 5. On the other hand, we were urged by a number of persons to exclude sales to distributors for resale from the operation of the proposed policy. These persons argued that since such sales were jurisdictional, the distributors would be in no better position than pipelines presently are to attract gas away from the intrastate market. Accordingly, inclusion of distributors within the terms of the policy statement would merely increase the number of potential purchasers in the interstate market without increasing the chances that additional supplies of gas would be made available to the interstate market. We have been persuaded by this argument. Accordingly, we have eliminated direct sales to distributors for resale from our policy statement.

Many of the comments we have received have supported the policy statement insofar as it applies to direct sales to non-resale high-priority customers. These comments have pointed to the benefits that would follow from such direct sales, not the least of which would be the continued employment of thousands of workers who stand to lose their jobs or be indefinitely laid off because of the increased shortages expected during the coming year, *see supra*. Not only would employment of these workers be pro-

duced if the policy statement is successfully implemented, but the production of vital products and essential services could also continue uninterrupted. A number of other benefits may flow from this policy. For example, an increase in the amount of gas available to the interstate market will result in the utilization of unused pipeline capacity with attendant cost benefits to pipelines and their customers. Furthermore, direct sales may result in an increase in producer revenues which would promote increased exploration for, and development of, gas supplies.

Several persons have stated that despite the advantages that might result from the implementation of this policy, it will by no means solve the natural gas shortage in this country. Only deregulation of the wellhead price or regulation of the intrastate market, we are told, could possibly lead to a solution of the gas shortage. As these same persons recognize, however, deregulation of wellhead prices or regulation of the intrastate market are matters for the Congress to decide upon. Until Congress acts on the various proposals now pending before it, it is our duty to deal with the shortages as best we can under the statute as it exists. While we agree that adoption of this policy statement will not solve the gas shortage, as we noted above, it may result in an increase in exploration and development activities with a consequent increase in supplies of gas. Even if new supplies are not discovered, implementation of the policy statement should, by making intrastate gas available to the interstate market, help mitigate the serious effects that will follow from curtailment of customers who are peculiarly dependent upon natural gas. While this policy statement will not "solve" the natural gas shortage, its implementation should alleviate some of its more serious consequences caused by rigid price ceilings imposed by the Natural Gas Act. Overall implementation of our policy statement will ration gas more efficiently between intrastate and interstate users.

In several comments it has been argued that intrastate customers being much closer to sources of supply will have lower transportation costs and will accordingly be in a position to outbid any interstate customer for available gas. The only result of our policy would allegedly be an increase in gas prices. We cannot agree with this analysis. While such a result is possible, we believe that incremental supplies of gas over and above intrastate demands will be sold to interstate users and that there will be some diversion of natural gas available to the intrastate market.

Another alleged consequence of our statement of policy would be that producers would hold gas off the interstate market that would otherwise be sold to interstate pipelines in the hope of obtaining an outrageous price for the gas. While this possibility exists, it is outweighed, we believe, by the likelihood that instead of withholding gas from the interstate market which is normally available to interstate pipelines, producers will be induced to increase volumes sold in the interstate market. The

shortages in the interstate market have reached a level where those customers whose continued operations require natural gas may be required to close down. For us to take no action will, according to the latest curtailment projections, *supra*, result in the curtailment of many of these customers. On the other hand, if our proposed policy is implemented, many customers that would otherwise have been curtailed will be able to obtain gas and to continue their operations. In these circumstances we believe that as a policy matter the availability of increased supplies to the interstate market warrants the risk that some producers might profiteer by withholding gas otherwise available to the interstate market. In this connection, we note that some persons have suggested that if we adopt the policy statement, we should refuse to certificate the transportation of direct sale gas which would otherwise have been available to the interstate market. Such action would be intended as a deterrent to the withholding of gas from interstate pipelines for sale directly to non-resale customers. Along these lines one person has suggested that certification of the transportation of direct sale gas should be granted only upon (1) a showing that the producer has offered to sell the gas to an interstate buyer for resale and that potential buyer has refused to purchase the gas, or (2) a showing that the buyer has agreed to purchase the gas on terms which the Commission subsequently refused to certify. This latter suggestion is, we believe, overly restrictive. If adopted, its effect would be that the only direct sale gas covered by our policy would be gas otherwise available to the interstate market, but which for a number of reasons never entered the interstate market. Such a restriction would completely exclude from the operation of the policy all gas which had never been offered to an interstate resale purchaser. This would frustrate a major goal of our policy, namely, the inducement of sales to interstate consumers of gas which has otherwise been sold in the intrastate market. We therefore reject this suggestion. Nevertheless, we are concerned that gas that would otherwise have been sold in the interstate market will be withheld from interstate resale purchasers. This is not to say that we will in all cases deny certification of the transportation of direct sale gas when it can be shown that this gas would otherwise have been sold in interstate commerce for resale. This would be only one of the factors to be considered in a certificate proceeding, *see Transco, supra*. Nevertheless, such a fact, if it could be established on the record in a particular case, would be an important factor to be considered.

Several persons argue that the proposed policy statement should not be adopted because it results in discrimination against interstate pipelines and against smaller non-resale customers who attempt to enter into direct sales transactions with producers. We have treated these same objections earlier, when we addressed challenges to our statutory authority to issue and to im-

plement the proposed policy statement. While the instant objections challenge the wisdom of our policy and not its legality, we believe that the same responses we gave earlier in addressing challenges to our statutory authority to issue and to implement the policy are applicable here. *See, supra*. Several distributors have also complained that if this policy is implemented they will be adversely affected by a decrease in the amount of gas they sell with a corresponding loss of revenue. We are not persuaded by this argument. As the policy statement expressly states, it applies only to direct purchases by customers who are curtailed because of curtailments by interstate pipeline suppliers. It is the curtailment by a jurisdictional pipeline, not the policy statement, that is responsible for a distributor's loss of sales. By implementing the policy statement the load of a distributor who delivers direct sale gas to the purchaser will be increased, together with the distributor's revenues for transporting the gas.

A number of comments submitted to us express basic agreement with our proposed policy. They object only to the restrictions that are contained therein. Some persons have urged us to expand the scope of the policy to include sales from the off-shore federal domain. This, we are told, would be an incentive to further exploration and development of this area. We are not persuaded that such an incentive is needed at this time. Moreover, one of the main goals of our policy is to increase supplies available to the interstate market from the unregulated intrastate market. Since gas produced in the off-shore federal domain is already available to the interstate market, we feel it is unnecessary to include the off-shore federal domain within the scope of this policy to achieve our goal.

Several comments suggest that we make the policy applicable to lower priority customers than the Priority 2 and 3 customers set forth in our April 4 notice. We will not preclude the filing of applications for transportation of gas sold directly to such lower priority customers. It may be that in particular circumstances the certification of such transportation would be required by the public convenience and necessity. On the other hand, as a matter of general policy we are not persuaded that direct sales for lower priority uses would be in the public interest or should be encouraged. Accordingly, we deny the request to expand our policy to include transportation of gas sold directly to lower priority customers.

Nor will we expand the policy to include direct sales to Priority 1 purchasers. Again, transportation of gas sold directly to certain of these customers may be in the public interest. However, the exceedingly large number of residential and small commercial customers that might try to take advantage of such a policy, convinces us that further study is necessary before expanding the policy to include these customers. Moreover, statistics available to us, *supra*, seem to

indicate that service to Priority 1 customers has not been imperiled to the degree that it has for Priority 2 and 3 customers. As with lower priority customers we will neither preclude the filing of applications for transportation certificates covering gas sold directly to Priority 1 customers, nor will we expand the policy to include these customers.

In addition to requesting the inclusion of direct sales to Priority 1 consumers within the terms of our policy, we have been asked to take a number of other steps to protect service to Priority 1. A number of persons have suggested that we condition any transportation certificates we may issue to provide that in periods of emergency the direct sale gas must be given to Priority 1 customers. Consideration of this proposal is premature. We therefore take no position with respect to it. Ample opportunity will be available in specific certificate proceedings to consider such actions. In any event, protection will be afforded to Priority 1 customers by the fact that we will monitor the operation of our policy to determine whether it is having an injurious effect on service to Priority 1 customers. In addition to other data available to us, we will also be able to use the data submitted to us as part of each certificate application, as well as data we will require to be filed with us monthly by the transporting natural gas company (*intra*), to evaluate the effect of our policy on Priority 1 consumers. Finally, to protect Priority 1 customers we will limit any transportation certificate we issue to a maximum term of two years which will cover two successive heating seasons.

It has also been suggested that the policy be amended to include direct sales to pipelines or to distributors for their own use. We note first of all that if gas sold directly to a pipeline for its own use were commingled with the pipeline's resale gas, under the doctrine of *Lo Vaca, supra*, such sales to the pipeline would be sales for resale and subject to our rate regulation. Under these circumstances, we see no purpose in including gas used directly by pipelines within our statement of policy. Moreover, we are concerned that including gas sold directly to pipelines or distributors for their own use may only free up gas otherwise used for these purposes for sale to low priority customers. We therefore decline to make the policy applicable to direct sales to pipelines or distributors for their own uses.

Several comments have been directed to subparagraph (d) of the proposed policy (now subparagraph (e)) which restricts application of the policy to existing customers whose deliveries are curtailed because of curtailments by their jurisdictional pipeline suppliers. As explained in our notice (Mimeo, p. 10), this restriction was intended to make it clear that gas covered by our policy was not to be used "to supply a new plant or new customers or to increase the volumes of gas that such plants or customers would have received had they not been curtailed as a result of curtailments by their juris-

dictional pipeline supplier." Several persons have nevertheless argued that the policy should be expanded to apply to the transportation of gas which is in addition to the gas they would receive from their pipeline supplier in the absence of curtailment. This suggestion must be rejected. We recognize that it might be possible in certain circumstances to show that the public convenience and necessity requires the transportation of direct sale gas in addition to volumes presently being received by a customer from a jurisdictional pipeline. We further recognize that in certain circumstances the public convenience and necessity might require the transportation of direct sale gas to new plants. Our purposes in issuing this statement of policy are, however, limited to the protection of existing service. We reserve for future consideration the question of whether our policy should be expanded in the manner requested.

We recognize that our decision to certificate only the transportation of direct sale gas used to offset curtailed volumes may present some practical problems. Producers may be unwilling to make direct sales of volumes which fluctuate with the levels of curtailment. There may be practical problems in transporting and delivering direct sale volumes which replace, but do not exceed, a direct sale customer's level of curtailment. The parties to such a direct sale transaction—the producer; the transporting pipelines; the local distributor if any; and the non-resale customer—are, we believe, in the best position to consider, in the first instance, how these details should be worked out. Accordingly, we will not attempt to dictate how such transactions should be structured. These details should and will be considered in specific transportation certificate proceedings. However, in those cases in which arrangements cannot be made to vary the volumes of direct sale gas being transported as curtailment levels of eligible Priority 2 or 3 categories fluctuate, we will take the necessary steps to insure that the gas transported pursuant to any transportation certificate we issue is used solely to offset the curtailment of Priority 2 or 3 gas covered by this policy. To this end, we have amended our proposed policy to provide that it will be our policy in such situations to issue transportation certificates upon the condition that the purchaser agree to reduce his takes under the curtailment plan of his existing pipeline supplier to the extent that the volumes of gas transported under the transportation certificate exceeds the volume of curtailment experienced by that customer in the eligible Priority 2 or 3 categories.

While our proposed policy was restricted to customers who are being curtailed, we did not mean to preclude those customers who have not yet been curtailed but who stand in imminent danger of being curtailed. No useful purpose would be served by refusing to certificate the transportation of direct sale gas until curtailment had begun, plants had been closed and employees thrown out of work.

Accordingly, we have amended our proposed policy to apply to those high pri-

ceding. In view of the seriousness of the shortages predicted for this coming win-

the interstate market for these high priority users will be substantial and will

seek supplies for higher priority users and customers that do not have practical

ditions under which there will be afforded useful employment opportunities,

opportunity to comment further on the modifications made herein, we will for-

Accordingly, we have amended our proposed policy to apply to those high priority customers who are in imminent danger of curtailment.

A number of persons have suggested that we expand the policy to include the interstate transportation of gas sold directly to non-resale customers by intrastate pipelines or by intrastate industrial users. We decline to follow this suggestion. Inclusion of such sellers might, we fear, provide an incentive for intrastate pipelines and intrastate industrial customers to tie up as much intrastate gas as possible for direct sales to interstate non-resale customers. We also decline to expand the policy to include the transportation of gas which is produced by the industrial consumer itself. Our purpose in adopting the instant policy statement was to encourage producers who would otherwise sell in the intrastate market to sell in the interstate market. If this attempt proves to be successful, it will be unnecessary to encourage for gas consumers to engage in their own gas production activities. In any event, further study of this proposal is necessary before we adopt the suggested modification.

We have received several comments which are critical of our decision to exclude direct sales by affiliates or producing divisions of jurisdictional pipelines. Such sales were excluded because the corporate relationship between jurisdictional pipelines and their affiliates or producing divisions often provides a strong incentive to sell available gas to the pipeline for resale in the interstate market. Moreover, interstate pipelines should not be induced to divert their production at higher prices to industrial users. Pipeline production should be a stabilizing influence on prices to interstate buyers. If we were to expand our policy to include their own production, pipelines would be hoist with their own petard. We therefore feel it is unnecessary to provide further incentives to affiliates and producing divisions.

In issuing this statement of policy we recognize that several of the pipelines that filed comments indicated their opposition to transporting direct sale gas. Several of the persons commenting on this problem suggested that it might be necessary to secure the pipeline's consent to transport the gas by either offering the pipeline a percentage of the gas transported, or by threatening the pipeline with various Commission sanctions. We decline to discuss incentives or sanctions any further at this time. We anticipate that specific cases will provide us with ample opportunity to consider these matters further.

#### GENERAL COMMENTS

As we have repeatedly stated in our April 4 notice and in the instant order, the new § 2.79 which we adopt today is merely a statement of policy. Whether a transportation certificate is issued will depend upon whether the record in each case demonstrates that the present and future public convenience and necessity requires certification. All relevant factors will be considered in each certificate pro-

ceeding. In view of the seriousness of the shortages predicted for this coming winter we will make every effort to process applications for transportation certificates as expeditiously as the requirements of due process permit. However, we will not, as one party suggested, use the data contained in Form 45<sup>14</sup> as conclusive evidence of the price of gas on the intrastate market for purposes of determining whether the contract price in direct sales made under the proposed policy should be permitted. While such use of the Form 45 data could expedite the certificate proceedings, and while we do not preclude use of this data in these proceedings, we are not prepared to decide at the present time that the interest in expediting consideration of certificate applications outweighs the interest of allowing other evidentiary presentations on the intrastate price level.

The attached table (Appendix A hereto) provides an indication of the quantity of natural gas which could qualify for transportation under this policy. The four pipeline systems shown there represent approximately 25 percent of the total interstate natural gas pipeline deliveries. The pipelines are Texas Eastern Transmission Corporation, Panhandle Eastern Pipe Line Company, Transcontinental Gas Pipe Line Corporation, and Columbia Gas Transmission Corporation, and serve a large portion of the industrial economy of the southeast, midwest, and eastern United States. The study shows that a total volume of 450 Bcf of curtailment is projected by these four pipelines to high priority industrial consumers for the twelve months ending March 1976. The 450 Bcf in priorities 2 and 3 amounts to 10.7 percent of the total system firm requirements of these companies of 4.2 Tcf for that period.

Based on normal winter conditions and normal demands for natural gas projected as of April 1975, anticipated curtailments of high priority industrial consumers on these four pipeline systems, range from 74 to 94 percent for the forthcoming winter heating season, November 1975, through March 1976. Unless this winter is warmer than normal or the nation's industrial economy continues to be sluggish with respect to fuel demand, these data indicate that substantial industrial dislocation may result if projected curtailments levels are actually affected.

The attached table, Appendix A, indicates that the potential volume of natural gas to be curtailed from these high priority industrial consumers by four major interstate pipelines will approximate 450 Bcf annually. While only a fraction of industrial requirements in Priorities 2 and 3 may be supplied by implementation of our policy, we believe that the value of incremental supplies to

<sup>14</sup> Order No. 521 (Issued January 9, 1975), No. 521-A (Issued February 19, 1975) and No. 521-B (Issued March 17, 1975), established Form 45 as part of a data collection system to investigate rates for non-jurisdictional sales by jurisdictional companies.

the interstate market for these high priority users will be substantial and will mitigate the economic consequences of curtailment. Many of the industrial consumers making up the total are small volume consumers and would probably encounter difficulty in arranging purchases from producers for these limited quantities. Other industrial consumers may have already converted to alternate fuels as a result of the gas shortage. Moreover, the availability of intrastate supply to the interstate market will become more limited as industrial economic recovery accelerates. There are also time constraints between the adoption of this policy and the coming winter which will further limit the application of the policy. Furthermore, it does not appear that other interstate pipeline systems will exhibit as severe a level of curtailment as the four shown here, and thus would not qualify under this policy unless an emergency can be demonstrated with respect to curtailment of high priority industrial consumers.

The policy is admittedly experimental and requires empirical evidence of its merits in specific applications and trial before we can determine whether the public convenience and necessity demands the policy be made permanent. *Permian Basin Area Rate Cases*, 390 U.S. 747 at 772 (1968); *F.P.C. v. Texaco, Inc.*, 417 U.S. 380 at 392-393 (1974); *Mobil Oil Corp. v. F.P.C.*, 417 U.S. 283 at 331-332 (1974). If, upon review, it appears that the policy has not resulted in the attraction of incremental gas supplies to meet the demands of the interstate market and to avert an imminent crisis in the winter of 1975-1976, we will revise or abandon the experiment.

To insure that we will have the necessary data to evaluate each certificate application, we have modified our proposed policy by requiring the submission of specific data in addition to any other information submitted in support of the application. It will also be our policy to attach appropriate conditions to any certificates we issue requiring the periodic submission of relevant data. This latter requirement will not only enable us to review the effect of our policy, but will insure that gas transported pursuant to any transportation certificates we issue will be used only for high priority uses.

#### SUMMARY

We emphasize that the implementation of this policy statement will not avert the shortfall of deliverable natural gas supplies, it will serve only to mitigate to a limited extent imminent and deepening curtailments of natural gas service. It is also essential that the supply of substitutable fuels and refined products be improved and sufficient quantities be made available to high priority industrial users which are unable to secure commitments of deliverable gas supplies for this forthcoming winter. This policy statement will not be implemented in a manner that will allow industrial customers to absorb all available onshore supplies of natural gas at the expense of the interstate pipelines, which must continue to

seek supplies for higher priority users and customers that do not have practical ability to utilize this procedure. Close attention must be accorded the question of whether a particular certification would result in diversion of gas from the interstate pipeline systems.

In summary, the application of this order will be limited as follows:

(1) Those persons who may purchase natural gas supplies pursuant to this order are commercial and industrial customers whose requirements are "large commercial requirements (50 Mcf or more on a peak day), [and] firm industrial requirements for plant protection, feedstock and process needs" classified as Priority 2 and 3 (only if such uses would be classified as Priority 2 if such purchase was not made on an interruptible basis) under § 2.78 (18 C.F.R. §§ 2.78(a) (2), (3)) for which there is no technically feasible alternate fuel (18 C.F.R. § 2.78(c) (10)).

(2) Certificated transportation will be authorized only for purchases for existing plants within the limits of delivery volumes below contract amounts between the purchaser and the transporting pipeline or the distributor, or volumetric requirements of the purchaser, whichever is lower.

(3) The industrial customer must reduce its takes under the curtailment plan of the transporting pipeline from day to day to the extent that the gas transported under RM75-25 exceeds the amount of curtailment experienced by that customer in the eligible Priority 2 and 3 categories.

(4) The industrial or commercial customer must actually be curtailed by its pipeline supplier (if a direct sale customer) or distributor (if a behind the city-gate customer) or must reasonably anticipate curtailment during the 1975-1976 winter heating season.

(5) The purchasers must file with this Commission in support of the transporting pipeline's application for a certificate of public convenience and necessity its gas purchase contracts including a concise summary of the terms of those contracts as to the price to be paid, the volumes to be delivered, the uses for which this gas will be consumed, and such other terms of the contract as may affect the public interest.

(6) The transporting pipeline must be curtailing deliveries of natural gas to its customers and have available unused capacity to transport natural gas supplies committed by eligible contracts executed between an industrial or commercial customer and an independent gas producer under the terms of this order.

(7) The transporting pipeline must file for and obtain a certificate of public convenience and necessity as issued by the Commission to transport the gas committed to purchases under this order.

The adoption and implementation of this order and policy statement will help achieve the goals of the Employment Act of 1946 to "promote free competitive enterprise and the general welfare, con-

ditions under which there will be afforded useful employment opportunities, including self-employment, for those able, willing, and seeking to work, and to promote maximum employment, production and purchasing power" as well as the current objectives of the Congress and the Administration to increase productivity, to reduce inflation, and to alleviate unemployment.

#### CONCLUSION

We believe the Natural Gas Act empowers the Commission to issue this policy statement and to take implementing action thereunder. However, we are also mindful that our actions will probably be appealed through the Federal court system for further review. In the meantime the implementation of our policy may be placed in jeopardy at a crucial time to secure incremental gas supply for the interstate market to avert a potential calamity to our economic welfare this winter. Accordingly, we have submitted to the Speaker of the House and the President of the Senate a proposed draft bill basically declaratory of the policy herein expressed to eliminate any uncertainty generated by appeals as to our powers under the Natural Gas Act to take implementing action pursuant to our policy statement.<sup>15</sup>

The Commission further finds: (1) The notice and opportunity to participate in this proceeding with respect to the matters presently before the Commission through the submission, in writing, of data, views, comments and suggestions in the manner as described above are consistent and in accordance with all procedural requirements thereof as prescribed in Section 553, Title 5 of the United States Code. Since the amendment prescribed here does not prescribe an added duty or restriction, compliance with the effective date requirements of 5 U.S.C. 553(d) is unnecessary.

(2) The amendment of Part 2, General Rules of Practice and Procedure, General Policy and Interpretations, Subchapter A, Chapter I, Title 18 of the Code of Federal Regulations, § 2.79, Policy With Respect To Pipeline Transportation Agreements, as herein prescribed, is necessary and appropriate for the administration of the Natural Gas Act.

(3) Since the modifications to the amendments prescribed herein which were not included in the notice of this proceeding are of a minor nature, and are consistent with the prime purpose of the proposed rulemaking, further notice thereof is unnecessary. However, to insure that all those persons who commented on our proposed policy (see Appendix B hereto), are given an adequate

<sup>15</sup> 60 Stat. 23 (1946); 15 U.S.C. 1021 (1970).

<sup>16</sup> Industries investing funds in securing committed gas supplies from independent producers under initiatives necessarily required to be taken forthwith to cope with the exigencies of limited gas supplies are entitled to Congressional sanction of the emergency actions undertaken by industrial users in reliance upon the validity of our interpretation of the Natural Gas Act.

opportunity to comment further on the modifications made herein, we will forward copies of this order to them.

The Commission, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly Sections 7, 15 and 16 thereof (52 Stat. 824, 825, 829, 830; 56 Stat. 83, 84; 61 Stat. 459; 15 U.S.C. 717f, 717h, and 717o) orders:

(A) Part 2 of the Commission's General Rules of Practice and Procedure, General Policy and Interpretations, Subchapter A, Chapter I, Title 18 of the Code of Federal Regulations is amended by adding new § 2.79, as follows:

§ 2.79 Policy with respect to certification of pipeline transportation agreements.

(a) The national interest in the protection of natural gas service to consumers who use natural gas for high priority end uses during periods of curtailed deliveries by jurisdictional pipeline companies will be served by the Commission's accepting for filing and approving, if required by the present or future public convenience and necessity, applications for certificates of public convenience and necessity filed by natural gas companies to transport gas sold by producers of natural gas from both the onshore domain (both federal and non-federal) and/or the off-shore non-federal domain directly to non-resale industrial and commercial customers for Priority 2 uses or for those Priority 3 uses that would otherwise have been in Priority 2 had the gas been purchased on a firm basis.

(b) As used in this section, the term "natural gas company" is used to refer to any person engaged in, or who proposes to engage in, the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission under Section 1(b) of the Natural Gas Act and which has available unused capacity to transport such natural gas.

(c) As used in paragraph (a) of this section, Priorities 2 and 3 uses refer to the uses covered by Priorities 2 and 3 as set forth in § 2.78 of the Commission's General Policy and Interpretations, § 2.78 (a) for which there exists no alternate fuel capabilities, as defined in § 2.78(c) (10).

(d) This policy is not intended to apply to gas which is already committed to jurisdictional pipelines under an advance payment plan, or to gas sold by an affiliate of a jurisdictional pipeline, or to gas sold by a producing division of a jurisdictional pipeline.

(e) This policy is intended to apply only to those existing industrial and commercial consumers whose deliveries for the high priority uses specified in paragraph (a) of this section are curtailed because of curtailments by their jurisdictional pipeline supplier, or whose deliveries for such high priority uses are subject to imminent curtailment because of curtailments by their jurisdictional supplier, when no other reasonable method of averting an emergency exists; provided that, unless authorized to the con-

trary pursuant to paragraph (f) of this section the volume which is transported

was not secured as part of the pipeline's system gas supply:

(h) It will be our policy to attach as a condition to any transportation

Agway, Inc.

#### APPENDIX B

Rep. Gus Yatron  
Kansas, State Corporation Commission of

Louisiana, State of  
Michigan Public Service Commission  
South Dakota Public Utilities Commission

trary pursuant to paragraph (f) of this section, the volume which is transported shall be the lesser of existing contract quantities, or existing requirements, for high priority uses described in paragraph (a) of this section; provided further, That the gas which is transported shall not be used directly or indirectly to supply uses other than the high priority uses specified in paragraph (a) of this section.

(f) In those cases in which arrangements cannot be made to vary the volumes of gas transported as the level of curtailment of gas used for the high priority purposes specified in paragraph (a) of this section fluctuates, it will be our policy to issue transportation certificates upon the condition that the non-resale industrial or commercial consumer agree to reduce the volumes he would receive under the curtailment plan of his existing natural gas supplier(s) for the high priority uses specified in paragraph (a) of this section to the extent that the volumes of gas transported under the transportation certificate exceeds the volumes of curtailment experienced by that customer in the eligible Priority 2 or 3 categories.

(g) All applications for a transportation certificate must be accompanied by the following information in addition to any other information submitted in support of the application:

(1) Pipelines transporting gas pursuant to this policy must:

(i) Indicate volumes to be transported on a peak day, average day and annual basis;

(ii) Indicate the pipeline capacity available to perform the transport service on a peak day, average day and annual basis;

(iii) Indicate the impact of the proposed transport on the pipeline's ability to provide systemwide deliveries for Priority 1 requirements;

(iv) Provide a copy of the proposed transportation agreement, indicating the proposed transportation rate together with a breakdown and justification of the proposed rate level. Include therein, a comparison of existing transportation rates for comparable services;

(v) Provide a detailed explanation as to why the subject natural gas supply

was not secured as part of the pipeline's system gas supply;

(vi) Provide an analysis as to how the gas transported will modify curtailments during the period of the proposed transport to the direct industrial consumer and/or the distributor customers involved in the transaction;

(vii) Indicate the distributor's capacity to perform the transport service on a peak-day, average-day, and annual basis through the distribution system to the non-resale high priority industrial or commercial customer whose gas is being transported pursuant to this policy statement.

(2) Non-resale industrial and commercial consumers whose gas is transported pursuant to this policy must:

(i) Indicate volumes of natural gas to be purchased under the proposed transport on a peak day and average day for each month of the proposed transport period;

(ii) Indicate the proposed end-use of such consumption by end-use priorities contained in § 2.78(a) for each month;

(iii) Indicate the total end-use requirements for natural gas at the plant location which the transport gas will be used;

(iv) Indicate the availability of other sources of natural gas at this location. Specify daily contract volumes, type of contract and anticipated availability of natural gas from each source for the transport period and the end-use thereof;

(v) Provide a copy of the gas purchase contract with the producer underlying the proposed transport;

(vi) Provide a detailed description of the nature of the emergency necessitating authorization of the proposed transportation including but not limited to the curtailment anticipated with respect to each priority of end-use at the plant.

(3) The information required by paragraph (g) (2) (i-vi) of this section may be supplied by the applicant for a transportation certificate through submission of an appropriate affidavit from the non-resale industrial and commercial consumer whose gas is transported pursuant to this policy.

(h) It will be our policy to attach as a condition to any transportation certificate we issue the following conditions:

(1) For each certificated transportation arrangement the transporting natural gas company shall submit a monthly report to the Commission indicating the name of the producer, the point of delivery from the producer, the volumes transported, the point of delivery to the distributor and/or non-resale industrial or commercial consumer, the name of the distributor and/or ultimate non-resale industrial or commercial consumer.

(2) Each non-resale industrial or commercial consumer must provide the transporting natural gas company with a monthly report which shall be transmitted by the natural gas company to the Commission as an attachment to the report described in paragraph (h) (1) of this section. The report required by this subsection must contain the amount of natural gas consumed during the month covered by the report, the end-use of such consumption according to the end-use priorities contained in § 2.78, the amount of natural gas consumed from other sources during the month, the end-use of the gas from those other sources together with a list of those other sources.

(3) Any transportation certificate we issue pursuant to this statement of policy will be limited to a maximum term of two years which will cover two successive heating seasons.

(j) Nothing in this § 2.79 is intended to amend, modify, or in any way change any existing rule or regulation.

(B) The amendment provided for herein shall be effective as of the date of issuance of this order.

(C) The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

Commissioner Springer, dissenting, filed a separate statement.<sup>10</sup>

By the Commission.

## PART 157—APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND FOR ORDERS PERMITTING AND APPROVING ABANDONMENT UNDER SECTION 7 OF THE NATURAL GAS ACT

## Small Producer Regulation

August 28, 1975.

The Commission, on September 9, 1974, issued a Notice of Proposed Rulemaking in this proceeding (39 FR 33241, September 16, 1974) proposing to establish a just and reasonable rate differential for sales made by small producers pursuant to the blanket certificate procedure set forth in Order No. 428, 45 FPC 454, above the base rate (exclusive of provisions for production, severance, or similar tax reimbursement, gathering allowances, or quality adjustments) established for large producers in a Commission order of general applicability. The Commission explained in that Notice the cost and non-cost considerations which in its tentative view supported the establishment of a differential for small producers.

Sixty-six initial comments and ten reply comments were received from sixty-eight companies, individuals, associations, and other groups. Large producers filed sixteen comments and two reply comments; small producers and producer associations filed twenty-seven comments and three reply comments; interstate pipelines filed twelve comments and one reply comment; gas distributors filed four comments and two reply comments; two consumer groups each filed an initial comment; and, federal officeholders filed five comments and two reply comments.

Certain Members of Congress requested the opportunity to cross-examine all witnesses upon which the Commission may rely in this case with respect to small producer costs.<sup>1</sup> In Opinion No. 699 issued June 21, 1974, in Docket No. R-389-B, we discussed at length the use of

<sup>1</sup> Senator Abourezk, Representatives Addabbo, Ashley, Brown, Jr., Conyers, Jr., Delums, Drinan, Harrington, Hechler, Holtzman, Kastenmeier, Lent, Moakley, Stark, Jr., Stokes, Sullivan, and Tiernan.

rule-making procedures in rate cases and covered reservoirs are to be found. The premised upon an assumed capital struc-

depending on sale involved) established either in each individual pipeline case or to the rulemaking proceeding in Docket whether, except in isolated situations, this alleged advantage would make any

rule-making procedures in rate cases and the lack of need for a formal hearing with oral cross examination there. We adopt that discussion here, and based thereon, we deny the request for cross-examination.

The Public Service Commission of the State of New York (PSCNY) suggested that, in lieu of a percentage differential, we should establish a specific rate differential in cents per Mcf for small producers. PSCNY questions the need for giving small producers a multiple of the base rate to the extent the base rate includes non-cost allowances for incentive or revenues for reinvestment. While non-cost factors, of course, are taken into consideration in determining the base rate in area or national rate cases, they are not always severable from cost factors. As the Commission indicated in Opinion No. 555, 45 FPC 674, 705, "we have not attempted the quantification of any non-cost factors, but rather have attempted to define cost in economic terms to include such considerations as the incentive necessary to elicit additional supplies of natural gas, competitive consequences upon the industry and the need for adequate capital to finance further exploration and development."<sup>2</sup> Moreover, contingent escalations, a non-cost incentive utilized in some area rate cases, are of little importance now in the light of our subsequent determination in Opinion No. 699, as amended, to establish a national new gas ceiling, in lieu of the various area ceilings previously in effect. One of the important advantages of the percentage approach is that it can be applied to each rate case of general applicability decided by the Commission in the past as well as in the future. While the percentage we determine here will not be necessarily a perpetually applicable determination, we do not intend to review it as often as the nationwide rate redeterminations. We conclude, therefore, that the percentage approach is more appropriate.

We pointed out in the September 9 notice the difficulties involved in quantifying the differential in small producer and large producer costs. The difficulties are still apparent.

The single most significant element in new gas costing is the productivity of successful wells in Mcf of reserves added per foot drilled. The productivity factor for small producers is probably lower than that for the larger producers. Small producers have relatively fewer offshore interests and the available evidence suggests that average offshore productivity is significantly higher than average onshore productivity. Further, in the onshore areas, small producers frequently operate properties on farm-out arrangements with the large producers. It is inevitable that the farm-out properties are more marginal than average. Finally, small producers ordinarily do not have the resources to finance the deeper and much more expensive wells from which the larger remaining undis-

covered reservoirs are to be found. The level of the productivity differential for small producers, however, is not quantified in the record.

Various studies also suggest that small producers are involved principally in exploratory, wildcat drilling and that a majority of the exploratory wells are drilled by small producers.<sup>3</sup> The ratio of allocated dry hole footage to successful gas well footage for the industry as a whole is approximately 1:1. That ratio is implicit in the dry hole allowance in the new gas costing methodology (Opinion 699). It is clear that the ratio is higher for the segment of the industry whose activity is weighted toward exploratory drilling. That fact could affect the small producer cost in two respects. First, it renders the small producer business more risky, a matter that will be considered in reference to the rate of return allowance. Second, the higher dry hole ratio could lead to an upward revision in the dry hole allowance. On the other hand, the dry hole drilling costs per foot are significantly greater for the deeper wells and for the offshore. The small producers do little drilling offshore and the average producer well onshore is probably drilled to a depth less than the industry average. Thus, the impact of a higher ratio of dry holes may be partially or wholly offset by a lesser average cost per foot. The record does not provide the basis for conclusive judgment.

Other factors suggest a higher rate for small producers. The large companies produce most of the condensate, a fact that suggests that the net liquid credit for small producers should be less. The prominence of the farm-out arrangements in the small producer segment of the industry and the concomitant overriding royalty would support a higher royalty allowance for small producers. The small producers do not have the capital to finance the purchase and warehousing of large quantities of tubular goods and, consequently, must often pay higher prices for these items. Small producers that do not operate as drillers often must pay premium rates to the drilling contractor. But again, these increased cost elements are not quantified in the record and may be offset in whole or part by the fact that small producers incur less than average direct lease acquisition and other exploratory costs.

Exploratory and wildcat drilling is inherently more risky than developmental drilling. The small producers, consequently, have a higher risk factor than the large producers. The significance of that risk is enhanced by the limited risk-spreading capability and a relatively weaker credit standing of smaller enterprise. Risk assessment is a key factor in establishing a rate of return for regulated enterprise and we find that the small producers are entitled to a higher rate of return allowance than that applicable to the industry as a whole. The rate of return allowance in Opinion No. 699 was

premised upon an assumed capital structure of 76% common equity and 24% long-term debt. The long-term debt was assigned a cost of 6.25% and the equity was allowed 17.73%. Most small producers are probably nearer to 100% equity financed and any supplemental debt financing undoubtedly is principally short-term and carries a substantially highest cost than 6.25%. While generally it is assumed that the equity investor's risk declines as the equity ratio is increased, the effect has a marginal range within which to operate, given the already high ratio assumed for the industry as a whole, and the effect is more than outweighed by the increased risk of the small producer ventures. We find that the combined risk increase, higher equity financing, and greater debt cost for small producers justifies an allowance for overall rate of return higher than the 15% that was found appropriate for the nationwide rate in Opinion No. 699.

We find also that a higher rate of return for small producers is justified as a means of encouraging new entrants in the industry. The number of producers in the oil and gas industry has declined dramatically in the past twenty years.<sup>4</sup> The resultant decline in exploratory capacity can be ill afforded concurrently with declining reserve additions.

An increased rate of return for small producers is amply justified; the level, however, is largely a matter of judgment. We find that at least a 20% rate of return is necessary to respond to the justifications.

Application of the Opinion No. 699-H DCF analysis with a 20% rate of return results in an increase of the high range rate of 51.46% to 67.6%,<sup>5</sup> a 31.5% increase. Since producer ratemaking does not yield precise absolutes, an increment of 30% of the nationwide or other base rate would provide a proper allowance for small producers.

We find that the record thus far compiled does not provide an adequate statistical basis from which to quantify variances of the direct costs of small producers from the average direct costs for the industry that formed the basis for the Opinion No. 699 nationwide rate. While this proceeding will be closed with the issuance of this Order, the Commission will monitor any additional small producer cost data that may become available in the future. In the meantime, however, we find from the record evidence and applied judgment that the increased rate of return allowance for small producers is justified and that, therefore, the just and reasonable differential for small producers should be 130 percent.

In determining the just and reasonable rate for small producers, the 130% differential determined herein should be multiplied by the applicable base rate ceiling (e.g., flowing or new gas ceiling

<sup>4</sup> The number of operating producers in the oil and gas industry has declined from approximately 12,000 in 1958 to about 5,600 in 1972, according to the Census of Mineral Industries.

<sup>5</sup> See Appendix A.

<sup>2</sup> See also *Permian Area Rate Case*, 390 U.S. at 815.

<sup>3</sup> See Comments, Office of Governor, State of Texas.

depending on sale involved) established by the Commission in an order of general applicability (e.g., an area or national rate order). The resulting rate would then be subject to gathering charges, quality adjustments, tax reimbursement, Btu adjustments, and any other adjustments, to the extent applicable to the sale and permitted or required under the particular order of general applicability involved. The total rate thus reached as a result of the 130% differential and the various adjustments thereto would be the just and reasonable rate for the small producer sale.

The 130% differential does not apply, as requested by TIPRO, to the minimum rate levels which have been established in certain area rate cases. We are not concerned here with contracts where the small producer is limited to a price below that authorized by this order as just and reasonable. Our purpose is to establish a just and reasonable rate ceiling, not a floor, for small producers.

The Commission finds that an area rate clause in a small producer contract does provide sufficient contractual authority for a small producer to collect a rate determined in accordance with the provisions of this order. We shall also amend § 157.40(e) relating to the use of indefinite pricing provisions in small producer contracts so as to permit small producers to collect the just and reasonable rate determined here pursuant to such provisions. As we did in Order No. 455, 48 FPC 218, we shall provide that escalation clauses in existing contracts of those producers not holding small producer certificates shall not be triggered as a result of the action taken here with respect to small producer sales.

We agree with Tennessee that the price standards referred to in the September 9 Notice, footnote 19, for determining whether a rate in excess of the rate established here is just and reasonable and, thus, includable in a pipeline's cost of service should be included in the regulations. This order will so provide. Such standards will apply to existing as well as new contracts involving small producers.

United Gas Pipe Line Company (United) contends that where a small producer is collecting a rate under an existing contract in excess of the just and reasonable rate, the small producer should be required under Section 5 of the Natural Gas Act to reduce its rate. Otherwise, United argues, the pipeline would be penalized ad infinitum for paying an above-ceiling rate. El Paso, on the other hand, contends that pipeline purchasers should not be required to absorb purchased gas costs with respect to above-ceiling purchases from small producers under existing contracts because the rules have changed since the issuance of Order No. 428. As we indicated in the September 9 Notice, we do not intend to require small producers to make refunds of above-ceiling rates for sales made pursuant to temporary or permanent certificates under Order No. 428.<sup>6</sup> The Section 5 question, however, will be decided

<sup>6</sup> See *F.P.C. v. Texaco, Inc., et al.*, 417 U.S. 380 (1974).

either in each individual pipeline case or in the rulemaking proceeding in Docket No. RM78-5, relating to our proposal to require small producers prospectively to reduce their rates to the applicable just and reasonable ceiling established in this proceeding. The arguments advanced by El Paso should be taken into consideration in pipeline rate cases in determining whether to allow a pipeline to recover above-ceiling rates paid to small producers under existing contracts.

We reject the suggestion advanced by Pacific Gas Transmission Company that affiliates of pipelines be treated as small producers where applicable. The rationale underlying the treatment of small producers has no applicability to pipeline affiliates. See Order No. 308, 34 FPC 1202, 1203. Nor is there adequate merit to the suggestion of Mapco and Tricentrol that the 10 million Mcf cutoff between large and small producers be increased. We believe the 10 million Mcf cutoff figure is the most appropriate limitation. See Order No. 308, 34 FPC at 1202.

We also reject the contention of Bruce Anderson, et al., that pipelines should be permitted to pay small producers (and include such payments in their cost of service rates) not only the just and reasonable rate determined herein, but also the rates as high as those authorized under Order Nos. 431 (limited-term certificate) and 455 (optional procedure). Rate determinations made under Order Nos. 431 and 455 are applicable only to the specific cases under consideration, and, thus, would have no general applicability to small producers. If small producers wish to seek treatment under those orders, they must apply therefor.

In view of the Court's ruling in *F.P.C. v. Texaco, Inc., et al.*, 417 U.S. 380 (1974), that it is proper to establish "one level of just and reasonable rates for small producers and another for large producers", there is no need to discuss the general allegations of undue discrimination advanced by certain large producers. The risk and operating differentials of small producers support the classification. They also claim, however, that our proposal will create royalty, joint leasing and state tax problems. But, these problems presumably have been in existence for some time inasmuch as producers for years have been selling gas from the same stream at different prices. The effect, if any, of our action here on these problems is highly speculative at this juncture and depends on a variety of factors. In any event, this is not the appropriate case to resolve such matters. However, a producer may seek appropriate relief from this Commission if it is faced with a specific problem in this regard.

We do not believe, as some large producers have asserted, that small producers will acquire an unfair advantage with respect to the acquisition of leases because they may receive a higher rate for the sale of their gas. In light of the inherent advantages a large producer has over a small producer,<sup>7</sup> it is doubtful

<sup>7</sup> *Permian Basin Area Rate Cases*, 390 U.S. 747, 784-87.

whether, except in isolated situations, this alleged advantage would make any significant difference in the acquisition of leases.

United and PSCNY have pointed out, quite properly, that § 157.40(f) relating to filings by large producers with respect to the resale of gas purchased from small producers should be modified in accordance with *F.P.C. v. Texaco, Inc., supra*, and we shall so modify that section. In judging whether to suspend such a large producer filing, we will be guided by our determination here as to the just and reasonable rate for a small producer sale and the size of the differential between the purchase price from the small producer and the resale price by the large producer. If a proposed rate is suspended because the small producer price exceeds the just and reasonable rate established in this case, then the same standards will apply in determining whether to allow a large producer to recover such costs as apply to similar pipeline purchases. And, if a proposed rate is suspended because of the differential between the purchase and resale price, we will determine the just and reasonable differential.

Contrary to Phillips' contention, the record in this case does not provide in our view an adequate basis for making a *Sierra* finding<sup>8</sup> which would authorize a processor who is an intermediate purchaser from a small producer to collect for the resale of such gas a rate in excess of its resale contract rate at a level that would permit the processor to recover the price paid to the small producer (up to the just and reasonable rate determined here) plus the customary differential between its purchase price and its resale price.<sup>9</sup>

We agree, however, with Gulf that where a processor has an area rate clause in its resale contract, such a clause provides sufficient contractual authority for the processor to collect for such resale the rate charged by the small producer as long as such rate does not exceed the just and reasonable rate authorized herein for small producers. But there is no basis in this record for allowing under such an area rate clause, as Skelly contends, a processor to file for the normal contract price differential between the purchase and resale price. The Commission lacks knowledge of what the normal differential is, let alone whether that differential is just and reasonable. However, if a producer has a contractual right to make a filing, we will at that time decide whether to accept or suspend the filing, and if it is suspended because of the differential between the purchase and resale price, we will then determine whether the differential is just and reasonable.

Phillips urges us to amend our regulations so as to allow the large producer

<sup>8</sup> *F.P.C. v. Sierra Pacific Power Co.*, 350 U.S. 348.

<sup>9</sup> Our refusal to make such a general finding does not preclude a large producer from seeking individual relief under *Sierra* if it can show entitlement thereto.

who seeks to purchase gas from a small

(f), and by adding paragraph (i) to read

lated contract for the resale of any nat-

COMPUTATION OF RETURN ON INVESTMENT AND ROYALTY

fected by the order to file objections to it and request a hearing.

quintuplicate and should specify both the provisions of the regulation deemed applicable and the grounds for seeking individual relief under *Sierra* if it can show entitlement thereto.

who seeks to purchase gas from a small producer to commence deliveries immediately and then advise us of such action. In support thereof, Phillips claims that while a pipeline may negotiate a purchase contract with a small producer and accept deliveries immediately under budget type arrangements, a large producer before it can accept deliveries must (1) negotiate a new resale contract with its pipeline purchaser, (2) file the new contract, together with a certificate application to resell such gas, and (3) await Commission action with respect to such application.

In Order No. 428-B, 46 FPC 47, 48, we eased the requirements relating to certificate applications so that a large producer could commence its sale immediately upon the filing of a certificate application when reselling gas purchased from a small producer.<sup>5</sup> Consequently, contrary to Phillips' third point, there is no need for a large producer to await Commission action. Moreover, even under Phillips' proposal, a large producer would still have to negotiate a new resale contract. There, thus, is no merit to its first point. The only point of any substance to which Phillips has alluded is that a large producer is required to file its resale contract and certificate application. Such a requirement, we think, is plainly reasonable. We, therefore, decline to amend the regulations in the manner requested by Phillips.

We also decline to increase the interests of large producers which may be covered by a small producer certificate under § 157.40 (a) (3) from 12½ percent to 50 percent, as requested by Cabot. Adequate justification has not been shown for taking such action.

#### The Commission finds:

(1) The notice and opportunity to participate in this rulemaking proceeding through the submission, in writing, of data, views, comments, and suggestions are in accordance with all procedural requirements therefor as prescribed in Section 553, Title 5 of the United States Code.

(2) The action taken herein is necessary and appropriate for the administration of the Natural Gas Act.

(3) Since the additional amendments to Section 157.40 of the Commission's Regulations Under the Natural Gas Act prescribed herein are consistent with the prime purpose of the proposed rulemaking, further notice thereof is unnecessary.

(4) In view of the purpose, intent, and effect of the amendments herein ordered, good cause exists for making the amendments effective upon issuance of this order.

The Commission, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly Sections 4, 5, 7, and 16 (52 Stat. 822, 823, 824, 825, and 830; 56 Stat. 83, 84; 61 Stat. 459; 76 Stat. 72; 15 U.S.C. 717c, 717d, 717f, and 717o), orders:

(A) Section 157.40 in Part 157, Subchapter E, of Chapter I, Title 18 of the Code of Federal Regulations is amended by revising paragraphs (c), (e), and

(f), and by adding paragraph (i) to read as follows:

§ 157.40 Exemption of small producers from certain filing requirements.

(c) *Rate and Certificate Regulation under blanket certificate.* Small producers certificated hereunder shall be authorized to make small producer sales nationwide pursuant to existing and future contracts at the price specified in each such contract. If the contractually authorized rate does not exceed 130 percent of the Commission-determined base ceiling rate applicable to a comparable large producer sale, subject to any adjustments permitted or required under the particular order of general applicability involved, the rate may be charged and received by the small producer and paid by the purchaser, as the lawful, just and reasonable rate approved by the Commission pursuant to sections 4, 5, and 7 of the Act. However, no small producer shall be relieved from compliance with section 7(b) of the Natural Gas Act with respect to any small producer sale regulated hereunder. Rate regulation as prescribed herein shall not apply to any jurisdictional sales made by a small producer where the gas reserves relating thereto were acquired by the purchase of developed reserves in place from a large producer. Nothing done hereunder shall be recognized by the Commission as triggering any escalation clause in an existing contract involving a producer not covered by a small producer certificate, except as provided in paragraph (f) of this section.

(e) *Limitation on contractual provisions.* No Small Producer granted exemption under subparagraph (c) above shall charge or collect any rate for a small producer sale of natural gas in excess of the just and reasonable rate prescribed in that paragraph, where the contractual right to such rate is based upon any contractual provision which would not be permitted by paragraphs (a), (b), (b) (1), and (c) of § 154.93. For the purpose of this limitation, it shall make no difference whether the contract was executed prior to or subsequent to April 3, 1962.

(f) *Filings by large producers with respect to related resales.* A large producer may file for the price specified in its re-

lated contract for the resale of any natural gas sold to it by a small producer pursuant to the exemption authorized hereunder. In determining whether to accept or suspend such a filing, we shall be guided by the just and reasonable rate for small producers established in paragraph (c) of this section and the size of the differential between the purchase and resale price. In the event the proposed rate is suspended because of the rate level paid to a small producer, the same standards set forth in paragraph (i) of this section with respect to pipeline purchases shall apply to the purchase by the large producer. A large producer under an area rate clause in its resale contract may file for the rate paid by it for gas purchased from a small producer as long as the rate does not exceed the just and reasonable rate prescribed in paragraph (c) of this section.

(i) *Pipeline purchases.* If a pipeline company purchases gas from a producer who is selling such gas pursuant to a small producer certificate at a rate in excess of the just and reasonable rate established in paragraph (c) of this section, then the pipeline purchaser must show that the rate paid to the small producer is just and reasonable before it may include any amount in excess of the just and reasonable rate in paragraph (c) of this section in its cost of service. In determining whether the small producer's rate is just and reasonable in such a situation, the Commission will consider all relevant factors including (1) producer's cost, (2) the pipeline's need for gas, (3) the availability of other gas supplies, (4) the amount of gas dedicated under the contract, (5) the rates of other recent small producer sales previously approved for flow through and (6) comparison with appropriate market prices.

(B) The amendments adopted herein shall be effective upon issuance of this order.

(C) The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER. Chairman Nassikas, dissenting, filed a separate statement.<sup>11</sup>

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

#### PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEED ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

N-(2,4-dimethylphenyl)-N-[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide

On June 17, 1975, notice was given (40 FR 25624) that the Upjohn Co., Kalamazoo MI 49001 had filed a pesticide petition (FAP 5H5091) with the Environmental Protection Agency (EPA). This petition proposed establishment of a feed additive tolerance for residues of the insecticide N-(2,4-dimethylphenyl)-N-[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide and its metabolites N-(2,4-dimethylphenyl)-N-methylmethanimidamide and N-(2,4-dimethylphenyl) formamide in or on citrus pulp at 3 parts per million resulting from application of the fungicide to growing grapefruit, lemons, oranges, and tangerines in accordance with an experimental use permit issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

The original petition included the citrus fruit tangelos, but in accordance with 40 CFR 180.1(h), this commodity is included under the general raw agricultural commodity category tangerines.

The data submitted in the petition and other relevant material have been evaluated. Residues of the insecticide will result in citrus fruit from uses as provided for by the experimental use permit issued under FIFRA, and therefore, a tolerance is being established to coincide with this use and to protect the public health. (A related document concerning the establishment of temporary tolerances for residues of the insecticide in or on the raw agricultural commodities listed above as well as the meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep, and in milk, also appears in today's FEDERAL REGISTER).

Any person adversely affected by this regulation may, on or before October 6, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M St. SW., East Tower, Room 1019, Washington, D.C. 20460. Such objections should be submitted in

quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective September 9, 1975, Part 561, Subpart A, is amended by adding § 561.195 to read as follows.

Dated: September 2, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

(Section 409(c) (1) & (4) of the Federal Food, Drug and Cosmetic Act [21 U.S.C. 348(c) (1) & (4)] transferred to the Administrator EPA in Reorganization Plan No. 3 (35 FR 15623))

Part 561 is amended by adding the new § 561.195 as follows.

§ 561.195 N-(2,4-dimethylphenyl)-N-[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide.

A temporary tolerance is established for residues of the insecticide N-(2,4-dimethylphenyl)-N-[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide and its metabolites N-(2,4-dimethylphenyl)-N-methylmethanimidamide and N-(2,4-dimethylphenyl) formamide in citrus pulp at 3 parts per million resulting from the application of the insecticide to grapefruits, lemons, oranges, and tangerines. Such residues may be present therein only as a result of application of insecticide in an experimental use program which expires September 2, 1976. Residues not in excess of this tolerance remaining after expiration of this experimental use program will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit/feed additive tolerance.

[FR Doc. 75-23815 Filed 9-8-75; 8:45 am]

[FRL 427-6; FAP5H5086/T3]

#### PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

O-Ethyl S,S-Diphenyl Phosphorodithioate

On June 12, 1975, notice was given (40 FR 25081) that Chemagro Agricultural Div., Mobay Chemical Corp., PO Box 4913, Kansas City MO 64120, had filed a pesticide petition (FAP 5H5086) with the Environmental Protection Agency (EPA). This petition proposed establishment of a feed additive tolerance for residues of the fungicide O-ethyl S,S-diphenyl phosphorodithioate in or on rice hulls at 0.3 part per million resulting from the application of the fungicide to growing rice in accordance with an experimental use permit issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

FEDERAL REGISTER, VOL. 40, NO. 175—TUESDAY, SEPTEMBER 9, 1975

observance of the speed limit, the U.S. Department of Transportation does not

state urban, other multi-lane divided rural and urban, major nondivided rural,

eral public. The record was held open until August 29, 1974, to permit submission

The data submitted in the petition and other relevant material have been evaluated, and it has been concluded that the tolerance will protect the public health and should therefore be established as set forth below. (A related document concerning the establishment of a temporary tolerance for rice grain also appears in today's FEDERAL REGISTER.)

Any person adversely affected by this regulation may on or before October 9, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M St., SW., East Tower, Room 1019, Washington, D.C. 20460. Such objections should be submitted in triplicate and specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on the date of signature Part 561 is amended by adding § 561.231 to read as follows:

Dated: September 2, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

(Section 409(c) (1) & (4) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 348 (c) (1) & (4)] transferred to the Administrator EPA in Reorganization Plan No. 3 (35 FR 15623))

Part 561 is amended by adding § 561.231 to read as follows:

§ 561.231 O-ethyl S,S-diphenyl phosphorodithioate.

A tolerance of 0.3 part per million is established for O-ethyl S,S-diphenyl phosphorodithioate in or on rice hulls. Such residues may be present therein only as a result of application of the fungicide in an experimental use program which expires July 24, 1976. Residues not in excess of this tolerance remaining in or on rice hulls after expiration of this experimental use program will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit/feed additive tolerance.

#### Title 23—Highways

#### CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-4; Notice 4]

#### PART 658—NATIONAL MAXIMUM SPEED LIMIT; MAXIMUM VEHICLE SIZE AND WEIGHT

##### Certification of Speed Limit Enforcement

This notice amends 23 CFR Part 658 by adding section 658.7, relating to State certification of the national maximum speed limit pursuant to section 107 of the Federal-Aid Highway Amendments of 1974, Pub. L. 93-643, 88 Stat. 2281, (23

U.S.C. 141). The amendment was proposed by notices of March 6, 1975 (40 FR 10481) and June 9, 1975 (40 FR 24532).

After review of the comments to the June 9 notice, it has been decided to issue section 658.7 in the form proposed in that notice. Although several of the comments contained useful remarks, as more fully discussed hereafter, none was found to require substantive changes in the proposal.

Most of the comments focused on subsections (c) and (d) of the proposal. With regard to subsection (c)(1), the Nebraska Department of Roads pointed out that the former notice had referred to the "approximate" road mileage having the 55 mph limit, but that the June 9 notice had omitted "approximate." The Department of Roads stated that if precise mileage were to be required, the measurement procedure would be impractical due to the need to measure the length of each reduced speed zone. The Federal agencies agree that such exacting measurement would be burdensome and do not intend the States to take such pains in their measurement. It is expected, however, that the tabulations will be as close to the true total as feasible. The same applies for all the informational requirements of section 658.7.

In a related comment on subsection (c), the West Virginia Department of Highways asked whether unposted roads would have to be included in the total mileage if their geometry does not "allow" speeds as high as 55 mph. The reference in subsection (c) (1) to roads with posted or "allowable" speeds of 55 mph refers to legal allowability, not to speed restrictions due to road geometry. The mountainous roads cited by West Virginia should therefore be included in the (c) (1) total. However, the State would be free to indicate what part of its (c) (1) mileage consists of roads that are not capable of being traveled at 55 mph. West Virginia also asked whether turnpikes and other toll roads should be included for purposes of road mileage calculation. Such highways must be included in all the informational requirements of this section.

Even though the requirement to submit the number of warnings issued has been removed, several States indicated their desire to submit this information in support of their enforcement efforts. Additional information, beyond the certification requirements, may be submitted if States desire to do so.

In commenting on subsection (c) (4), the Colorado Department of Highways suggested that the "citations issued by State agencies" should be the citations issued on the State roads whose mileage was submitted pursuant to subsection (c) (1). This is a correct reading of (c) (4). Colorado also stated that submission of data for the period going back to September 30, 1974, would be difficult because the procedures of 23 CFR Part 658 would not have been followed for most of that period. The Federal agencies are aware of this difficulty and are not requiring the data collected for the

period before issuance of this notice to conform to section 658.7. States that have data available, however, are urged to submit information for the entire 12-month period. The information for the year prior to the year upon which certification is made might also be submitted, if available, for comparative purposes. The same holds true for the informational requirements in subsection (d).

Several comments noted the statement in the preamble to the June 9 notice that the Federal agencies were preparing statistical guides for the States to use in developing their speed monitoring programs. It is recognized that insufficient time is available for the States to develop and implement a statistically valid speed monitoring procedure and to report the results as part of the January 1, 1976, certification. Data obtained via less sophisticated procedures will suffice for the certification due January 1, 1976. However, subsequent certifications should be based upon the results of fully implemented, statistically valid speed monitoring procedure. The Federal Highway Administration will issue a Procedural Guide for Speed Monitoring. The Procedural Guide will contain criteria that States should follow when monitoring speeds. Additionally, the Procedural Guide will contain a statistical sampling procedure that should produce statistically valid data. At the States' option, alternative statistical sampling procedures could be employed, provided that they yield results having the same level of statistical reliability. Because the Procedural Guide is not yet issued and will not have its full effect until after January 1, 1976, no reason appears for postponing the effective date of section 658.7 to allow for State assimilation of the Federal statistical guidance.

The Nebraska Department of Roads asked whether subsections (d) (1) and (d) (2) would require reports for each month of the 12-month period ending on September 30 before the date of certification. The subsections do not require such monthly reports. Nebraska also questioned whether under its current system of March-May and September-October monitoring periods, the certification due by January 1 could include data from the most recent October or whether the State would have to reach back to the data of the previous October. The year based on September 30 was devised for the convenience of the States, to allow them time to finish their data evaluation comfortably before the certification date. If Nebraska wishes to continue its present system, it may do so by including its most recent October data each year. However, in the first certification year, the State should also submit its data from the preceding October so that its data will be on the same footing as other States.

With respect to subsection (d) (2), the Colorado Department of Highways suggested that a "factor of difficulty" be allowed in evaluating State certifications, to allow for those States whose formerly high limits would tend to produce higher speeds with the 55 mph limit. Although such factors have a bearing on motorists'

observance of the speed limit, the U.S. Department of Transportation does not consider it appropriate to build such factors into the regulation itself and therefore declines to amend (d) (2) as requested. The suggestion from Massachusetts on (d) (2), to the effect that the "pace" should be ascertained as well as the other elements of the speed profile, may prove to have merit and will be considered as a possibility for future rulemaking.

In consideration of the foregoing, Part 658 in Title 23, Code of Federal Regulations, is amended by the addition of section 658.7, as follows:

#### § 658.7 Certification of speed limit enforcement.

In order to obtain approval of Federal-aid projects under 23 U.S.C. 106, the Governor of each State, or an official designated by the Governor, shall certify to the Federal Highway Administration before January 1 of each year that the State is enforcing the national maximum speed limit of 55 miles per hour. The certification shall consist of the following elements:

(a) A statement signed by the Governor, or by an official designated by the Governor, certifying that the State is enforcing the national maximum speed limit.

(b) Copies of any State laws, regulations, or administrative orders relating to enforcement of the 55 mph speed limit, which were adopted after the date of the statement required by § 658.6, and which have not been included in earlier certifications under this section.

(c) Information relating to enforcement, as follows:

(1) The number of miles of State highways having posted or allowable speeds of 55 mph.

(2) The approximate portion of the mileage listed in paragraph (1) of this section on which the State has patrol responsibility, including portions on which the State shares responsibility with local law enforcement agencies.

(3) The State administrative orders or instructions regarding enforcement agency policy on enforcement of the 55 mph speed limit.

(4) The number of citations issued by State agencies for violation of the 55 mph speed limit during each month of the 12-month period ending on the September 30 before the date by which certification is required.

(d) Information relating to observance of the speed limit by motorists on the State highway system, as follows:

(1) A description of the State program for monitoring speeds for the 12-month period ending on September 30 before the date by which certification is required, including the number of stations for each type of highway, the basis for determining the number and location of stations, the frequency and duration of operations, and the total sample size and basis for sample selection.

(2) The summary statistics derived from the data obtained from the monitoring program, classified according to highway type (Interstate rural, Inter-

state urban, other multi-lane divided rural and urban, major nondivided rural, etc.), indicating the average speed, the median speed, the 85th percentile speed, and the percent of motorists exceeding 55, 60, and 65 mph for the 12-month period ending on September 30 before the date by which certification is required.

**Effective date:** September 9, 1975. Because of the short time remaining in the initial data collection cycle under 658.7 and the need to have a basic amount of data in support of the certification due January 1, 1976, the Administrators find good cause to establish an immediate effective date.

(Secs. 106, 107, 114, Pub. L. 93-643, 88 Stat. 2281; 23 U.S.C. 127, 141, 154; 23 U.S.C. 315; delegations at 49 CFR 1.48 and 1.50.)

Issued on September 4, 1975.

JAMES B. GREGORY,  
National Highway Traffic  
Safety Administrator.

NORBERT T. TIEMANN,  
Federal Highway Administrator.

#### Title 30—Mineral Resources

#### CHAPTER I—MINING ENFORCEMENT AND SAFETY ADMINISTRATION, DEPARTMENT OF THE INTERIOR

#### PART 77—MANDATORY SAFETY STANDARDS, SURFACE COAL MINES AND SURFACE WORK AREAS OF UNDERGROUND COAL MINES

##### Refuse Piles and Impounding Structures

Under the authority contained in Section 101(a) of the Federal Coal Mine Health and Safety Act of 1969, as amended (83 Stat. 745; 30 USC 811(a)), there was published in the FEDERAL REGISTER for January 16, 1974 (39 FR 2004) a notice of proposed rulemaking which set forth proposed requirements for the construction of refuse piles and extinguishment of fires; reporting pertinent information on refuse piles; certifying stability; abandonment; and identification of refuse piles. The proposal also set forth requirements for developing and approval of plans for construction of impounding structures; notification of potentially hazardous conditions; and identification of impounding structures.

Written objections were timely filed with the Mining Enforcement and Safety Administration stating the grounds for objections and requesting a public hearing on the proposed amendments. In accordance with Section 101(f) of the Act, a notice of objections filed and hearing requested was published in the FEDERAL REGISTER for May 14, 1974 (39 FR 17234).

Following this notice, there was published in the FEDERAL REGISTER for June 7, 1974 (39 FR 20213), a notice of public hearing to be held for the purpose of receiving relevant evidence on issues raised in the written comments. The public hearing was held on July 23, 1974, in the House Chamber, State Capitol Building, Charleston, West Virginia. Information was received from representatives of mine operators, labor, State and Federal agencies, environmentalists and the gen-

eral public. The record was held open until August 29, 1974, to permit submission of additional data and information.

Findings of fact based on relevant evidence submitted in written comments, statements and data received in response to the proposed rulemaking and the public hearing were made public on October 25, 1974 and were published in the FEDERAL REGISTER for November 1, 1974 (39 FR 38660).

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior prepared a final environmental impact statement on the proposed regulations. A notice of availability of the final environmental impact statement was published in the FEDERAL REGISTER for June 23, 1975 (30 FR 26289).

All comments, suggestions, data, information, and objections received in response to the notice of proposed rulemaking and the public hearing have been fully and carefully considered. Modifications of the proposed standards have been made which are described below in the findings of fact.

The final rules have been rearranged in order to facilitate their use, and a "Definitions" section has been added as § 77.217 to clarify and define terms and phrases used in the regulations.

Under the final regulations, refuse piles and impounding structures that can be identified with an operator will be categorized as active until they are abandoned according to an approved abandonment plan. Once abandoned according to the approved plan there will be no need for certifications of stability every 3 years, and this requirement in the proposed regulations has been dropped.

The certifications for active refuse piles (§ 77.215-3) and impounding structures (§ 77.216-4) have been revised so that registered engineers will be able to certify that the structures are designed and constructed according to current prudent engineering practices. These certifications will give an assurance of the stability of the structure. By requiring that the certifications be accompanied by supporting documentation, MESA will have the ability to run a double check on the certification.

The final regulations will provide the operator with flexibility in constructing refuse piles and impounding structures which will present no hazard to coal miners in their work. At the same time MESA will have the flexibility to examine each situation and treat it on an individual basis. For example, under § 77.215 (h), if the operator wants to construct a refuse pile with a slope steeper than 27° or with compacted layers thicker than 2 feet, he will be permitted to do so if he can show that the structure will have a safety factor greater than 1.5. The goal of the regulations is to improve the stability of refuse piles, and MESA believes that no acceptable method for achieving that goal should be discouraged.

The final regulations differ from the proposed regulations by requiring the

performance of several new duties. Section 77.216(e) requires that fires in impounding structures be extinguished

would adversely affect the stability of the refuse pile.

(7) At a scale not to exceed 1 inch=100 feet, cross sections of the length and

above the upstream toe of the structure; or

of the mine or preparation plant as assigned by MESA.

(16) General provisions for abandonment.

(17) A certification by a registered en-

performance of several new duties. Section 77.216(e) requires that fires in impounding structures be extinguished. Omission of this requirement in the proposed regulations was an oversight, and it is common engineering knowledge that fires in impounding structures present an extremely dangerous condition. A further addition is the requirement in §§ 77.215(j) and 77.216(e) that fire extinguishing operations on refuse piles and impounding structures be conducted in accordance with an approved plan. This new requirement is justified by the hazardous nature of the extinguishing operation and the necessity to ensure that all miners employed in extinguishing operations are fully acquainted with the procedures to be used. Section 77.215(d) requires that foundations for refuse piles be cleared of vegetation and undesirable material. If left in place, such material can cause fires and create unstable conditions in the refuse pile. Another new requirement (§ 77.215-2(a)) is that MESA be informed of the location of all new refuse piles. This requirement will facilitate MESA's inspection responsibilities.

All aspects of the proposed regulations were fully discussed in the written comments and at the public hearing, and the final regulations are the product of full and careful consideration of the record.

Part 77, Title 30 Code of Federal Regulations, is amended and revised as set forth below.

**Effective date.** These revisions and amendments shall be effective on November 1, 1975.

It is hereby certified that the economic and inflationary impacts of these regulations have been carefully evaluated in accordance with OMB Circular A-107.

Dated: August 28, 1975.

JACK W. CARLSON,

Assistant Secretary

of the Interior.

Part 77, Subchapter O, Chapter I, Title 30 Code of Federal Regulations is amended as follows:

1. Section 77.215 is amended by adding new paragraphs (h), (i) and (j), and by adding new §§ 77.215-1 through 77.215-4 as follows:

§ 77.215 Refuse piles: construction requirements.

(h) After October 31, 1975 new refuse piles and additions to existing refuse piles, shall be constructed in compacted layers not exceeding 2 feet in thickness and shall not have any slope exceeding 2 horizontal to 1 vertical (approximately 27°) except that the District Manager may approve construction of a refuse pile in compacted layers exceeding 2 feet in thickness and with slopes exceeding 27° where engineering data substantiates that a minimum safety factor of 1.5 for the refuse pile will be attained.

(i) Foundations for new refuse piles and additions to existing refuse piles shall be cleared of all vegetation and undesirable material that according to current, prudent engineering practices

would adversely affect the stability of the refuse pile.

(j) All fires in refuse piles shall be extinguished, and the method used shall be in accordance with a plan approved by the District Manager. The plan shall contain as a minimum, provisions to ensure that only those persons authorized by the operator, and who have an understanding of the procedure to be used, shall be involved in the extinguishing operation.

§ 77.215-1 Refuse piles: identification.

A permanent identification marker, at least six feet high and showing the refuse pile identification number as assigned by the District Manager, the name associated with the refuse pile and the name of the person owning, operating or controlling the refuse pile, shall be located on or immediately adjacent to each refuse pile within the time specified in paragraphs (a) or (b) of this section as applicable.

(a) For existing refuse piles, markers shall be placed before May 1, 1976.

(b) For new or proposed refuse piles, markers shall be placed within 30 days from acknowledgement of the proposed location of a new refuse pile.

§ 77.215-2 Refuse piles: reporting requirements.

(a) The proposed location of a new refuse pile shall be reported to and acknowledged in writing by the District Manager prior to the beginning of any work associated with the construction of the refuse pile.

(b) Before May 1, 1976, for existing refuse piles, or within 180 days from the date of acknowledgement of the proposed location of a new refuse pile, the person owning, operating or controlling a refuse pile shall submit to the District Manager a report in triplicate which contains the following:

(1) The name and address of the person owning, operating or controlling the refuse pile; the name associated with the refuse pile; the identification number of the refuse pile as assigned by the District Manager; and the identification number of the mine or preparation plant as assigned by MESA.

(2) The location of the refuse pile indicated on the most recent USGS 7½ minute or 15 minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available.

(3) A statement of the construction history of the refuse pile, and a statement indicating whether the refuse pile has been abandoned in accordance with a plan approved by the District Manager.

(4) A topographic map showing at a scale not to exceed 1 inch=400 feet, the present and proposed maximum extent of the refuse pile and the area 500 feet around the proposed maximum perimeter.

(5) A statement of whether or not the refuse pile is burning.

(6) A description of measures taken to prevent water from being impounded by the refuse pile or contained within the refuse pile.

(7) At a scale not to exceed 1 inch=100 feet, cross sections of the length and width of the refuse pile at sufficient intervals to show the approximate original ground surface, the present configuration and the proposed maximum extent of the refuse pile, and mean sea level elevations at significant points.

(8) Any other information pertaining to the stability of the pile which may be required by the District Manager.

(c) The information required by paragraphs (b) (4) through (b) (8) of this section shall be reported every twelfth month from the date of original submission for those refuse piles which the District Manager has determined can present a hazard and which have not been abandoned in accordance with a plan approved by the District Manager.

§ 77.215-3 Refuse piles: certification.

(a) Within 180 days following written notification by the District Manager that a refuse pile can present a hazard, the person owning, operating, or controlling the refuse pile shall submit to the District Manager a certification by a registered engineer that the refuse pile is constructed or has been modified in accordance with current, prudent engineering practices to minimize the probability of impounding water and failure of such magnitude as to endanger the lives of miners.

(b) After the initial certification required by this section, certifications shall be submitted every twelfth month from the date of the initial certification for all refuse piles which have not been abandoned in accordance with a plan approved by the District Manager.

(c) Certifications required by paragraphs (a) and (b) of this section shall include all information considered in making the certification.

§ 77.215-4 Refuse piles: abandonment.

When a refuse pile is to be abandoned, the District Manager shall be notified in writing, and if he determines it can present a hazard, the refuse pile shall be abandoned in accordance with a plan submitted by the operator and approved by the District Manager. The plan shall include a schedule for its implementation and describe provisions to prevent burning and future impoundment of water, and provide for major slope stability.

2. Section 77.216 is revised, and new §§ 77.216-1 through 77.216-5 are added as follows:

§ 77.216 Water, sediment, or slurry impoundments and impounding structures: general.

(a) Plans for the design, construction, and maintenance of structures which impound water, sediment, or slurry shall be required if such an existing or proposed impounding structure can:

(1) Impound water, sediment, or slurry to an elevation of five feet or more above the upstream toe of the structure and can have a storage volume of 20 acre-feet or more; or

(2) Impound water, sediment, or slurry to an elevation of 20 feet or more

above the upstream toe of the structure; or

(3) As determined by the District Manager, present a hazard to coal miners.

(b) Plans for the design and construction of all new water, sediment, or slurry impoundments and impounding structures which meet the requirements of paragraph (a) of this section shall be submitted in triplicate to and be approved by the District Manager prior to the beginning of any work associated with construction of the impounding structure.

(c) Before May 1, 1976, a plan for the continued use of an existing water, sediment, or slurry impoundment and impounding structure which meets the requirements of paragraph (a) of this section shall be submitted in triplicate to the District Manager for approval.

(d) The design, construction, and maintenance of all water, sediment, or slurry impoundments and impounding structures which meet the requirements of paragraph (a) of this section shall be implemented in accordance with the plan approved by the District Manager.

(e) All fires in impounding structures shall be extinguished, and the method used shall be in accordance with a plan approved by the District Manager. The plan shall contain as a minimum, provisions to ensure that only those persons authorized by the operator, and who have an understanding of the procedures to be used, shall be involved in the extinguishing operation.

§ 77.216-1 Water, sediment or slurry impoundments and impounding structures: identification.

A permanent identification marker, at least six feet high and showing the identification number of the impounding structure as assigned by the District Manager, the name associated with the impounding structure and name of the person owning, operating, or controlling the structure, shall be located on or immediately adjacent to each water, sediment or slurry impounding structure within the time specified in paragraphs (a) or (b) of this section as applicable.

(a) For existing water, sediment or slurry impounding structures, markers shall be placed before May 1, 1976.

(b) For new or proposed water, sediment, or slurry impounding structures, markers shall be placed within 30 days from the start of construction.

§ 77.216-2 Water, sediment, or slurry impoundments and impounding structures: minimum plan requirements; changes or modifications; certification.

(a) The plan specified in § 77.216, shall contain as a minimum the following information:

(1) The name and address of the persons owning, operating or controlling the impoundment or impounding structure; the name associated with the impoundment or impounding structure; the identification number of the impounding structure as assigned by the District Manager; and the identification number

of the mine or preparation plant as assigned by MESA.

(2) The location of the structure indicated on the most recent USGS 7½ minute or 15 minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available.

(3) A statement of the purpose for which the structure is or will be used.

(4) The name and size in acres of the watershed affecting the impoundment.

(5) A description of the physical and engineering properties of the foundation materials on which the structure is or will be constructed.

(6) A statement of the type, size, range, and physical and engineering properties of the materials used, or to be used, in constructing each zone or stage of the impounding structure; the method of site preparation and construction of each zone; the approximate dates of construction of the structure and each successive stage; and for existing structures, such history of construction as may be available, and any record or knowledge of structural instability.

(7) At a scale not to exceed 1 inch=100 feet, detailed dimensional drawings of the impounding structure including a plan view and cross sections of the length and width of the impounding structure, showing all zones, foundation improvements, drainage provisions, spillways, diversion ditches, outlets, instrument locations, and slope protection, in addition to the measurement of the minimum vertical distance between the crest of the impounding structure and the reservoir surface at present and under design storm conditions, sediment or slurry level, water level and other information pertinent to the impoundment itself, including any identifiable natural or man-made features which could affect operation of the impoundment.

(8) A description of the type and purpose of existing or proposed instrumentation.

(9) Graphs showing area-capacity curves.

(10) A statement of the runoff attributable to the probable maximum precipitation of 6-hour duration and the calculations used in determining such runoff.

(11) A statement of the runoff attributable to the storm for which the structure is designed and the calculations used in determining such runoff.

(12) A description of the spillway and diversion design features and capacities and calculations used in their determination.

(13) The computed minimum factor of safety range for the slope stability of the impounding structure including methods and calculations used to determine each factor of safety.

(14) The locations of surface and underground coal mine workings including the depth and extent of such workings within the area 500 feet around the perimeter, shown at a scale not to exceed one inch=500 feet.

(15) Provisions for construction surveillance, maintenance, and repair of the impounding structure.

(16) General provisions for abandonment.

(17) A certification by a registered engineer that the design of the impounding structure is in accordance with current, prudent engineering practices for the maximum volume of water, sediment, or slurry which can be impounded therein and for the passage of runoff from the designed storm which exceeds the capacity of the impoundment; or, in lieu of the certification, a report indicating what additional investigations, analyses, or improvement work are necessary before such a certification can be made, including what provisions have been made to carry out such work in addition to a schedule for completion of such work.

(18) Such other information pertaining to the stability of the impoundment and impounding structure which may be required by the District Manager.

(b) Any changes or modifications to plans for water, sediment, or slurry impoundments or impounding structures shall be approved by the District Manager prior to the initiation of such changes or modifications.

§ 77.216-3 Water, sediment, or slurry impoundments and impounding structures: inspection requirements; correction of hazards; program requirements.

(a) All water, sediment, or slurry impoundments which meet the requirements of § 77.216(a) shall be examined by a qualified person designated by the person owning, operating or controlling the impounding structure at intervals not exceeding seven days for appearances of structural weakness and other hazardous conditions. All instruments shall be monitored at intervals not exceeding seven days by a qualified person designated by the person owning, operating, or controlling the impounding structure.

(b) When a potentially hazardous condition develops, the person owning, operating or controlling the impounding structure shall immediately:

(1) Take action to eliminate the potentially hazardous condition;

(2) Notify the District Manager;

(3) Notify and prepare to evacuate, if necessary, all coal miners from coal mine property which may be affected by the potentially hazardous conditions; and

(4) Direct a qualified person to monitor all instruments and examine the structure at least once every eight hours, or more often as required by an authorized representative of the Secretary.

(c) After each examination and instrumentation monitoring referred to in paragraphs (a) and (b) of this section, each qualified person who conducted all or any part of the examination or instrumentation monitoring shall promptly record the results of such examination or instrumentation monitoring in a book which shall be available at the mine for inspection by an authorized representative of the Secretary, and such qualified person shall also promptly report the results of the examination or monitoring to one of the persons specified in paragraph (d) of this section.

(d) All examination and instrumentation monitoring reports recorded in accordance with paragraph (c) of this section shall include a report of the action taken to abate hazardous conditions and shall be promptly signed or countersigned by at least one of the following persons:

- (1) The mine foreman;
- (2) The assistant superintendent of the mine;
- (3) The superintendent of the mine;
- (4) The person designated by the operator as responsible for health and safety at the mine.

(e) Before May 1, 1976, the person owning, operating or controlling a water, sediment, or slurry impoundment which meets the requirements of § 77.216(a) shall adopt a program for carrying out the requirements of paragraphs (a) and (b) of this section. The program shall be submitted for approval to the District Manager. The program shall include as a minimum:

- (1) A schedule and procedures for examining the impoundment and impounding structure by a designated qualified person;
- (2) A schedule and procedures for monitoring any required or approved instrumentation by a designated qualified person;
- (3) Procedures for evaluating hazardous conditions;
- (4) Procedures for eliminating hazardous conditions;
- (5) Procedures for notifying the District Manager;
- (6) Procedures for evacuating coal miners from coal mine property which may be affected by the hazardous condition.

(f) Before making any changes or modifications in the program approved in accordance with paragraph (e) of this section, the person owning, operating, or controlling the impoundment shall obtain approval of such changes or modifications from the District Manager.

(g) The qualified person or persons referred to in paragraphs (a), (b) (4), (c), (e) (1), and (e) (2) of this section shall be trained to recognize specific signs of structural instability and other hazardous conditions by visual observation and, if applicable, to monitor instrumentation.

§ 77.216-4 Water, sediment or slurry impoundments and impounding structures; reporting requirements; certification.

Every twelfth month following the submission of information specified in § 77.216-2(a) the person owning, operating, or controlling a water, sediment, or slurry impoundment and impounding structure that has not been abandoned in accordance with an approved plan, shall submit to the District Manager a report describing any changes in the geometry of the impounding structure; instrumentation; average and maximum depths and elevations of the impounded water, sediment, or slurry; storage capacity of the impounding structure; the volume of water, sediment, or slurry im-

pounded; and any other aspect of the impounding structure affecting its stability which has occurred during such reporting period. The report shall also contain a certification by a registered engineer that all work was performed in accordance with the approved plan.

§ 77.216-5 Water, sediment or slurry impoundments and impounding structures; abandonment.

Prior to abandonment of any water, sediment, or slurry impoundment and impounding structure which meets the requirements of § 77.216(a), the person owning, operating, or controlling such an impoundment and impounding structure shall submit to and obtain approval of the District Manager a plan for abandonment based on current, prudent engineering practices which shall contain provisions to preclude the probability of future impoundment of water, sediment, or slurry, provide for major slope stability, and include a schedule for the plan's implementation.

3. A new § 77.217 is added as follows:

§ 77.217 Definitions.

For the purpose of §§ 77.214 through 77.216-5, the term:

(a) "Abandoned" as applied to any refuse pile or impoundment and impounding structure means that work on such pile or structure has been completed in accordance with a plan for abandonment approved by the District Manager.

(b) "Area-capacity curves" means graphic curves which readily show the reservoir water surface area, in acres, at different elevations from the bottom of the reservoir to the maximum water surface, and the capacity or volume, in acre-feet, of the water contained in the reservoir at various elevations.

(c) "Impounding structure" means a structure which is used to impound water, sediment, or slurry, or any combination of such materials.

(d) "Probable maximum precipitation" means the value for a particular area which represents an envelopment of depth-duration-area rainfall relations for all storm types affecting that area adjusted meteorologically to maximum conditions.

(e) "Refuse pile" means a deposit of coal mine waste which may contain a mixture of coal, shale, claystone, siltstone, sandstone, limestone, and related materials that are excavated during mining operations or separated from mined coal and disposed of on the surface as waste byproducts of either coal mining or preparation operations. "Refuse pile" does not mean temporary spoil piles of removed overburden material associated with surface mining operations.

(f) "Safety factor" means the ratio of the forces tending to resist the failure of a structure to the forces tending to cause such failure as determined by accepted engineering practice.

(Secs. 101, 508, Pub. L. 91-173, 83 Stat. 745, 803 (30 U.S.C. 811, 967))

#### Title 40—Protection of Environment

##### CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 303-4]

#### PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

##### Nebraska: Approval of Plan Revisions

On May 31, 1972 (37 FR 10842), pursuant to Section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved, with specific exceptions, the State of Nebraska plan for implementation of the National Ambient Air Quality Standards (NAAQS). On July 8, 1974 (39 FR 24921), EPA announced that the State of Nebraska proposed to revise its implementation plan by adopting on February 22, 1974, a number of amendments to the Nebraska Air Pollution Control Regulations. EPA received only one comment on the proposed revisions, which comment is discussed below. The significant revisions are discussed in the following paragraphs.

1. The applicability of State emission limitations has been expanded to include the entire State. Previously, the State limitations were applicable only in Douglas, Lancaster and Sarpy Counties. However, EPA had found that these limitations were inadequate to provide for attainment and maintenance of the NAAQS in the Lincoln-Beatrice-Fairbury Intrastate Air Quality Control Region (AQCR). To correct this inadequacy, EPA had promulgated a regulation limiting emissions of particulate matter in Jefferson, Gage and Thayer Counties located in the Lincoln-Beatrice-Fairbury Intrastate Region. The amendments the State has adopted and proposed as a part of the SIP will correct this deficiency.

2. The State procedures for preconstruction review of new sources have been expanded to include a determination of compliance with all State emission standards for stationary sources, to include indirect sources, and to provide a public comment period in the review process. The State procedures for preconstruction review of new and modified direct and indirect sources are now acceptable. It should be noted that the Federal indirect source regulation promulgated in 1974 for Nebraska and most other States (40 CFR 52.22(b)) requires review of parking facilities with 1000 spaces or more in all Standard Metropolitan Statistical Areas (SMSAs), while the Nebraska regulation at that time, today is less restrictive. The Administrator is taking no action to disapprove the Nebraska regulation in this regard, however, since the Federal regulation has been indefinitely suspended pending Congressional consideration of amendments to the Clean Air Act relating to indirect sources. See 40 FR 28065, July 3, 1975. If EPA reinstates the Federal regulation at some time in the future, it may be necessary to require an amendment to the Nebraska regulations at that time.

It should also be noted that today's approval of the Nebraska indirect source regulation is in no way intended to

compromise the validity of EPA's indefinite suspension of the parking-related aspects of its own indirect source regulation, 40 CFR 52.22(b), announced on July 3, 1975 (40 FR 28064). As stated in that announcement, the suspension related to the Federal review regulation only; the Administrator continues to encourage the States to develop their own indirect source regulations and to submit them to EPA for approval.

3. A new provision (Rule 5(e)) has been added to the procedure for disapproving a construction permit application for a new or modified stationary source. A construction permit will not be issued if the proposed source will emit one ton per hour or more of particulate matter or sulfur dioxide if it is located within 20 miles of another source which emits one ton per hour or more of the same pollutant. This rule was added as a control strategy measure to prevent significant deterioration of air quality in areas where air quality is better than required by the NAAQS.

EPA is approving Rule 5(e) as a plan revision, since it evaluates stationary sources with criteria stricter than the national ambient standards. By virtue of Section 116 of the Clean Air Act, EPA has no authority to disapprove a plan measure on the grounds that it is more stringent than necessary.

While Rule 5(e) is being approved, it is not sufficiently identical to the Federal non-significant deterioration regulation (40 CFR 52.21) to serve as a replacement for that regulation in the Nebraska plan. EPA is therefore taking no action to revoke 40 CFR 52.1436, which incorporates 40 CFR 52.21 into the Nebraska plan.

4. A new sulfur oxides emission standard (2.5 pounds per million BTU heat input) has been added for fuel-burning equipment. The sulfur oxides emission regulation remains the same for all other equipment.

5. A "final date for compliance" has been added to the list of incremental dates required for a compliance schedule and the provision that a source must be notified to report its compliance status to the State has been deleted. A source must have been in conformance with an applicable regulation within 180 days from the day these amendments became enforceable by the Nebraska Department of Environmental Control if the source has not applied for and received a variance. For State purposes, the amendment became effective on February 26, 1974.

The Nebraska SIP compliance schedule regulation (§ 52.1425) is deleted.

6. Section 52.1431 has been revised below to correct the attainment date for particulate matter for the Metropolitan St. Louis City Interstate AQCR. An attainment date should not have been specified because air quality levels were already below the NAAQS and the AQCR was classified Priority III for particulate matter.

7. The National Emission Standards for Hazardous Air Pollutants, published

April 6, 1974 (38 FR 8820), have been adopted by the State.

It was incorrectly stated in the EPA proposal that a visible emission regulation for diesel-powered motor vehicles had been added. This regulation was originally proposed; however, it was withdrawn prior to adoption by the Nebraska Environmental Control Council and no action is taken in this regard.

During the public comment period, concern was expressed that Rule 1, which established an attainment date for secondary ambient air quality standards in Lancaster County was unrealistic because of problems attributed to fugitive emissions from unpaved streets. The attainment date of July 31, 1975, coincides with the date specified in 40 CFR 52.1431 which was promulgated on May 31, 1972. The Clean Air Act, Section 110, allows each State to specify its own attainment dates for secondary standards. By virtue of Section 116 of the Act, the Administrator does not have the authority to disapprove plan provisions on the ground that they are more stringent than what EPA requires. Therefore, Rule 1 must be approved by the Administrator according to the Clean Air Act.

These changes constitute a proposed revision to the State of Nebraska implementation plan, pursuant to § 51.8 of this chapter. The Administrator's decision to approve or disapprove revisions to a plan is based on whether they meet the requirements of Section 110(a)(2)(A)-(H) of the Clean Air Act and 40 CFR Part 51 "Requirements for Preparation, Adoption and Submittal of State Implementation Plans."

After careful review of all the changes contained in the proposed revision, the Administrator has determined that the revision meets the requirements of Section 110(a)(2)(A)-(H) of the Clean Air Act and 40 CFR Part 51. Accordingly, this SIP revision is hereby approved and made a part of the SIP. This approval will become effective October 9, 1975. (42 U.S.C. 1857c-5)

Dated: September 2, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

##### Subpart CC—Nebraska

1. Section 52.1420, paragraph (c) is amended by inserting the date, February 27, 1974, in chronological order in paragraph (c) (1).

2. Section 52.1425 is revoked.

3. Section 52.1428 is revoked.

4. In Section 52.1431, the attainment date table is amended as follows:

Replacing the letter "b", which indicates that ambient air quality levels were in excess of the secondary standards for particulate matter in the Metropolitan St. Louis City Interstate Region, with the letter "c", and replacing the letter "a", which designates the date for attainment of the national standards for particulate

matter in the Metropolitan St. Louis City Interstate Region, with letter "c".

5. Section 52.1432 is revoked.

[FR Doc. 75-23812 Filed 9-8-75; 8:45 am]

#### PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

##### North Carolina: Approval of Compliance Schedules

Section 110 of the Clean Air Act and the implementing regulations of 40 CFR Part 51 require each State to submit a plan which provides for the attainment and maintenance of the national ambient air quality standards throughout the State. Each such plan is to contain legally enforceable compliance schedules setting forth the dates by which all sources must be in compliance with any applicable requirements of the plan.

On November 7 and 27, 1974, pursuant to these requirements, the State of North Carolina submitted for the Environmental Protection Agency's approval revisions in the compliance schedule portion of its plan. The compliance schedules submitted by North Carolina were reviewed by the Agency to verify adherence to the requirements of 40 CFR Part 51 regarding public hearings, plan revisions, and compliance schedules as well as consistency with the control strategies of the State's implementation plan. The schedules which met these criteria were published in the FEDERAL REGISTER as proposed rulemaking on May 12, 1975 (40 FR 20643). Copies of the schedules were made available for public inspection and all interested parties were invited to submit written comments on them. No comments were received from the general public or from the affected sources, however, and the schedules printed below are identical to those offered for comment in the proposal notice.

The schedules below are printed in two groups. The first group is composed of new schedules and certain schedules which were proposed previously in the FEDERAL REGISTER, but were then renegotiated by the State before the Agency could act on them. Composing the second group are schedules which have been renegotiated by the State since the Administrator's original approval of them on June 20, 1973 (38 FR 16144). Existing lines of 40 CFR 52.1774(a) are here revised to reflect these extensions in the deadline for final compliance.

All of the schedules establish dates by which individual air pollution sources must attain compliance with the emission limitations of the State implementation plan. These dates are given in the succeeding tables under the heading "Final Compliance Date." In many cases the schedules include incremental steps toward compliance, with specific dates set for achieving those steps. While the tables below do not list these interim dates, the actual schedules do. The entry "Immediately" under the heading "Effective Date" means that the schedule becomes Federally enforceable immediately upon its approval by the Administrator.

## RULES AND REGULATIONS

Copies of the schedules and the North Carolina plan are available for public inspection at the following locations:

Air Programs Branch, Air and Hazardous Materials Division, Environmental Protection Agency, Region IV, 1421 Peachtree Street, N.E., Atlanta, Georgia 30309.  
Air Quality Section, Division of Environmental Management, Department of Natural and Economic Resources, 226 West Jones Street, Raleigh, North Carolina 27611.  
Freedom of Information Center, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

An evaluation of any of the schedules can be obtained by consulting personnel of the Agency's Region IV Air Programs Branch at the Atlanta address given above (telephone: 404/526-3043).

The Administrator has determined that approval of these schedules will not hinder the attainment and maintenance of the national ambient air quality standards in North Carolina. Accordingly, they are hereby approved.

This action is effective immediately. The Administrator finds that good cause exists for making this approval action immediately effective since these schedules are already in effect under North Carolina law and the Agency's action

imposes no additional regulatory burden on affected facilities.

(Sec. 110(a) of the Clean Air Act (42 U.S.C. 1857c-5(a)).)

Dated: September 2, 1975.

JOHN QUARLES,  
Acting Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

### Subpart H—North Carolina

#### § 52.1770 [Amended]

1. Section 52.1770, *Identification of plan*, is amended by inserting the dates November 7 and 27 [1974] in proper chronological order in paragraph (c).

2. Section 52.1774 is amended by inserting new lines in the tables of paragraph (a) as follows:

#### § 52.1774 Compliance schedules.

(a) The compliance schedules for the sources identified below are approved as meeting the requirements of § 51.6 and § 51.51 of this chapter. All regulations cited are air pollution control regulations of the State.

#### NORTH CAROLINA

[FRL 427-2]  
**PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS**  
**Approval of Revision to the Philadelphia Portion of the Pennsylvania Implementation Plan**

On May 28, 1974, the Commonwealth of Pennsylvania submitted to the Administrator proposed revisions to the City of Philadelphia's portion of the Pennsyl-

vania State Implementation Plan. The revisions consist of amendments to the following regulations.

Regulation I—General Provisions.  
 Regulation II—Air Contaminant and Particulate Matter Emissions.  
 Regulation X—Complex Source Review.  
 Regulation XI—Control of Emissions from Incinerators.

Regulation I is amended by retitling Section II, "Source Registration and

Emission Reporting," and by adding detailed requirements for registration of emission sources and reporting of emissions. The provisions for source registration are essentially a consolidation of existing permit and license requirements and additional relevant portions of the implementation plan pertaining thereto. In Regulation II, Section IV.1.d. is amended by changing the reference to incinerator regulations from those adopted May 16, 1969, to the new Regulation XI.

Regulation X, "Complex Source Review," amends the previous Regulation X, "Construction Review," in its entirety. The new regulation was designed to be more comprehensive in order to conform with Federal requirements. The definition of "complex sources" in this amendment refers to all potential installations that may affect the achievement and maintenance of air quality standards. Section IIB contains several exclusions that exempted smaller facilities not likely to have a significant impact on air quality. Section III of Regulation X includes review procedures and conditions of approval, and requires the submission of an impact statement with any request for approval to construct a complex source.

Regulation XI, Control of Emissions for Incinerators, replaces those regulations relating to control of incinerators, which had become effective on May 19, 1969. The major provisions of the new regulations are the retention of the ban on new refuse incinerators and the lowering of the allowable particulate emission limit in accordance with Federal standards. Two additional provisions contained in Section III of Regulation XI include prohibition of any emission exceeding 60 percent opacity and prohibition of fly ash emission.

On September 20, 1974 (39 FR 33808), the Administrator acknowledged receipt of this proposal, and provided for a 30-day public comment period, which ended on October 20, 1974. No comments were received. Based on the Administrator's evaluation, it is the Administrator's judgment that the amendments to Regulations I and II are approved as revisions to the Pennsylvania State Implementation Plan, effective immediately. The amendments serve to clarify the existing provisions and hence, improve the effectiveness of the regulations. The Administrator also approves, excepting the odor provisions on which EPA is taking no action, effective immediately, the new Regulation XI, based on the fact that the amendment clarifies the scope and applicability of the present regulation controlling incinerators, provides a more stringent emission limitation for existing sources, and adds an emission limitation to new incinerators. The amendments approved by this revision shall not be construed as repealing or modifying the powers of the Administrator with respect to enforcement of violations of pre-existing incinerator regulations that were a part of the implementation plan at the time the violations occurred.

FEDERAL REGISTER, VOL. 40, NO. 175—TUESDAY, SEPTEMBER 9, 1975

XUM

## RULES AND REGULATIONS

On the other hand, the Administrator

PART 162—REGULATIONS FOR THE CONTROL OF AIR POLLUTION

## RULES AND REGULATIONS

41789

162.40-162.96. For a full understanding of registration, reregistration and classification, see the following:

not previously registered by the Agency.  
 (2) (i) Form (A) is the basic form used

out completely, with particular reference to the name and address of the producer of the chemical, and common or chemical

On the other hand, the Administrator will not take any approval/disapproval action on the amendment to Regulation X at this time. On December 5, 1974, the Administrator informed the Commonwealth of Pennsylvania that the aforementioned amendment would be unacceptable for the Administrator's approval. The specific objections included:

- (1) Lack of basis and clarity for determining which facilities would be subject to review.
- (2) Lack of justification for determining which facilities would be exempt from review.
- (3) Lack of clarity in determining the "person responsible" for submitting an application of approval.
- (4) Lack of adequate provisions to notify other local air pollution agencies and EPA about receipt of permit applications.
- (5) Lack of adequate provisions to have the information submitted by the applicant, as well as the reviewing agency's analysis of air quality impact, available for public comment.

On January 15, 1975, the Commonwealth of Pennsylvania requested that the amendments to Regulation X be withdrawn from further consideration as a proposed revision to the Pennsylvania Implementation Plan. The Commonwealth agreed with the objections set forth by the Administrator. The Administrator concurs with this request, and hereby withdraws this amendment from further consideration as a plan revision.

Copies of these revisions are available for public inspection during normal business hours at the offices of EPA, Region III, Curtis Building, Second Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania, 19106; at the Freedom of Information Center, U.S. EPA, 401 M Street, SW., Washington, D.C., 20460; and at the office of Philadelphia Air Management Services, 4320 Wissahickon Avenue, Philadelphia, Pennsylvania, 19129.

(42 U.S.C. 1857c-5)

Dated: September 2, 1975.

JOHN QUARLES,  
Acting Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

**Subpart NN—Pennsylvania**

In § 52.2020, paragraph (c) (2) is revised to read as follows:

**§ 52.2020 Identification of plan.**

(c) . . .

(2) May 5, 1972 and May 28, 1974.

[FR Doc. 75-23824 Filed 9-8-75; 8:45 am]

**PART 162—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL INSECTICIDE, FUNGICIDE AND RODENTICIDE ACT**

**Pesticides in the United States; Registration Procedures**

Notice is hereby given that, pursuant to the authority of sections 3 and 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended by the Federal Environmental Pesticide Control Act of 1972 (Pub. L. 92-516, 86 Stat. 973), the Administrator of the Environmental Protection Agency is amending 40 CFR Part 162 by establishing these §§ 162.41 through 162.51 pertaining to the procedures for the registration, reregistration and classification of pesticides. The Guidelines are set forth below.

On July 3, 1975, the Environmental Protection Agency published in the FEDERAL REGISTER (40 FR 28242) final regulations for the registration, reregistration and classification of pesticides pursuant to Sections 3, 6, 19, 21 and 25 of the FIFRA. The regulations are effective August 4, 1975.

On June 25, 1975 the Environmental Protection Agency published in the FEDERAL REGISTER (40 FR 26802) proposed Guidelines and an Appendices thereto for registering pesticides pursuant to Sections 3 and 25(a) of the FIFRA. The sections that follow hereafter pertaining to registration procedures were reserved in that June 25th document. The purpose of these sections is to advise all applicants for registration and reregistration of the procedures for registration which pertain to their product and thereby expedite the registration process. The various forms for registration mentioned in this document are available from the Forms Clerk, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. The forms necessary for reregistration will be sent to the registrant when his application for reregistration is called in.

In order to facilitate the use of the Guidelines and Appendices these documents, once final, including subsequent amendments, will be published in a loose-leaf format which will be available on a subscription basis from the Government Printing Office, Washington, D.C. 20402. When the Guidelines document published for public comment on June 25, 1975 (40 FR 26802) is made available on the subscription basis, these registration procedures will be included therein.

The Administrator has determined that there are compelling public interest reasons for these guidelines to be made effective at this time without notice and

opportunity for comment by the public. These regulations contain rules of Agency procedure and therefore fall outside Administrative Procedure Act requirement that they first be published as a proposal. Section 5 U.S.C. 553(b) provides that all regulations governing procedure or practice may be published without the requirement of notice and opportunity for public comment. These guidelines impose no new substantive requirements for registration. They merely specify which forms shall be completed for each of the various registration actions and explain the procedures the Agency will use in review of applications for registration and the procedures the Agency expects the applicant for registration to follow in preparing and submitting his application for registration, so that registration reviews can be more expeditiously processed. Moreover, in accordance with section 5 U.S.C. 553(d), these procedures shall take effect upon publication (September 9, 1975) rather than 30 days thereafter. Firstly, as discussed above, the Administrator has determined that they are nonsubstantive rules and secondly, the Administrator finds such "good cause" as is required by paragraph (3) of section 5 U.S.C. 553(d) to make these regulations effective immediately. Any delay in the effectiveness of these procedures may interfere with the orderly registration and reregistration of pesticide products.

Dated: September 2, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 162 of 40 CFR is amended by adding §§ 162.41 through 162.51 to read as follows:

**GUIDELINES FOR REGISTERING PESTICIDES; REGISTRATION PROCEDURES**

Sec.	General information.
162.41	Registration forms.
162.42	Preparation of application packages.
162.43	Labeling (§§ 162.10, 162.71—76).
162.44	Supporting data (§ 162.8).
162.45	Registration review.
162.46	Disposition of applications.
162.47	[Reserved]
162.48	[Reserved]
162.49	[Reserved]
162.50	[Reserved]
162.51	[Reserved]

AUTHORITY: Sections 3 and 25(a), Federal Insecticide, Fungicide and Rodenticide Act, as amended (7 U.S.C. 136 et seq.).

**GUIDELINES FOR REGISTERING PESTICIDES; REGISTRATION PROCEDURES**

**§ 162.41 General information.**

These registration procedures are a non-substantive guide to the applicant and registrant and provide instruction regarding application for registration. The citations in brackets refer to appropriate Sections of either the registration, reregistration and classification regulations, 40 CFR 162.1-162.23, or the Guidelines for registering pesticides, 40 CFR

162.40-162.96. For a full understanding of registration, reregistration and classification activities, these documents should all be read together.

(a) Any person who wishes to register a pesticide product must submit the appropriate application forms and other information specified here to the following address:

Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, Washington, D.C. 20460.

(b) Each applicant will be assigned a number which designates his company. This company number is assigned permanently and should be referenced in all correspondence relating to the company. (This number is not to be confused with the establishment number).

(c) Any applicant not residing in the United States must appoint an authorized agent in the U.S. to act on his behalf in all registration matters. Any other applicant who wishes may also appoint such an agent. To designate an agent, a notarized letter of appointment, signed by an authorized representative of the company stating the agent's name and address, must be submitted to the division. (§ 162.6(a) (2); § 162.6(a) (3)).

(d) Only one address of record can be maintained for each registrant, except that different divisions or other entities of the same company may, upon request, be assigned different company numbers. In the case of a foreign applicant, all correspondence will be directed to his U.S. agent. (§ 162.6(a) (3); § 162.6(a) (4)).

(e) An application for registration is either an application for new registration (§ 162.6(b) (2)), amended registration (§ 162.6(b) (3)), supplemental registration (§ 162.6(b) (4)), or reregistration (§ 162.6(b) (5)). A product currently registered under state pesticide registration laws must also be registered in accordance with § 162.17, unless it is registered pursuant to section 24(c) of the Act and the regulations thereunder.

(f) A separate registration application must be made for each pesticide product. A registration shall pertain to only one formulation and variations in the formulation of a pesticide product will require separate registrations except as provided by § 162.6(b) (1) of the regulations. This exception includes (1) certain applications for amended registration which request marketing of a single product under multiple brand names and (2) certain fertilizer-pesticide combinations, paint-pesticide mixtures and other pigment-pesticide mixtures (See § 162.21(a)).

**§ 162.42 Registration forms.**

The following discussion briefly describes the purpose and use of each of the various registration forms and the procedures which are particularly important. The detailed procedure attached to each is discussed after the explanation of the forms.

(a) *Application for new registration* (§ 162.6(b) (2)) (EPA Form 8570-1). (1) An application for new registration is required for registration of all products

not previously registered by the Agency. (2) (i) Form (A) is the basic form used to apply for registration of a new pesticide product. It also will be used for full registration of intrastate products and reregistration.

(ii) Form (A) is for the initial submission for a new product only. Any subsequent submissions prior to registration should be made on EPA Form 8570-12, Resubmission of a Pesticide Product Application.

(b) *Application for amended registration* (§ 162.6(b) (3)) (EPA Form 8570-11). (1) An application for amended registration is required, if:

(i) Changes are proposed in the labeling of the product, including but not limited to a change in the product name, deletion of label text or the addition of new uses, provided such changes would not require a change in any use classification of the pesticide;

(ii) Minor changes are proposed in the composition of the pesticide which would not require any changes in the label directions, required warning or caution statements or the use classification of the pesticide; or

(iii) Additional brand names are requested. (2) (i) Form (B) is used to amend the existing registration of a product, including the labeling, packaging, name, or inert ingredients. The form gives examples of types of revisions and provides space for a brief description of the revision or any additional explanation deemed necessary by the registrant. All changes in a registered product, including labeling, require Registration Division approval before marketing or shipment.

(ii) Form (B) should be used for registered products only. Resubmissions of an application which has been found deficient (§ 162.6(a) (5)) or been denied (§ 162.7(e)), should be made on EPA Form 8570-12.

(c) *Application for renewal registration* [Reserved]

(d) *Resubmission application* (EPA Form 8570-12).

(1) Form (C) should be used to transmit all resubmissions (except distributor brands) in response to an EPA determination that the application for registration is deficient (§ 162.6(a) (5)) or that the application is denied (§ 162.7(e)), whether registered or unregistered products are involved and regardless of the type of submission which preceded it. The registrant should note carefully the spaces for the type of original submission and the date of the Registration Division's correspondence to the registrant.

(2) A resubmission must be limited to corrections or responses required by the notice of deficiency or denial. A resubmission form may not be used to initiate new labeling claims; applications which do so will be returned unprocessed to the applicant.

(e) *Confidential statement of formula* (EPA form 8570-4). (1) Form (E) is the basic form which describes the chemistry of a pesticide product. It must be filled

out completely, with particular reference to the name and address of the producer and the correct common or chemical name for each component. The form is required with each application for new registration, reregistration, registration renewal, and any amendment which relates to the product chemistry, for example, an inert ingredient change or a change in basic supplier.

(2) For each active ingredient, the applicant must specify the EPA Registration Number of the product containing the active ingredient, if applicable. If he does not manufacture the active ingredient himself, he must attach a letter from his supplier authorizing the Registration Division to refer to the confidential formula information in the supplier's registration record. The authorization letter should include the supplier's registration number or file symbol, if known. The applicant should not request his supplier to submit a Confidential Statement of Formula for his product.

(f) *Label technical data sheet* (EPA Form 8570-10). Form (F) must be submitted with all applications for new registration, reregistration, and with any other application which requires a change in information previously submitted on the form. The purpose of Form (F) is to allow the Agency to compile a profile of registered products including site, pest, mode of action, user type and formulation.

(g) *Application for supplemental registration of distributor products* (§ 162.6(b) (4)) (EPA Form 8570-5). (1) Supplemental registration permits a distributor of a registered product to market that pesticide product under the distributor's brand name. The conditions for such a registration are outlined in § 162.6(b) (4).

(2) Form (H) must be submitted by a registrant to permit a distributor to market a registered product under the distributor's own brand name. There are two changes from previous policy in the use of this form which the registrant should note: (i) Both the primary registrant and the distributor must request supplemental distributor registration; and (ii) a separate form must be used for each distributor product proposed.

(h) *Application for reregistration* (§ 162.6(b) (5)). (1) Pesticide products previously registered by the Agency are required to be reregistered and classified by October 21, 1976.

(2) The applicant for reregistration shall submit Form (A) to initiate his reregistration application. This is the same form used for new registration of a pesticide product. The registrant will be notified pursuant to § 162.43(f) regarding when to submit the application. Registrants should not submit an application for reregistration until notified to do so by the Agency.

(i) *Application for intrastate products* (§ 162.17). (1) Pesticide products currently registered under state pesticide registration laws must be registered under the provisions of 40 CFR § 162.17, subpart A, unless registered pursuant to section 24(c) of the Act and the regulations thereunder.

(2) The applicant for federal registra-

(2) Corrections to the application

(A) The sufficiency of data previously

package. The guidance package will be sent to all registrants of products in the

applications will be considered as applications for reregistration, subject to the

utor products approved as supplemental registrations prior to the effective date of the regulations (August 4, 1975) is not

(2) The applicant for federal registration of an intrastate product shall submit Form 8570-8 within 60 days of the effective date of § 162.17 to notify the Agency of his intent to submit a full application for registration. The applicant will be notified in accordance with §§ 162.17 and 162.13(g) when to submit a full application for registration. At such time, the applicant shall use Form (A). This is the same form used for new registration of a pesticide product.

#### § 162.43 Preparation of application packages.

Applications for registration must be submitted as a complete package, as specified below. Incomplete applications will be returned unprocessed. The applicant is responsible for the accuracy and completeness of all information submitted in connection with the application (§ 162.6(a)(5)).

(a) *New registrations* (§ 162.6(b)(2)). Every application for a new product registration must include the following:

(1) Application for New Pesticide Product Registration (EPA Form 8570-1).

(2) Confidential Statement of Formula (EPA Form 8570-4).

(3) Authorization letters from suppliers regarding active ingredients, unless the applicant is the primary manufacturer.

(4) Label Technical Data Sheet (EPA Form 8570-10).

(5) Two loose copies of draft labeling.

(6) Two copies of any data submitted in support of the application.

Samples of the pesticide product or its packaging should not be submitted unless the Agency specifically requests them.

(b) *Amended registrations* (§ 162.6(b)(3)). Every application for an amended product registration must include the following:

(1) Application for Amended Pesticide Product Registration (EPA Form 8570-11).

(2) Label Technical Data Sheet (EPA Form 8570-10), when changes would require revision of the information previously submitted on the form.

(3) Confidential Statement of Formula (EPA Form 8570-4), when necessary because of changes in the chemistry of the product.

(4) Two loose copies of draft labeling.

(5) Two copies of any data submitted in support of the application.

Samples of the pesticide product or its packaging should not be submitted unless the Agency specifically requests them.

(c) *Renewal registrations* [Reserved].

(d) *Resubmission upon notice of a deficiency in the application* (§ 162.6(a)(5)).

(1) If an application for new, amended or renewal registration or reregistration is found deficient, the notice to the applicant will specify the deficiencies in the data or labeling and the materials that must be submitted to make the application acceptable.

(2) Corrections to the application should be transmitted on EPA Form 8570-12, Resubmission of Pesticide Product Application. Resubmissions should respond specifically to the deficiencies specified in the Registration Division's previous notice. Submissions of final printed labeling may be transmitted to the Agency on this same form, 8570-12. The following items must be included with a resubmission:

(i) Resubmission of a Pesticide Product Application (EPA Form 8570-12).

(ii) Label Technical Data Sheet (EPA Form 8570-10), if any information previously submitted on the form is changed.

(iii) Confidential Statement of Formula (EPA Form 8570-4), if any information previously submitted is changed.

(iv) Two loose copies of draft labeling, or, if requested by the previous correspondence, five copies of final printed labeling.

(v) Two copies of any data submitted in support of the application.

(e) *Supplemental registration of distributor products* (§ 162.6(b)(4)).

(1) One copy of EPA Form 8570-5, Application for Supplemental Registration of Distributor Products, must be submitted for each distributor brand registration requested. Supplemental registration of a distributor product requires the concurrence and signature of both the primary registrant and the distributor. A registrant for supplemental registration should only submit Form 8570-5 and should not submit either primary registrant labeling or distributor labeling. Submitting several applications for supplemental registration of the same basic product simultaneously will facilitate processing.

(2) A potential distributor who does not have a company number assigned should write to the Registration Division on letterhead stationery requesting a company number. This letter may accompany the application for supplemental registration of the distributor product brand. Distributor applications that do not specify the distributor company number or that do not include a request for such a number on the distributor's letterhead will be returned to the primary registrant.

(3) Conditions for acceptance of distributor products are outlined on the form and in 40 CFR 162.6(b)(4). If the information on the form is correct and if the proposed distributor product name is not misleading, copies of the form will be returned to the registrant and the distributor with approval. If the application is disapproved, the copies returned will state the reasons for denial.

(f) *Reregistration*. (1) Applications for reregistration of products previously registered by this Agency should only be submitted when solicited by EPA. Solicitation of applications for reregistration will be grouped in products similar to each other in chemistry and broad use pattern, hereinafter referred to as a batch.

(i) Before soliciting applications for the reregistration of products in a batch, the Agency will preliminarily review the registration to determine the following:

(A) The sufficiency of data previously submitted or otherwise available to the Administrator to satisfy the requirements of § 162.8(c) of the regulations. The review will determine whether:

(1) All applicable requirements of § 162.8(c) are met. In this case the products in the batch are candidates for full reregistration and classification, subject to solicitation, submission, review and approval of applications.

(2) Certain requirements of § 162.8(c) are not met, and the necessary studies cannot reasonably be expected to be completed before October 21, 1976.

In this case, provided that the criteria for risk set forth in § 162.11(a)(3) are not met or exceeded, and provided that all other applicable requirements of the Act and these regulations are satisfied, the Administrator may in his discretion after soliciting the applications for reregistration of the affected products, classify and reregister the products for a reasonable period of time pending completion of the required testing (§ 162.6(b)(5)(ii)).

Such reregistrations will be for a fixed term of less than five years, reasonable to allow development, submission, and review of required data, and will not be subject to renewal. Registrants of products included in such batches will be notified of the unsatisfied requirements for long term data, so that the necessary studies can be initiated; registrants of similar products are encouraged to cooperate in the development of needed data, to minimize duplication of effort and expedite the reregistration review.

(3) Certain requirements of § 162.8(c) are not met, and the necessary studies are of short duration and can be expected to be completed before October 21, 1976. In this case the registrants of affected products will be notified as early as possible of the gaps in supporting data, so that they may be satisfied prior to solicitation and submission of the application for reregistration. Except when otherwise specified in the notification, studies performed with the active ingredient will be acceptable; registrants of similar products are encouraged to cooperate in the development of needed data, to minimize duplication of effort and expedite the reregistration review.

(B) Whether the products in the batch are to be candidates for restricted use, based on the criteria of § 162.11(c)(2) of the regulations, with qualification as appropriate on the basis of concentration, dosage rates, broad use pattern, physical form of the pesticide, or other relevant factors.

(C) The required precautionary and other standard label statements in accord with the provisions of § 162.10 of the regulations. When such statements are conditionally required, the appropriate conditions will be explicitly stated. To improve consistency among similar products and to minimize the likelihood of rejection of proposed labeling, the wording of these statements will be prescribed.

(i) The results of this preliminary batch review will be compiled into a reregistration and classification guidance

package. The guidance package will be sent to all registrants of products in the batch and will solicit applications for reregistration. This package will include the following materials:

(A) Application forms.

(B) General instructions for completing the forms and applying for reregistration.

(C) Specific procedural instructions for the batch, including the time for response. Registrations of products for which applications for reregistration are not received by the date specified will be cancelled.

(D) The results of the preliminary classification review, with a discussion of actions, if any, which could be taken by the applicant for reregistration to make a product which is a candidate for restricted use acceptable for general classification.

(E) Guidelines and examples for applying the label format standards of § 162.10 of these regulations.

(F) Prescribed wording for required precautionary and other standard label statements.

(G) Any other specific requirements applicable to the batch.

(2) *Contents of application for reregistration*. The required contents of an application for reregistration will vary somewhat from one batch to another, and will be described in detail in the guidance package accompanying the solicitation of application. In general, the requirements are as follows:

(i) The name and address of the applicant and any other person whose name will appear on the labeling;

(ii) The name and EPA registration number of the product;

(iii) A set of completed application forms, including the Application for New Registration, the Confidential Statement of Formula, and the Label Technical Data Sheet;

(iv) The classification(s) requested for the use(s) for which reregistration is requested, pursuant to § 162.11(c);

(A) If the classification requested differs from that indicated by the results of the preliminary batch classification review included in the guidance package, a rationale for the requested classification must be included, based upon § 162.11(c). If, for example, in order to make acceptable for general use a product identified in the preliminary batch classification review as a candidate for restricted use, the applicant proposes deletion of uses from the label directions, these proposed deletions should be explicitly stated.

(B) If reregistration of a single product bearing directions for both general and restricted uses is sought, and if as provided in § 162.10(j) of the regulations the applicant requests reregistration as two products with distinct registration numbers, one bearing only general use directions and the other bearing directions for restricted use (with or without additional directions for general use), separate applications are required. These separate applications, however, should be submitted concurrently, and both ap-

plications will be considered as applications for reregistration, subject to the procedural requirements of this section and the data requirements of § 162.8(c).

(v) A number of copies as specified in the guidance package of draft and/or final printed labeling for the pesticide product. All labeling submitted must be in conformance with the requirements of § 162.10.

(A) The Administrator may in his discretion allow for an expedited review of certain applications when the applicant certifies that no claims are proposed additional to those previously accepted, that no changes are proposed in the chemical formulation of the product, and that all labeling requirements, as prescribed in the guidance package, have been satisfied. In this case the applicant may submit copies of final printed labeling with his initial application for reregistration. Those batches for which this option is available will be identified in the guidance package, and specific instructions will be included.

(B) When draft labeling is submitted with the initial application, final printed labeling need not be submitted until draft labeling has been provisionally accepted. When this course is followed, expedited review will be granted to the final labeling when the applicant certifies compliance with the terms of provisional acceptance.

(vi) Supporting data as necessary to support the application consistent with the data requirements of § 162.8(c), the procedural requirements of § 162.9, and the instructions in the guidance package.

(3) *Suspension of five-year renewals during the period of reregistration*. For the duration of the period of reregistration, the five-year renewal requirement has been suspended. No product registration will lapse prior to October 21, 1976 because of the expiration of the five-year period for registration.

(4) *Amendments prior to October 21, 1976*. Applications for amended registration of products subject to reregistration by October 21, 1976 will normally be processed independently of reregistration. Amended registration approved prior to reregistration of the affected product will not constitute full reregistration and classification, and will be effective only for the period between approval of the amendment and reregistration of the product. Labeling revised for purposes of the amendment is likely to require further revision in accord with the provisions of the reregistration guidance package prior to approval of reregistration. Applications for amended registration may be submitted concurrently with the application for reregistration. If the nature of the proposed amendment is such that concurrent review would not unnecessarily delay reregistration, the two applications will be reviewed together. In other cases, for example, when significant new claims are proposed, consideration of the amendment will be deferred until after the reregistration review is completed.

(5) *Reregistration of distributor products*. Separate reregistration of distrib-

utor products approved as supplemental registrations prior to the effective date of the regulations (August 4, 1975) is not required prior to October 21, 1976 when reregistration is approved for a primary product. Supplemental registration of distributor products previously approved under that primary registration will be considered to be reregistered under the same terms as the primary product, subject to the conditions for supplemental registration contained in § 162.6(b)(4).

(g) *Intrastate products* (§ 162.17).

(1) Within 60 days of the effective date of § 162.17, each registrant of a product registered solely under state law must submit a notice of application for federal registration on EPA Form 8570-8. Pending solicitation of a full application for federal registration and the final registration decision either approving or denying the registration application, the state registrant may continue to sell and distribute the product subject to the requirements of § 162.17(f).

(2) Applications for federal registration of products previously registered solely under state pesticide registration laws will be solicited in batches of products similar to each other in chemistry and broad use pattern, just as applications for reregistration. Before soliciting the applications for federal registration of these products, the Administrator will make similar findings as discussed immediately above for solicitation of applications for reregistration, provided that since these products have not previously been registered by the EPA, these products will have to satisfy the data requirements for new registration. (§ 162.8(b)). However, the requirement of § 162.8(b)(2) for efficacy data may be waived on the basis of scientific data or findings and recommendations of a state or federal agency authorized by law to conduct pesticide research, pest control activities or programs for the protection of environmental quality or natural resources. (§ 162.17(a)).

#### § 162.44 Labeling [§§ 162.10, 162.71-.76]

(a) As a general rule, labeling initially submitted with the application should be in draft form. Final printed labeling need not be submitted until the proposed labeling has been conditionally accepted by the Registration Division. If an applicant chooses, however, he may submit final printed labeling with his initial application. If such labeling is unacceptable, the applicant bears full responsibility for providing correct labeling.

(b) Draft labeling may be either typewritten label text on 8½ by 11 inch paper or a mock-up of the label prepared so that it can be stored in 8½ by 11 inch files. Significantly smaller labeling should be mounted on 8½ by 11 inch paper.

(c) Final printed labels should also be prepared for storage in 8½ by 11 inch files by mounting or by photoreduction, where reduction would not significantly impair readability. When screen printing is used to print labeling directly on the container, do not submit the container; copies may be obtained

by taping a piece of paper on the container as it goes through the printing

respect to whether the properties of the specific pesticide or product are funda-

from use of pesticide is not as great as indicated by the criteria which gave

(7) A final order concerning denial or cancellation of a registration is made

time for completion of the review, and, in the case of a new product, will assign

cant has 30 days from receipt of this letter to take the specified corrective action or he may petition for withdrawal of his

by taping a piece of paper on the container as it goes through the printing process. Photocopies of embossed labeling should be submitted. Paste-on labeling should be submitted as is, unless it requires photoreduction or mounting.

#### § 162.45 Supporting data [§ 162.8].

(a) *Format.* (1) Two full sets of all data submitted are required, and must be bound separately. A bound volume of data should contain all individual studies of a single data type, such as environmental chemistry data or toxicology data or efficacy data. For a list of data types see the face of the Application for New Registration (EPA Form 8570-1). On the cover of each volume of data should be the product name, EPA Registration Number or File Symbol (if known), the type of data contained in the volume, and the date of the submission. In the front of each volume should be included in this order:

- (i) A full table of contents;
- (ii) A copy of the application form;
- (iii) A copy of the labeling;
- (iv) A tabular summary of the data contained in the volume, on forms provided by the Agency where appropriate.

(2) When large amounts of data are contained in one volume, it may be necessary to subsection by tabbing groups of data; for example, efficacy data by crop or geographical location, or human safety data by type of study. The material must be page numbered. The preferred pagination is a dual numbering system, with a capital Roman numeral to indicate the volume number and Arabic numerals assigned consecutively within the volume to indicate page numbers.

(3) Section 10 of FIFRA, as amended, provides that an applicant may clearly mark any data considered confidential and submit it separately. This data may be separately identified by using different colored paper or by stamping each page Confidential.

(b) *Compensation for use of previously submitted data in support of registration* (§ 162.9) [Reserved].

(c) *Waiver of a data requirement* (§ 162.8(a)(3), 162.17(a)).—(1) *Standard.* The Regulations and Registration Guidelines set forth the data requirements for registration of a pesticide. The Agency recognizes that the indicated data requirements may not have taken account all relevant factors for all pesticides. Therefore, a data requirement may be waived if it is established that the composition, degradability, proposed patterns of use and such other chemical or physical properties of a specific pesticide or product relating to an evaluation of the effects on man or the environment are fundamentally different from the factors considered by the Agency in the establishment of the data requirement of the Registration Guidelines.

(i) *New registration.* The applicant may submit written argument that a data requirement should be waived pursuant to the above standard. The Administrator will consider the argument submitted by the applicant and such other information as may be available to him, and make a written finding with

respect to whether the properties of the specific pesticide or product are fundamentally different from the factors considered by the Agency in establishing the data requirement of the Registration Guidelines. If the Administrator so determines, he may waive a data requirement of the Registration Guidelines when he determines that the data so required is not necessary in order for him to determine whether such specific pesticide product will generally cause unreasonable adverse effects on man or the environment. In the case of the approval of any application in which the Administrator has determined to waive a data requirement specified in the Registration Guidelines, the notice of approval issued pursuant to § 162.7(d)(2) shall list any data requirement which has been waived and briefly state the basis for such waiver.

(ii) *Reregistration.* The registrant may submit written argument that a data requirement should be waived or the Administrator may initiate the waiver of a data requirement in the solicitation of an application for reregistration, pursuant to the above standard. If the applicant submits argument that a data requirement should be waived, the Administrator will consider the argument submitted and proceed in accordance with the procedures discussed above for waiver of a data requirement for new registration. If the Administrator waives a data requirement in the solicitation of an application for reregistration, the notice of solicitation shall list any data requirement which has been waived and briefly state the basis for such waiver.

(iii) *Intrastate products.* The applicant may submit written argument that a data requirement should be waived or the Administrator may initiate the waiver of a data requirement in his notice to the applicant to submit a full application for federal registration, pursuant to the above standard. If the applicant submits argument that a data requirement should be waived, the Administrator will consider the argument submitted and proceed in accordance with the procedures discussed above for waiver of a data requirement for new registration. If the Administrator waives a data requirement in the solicitation of an application for full federal registration, the notice of solicitation shall list any data requirement which has been waived and briefly state the basis for such waiver.

(d) *Rebuttable presumption against registration.* (1) A rebuttable presumption against registration or continued registration arises if a pesticide meets or exceeds the criteria for risk of § 162.11(a)(3). Upon so determining, the Administrator shall issue notice by certified mail to the applicant or registrant stating that he may submit evidence in rebuttal of the presumption. (§ 162.11(a)(1)). The applicant or registrant has 45 days to submit such evidence; however, for good cause shown, the Administrator may grant an additional 60 days for submittal of such evidence.

(2) The presumption against registration is rebutted by showing that the risk

from use of pesticide is not as great as indicated by the criteria which gave rise to the rebuttable presumption. (§ 162.11(a)(4)). If after review of the evidence submitted in rebuttal, the Administrator determines that the presumption against registration has been rebutted and if the application for registration is otherwise in compliance with the Act, the regulations and these guidelines, the pesticide will be registered. (§ 162.11(a)(5)(i)). In the case of an application for registration for which notice of approval is required to be published pursuant to § 162.7(d)(2), such notice shall state that the Administrator has determined that the presumption has been rebutted and refer to the appropriate clause of § 162.11(a)(4)(i)-(ii) upon which he bases his determination.

(3) If the Administrator determines that the applicant or registrant has failed to rebut the presumption against registration, then for the uses of the pesticide subject to the presumption and not rebutted he shall issue either a (i) notice of intent to deny the registration, pursuant to section 3(c)(6) of the Act, (ii) notice of intent to cancel the registration, pursuant to section 6(b)(1) of the Act or (iii) notice of intent to hold a hearing to determine whether the registration should be cancelled or denied. (§ 162.11(a)(5)(ii)). This notice will be issued within 180 days from the date the initial notice was sent to the applicant or registrant informing him that he may submit evidence in rebuttal of the presumption.

(4) When the applicant or registrant submits evidence in rebuttal of the presumption against registration, he may also submit evidence as to whether the economic, social, and environmental benefits of the use(s) of the pesticide subject to the presumption outweigh the risks of use. The Administrator may, in his discretion, in determining which of the several hearing procedures to convene, take into account staff recommendations resulting from preliminary analysis, if any, concerning a balancing of risks against benefits from use of the pesticide. (§ 162.11(a)(5)(iii)). Any such preliminary analysis will be completed within 150 days from the date the notice was sent to the applicant or registrant informing him that he may submit evidence in rebuttal of the presumption.

(5) If based on such analysis the staff recommendation is that benefits appear to outweigh risks, the Administrator may, in his discretion, issue notice of intent to hold a hearing to determine whether the registration should be cancelled or denied rather than a notice of intent to deny or cancel the registration. If the recommendation is that benefits do not appear to outweigh the risks, the Administrator shall issue a notice of intent to deny or cancel the registration. (§ 162.11(a)(5)(iii)).

(6) Section 162.11(a)(6) sets forth additional grounds for issuance of a notice of intent to deny or cancel a registration or to hold a hearing to determine whether the registration should be cancelled or denied.

(7) A final order concerning denial or cancellation of a registration is made after a balancing of all factors concerning the risks and benefits of use of the pesticide in accordance with the burdens of proof contained at § 162.11(b).

#### § 162.46 Registration review.

(a) *Product manager system.* (1) The Registration Division has adopted a Product Manager system for more expeditious review of pesticide product applications. Under this system, each product is assigned to a single team headed by a Product Manager. New products are assigned to a Product Manager team as they are received. Assignment is generally by active ingredient and use; for example, one Product Manager handles all quaternary ammonium disinfectants; another, all chlorinated hydrocarbons; and a third, most fumigant-type products. With minor exceptions, the team to which the product is assigned handles all registration or other actions relating to the product, including registration, amendments to registration, resubmissions, renewals, petitions for tolerance, and, if necessary, cancellations or suspensions. Exceptions include enforcement case reviews, distributor brand applications, and experimental use permits; even in these cases, the Product Manager is kept informed of actions affecting his product. The Product Manager is the control point for information concerning a particular product and all questions or problems pertaining to an application should be directed to him.

(2) The acknowledgement copy of the application which is returned to the applicant will have the Product Manager's name and telephone number. The applicant should retain these, since both the Application for Amended Registration (EPA Form 8570-11) and the Resubmission of a Pesticide Product Application (EPA Form 8570-12) request that the name of the appropriate Product Manager be included on the form.

(b) *Notice of application* (§ 162.8(b)(6)). The Administrator will publish in the FEDERAL REGISTER notice of receipt of an application for new or amended registration if the pesticide formulation contains any active ingredient not registered at the time of the application or if a changed use pattern is proposed. Section 162.8(b)(6) lists the contents of this notice. The notice will provide a period of 30 days within which any interested party may submit comment regarding the registration of the pesticide for the indicated uses.

(c) *Acknowledgement of application* (§ 162.7(b)). (1) Applications may be mailed or delivered personally to the Registration Division. An application for registration will be acknowledged as soon as possible after receipt by returning the "Acknowledgement" copy of the form. The applicant should keep the triplicate copy of the form for his own records.

(2) The acknowledgement copy will contain the date of receipt of the application, the Product Manager's name and the telephone number, the anticipated

time for completion of the review, and, in the case of a new product, will assign the product a "File Symbol."

(3) A File Symbol is a reference code composed of the applicant's company number, followed by a dash and a letter or series of letters designating the individual product, for example, 9151-AER. All correspondence relating to the product must reference the File Symbol (or, if registered, the Registration Number).

(d) *Completeness check* (§ 162.6(a)(5)). (1) The application then undergoes a preliminary review to assure that all required materials and information are present and correct. A review is also made of the chemistry of the product.

(2) If deficiencies are found which preclude further review of the application, or if it is incomplete in any respect, the applicant will be notified as soon as possible by the Product Manager, either by telephone if the deficiencies are minor and can be corrected easily, or by letter if extensive revision is necessary. In extreme cases, the entire application may be returned to the applicant.

(e) *Scientific review.* Complete applications, together with accompanying labels and data, are routed to the designated Product Manager and review to determine if the pesticide and product labeling meet the requirements of the Act, the Regulations, and these Registration Guidelines. The review includes ascertaining (1) if the directed use of the product can reasonably be expected to result in any level of residues on food or feed; (2) if the directed application of the product is effective for the claims made and the directions for use are adequate and practical; and (3) if the proposed labeling bears necessary precautionary statements which, if complied with, will be adequate to prevent unreasonable injury to man, beneficial animals and the environment. (§ 162.7(d)).

#### § 162.47 Disposition of applications.

(a) *Notice of deficiency* (§ 162.6(a)(5)). (1) If the application is deficient, the Product Manager will notify the applicant, by letter, of the deficiencies in data or labeling. The applicant will be afforded an opportunity to correct the deficiencies or submit additional information to complete the review. All responses to such letters should be made on EPA Form 8570-12, Resubmission of a Pesticide Product Application.

(2) If the corrections or information are not submitted within a reasonable time, the applicant will be requested to withdraw the application or the application will be denied.

(b) *Denial of registration* (§ 162.7(e)). (1) The Administrator will deny an application for registration if the pesticide product fails to meet any of the requirements of § 162.7(d) or if there is insufficient data to make the required determinations.

(2) After making such a determination, the Administrator shall notify the applicant by certified letter setting forth the reasons and factual basis for the determination and the conditions, if any, which must be satisfied in order for the registration to be approved. The appli-

cant has 30 days from receipt of this letter to take the specified corrective action or he may petition for withdrawal of his application. If the applicant fails to remedy the deficiency of his registration application, or if the Administrator denies any petition for withdrawal, a notice of denial of registration shall be published in the FEDERAL REGISTER. This notice shall set forth the information listed at § 162.7(e)(3) of the regulations. Within 30 days of this FEDERAL REGISTER notice, the applicant or any interested party with the written authorization of the applicant may request a hearing in accordance with § 162.7(e)(4).

(c) *Provisional acceptance.* (1) If the data and labeling are acceptable and in compliance with FIFRA, as amended, and 40 CFR 162, the applicant will be notified in a provisional acceptance letter (PA letter). (The criteria for approval are given in 40 CFR 162.7(d).) This letter will:

(i) Outline any required labeling changes.

(ii) Assign a Registration Number to the product.

(iii) Request five copies of final printed labeling which must incorporate the requested changes and must bear the assigned Registration Number. (See Labeling.)

(iv) Notify the applicant whose label does not include an Establishment Number that this number must be shown somewhere on the immediate container.

(2) All submissions of final printed labeling should be transmitted with EPA Form 8570-12, Resubmission of a Pesticide Application, and with the duplicate copy of the PA letter. The final printed labeling should be identical to the draft submitted, except for the changes specified in the PA letter.

(3) The provisional acceptance letter does not constitute registration. Only the issuance of a "Notice of Registration" affects registration.

(d) *Approval of registration* (§ 162.7(d)). (1) After receipt and review of acceptable final printed labeling, the Registration Division will approve the registration and inform the applicant by letter. A stamped copy of the approved printed labeling will be returned to the applicant with the letter of approval.

(2) The Administrator will publish in the FEDERAL REGISTER notice of approval of the registration for any pesticide product containing any active ingredient not registered at the time of the application or if a changed use pattern has been approved. (§ 162.7(d)(2)).

(3) Registration becomes effective on the date the "Notice of Registration" or letter of approval is issued. Prior shipment of the product is a violation of the FIFRA, as amended. Registration is effective for five years from the date of registration or subsequent renewal, unless the Administrator indicates that the registration is for a shorter term, the registrant voluntarily terminates the registration, or it is suspended or cancelled by the Agency.

**APPENDIX—PUBLIC LAND ORDERS**

[Public Land Order 5525: (ES-15284)]

**GEORGIA**

**Boundary Modification: Oconee National Forest**

By virtue of the authority vested in the President by section 24 of the Act of March 3, 1891, as amended, 16 U.S.C. 471 (1970), and the Act of June 4, 1897, 16 U.S.C. 473 (1970), and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), and upon recommendation of the Secretary of Agriculture, it is ordered as follows:

The boundaries of the Oconee National Forest are hereby modified to conform to the following descriptions:

**UNIT No. 1**

Beginning at a point where State Highway 16 crosses the Ocmulgee River:

Thence easterly along the south side of said highway approximately 7¼ miles to the Fellowship Church Road;

Thence southwesterly along the northwest side of said road approximately 1 mile to the Sawmill Road;

Thence southeasterly along the southwest side of said road approximately 1 mile to State Highway 83;

Thence southwesterly along the northwest side of said road approximately ¼ mile to the Georgia Pacific Road;

Thence southerly along the west side of said road approximately 2¼ miles to the Mine Road;

Thence easterly along the south side of said road approximately ¼ mile to a point;

Thence northeasterly with a projection from the northwest line of Tract U-364 to said tract and clockwise along the lines of said tract to State Highway 11;

Thence southeasterly along the southwest side of said highway approximately 5 miles to the Fullerton Road;

Thence easterly along the south side of said road approximately 1 mile to the Goolsby Road;

Thence northeasterly along the southeast side of said road approximately 4 miles to the Jordan Road;

Thence easterly along the south side of said road approximately 1¼ miles to the Fullerton Road;

Thence northeasterly along the southeast side of said road approximately ¼ mile to State Highway 212;

Thence northwesterly along the northeast side of said highway approximately 1 mile to the Kitchens Road;

Thence northeasterly along the southeast side of said road approximately 2¼ miles to Tract U-463;

Thence clockwise along the line of said tract to the Tyler Road;

Thence northwesterly along the northeast side of said road approximately 2¼ miles to the Tyler Cutoff Road;

Thence northerly along the east side of said road a short distance to State Highway 16;

Thence easterly along the south side of said highway approximately 2 miles to the Jasper-Putnam County Line;

Thence northerly along the said county line approximately 3 miles to Tract U-133;

Thence clockwise along the lines of said tract to the Jasper-Putnam County Line;

Thence northerly along the said county line approximately 1¼ miles to Tract U-57;

Thence clockwise along the lines of said tract to the old Eatonton-Monticello Road;

Thence easterly along the south side of said old road approximately 2 miles to Tract U-3;

Thence clockwise along the lines of said tract to the right bank of Little River;

Thence downstream along the meanders of the south side of said river to the old Presley Mill Road;

Thence northeasterly along the southeast side of said old road approximately ¾ mile to State Highway 300;

Thence northeasterly along the southeast side of said highway approximately 6¼ miles to U.S. Highway 129;

Thence southerly along the west side of said highway approximately 5½ miles to Tract U-906a;

Thence clockwise along the lines of said tract to the Eatonton-Reids Crossroads Road;

Thence westerly along the south side of said road and a county road approximately ½ mile to Tract U-906b;

Thence southwesterly along the southeast lines of said tract and Tracts U-1791 and U-68 to the left bank of Little River;

Thence downstream along the meanders of the east side of said river and Lake Sinclair to the Island Point Road;

Thence westerly along the north side of said highway approximately 1¼ miles to Tract 1891a;

Thence clockwise along the lines of said tract to the Island Point Road;

Thence westerly along the north side of said highway approximately 1¼ miles to Tract U-201;

Thence southeasterly along the northeast line of said tract, projecting along the said line to the Putnam-Baldwin County Line located in Lake Sinclair;

Thence upstream through Lake Sinclair and Cedar Creek along the Putnam-Baldwin County Line and the Putnam-Jones County Line to U.S. Highway 129;

Thence southerly along the west side of said highway approximately 3¼ miles to Tract U-305f;

Thence clockwise along the lines of said tract to U.S. Highway 129;

Thence southerly along the west side of said highway approximately 2 miles to Tract U-348;

Thence clockwise along the lines of said tract to U.S. Highway 129;

Thence southerly along the west side of said road approximately 1 mile to a point due east of the most easterly corner of Tract U-347;

Thence due west to said corner of Tract U-347;

Thence clockwise along the lines of said tract and Tracts U-361, U-330, U-361, U-347, U-347a, and U-185 to the most westerly corner of Tract U-185;

Thence northeasterly along the northwest line of said tract, projecting along the said line to the Blountsville-Round Oak Road;

Thence westerly along the north side of said road, along the southwest lines of Tracts U-11a and U-117a, and along the said road again approximately 4¼ miles to Tract U-354f;

Thence clockwise along the lines of Tracts U-354f, U-167, U-117, U-167, and U-186a to State Highway 11;

Thence northerly along the east side of said highway approximately 1¼ miles to the Jones-Jasper County Line;

Thence westerly along the said county line approximately 1½ miles to a point;

Thence northwesterly with a projection from the northeast line of Piedmont National Wildlife Refuge Tract 227a to the most easterly corner of said tract;

Thence westerly along the north lines of Refuge Tracts 227a, 1261, 213, 1276, 158, 1261a, and 238 to the most northwesterly corner of Refuge Tract 238;

Thence westerly along the north side of an old road and along a line of National Forest Tract U-1401 approximately ½ mile to the most northerly corner of Refuge Tract 382c;

Thence westerly along the north lines of Refuge Tracts 282c, 1401 (containing approximately 220 acres) and 215a to the most westerly corner of Tract 215a;

Thence southwesterly with a projection from the northwest line of Piedmont National Wildlife Refuge Tract 215a to the left bank of the Ocmulgee River;

Thence upstream along the meanders of the east side of said river to the point of beginning, being located in Jasper, Putnam, and Jones Counties, Georgia;

Also, Tract U-154 in Jasper County, Tract U-354h and Tract U-172b in Jones County.

**UNIT No. 2**

Beginning at a point in the center of the Apalachee River where it runs into the Oconee River;

Thence upstream along the Apalachee River, following the Greene-Morgan County Line to the most easterly corner of Tract R-179;

Thence clockwise along the lines of said tract to the center of the Apalachee River;

Thence upstream along the said river, following the Greene-Morgan County Line to the Greene-Oconee County Line;

Thence clockwise along the lines of Tract R-185 to the Greene-Oconee County Line;

Thence northeasterly along the said county line approximately ¼ mile to Tract R-168;

Thence clockwise along the lines of said tract to the Greene-Oconee County Line;

Thence northwesterly along the said county line approximately 4 miles to Tract R-178;

Thence clockwise along the lines of said tract to the Greene-Oconee County Line;

Thence northeasterly along the said county line approximately 1 mile to the center of the Oconee River;

Thence upstream along the said river, following the Greene-Oconee County Line and the Oconee-Oglethorpe County Line to a point where Tract R-174 departs from said river in a northeasterly direction;

Thence clockwise along the lines of said tract and Tracts R-171, R-172, R-176, R-172, and R-50-A to the Greene-Oglethorpe County Line;

Thence southeasterly along the said county line approximately 3¼ miles to Tract R-160;

Thence clockwise along the lines of said tract to the Greene-Oglethorpe County Line;

Thence southeasterly along the said county line approximately 1½ miles to the Penfield-Maxeys Road;

Thence southerly along the west side of said road approximately 4½ miles to a point located south of Penfield on the north line of Tract R-93;

Thence clockwise along the lines of said tract and Tract R-119 to the Woodville-Shiloh Church Road;

Thence southwesterly along the northwest side of said road approximately 1½ miles to the Greensboro-Penfield Road;

Thence southerly along the west side of said road approximately ¾ mile to the John Cannon Road;

Thence southwesterly along the northwest side of said road approximately 2¼ miles to State Highway 15;

Thence southwesterly across said highway and along the northwest side of the Lick Skillet Road and a county road approximately 2¼ miles to U.S. Highway 278;

Thence westerly along the north side of said highway approximately ¾ mile to the Carey Station Road;

Thence southwesterly along the north side of said road approximately 1 mile to Tract R-120;

Thence clockwise along the lines of said tract to the point of beginning, being located in Greene, Morgan, Oconee, and Oglethorpe Counties, Georgia;  
 Also, Tract R-121 in Greene County.

**KENT FRIZZELL,**

*Acting Secretary of the Interior.*

SEPTEMBER 2, 1975.

[FR Doc.75-23853 Filed 9-8-75; 8:45 am]

**Title 45—Public Welfare**

**CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE**

**PART 100—GENERAL**

**PART 101—GRANTS TO LAND-GRANT COLLEGES AND UNIVERSITIES**

**Availability of Public Records; Fee Schedule**

The 1974 amendments to the Freedom of Information Act, Pub. L. 93-502 (5 U.S.C. 552) require, in revised section 552(a)(4)(A), that each agency promulgate regulations, pursuant to notice and receipt of public comment, specifying a uniform schedule of fees applicable to all constituent units of such agency.

The Department of Health, Education, and Welfare, following the mandate of the 1974 amendments, reissued its fee schedule, after notice and opportunity for comment, in the FEDERAL REGISTER of May 1, 1975, 40 FR 18997, 45 CFR 5.60-5.61. The fee schedule of the Department must, under the Act, apply to all constituent units of the Department. Therefore, for the convenience of those who may request records from the Office of Education and refer to the Office of Education General Provisions Regulations, 45 CFR Parts 100-100c, the Department's fee schedule is reissued as the fee schedule of the Office of Education and is made a part of the Office of Education General provisions regulations.

At the same time, the former policy of the Office of Education on fees and the Office of Education former fee schedule under the Freedom of Information Act is revoked. In addition, the section on charges, 45 CFR 101.13, issued under former section 417 of the General Education Provisions Act, is also revoked. Thus, the entire Subpart B of Part 101 is deleted from the Code of Federal Regulations. The heading for Subpart A is also deleted, only one subpart remaining.

Since the Department's policy on fees and fee schedule were issued after public notice and opportunity for comment and since the changes made herein are merely to conform the regulations of the Office of Education to the Department's regulations issued under 1974 amendments to the Freedom of Information Act, notice and public procedure thereon are unnecessary under 5 U.S.C. 553(b). The changes herein are, therefore, made without a second period of public comment.

Therefore, the following amendments are made to Parts 100 and 101 of Sub-

chapter I of Title 45, Code of Federal Regulations:

1. Part 100 is amended to add a new heading for Subpart A and a new Subpart B to read as follows:

**Subpart A—General**

• • • • •  
 Subpart B—Availability of Information to the Public

Sec.  
 100.5 Regulations of the Department.  
 100.6 Policy on fees.  
 100.7 Fee schedule.

**Subpart B—Availability of Information to the Public**

§ 100.5 Regulations of the Department.

The Department's regulations (45 CFR Part 5) on availability to the public of documents under the Public Information Act (5 U.S.C. 552) apply to the Office of Education.

(5 U.S.C. 552)

**§ 100.6 Policy on fees.**

The Department's policy on fees set forth in § 5.60 of this title is as follows: It is the policy of the Department to provide routine information to the public without charge. Special information services involving a benefit that does not accrue to the general public shall be subject to the payment of fees which shall be fixed in amounts to recover the direct cost to the Government of providing such services. Fees will be charged for the following special services:

(a) Reproduction, duplication or copying of records;  
 (b) Certification or authentication of records;  
 (c) Searches for records.

(5 U.S.C. 552(a)(4)(A))

**§ 100.7 Fee schedule.**

The fee schedule for the Department of Health, Education, and Welfare, set forth in § 5.61 of this title, is as follows: (a) (1) Search for records—three dollars per hour; provided, however, that no charge will be made for the first half hour.

(2) Reproduction, duplication or copying of records—ten cents per page where such reproduction can be made by commonly available photocopying machines. However, the cost of reproducing records which are not susceptible to such photocopying, e.g., punch cards, magnetic tapes, blueprints, etc., will be determined on a case-by-case basis at actual cost.

(3) Certification or authentication of records—three dollars per certification or authentication.

(4) Forwarding material to destination—any special arrangements for forwarding which are requested by the requester shall be charged on an actual cost basis.

(5) No charge will be made where the total amount does not exceed five dollars.

(b) Waiver or reduction of the fees provided for in this subsection may be made upon a determination that such

waiver or reduction is in the public interest because furnishing the information can be considered as primarily benefiting the general public.

(5 U.S.C. 552(a)(4)(A))

2. Part 101 of Subchapter B of Chapter I of Subtitle B of Title 45, Code of Federal Regulations, is amended by revising the title of Part 101, by deleting the heading of Subpart A, and by deleting all of Subpart B, so that the heading for Part 101 reads as follows: "Part 101—GRANTS TO LAND-GRANT COLLEGES AND UNIVERSITIES."

*Effective date.* Pursuant to Section 431 (d) of the General Education Provisions Act, as amended, (20 U.S.C. 1232(d)) these regulations have been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission (October 24, 1975), subject to the provisions therein concerning Congressional action and adjournment.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.

(Catalog of Federal Domestic Assistance Programs Nos. 13.400-13.550, Office of Education)

Dated: August 13, 1975.

T. H. BELL,

*U.S. Commissioner of Education.*

Approved: September 3, 1975.

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

### DEPARTMENT OF LABOR

#### Occupational Safety and Health Administration

[ 29 CFR Part 1910 ]

[Docket No. H-017]

#### STANDARD FOR EXPOSURE TO COKE OVEN EMISSIONS

##### Notice of Intent To Prepare an Environmental Impact Statement

Section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) requires each Federal agency to consider the environmental effects of proposed actions and to prepare environmental impact statements on major actions significantly affecting the quality of the human environment. Accordingly, the Occupational Safety and Health Administration (OSHA), U.S. Department of Labor, in conformance with its procedures for preparation and circulation of environmental impact statements (29 CFR 1999.3(d)) hereby announces its intention to prepare an environmental impact statement assessing the impact of the proposed standard regulating exposure to coke oven emissions (40 FR 32268) because the proposed standard regulates an environmental hazard to health in the workplace.

The Office of Standards Development, OSHA, is currently collecting information and data on possible environmental impacts of the proposed standard such as any adverse environmental effects which cannot be avoided should the proposal be adopted; alternatives to such a standard; any irreversible commitments of resources which would be involved if the proposal were promulgated; and the relationship between local short-term uses of the environment and the maintenance and enhancement of long-term productivity. Other items to be included in a draft environmental impact statement are listed in 29 CFR 1999.4.

Issues of particular interest in evaluating the environmental impact of the proposed standard on coke oven emissions include the following:

- Current and past levels of occupational exposure.
- Effects associated with exposure to coke oven emissions, especially correlating accident experience, damage to facilities or interruption of plant activities.
- Substantiated data including medical or toxicological evidence showing the effects of coke oven emissions on air quality in the vicinity of the coking operations or on the health of the general population.
- Any information indicating the decrease in employee exposure or expo-

sure of the general population that will result from the implementation of the proposed standard.

(e) Any other pertinent information. Any person having data or information on this subject which is not readily available in the open literature is invited to submit it, with accompanying documentation, to David R. Bell, Office of Standards Development, Room N-3669, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210, by September 30, 1975. Comments submitted in response to the Advance Notice of Proposed Rulemaking (38 FR 26207) or to the proposed standard (40 FR 32268) need not be resubmitted. All information received will be available for public inspection and copying at the above address.

In accordance with 29 CFR 1999.3(d), a copy of the draft environmental impact statement, once it is completed, will be available to any member of the public and a notice of its availability will be published in the FEDERAL REGISTER. Any person or agency submitting comments on the completed draft environmental impact statement to OSHA shall submit five (5) copies to the Council on Environmental Quality. A 45-day period will be allowed for the submission of comments after the publication of the notice of availability of the draft environmental impact statement.

Signed at Washington, D.C., this 3rd day of September 1975.

JOHN T. DUNLOP,  
Secretary of Labor.

[FR Doc. 75-23922 Filed 9-8-75; 8:45 am]

### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

#### Food and Drug Administration

[ 21 CFR Part 121 ]

[Docket No. 75N-0180]

#### ANIMAL FOOD OR FEED

##### Prohibited Substances

The Commissioner of Food and Drugs is proposing to establish a regulation on substances that are prohibited from use in food or feed for animals other than man. The regulation proposes to ban from such use certain industrial grade vegetable oil byproducts. These byproducts, which constitute the residue from distillation and deodorization refinement of crude vegetable oils, have been found to have the capacity to carry high levels of pesticides and other contaminants that are hazardous for food or feed use,

and they are thus suitable only for industrial use. Interested persons have until November 10, 1975, to submit comments.

Included in the category of industrial grade vegetable oil byproducts are the so-called deodorizer distillates resulting from the steam stripping or vacuum distillation of edible vegetable oils, residual oils resulting from the extraction of tocopherols from the further distillation of the deodorizer distillates, esters and salts of fatty acids derived from such deodorizer distillates, and any combinations or blends of the byproducts listed above with or without other miscellaneous vegetable oil byproducts or vegetable oil refinery wastes.

The Commissioner therefore concludes that it is in the public interest and will promote efficient enforcement of the act to provide a section in the food additive regulations to provide for the listing of substances, including the foregoing, for which use in animal food or feed has been prohibited.

Food additives are prohibited from use in animal food or feed based on the conclusion that the available evidence does not establish their safety, rather than on the basis of a determination that they are in fact unsafe. Section 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348) places the burden on the manufacturer or distributor of a food additive to prove its safety prior to use. Accordingly, the Commissioner recognizes that, as additional scientific information becomes available, it may well be possible to approve one or more of these substances for use in animal food or feed and thus to delete it from the section. The proposed regulation provides for such transfers to and from the section on the Commissioner's initiative or on the petition of any interested person.

The fact that a substance does not appear on this list of prohibited substances does not mean that it may lawfully be used in animal food or feed. The proposed new section should be considered only as an easy reference and a partial list of prohibited substances; it may be amended from time to time as new substances are found to fit into this category.

Regarding industrial grade vegetable oil byproducts included in this proposal, the Commissioner is concerned about incidents of illegal pesticide and industrial chemical contamination of human food derived from animals. Such incidents present a threat to human health and lead to severe economic losses to the milk, egg, poultry and meat-producing industries. The contamination of these

menclature employed with regard to the industrial-grade vegetable oil byproducts.

Interested persons may, on or before November 10, 1975, submit to the Hear-

plasmapheresis. Furthermore, since two single units of plasma may be obtained

foods has been caused by the misuse of chemicals whereby the animal has been directly exposed to the contaminant or by the presence of illegal pesticides and industrial chemical residues in the feed of these animals. Animal feed contamination may result from misuse of chemicals and from a variety of other causes, including the use as a feed ingredient of certain industrial grade byproducts that result from the processing of edible oils of vegetable origin. These byproducts, which have been shown to contain excessive levels of pesticide and industrial chemical residues, are not normally sold or intended for use in animal rations but are generally used for industrial purposes. However, because certain shipments of these byproducts have been diverted into animal feed channels, the Commissioner is proposing measures considered necessary to prevent the marketing of these byproducts of vegetable oil processing as ingredients for animal feeds.

The United States Department of Agriculture (USDA) in early 1974, encountered contaminated poultry from several growers in Mississippi; it contained residues of the pesticide dieldrin in excess of the current action level of 0.3 part per million (ppm) on a fat basis, with levels ranging up to 7.0 ppm. As a result, pre-market testing of all flocks from these growers was instituted by USDA and over 8 million dieldrin-contaminated chickens were subsequently destroyed. Since FDA has responsibility for the safety of animal feeds, extensive investigations were immediately undertaken to determine if animal feed was the source of the contamination and, if so, to initiate regulatory action deemed appropriate, including steps to preclude continued use and further shipment of the dieldrin-contaminated feed or feed ingredients.

The FDA investigation covered vegetable oil processors and blenders, poultry growers, feed mills, meat and poultry slaughtering and byproduct processing plants, and other plants where animal feed ingredients are produced.

Industrial grade vegetable oil byproducts were tested. Of the 125 samples tested, 93 contained dieldrin; the levels ranged from 0.06 to 90.5 ppm. Other animal feed ingredients such as corn, fish meal, meat scrap meal, milo, and cottonseed and alfalfa meals contained no detectable or only trace amounts of dieldrin residues. The pesticides dieldrin and endrin were the contaminants most frequently encountered in the vegetable oil byproduct samples and, in some instances, endrin levels ranged up to 3.96 ppm. DDE, a degradation product of the pesticide, DDT, was found in 1 sample at 9.88 ppm.

Vegetable oil refineries received extensive coverage after the initial FDA investigation of growers revealed that blended oils being used as components of their feeds were contaminated with dieldrin at levels ranging from a trace amount to 90.5 parts per million. It became apparent that certain industrial grade vegetable oil byproducts consistently contained significant levels of dieldrin residues. The oils received by the growers were traced back through various suppliers or blenders, brokers, and other intermediate channels and ultimately, to the refineries. It was determined that in previous months some suppliers furnishing oils to the growers were shipping industrial grade oils to the feed mills, apparently due to the heavy demand for feed grade oils. The best evaluation of the problem indicates that the Mississippi chicken contamination was caused by the diversion of deodorizer vegetable oil distillates and related vegetable oil refinery byproducts from industrial use to animal feed use.

As a result of the investigation, five product recalls of vegetable oil distillates and feeds containing these oils were instituted. Additionally, three firms were enjoined from shipping in interstate commerce adulterated oils for feed use.

The presence of chemical contaminants in these byproducts appears to result from a series of circumstances. For example, chlorinated hydrocarbon pesticides have been used for control of insects on corn and other crops for many years. Such pesticides are persistent and may remain in the soil for years, breaking down into other products equally toxic and persistent. Aldrin, one such chlorinated hydrocarbon pesticide, remains in the soil either as aldrin or its degradation product, dieldrin. During crop rotation, soybeans or other oil seed crops may be planted after corn crops; the aldrin or dieldrin is absorbed by the plants and, being lipid soluble, enters the seeds. Although only insignificant residue levels of aldrin or dieldrin may be in the oilseeds themselves, or in the crude oils produced from them during the processing of the oil, chlorinated hydrocarbons are concentrated in the deodorizer distillate step of processing by a factor that may exceed 300. The deodorizer distillate step consists of a vacuum distillation to remove objectionable odor and taste factors from the edible oils. These deodorizer distillate oils are normally not used for food but have commercial value in producing paint, linoleum, and other industrial products.

However, one food grade product may be obtained from deodorizer vegetable oil distillates. This is tocopherols. The extracted tocopherols are not known to contain any harmful levels of chlorinated hydrocarbon chemicals or impurities. However, the residual oils from tocopherol manufacture are likely to contain aforementioned pesticide residues and should be sold only for industrial use and labeled or invoiced to indicate that they are not for animal feed use. Experience has shown, however, that once in commerce, price differentials and shortages of suitable animal feed oils may lead to diversion of industrial grade products of this type into animal feed channels.

It is such products that are of particular concern to the Commissioner. Many oil refiners sell these industrial grade vegetable oil byproducts with disclaimers such as "Not for human or animal consumption," or similar statements on written agreements, invoices, and/or

other billing record. During the Mississippi incident investigation, it was found that such products were remarketed with the removal of the disclaimer statement. This resulted in contamination of the animal feeds in which they were ultimately used.

Industrial grade vegetable oil byproducts by their very nature must be considered as a contaminated concentrate. There is no way of listing all potentially significant chemical residues that may be present in the distillates. Likewise, there is no specific methodology available to cover either the diversity of samples or contaminants that may be involved, and there can be no valid assurance that any lot is free of all significant contaminants. There are, however, legitimate nonfood or nonfeed uses for these byproducts. While they account for less than 1 percent of the total production of vegetable oils, this is still in excess of millions of pounds of questionable material available for misuse in animal feed. It must be concluded that industrial grade vegetable oil byproducts such as deodorizer distillates and blends thereof, are generally unfit for use as components of food or animal feeds, and thus their use would cause any food or feed article in which they are used to be deemed adulterated within the meaning of section 402(a)(2)(C) of the act (21 U.S.C. 342(a)(2)(C)).

Since such byproducts have been used for animal food in the past and shipped in interstate commerce for such purpose, and since it is not easy visually or analytically to distinguish them from those articles deemed suitable for such use, the Commissioner concludes that the proposed regulation requires that the labeling of industrial grade vegetable oil byproducts bear the statement, "NOT FOR FOOD OR FEED USE."

Therefore, when industrial grade vegetable oil byproducts specified in the regulation are offered for entry into or shipped in interstate commerce, the absence of labeling that declares the article "Not for food or feed use" will cause such products to be deemed as unsafe food additives within the meaning of section 402(a)(2)(C) of the act. As an alternative to the labeling requirement proposed, such products may be appropriately denatured to render them as unsuitable and otherwise not capable of use as ingredients of animal feeds. The industry is invited to submit information and data establishing that such products are capable of being so denatured. Should such information and data be supplied, the final regulation based on this proposal will be modified accordingly.

The listing of industrial grade vegetable oil byproducts in the proposed regulation is based on the results of the FDA investigation of the previously discussed Mississippi incident; it includes those products the Commissioner has found or would expect to contain residues of certain pesticides and industrial chemicals in excessive amounts. The Commissioner is, however, specifically seeking comments on the list, both in terms of its completeness and the nomenclature employed with regard to the industrial-grade vegetable oil byproducts.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 402, 409, 701(a), 52 Stat. 1046-1047, 1055, 72 Stat. 1784-1787, as amended (21 U.S.C. 321(s), 342, 348, 371(a))), and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Part 121 be amended by adding to Subpart B the following new section as follows:

§ 121.107 Substances prohibited from use in food or feed for animals other than man.

(a) The ingredients listed in this section have been prohibited from use in food or feed for animals other than man by the Food and Drug Administration because of a determination that they present a potential risk to the public health or have not been shown by adequate scientific data to be safe for use in such food or feed. Use of any of these substances in violation of this section causes the food or feed involved to be adulterated and in violation of the act.

(b) This section includes only a partial list of substances prohibited from use in food or feed for animals other than man; it is for easy reference purposes, and is not a complete list of substances that may not lawfully be used in such food or feed. No substance may be used in food or feed for animals other than man, unless it meets all applicable requirements of the act.

(c) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may publish a proposal to establish, amend, or repeal a regulation under this section on the basis of new scientific evaluation or information. Any such petition shall include an adequate scientific basis to support the petition, shall be in the form set forth in § 121.51, and will be published in the FEDERAL REGISTER for comment if it contains reasonable grounds.

(d) Substances prohibited from direct addition or use as food or feed for animals other than man: (1) Industrial grade vegetable oil byproducts. (i) For the purpose of this section, industrial grade vegetable oil byproducts consist of: Deodorizer distillates resulting from the steam stripping or vacuum distillation of edible vegetable oils; residual oils resulting from the extraction of tocopherols from such deodorizer distillates; esters and salts of fatty acids derived from such deodorizer distillates, or combinations or blends of any of the byproducts listed above with or without other miscellaneous vegetable oil byproducts or vegetable oil refinery wastes.

(ii) Industrial grade vegetable oil byproducts identified in paragraph (d)(1) of this section shall be regarded as adulterated as unsafe food additives under section 402(a)(2)(C) of the act, unless such articles are labeled "NOT FOR FOOD OR FEED USE" based on a regulation published in the FEDERAL REGISTER of \_\_\_\_\_.

(2) (Reserved)

Interested persons may, on or before November 10, 1975, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written comments regarding this proposal. Comments should be filed in quintuplicate (except that individuals may submit single copies), and should be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office Monday through Friday, from 9 a.m. to 4 p.m., except on Federal legal holidays.

Dated: August 28, 1975.

A. M. SCHMIDT,  
Commissioner of Food and Drugs.  
[FR Doc. 75-23838 Filed 9-8-75; 8:45 p.m.]

#### [ 21 CFR Part 640 ]

[Docket No. 75N-0129]

#### BIOLOGICAL PRODUCTS

##### Additional Standards for Cryoprecipitated Antihemophilic Factor (Human)

The Commissioner of Food and Drugs is proposing to amend the regulations for manufacturing Cryoprecipitated Antihemophilic Factor (Human) to permit making the product from plasma obtained by plasmapheresis and to reorganize the regulations to be consistent with other regulations. Interested persons have until November 10, 1975, to comment.

Under section 351 of the Public Health Service Act (42 U.S.C. 262), all biological products offered for sale in interstate commerce must be licensed and meet certain standards that assure their continued safety, purity, potency and efficacy. Such standards for licensed Cryoprecipitated Antihemophilic Factor (Human) are prescribed under §§ 640.50 through 640.52 (21 CFR 640.50 through 640.52) of the biologic regulations.

Cryoprecipitated Antihemophilic Factor (Human) is a life-saving blood component containing sufficient levels of antihemophilic factor, also commonly known as Factor VIII, to correct spontaneous bleeding episodes characteristic of individuals having the coagulation disorder known as hemophilia A, a disease due to a deficiency of antihemophilic factor.

The standards presently limit the source of Cryoprecipitated Antihemophilic Factor (Human) to plasma obtained from a single unit of human blood meeting, for the most part, criteria prescribed for Whole Blood (Human). The Commissioner has received a license application from a manufacturer proposing to prepare this product from a single unit of plasma obtained by plasmapheresis. On the basis of the data in the license application, and other relevant material, the Commissioner concludes that a Cryoprecipitated Antihemophilic Factor (Human) which is as safe, pure, potent, and effective as the same product prepared from a single unit of whole blood obtained from a whole blood donor, may be prepared from plasma obtained by

plasmapheresis. Furthermore, since two single units of plasma may be obtained by plasmapheresis from one individual, and each unit may be used as a source of Cryoprecipitated Antihemophilic Factor (Human), an increase in its supply can be expected if preparation of this life-saving substance from plasma obtained by plasmapheresis is permitted.

Accordingly, the Commissioner is proposing to amend the additional standards to permit the preparation of Cryoprecipitated Antihemophilic Factor (Human) from plasma obtained by plasmapheresis, and to prescribe criteria for donor suitability, collection, and testing of source material to protect the donor and assure the integrity of such source material.

In addition, as a result of the Commissioner's ongoing review of the existing standards of safety, purity, potency and efficacy of biological products he considers it appropriate at this time to reorganize the additional standards for Cryoprecipitated Antihemophilic Factor (Human) to be consistent with the organization of other additional standards. The proposal also contains a number of substantive changes, which reflect new scientific knowledge and experience with the product.

A. The current regulations under § 640.52(d) require, in part, that the final container shall be marked or identified by a number or other symbol to relate it to the donor. To promote uniform identification of final containers, the phrases "marked" and "or other symbol" have been deleted, so that all containers must be identified solely by number. In the revision of the standards, this provision is in proposed § 640.54(b)(3).

B. The Bureau of Biologics has been conducting potency tests on inspection samples of Cryoprecipitated Antihemophilic Factor (Human) to monitor the ability of licensed manufacturers to produce consistently a product that is safe, pure, potent and effective. The results of this testing reveal that the majority of licensed establishments are, in fact, consistently producing a final product containing more than 40 units of antihemophilic factor from each 100 milliliters of plasma. The antihemophilic factor potency levels of products produced by a few manufacturers, however, consistently contain less than 40 units of antihemophilic factor.

The Commissioner recognizes that the antihemophilic factor potency of the final product may be dependent on the variability of antihemophilic factor in certain donors or the adequacy of the collection and processing procedures, or both. However, the fact that the majority of manufacturers consistently produce a product containing more than 40 units of antihemophilic factor suggests that the manufacture of low potency products is due to inadequate collection and processing procedures. The Commissioner therefore finds that periodic potency tests should be performed as a quality control procedure to assure that the collection and processing methods do not adversely affect the antihemophilic factor potency of Cryoprecipitated Antihemophilic Factor (Human).

itated Antihemophilic Factor (Human). Advances in antihemophilic factor assay technique, and the availability of testing laboratories other than those of the licensed manufacturer, make it possible for all manufacturers of Cryoprecipitated Antihemophilic Factor (Human) to initiate quality control potency testing of the final product.

Accordingly, the Commissioner proposes: (1) A new § 640.55 that identifies a U.S. Standard Antihemophilic Factor preparation, which may be obtained from the Bureau of Biologics for use in the preparation of a working reference to be employed as a control for the potency testing of licensed Cryoprecipitated Antihemophilic Factor (Human); and (2) a new § 640.56 that requires that four representative units of Cryoprecipitated Antihemophilic Factor (Human) be tested for potency each month to ensure that the collection and processing procedures are adequate, and the resultant product contains 40 units or more of antihemophilic factor from each 100 milliliters of plasma. The procedures for potency testing and a U.S. Standard Antihemophilic Factor (Human) preparation may be obtained, upon request, from the Director, Bureau of Biologics, 8800 Rockville Pike, Bethesda, MD 20014.

C. The labeling requirements currently prescribed in paragraph (c) of § 640.51 have been redesignated, with minor grammatical changes, under a new § 640.57 Labeling.

The Commissioner is proposing that labeling requirements concerning the donor number, storage temperature, identification and results of the test conducted for syphilis and, if performed, identification and results of the test conducted for unexpected antibodies be added to the regulations.

Pertinent background data and information on which the Commissioner relies in proposing this regulation are on public display in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

Therefore, under the Public Health Service Act (section 351, 58 Stat. 702, as amended (42 U.S.C. 262)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Part 640 be amended in Subpart F by revising §§ 640.50, 640.51, and 640.52 and adding §§ 640.53, 640.54, 640.55, 640.56, and 640.57, to read as follows:

§ 640.50 Cryoprecipitated Antihemophilic Factor (Human).

(a) *Proper name and definition.* The proper name of this product shall be Cryoprecipitated Antihemophilic Factor (Human). The product is defined as a preparation of antihemophilic factor, which is obtained from a single unit of plasma collected and processed in a closed system, and which will correct the coagulation defect of hemophilia A.

(b) *Source.* The source material for Cryoprecipitated Antihemophilic Factor (Human) shall be plasma which may be obtained by whole blood collection or by plasmapheresis.

§ 640.51 Suitability of donors.

(a) Whole blood donors shall meet the criteria for suitability prescribed in § 640.3.

(b) Plasmapheresis donors shall meet the criteria for suitability prescribed in § 640.63, excluding the phrase "other than malaria" in paragraph (c)(9) of that section. Informed consent shall be required as prescribed in § 640.61.

(c) Donors shall not be suitable if they are known to have been immunized by injection with human red blood cells or blood group substances.

§ 640.52 Collection of source material.

(a) Whole blood used as a source of Cryoprecipitated Antihemophilic Factor (Human) shall be collected as prescribed in § 640.4, except that paragraphs (d)(2), (g) and (h) of that section shall not apply. Whole blood from which both Platelet Concentrate (Human) and Cryoprecipitated Antihemophilic Factor (Human) is derived shall be maintained as required under § 640.24 until the platelets are removed.

(b) If plasmapheresis is used, the procedure for collection shall be as prescribed in §§ 640.62, 640.64 (except that paragraph (c)(3) of that section shall not apply), and 640.65.

§ 640.53 Testing the blood.

(a) Blood from which plasma is separated for the preparation of Cryoprecipitated Antihemophilic Factor (Human) shall be tested as prescribed in §§ 610.40 of this chapter and 640.5 (a), (b), and (c).

(b) The tests shall be performed on a sample of blood collected at the time of collecting the source blood, and such sample container shall be labeled with the donor's number before the container is filled.

(c) Manufacturers of Cryoprecipitated Antihemophilic Factor (Human) obtained from plasma collected by plasmapheresis shall have testing and record-keeping responsibilities equivalent to those prescribed in § 640.63 (f) and (g).

§ 640.54 Processing.

(a) *Processing the plasma.* (1) The plasma shall be separated from the red blood cells by centrifugation within 4 hours after collection to obtain essentially cell-free material.

(2) The plasma shall be frozen within 2 hours after separation. A combination of dry ice and organic solvent may be used for freezing. *Provided*, That the procedure has been shown not to cause the solvent to penetrate the container or leach plasticizer from the container into the plasma.

(3) Immediately after processing, the plasma shall be stored and maintained at -18° C or colder until further processing to remove the Cryoprecipitated Antihemophilic Factor (Human).

(b) *Processing the final product.* (1) The Cryoprecipitated Antihemophilic Factor (Human) shall be separated from the plasma by a procedure that has been shown to produce a product which has a

demonstrated potency to correct the coagulation defect of hemophilia A.

(2) No diluent shall be added to the product by the manufacturer.

(3) The final container used for Cryoprecipitated Antihemophilic Factor (Human) shall be colorless and transparent, to permit visual inspection of the contents; any closure shall maintain a hermetic seal and prevent contamination of the contents. The container material shall not interact with the contents, under the customary conditions of storage and use, in such a manner as to have an adverse effect upon the safety, purity, potency and effectiveness of the product. At the time of filling, the final container shall be identified by a number so as to relate it to the donor.

§ 640.55 U.S. Standard preparation.

A U.S. Standard Antihemophilic Factor (Factor VIII) preparation may be obtained from the Bureau of Biologics, Food and Drug Administration, for use in the preparation of a working reference to be employed in a quality control potency test of Cryoprecipitated Antihemophilic Factor (Human).

§ 640.56 Quality control test for potency.

(a) Quality control tests for potency of antihemophilic factor shall be conducted each month on four representative units of Cryoprecipitated Antihemophilic Factor (Human).

(b) The quality control test for potency may be performed by a clinical laboratory which meets the standards of the Clinical Laboratories Improvement Act of 1967 (CLIA) (42 U.S.C. 263a) and is qualified to perform potency tests for antihemophilic factor. Such arrangements must be approved by the Director, Bureau of Biologics, Food and Drug Administration. Such testing shall not be considered as divided manufacturing, as described in § 610.63 of this chapter, provided the following conditions are met:

(1) The results of each test are received within 10 days of the preparation of the cryoprecipitated antihemophilic factor and are maintained by the establishment licensed for Cryoprecipitated Antihemophilic Factor (Human) so that they may be reviewed by an authorized representative of the Food and Drug Administration.

(2) The licensed Cryoprecipitated Antihemophilic Factor (Human) manufacturer has obtained a written agreement that the testing laboratory will permit an authorized representative of the Food and Drug Administration to inspect its testing procedures and facilities during reasonable business hours.

(3) The testing laboratory will participate in any proficiency testing programs undertaken by the Bureau of Biologics, Food and Drug Administration.

(c) If the average potency level of the four units tested is less than 40 units of antihemophilic factor derived from each 100 milliliters of source material:

(1) Immediate corrective actions shall be taken and a record maintained of such action.

## COST ACCOUNTING STANDARDS BOARD

[4 CFR Part 410]

### ALLOCATION OF BUSINESS UNIT GENERAL AND ADMINISTRATIVE EXPENSE TO FINAL COST OBJECTIVES

#### Proposed Cost Accounting Standard

Notice is hereby given of a proposed Cost Accounting Standard on Allocation of Business Unit General and Administrative (G&A) Expense to Final Cost Objectives, being considered by the Cost Accounting Standards Board for promulgation to implement further the requirement of Section 719 of the Defense Production Act of 1950, as amended, Public Law 91-379, 50 U.S.C. App. 2168. When effective, the Standard will be used by all relevant Federal agencies and national defense contractors and subcontractors.

The Board published an earlier proposal for this Standard in the FEDERAL REGISTER for September 24, 1974 (39 FR 34300). The Board supplemented the publication by sending copies of the FEDERAL REGISTER material to organizations and individuals who had expressed an interest in the work of the Board. Fifty responses were received.

After reviewing those responses, the Board has revised the proposal in a number of ways, and the proposal as revised is being published for comments by interested persons.

To assist interested persons who wish to comment on this proposal, the Board has identified below the principal areas in which it has modified the proposal published on September 24, 1974, together with the Board's reasons for those modifications.

1. *Selection of an Allocation Base for the G&A Expense Pool.* Commentators expressed the view that the choice of an allocation relationship between the G&A expense pool and final cost objectives is arbitrary; particularly, the selection of a single allocation base is arbitrary. Because of this view, commentators have inquired about the Board's reasons for selecting cost input as the allocation base for the G&A expense pool. The expenses in the G&A expense pool are the expenses of the general management and administration of a business unit as a whole. Therefore, the allocation base chosen should be one which measures the total activity of the business unit during a cost accounting period and not just some part of total activity. Only a cost input base accomplishes this objective.

Shortly after the initial FEDERAL REGISTER publication, the Board surveyed segments of a number of companies who use a cost of sales base to allocate G&A expenses. The survey was designed to compare the results of using a cost of sales base versus a cost input base to allocate these expenses. Responses were received from 91 segments. The results of the survey established that in the case of individual segments the use of a cost of sales base as compared with a cost input base can result in a significant change in the G&A rate and in the allocations of G&A expenses to final cost objectives.

A number of commentators suggested that the use of cost of sales as a measure of the allocation base for the G&A expense pool should be permitted. Commentators asserted that this base has long been used for the allocation of the G&A expense pool and that it was in consonance with the concept of period expense. The measurement of a cost of sales base is representative, in part, of the productive activities of prior periods and is subject to fluctuations which can distort the allocation of G&A expenses to activities of the current period. Although the measurement of cost of sales is based on a recorded date of sale, management activities of a period are not necessarily related to the date of sale.

Under current regulations as interpreted by the Armed Services Board of Contract Appeals, a cost of sales base should only be used where it closely approximates a cost input base. The Board has considered the existence of these past disputes and cases involving the use of a cost of sales allocation base. In given circumstances, due to the definition and accounting for sales under various types of contracts, the cost of similar types of productive activities may be treated differently in terms of the measurement of a cost of sales allocation base. The use of a cost of sales base can result in unwarranted shifting of costs between different types of final cost objectives. Therefore, the Board has concluded that the use of a cost of sales base is inappropriate for establishing the proper cost of final cost objectives within a cost accounting period.

Commentators also asserted that the Standard was unduly rigid because it permitted only one base for the allocation of the G&A expense pool. The proposed Standard is not limited to the use of one allocation base; rather, the scope of the base, the measurement of total activity, is limited to cost input as this is the measure of the total activity of the business unit. The proposed Standard provides that the measure of cost input best representing the total activity of the business unit during a cost accounting period would be the one chosen as the base. The Standard provides criteria for determining the cost input base which will best measure total activity. The criteria are provided so that the allocation base for the G&A expense pool can be selected giving consideration to the differing circumstances of individual business units.

(2) Within 30 days after testing the fourth sample, the potency test results from each of the four samples, together with a description of the corrective action and its effect on the potency of subsequently processed products, shall be submitted to the Director, Bureau of Biologics, Food and Drug Administration.

§ 640.57 Labeling.

In addition to the applicable requirements of § 610.62 of this chapter, and in lieu of the requirements of §§ 610.60 and 610.61 of this chapter, the container label shall bear the following information:

(a) The proper name of the product.  
(b) The volume of source blood and plasma, and the volume and type of anticoagulant present in the source blood from which the product was prepared.  
(c) Blood group designations of the source blood.  
(d) Donor number.  
(e) Expiration date.  
(f) Type of serologic test for syphilis used and results.  
(g) Type of test for hepatitis B surface antigen used and results.  
(h) Type of test for unexpected antibodies, if performed, and results.

(i) Instructions to store the product at -18° C or colder.  
(j) A warning against further processing of the product if there is evidence of breakage or thawing.  
(k) Instructions to thaw the product at a temperature between 30-37° C.  
(l) Instructions to store the product at room temperature after thawing, and to use the product within 8 hours after thawing and within 2 hours of entering the container.

(m) Instructions to use a filter in the administration equipment.

(n) A statement to see the instruction circular for directions for use.

(o) The statement "Caution: Federal Law prohibits dispensing without prescription."

(p) Name, address, and license number of the manufacturer.

Interested persons may, on or before November 10, 1975, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written comments regarding this proposal. Comments shall be filed in quintuplicate and shall be identified with the Hearing Clerk docket number found in the document heading. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: September 2, 1975.

SAM D. FINE,  
Associate Commissioner for  
Compliance.

[FR Doc.75-23837 Filed 9-8-75; 8:45 am]

Commentators expressed concern that the criteria for selection of a particular

method and inequities the Board should provide a specific method of compensa-

after the date on which a business unit must first allocate its cost in compliance

composition of the G&A expense pool. and be used in this instance as a

apart from the G&A expense pool, they shall become part of the cost input base

allocation base used to allocate home office expenses to the segment.

Commentators expressed concern that the criteria for selection of a particular cost input base were not clear and could lead to disputes. The Board has recognized the merit of these comments and has modified the Standard to clarify the criteria for selection of an allocation base in a particular circumstance. Under the proposed Standard, only a cost input base may be used. Three cost input bases have been provided and criteria have been established for selection of the appropriate base. The individual circumstances of a given business unit must be analyzed, and the cost input base that best represents the total activity of that business unit would be the base selected. The Board's research indicates that generally total cost input, because it is a broad measure of all of the work done and includes all of the costs allocable to the contracts of the period will be a measure that is representative of the total activity of the cost accounting period.

In this context the term "total activity" refers to the production of goods and services during a cost accounting period. This scope of activity is selected in light of the fact that the purpose of this Standard is to provide guidelines for the allocation of expense to the work of a cost accounting period. Thus, the total activity involved in the production of goods and services is the measure selected to act as a base for allocating the G&A expense pool to the final cost objectives of a given cost accounting period.

Commentators were uncertain as to the relationship of cost input to the purchase of raw materials inventory and to Cost Accounting Standard (CAS) 404—Capitalization of Tangible Assets. To help clarify the relationship of this Standard to the purchase of raw material inventories and to CAS 404, an illustration has been added. Cost input is basically a measure of the costs and expenses allocated to production of goods and services during a cost accounting period. Thus, items purchased for raw material inventory which are not entered into production during a cost accounting period would not be part of the cost input base for that cost accounting period. As to the acquisition costs of assets constructed or fabricated by a contractor, CAS 404 and the proposed Standard must be read together. The requirements of CAS 404 provide that those G&A expenses which are identifiable with the constructed asset and are material in amount shall be allocated to the cost of the asset. CAS 404 also provides that the cost of constructed assets that are identical with or similar to the contractor's regular product shall include a full share of indirect costs—thus, the costs of these assets will be included in the cost input base.

Commentators also suggested that guidance be given for the accounting for costs which are excluded from the G&A expense pool under this Standard. An illustration has been provided to clarify the accounting for those costs as part of the cost input base.

2. *A Transition Provision.* Some commentators suggested that to avoid dis-

putes and inequities the Board should provide a specific method of compensation for any contractor who is required to change from a cost of sales or sales base to a cost input base. They suggested that the transition provision should specifically consider the potential administrative cost and difficulty that could arise in adjusting existing fixed price contracts. Other commentators recommended that the Board leave this question for resolution by the contracting parties, because no single transition technique was likely to be satisfactory to all. When commenting on this issue, some commentators asserted that the transition could significantly impact both profit shown in the income statement and cash flow in the year of transition.

The Board recognizes that the conversion to a cost input base from a cost of sales or sales base may have an impact on a considerable number of fixed price contracts. To avoid potential disputes and to minimize the administrative cost of implementing the transition, the Board is considering the adoption of a specific transition method. In the Standard published today, the Board has included two alternative transition methods from which it expects to select one as the specific transition method. The alternatives are designated 410.40(b)(2)(i) X or Y; 410.50(e) X or Y; 410.60(f) X or Y.

Either method will permit a business unit whose disclosed or established cost accounting practice was to use a cost of sales or sales base and which has cost reimbursement-type or fixed price contracts, or both, subject to the CAS clause existing as of the date the business unit must first allocate costs in compliance with the requirements of this Standard, to allocate the G&A expense pool to these final cost objectives using a cost of sales base. The method shall also be used to determine the amount of G&A expenses to be removed from the G&A expense pool prior to the allocation of that pool to new cost reimbursement-type contracts and new fixed price contracts subject to the CAS clause.

The difference between the proposed methods is the treatment of final cost objectives not subject to the CAS clause existing as of the date the business unit must first allocate costs in compliance with the requirements of this Standard. These final cost objectives may include:

- (1) Government contracts which do not contain the CAS clause;
- (2) Contracts other than Government contracts or customer orders awarded prior to the date the business unit must first allocate its costs in compliance with the requirements of this Standard; and
- (3) Production not specifically identified with contracts or customer orders under production or work orders existing prior to the date on which a business unit must first allocate its costs in compliance with this Standard and which are limited to time or quantity.

Production under standing or unlimited work orders, continuous flow processes and the like, not identified with contracts or customer orders are to be treated as final costs objectives awarded

after the date on which a business unit must first allocate its cost in compliance with the requirements of this Standard.

In alternative Method X, the cost input base is used to determine that portion of the G&A expense pool applicable to those final cost objectives not subject to the CAS clause existing as of the date a business unit must first allocate costs in compliance with the requirements of this Standard. In alternative Method Y, the cost of sales or sales base is used to determine the portion of the G&A expense pool applicable to such final cost objectives.

The proposed transition methods incorporate a number of suggestions that were made to the Board in comments on the draft which previously appeared in the FEDERAL REGISTER. The methods involve using a combination of a cost of sales or sales base and a cost input base. A contractor will use the transition method until all pre-existing final cost objectives using the cost sales or sales base are completed. At that point the contractor would be using and would continue to use a cost input base selected in accordance with the requirements of 410.50(d) to allocate the G&A expense pool.

The Board recognizes that the inventorying or deferring of G&A on fixed price contracts received after the date on which a business unit must first record costs in compliance with the proposed Standard will affect its cash flow. The Board notes that this effect can be somewhat offset by means of progress payments for that portion of the G&A expenses which are in inventory at the end of a cost accounting period.

3. *Definition of G&A Expense.* Commentators were concerned that the proposed definition of G&A expense was narrower than those definitions currently in use, and the result might be excessive fragmentation of existing G&A expense pools to remove insignificant items.

Board research indicates that while accountants are in agreement about the general character of G&A expenses, practice has resulted in the cost of a variety of functions and expenses being included in the G&A expense pool. The definition proposed by the Board limits G&A expenses to those expenses which are related to the general management and administration of the business unit as a whole. Excluded are those management expenses whose beneficial or causal relationship to cost objectives can be more directly measured by a base other than a cost input base representing the total activity of a business unit during a cost accounting period.

With respect to the questions about materiality, the Board has several times expressed its belief that the administration of Cost Accounting Standards should be reasonable and not seek to deal with insignificant amounts of cost. See, for example, the March 1973 "Statement of Operating Policies, Procedures and Objectives." The Board has considered the comments concerning the potential problems that could arise without a clearer statement of materiality related to the

composition of the G&A expense pool. The Board believes in this instance a significance test will be useful and the proposed Standard has been appropriately modified.

Commentators also expressed concern about the treatment of specific items of expense that are sometimes found in the G&A expense pool. In particular, commentators expressed concern over the treatment of selling and marketing expense, independent research and development (IR&D) expense and bidding and proposal (B&P) expense. Commentators questioned whether under the proposed Standard these expenses were G&A expenses to be included in the G&A expense pool.

The Board recognizes that at the present time selling costs (marketing or selling expenses) may constitute a significant amount of cost and are accounted for in a variety of ways. Some account for selling costs in a separate cost pool while others include selling costs as part of the G&A expense pool. Also, the Board notes that the current ASPR provision related to the accounting for IR&D and B&P requires that generally the allocation of these costs shall be on the same basis as the contractor's allocation of his G&A expense pool, although these expenses are not termed G&A expenses. All of these subjects are being considered by the Board as separate Standards, and at this time the Board does not propose altering or changing their existing accounting treatment.

Contractors who have included IR&D and B&P costs in their G&A expense pool may continue to do so. As a result of having these costs remain in the G&A expense pool and of the proposed alternative transition provisions of 410.50(e), the accounting for these costs will be as follows:

(a) During the transition period, those business units which were using a cost of sales or sales base would continue to use that base to allocate the G&A expense pool to cost contracts and fixed price contracts subject to the CAS clause, which were in existence as of the date the business unit must first allocate its costs in accordance with the requirements of this Cost Accounting Standard.

(b) During the transition period and subsequent to that time, the G&A expense pool would be allocated to new cost contracts and new fixed price contracts subject to the CAS clause using a cost input base as required by 410.50(d).

Contractors who have included selling costs in a cost pool separate and apart from the G&A expense pool may continue to account for those costs in a separate pool or may change and include selling costs in their G&A expense pool. Further, contractors who will have to change the allocation base used for the G&A expense pool and who have in the past included selling costs as part of the G&A expense pool may account for selling costs by establishing a separate cost pool for the selling costs and using the allocation base they previously used for their G&A expense pool. Where selling costs are accounted for in a cost pool separate and

apart from the G&A expense pool, they shall become part of the cost input base used to allocate the G&A expense pool. Illustrations have been added to the proposed Standard to clarify the treatment of these costs.

As a result of the current ASPR provision, which requires that generally the allocation of IR&D and B&P costs on the same basis as the business unit's G&A expense pool, a business unit which is required under this proposed Standard to change the allocation base used for its G&A expense pool could, because of the ASPR requirements, also be required to change the allocation base for IR&D and B&P. This change in the business unit's method of accounting for IR&D and B&P costs, however, would be subject to the transition provision of the proposed Standard, and would only affect allocation of these costs to contracts awarded after the date on which a business unit must first allocate its costs in accordance with the requirements of this Standard.

4. *Use of Memorandum Records.* Some commentators urged that the Standard specifically permit the use of memorandum records for the allocation of G&A expenses to final cost objectives. The Board notes that even in the absence of this Standard, many contractors now use memorandum records to perform the allocation of G&A expenses for purposes of Government contracts, because they do not make formal allocation of G&A expenses to contracts or they do so on a different basis. The Board sees no need to disturb the practice of using memorandum records for the allocation of G&A expenses to final cost objectives.

5. *Allocation of Home Office Expenses to Final Cost Objectives.* Commentators expressed concern about the handling of home office expenses which are received by a segment as residual expenses under CAS 403 or as a lump sum which is not designated as a particular type of expense. The proposed Standard now provides explicitly that individual handling of various types of home office expenses would be required only where a separate allocation of expenses is received from a home office, and where the amount of the allocated expense is significant.

Other commentators suggested that in given circumstances a different allocation base than the allocation base used for the allocation of home office expense to the segment may be appropriate for the allocation of home office expense to final cost objectives of the segment. The Standard does not require that the same base be used for the allocation of home office expenses to final cost objectives of the segment as was used for the allocation of home office expenses to the segment. The Standard requires establishment of a beneficial or causal relationship between the cost objectives and the expense wherever separate and significant allocations of home office expenses are received by a segment. It may be appropriate to use a different allocation base for the allocation of home office expenses received by a segment than the

allocation base used to allocate home office expenses to the segment.

6. *Allocation of G&A Expenses to Special Contracts.* Commentators suggested that the special allocation provision be stated in terms of class of contracts or types of situations. If the G&A expense meets the requirements of the proposed Standard, the existence of a need for special allocation to a class of contracts or type of situation would indicate that the allocation base being used is not representative of the total activity of the business unit during a cost accounting period. The Standard is designed to provide consistent accounting treatment for all contracts, except for a particular contract or other final cost objective which is an exception to a business unit's normal operation.

The cost input allocation base for G&A expense is a broad measure which is normally representative of the total activity of a business unit during a cost accounting period. Thus, for a given final cost objective to qualify for special treatment, the difference in its beneficial or causal relationship to G&A expense as compared with the relationship of other final cost objectives to G&A expenses should be one which is apparent and capable of being supported. The provision of the proposed Standard will call for the exercise of judgment; nonetheless, the Board believes a materiality criterion based on a measure of significantly different benefits is proper for use in evaluating and establishing a separate and exceptional allocation to a given final cost objective.

The Board solicits comments on this revised proposal for a Cost Accounting Standard which will assist the Board in its further consideration of the proposal. The Board is particularly interested in receiving comments on the alternative methods for the proposed requirement for the transition from use of a cost of sales base for allocation of the G&A expense pool to use of a cost input base as set out in Section 410.50(e). Respondents are asked to comment on the administrative cost and effort entailed by each of the alternatives and to indicate their preference between the alternatives. Interested persons should submit written data and views, concerning the proposed Cost Accounting Standard to the Cost Accounting Standards Board, 441 G Street, N.W., Washington, D.C. 20548.

To be given consideration by the Board in its determination relative to final promulgation of the Cost Accounting Standard covered by this notice, written submissions must be made to arrive no later than November 14, 1975.

NOTE: All written submissions made pursuant to this notice will be made available for public inspection at the Board's office during regular business hours.

#### PART 410—ALLOCATION OF BUSINESS UNIT GENERAL AND ADMINISTRATIVE EXPENSE TO FINAL COST OBJECTIVES

Sec.	
410.10	General applicability.
410.20	Purpose.
410.30	Definitions.

- Sec.  
410.40 Fundamental requirement.  
410.50 Techniques for application.  
410.60 Illustrations.  
410.70 Exemptions.  
410.80 Effective date.

AUTHORITY: 84 Stat. 796, sec. 103, 50 U.S.C. App. 2168.

#### § 410.10 General applicability.

General applicability of this Cost Accounting Standard is established by § 331.30 of the Board's regulations on applicability, exemption, and waiver of the requirement to include the Cost Accounting Standards contract clause in negotiated defense prime contracts and subcontracts (§ 331.30 of this chapter).

#### § 410.20 Purpose.

The purpose of this Cost Accounting Standard is to provide criteria for the allocation of business unit general and administrative (G&A) expenses to business unit final cost objectives based on their beneficial or causal relationship. These expenses represent the cost of the management and administration of the business unit as a whole. The Standard also provides criteria for the allocation of home office expenses received by a segment to the cost objectives of that segment. This Standard will increase the likelihood of achieving objectivity in the allocation of expenses to final cost objectives and comparability of cost data among contractors in similar circumstances.

#### § 410.30 Definitions.

(a) The following definitions of terms which are prominent in this Standard are reprinted from Part 400 of this chapter for convenience. Other terms which are used in this Standard and are defined in Part 400 of this chapter have the meanings ascribed to them in that part unless the text demands a different definition or the definition is modified in paragraph (b) of this section.

(1) *Allocate*. To assign an item of cost or a group of items of cost, to one or more cost objectives. This term includes both direct assignment of cost and the reassignment of a share from an indirect cost pool.

(2) *Business unit*. Any segment of an organization, or an entire business organization which is not divided into segments.

(3) *Cost input*. The cost, except G&A expenses, which for contract costing purposes is allocable to the production of goods and services during a cost accounting period.

(4) *Cost objective*. A function, organizational subdivision, contract or other work unit for which cost data are desired and for which provision is made to accumulate and measure the cost of processes, products, jobs, capitalized projects, etc.

(5) *Final cost objective*. A cost objective which has allocated to it both direct and indirect costs, and, in the contractor's accumulation systems, is one of the final accumulation points.

(6) *General and Administrative (G&A) expense*. Any management, financial, and other expense which is incurred by or allocated to a business unit and which is for the general management and administration of the business unit as a whole. G&A expense does not include those management expenses whose beneficial or causal relationship to cost objectives can be more directly measured by a base other than a cost input base representing the total activity of a business unit during a cost accounting period.

(7) *Segment*. One of two or more divisions, product departments, plants, or other subdivisions of an organization reporting directly to a home office, usually identified with responsibility for profit and/or producing a product or service. The term includes Government-owned contractor-operated (GOCO) facilities, and joint ventures and subsidiaries (domestic and foreign) in which the organization has a majority ownership. The term also includes those joint ventures and subsidiaries (domestic and foreign) in which the organization has less than a majority of ownership, but over which it exercises control.

(b) The following modifications of definitions set forth in Part 400 of this chapter are applicable to this Standard: None.

#### § 410.40 Fundamental requirement.

(a) Business unit G&A expenses shall be grouped in a separate indirect cost pool which shall be allocated only to final cost objectives.

(b) (1) The G&A expense pool of a business unit for a cost accounting period shall be allocated to final cost objectives of that cost accounting period by means of a cost input base representing the total activity of the business unit during that entire cost accounting period, except as provided in paragraph (b) (2) of this section.

(b) (2) (i) The allocation of the G&A expense pool to any particular final cost objectives which receive benefits significantly different from the benefits accruing to other final cost objectives shall be determined by special allocation.

#### ALTERNATIVE X

(ii) Where, prior to the effective date of this Standard, a business unit's disclosed or established cost accounting practice was to use a cost of sales or sales base, final cost objectives subject to the CAS clause in existence on the date on which a business unit must first allocate its costs in accordance with the requirements of this Cost Accounting Standard shall use the transition method required by § 410.50(e) to allocate the G&A expense pool.

#### OR

#### ALTERNATIVE Y

(ii) Where, prior to the effective date of this Standard, a business unit's disclosed or established cost accounting practice was to use a cost of sales or sales base, final cost objectives in existence on the date on which a business unit must first allocate its costs in accordance with the requirements of this Cost Accounting Standard shall use the transition method required by § 410.50(e) to allocate the G&A expense pool.

tion method required by § 410.50(e) to allocate the G&A expense pool.

(c) Home office expenses received by a segment shall be allocated to segment cost objectives as required by § 410.50(g).

(d) Notwithstanding any other provisions herein, any costs which do not satisfy the definition of G&A expenses in this Standard, but which are currently classified by a business unit as G&A expenses (e.g., selling cost) or are required by a controlling agency to be accounted for in the same way the business unit accounts for G&A expenses (e.g., Independent Research and Development costs and Bidding and Proposal costs), shall continue to be treated pursuant to provisions of existing laws, regulations, and other controlling factors.

#### § 410.50 Techniques for application.

(a) G&A expenses of a segment(s) incurred by another segment shall be removed from the incurring segment's G&A expense pool. These expenses shall be allocated to the segment(s) for which the expenses were incurred on the basis of the beneficial or causal relationship existing between the expenses incurred and all benefiting or causing segments. If the expenses are incurred for two or more segments, they shall be allocated using an allocation base common to all such segments.

(b) The G&A expense pool may be combined with other expenses for allocation to final cost objectives provided that:

(1) The allocation base used for the combined pool would be appropriate both for the allocation of the G&A expense pool under this Standard and for the allocation of the other expenses; and

(2) Provision is made to identify the components and total of the G&A expense pool separately from the other expenses in the combined pool.

(c) Expenses which are not G&A expenses and are insignificant in amount may be included in the G&A expense pool for allocation to final cost objectives.

(d) The cost input base used to allocate the G&A expense pool shall include all significant elements of that cost input which represent the total activity of the business unit. The cost input measure selected to represent the total activity of a business unit during a cost accounting period may be any one of the three: total cost input, value-added cost input, or single element cost input. The determination of which allocation base best represents the total activity of a business unit must be judged on the basis of the facts of each situation.

(1) A total cost input allocation base is generally acceptable as an appropriate measure of the total activity of a business unit.

(2) Value-added cost input may be used as an allocation base where inclusion of material and subcontract costs would significantly distort the allocation of the G&A expense pool in relation to the benefits received, but where costs other than direct labor are significant measures of total activity. A value-added cost input base is total cost input less material and subcontract costs.

(3) A single element cost input base, e.g., direct labor hours or direct labor dollars, which represents the total activity of a business unit may be used to allocate the G&A expense pool where it produces equitable results. A single element base may not produce equitable results where other measures of activity are also significant in relation to total activity. A single element base is inappropriate where it is an insignificant part of the total cost of some of the final cost objectives.

#### ALTERNATIVE X

(e) The transition method for allocating the G&A expense pool shall be as provided below.

(1) A business unit, whose established or disclosed cost accounting practice is to use a cost of sales or sales base to allocate its G&A expense pool, and which has final cost objectives subject to the CAS clause existing on the date on which it must first allocate costs in accordance with the requirements of this Cost Accounting Standard shall allocate its G&A expense pool as provided below.

(2) Any such business unit shall use the following transition method to compute the allocation of its G&A expense pool until all pre-existing final cost objectives subject to the CAS clause have been completed:

(i) (A) Calculate the cost of sales or sales base in accordance with the cost accounting practice disclosed or established prior to the effective date of this Cost Accounting Standard;

(B) Calculate the G&A expense allocation rate using the base determined in paragraph (e) (2) (i) (A) of this section and use that rate to allocate from the G&A expense pool to the pre-existing final cost objectives subject to the CAS clause as described in paragraph (e) (1) of this section;

(ii) Calculate a cost input base in compliance with § 410.50(d) except that the cost input of all final cost objectives described in paragraph (e) (1) of this section shall be excluded; and

(iii) Use the cost input base calculated in paragraph (e) (2) (ii) of this section to determine the allocation of the pool that remains after step (i) (B) to the final cost objectives whose cost input was included in the base.

#### OR

#### ALTERNATIVE Y

(e) The transition method for allocating the G&A expense pool shall be as provided below.

(1) A business unit, whose established or disclosed cost accounting practice is to use a cost of sales or sales base to allocate its G&A expense pool, and which has final cost objectives existing on the date on which it must first allocate costs in accordance with the requirements of this Cost Accounting Standard shall allocate its G&A expense pool as provided below.

(2) Any such business unit shall use the following transition method to compute the allocation of its G&A expense

pool until all pre-existing final cost objectives have been completed;

(i) (A) Calculate the cost of sales or sales base in accordance with the cost accounting practice disclosed or established prior to the effective date of this Cost Accounting Standard;

(B) Calculate the G&A expense allocation rate using the base determined in paragraph (e) (2) (i) (A) of this section and use that rate to allocate from the G&A expense pool to the pre-existing final cost objectives subject to the CAS clause as described in paragraph (e) (1) of this section;

(C) Remove from the remaining pool of G&A expense the amount applicable to all other final cost objectives described in paragraph (e) (1) of this section by using the base and rate determined under paragraph (e) (2) (i) (A) and (B) of this section;

(ii) Calculate a cost input base in compliance with § 410.50(d) except that the cost input of all final cost objectives described in paragraph (e) (1) of this section shall be excluded; and

(iii) Use the cost input base calculated in paragraph (e) (2) (ii) of this section to determine the allocation of the pool that remains after steps (i) (B) and (C) to the final cost objectives whose cost input was included in the base.

(f) Cost input shall include those expenses which by operation of this Standard are excluded from the G&A expense pool and are not part of a combined pool of G&A expenses and other expenses allocated using the same allocation base.

(g) (1) Allocations of the home office expenses of (i) line management of particular segments or groups of segments, (ii) residual expenses, and (iii) directly allocated expenses related to the management and administration of the receiving segment as a whole shall be included in the receiving segment's G&A expense pool.

(2) Any separate allocation of the expenses of home office (i) centralized service functions, (ii) staff management of specific activities of segments, and (iii) central payments or accruals, which is received by a segment shall be allocated to the segment cost objectives in proportion to the beneficial or causal relationship between the cost objectives and the expense if such allocation is significant in amount. Where a beneficial or causal relationship for the expense is not identifiable with segment cost objectives, the ship between the cost objectives and the expense may be included in the G&A expense pool.

(h) Where a segment performs home office functions and also performs as an operating segment having a responsibility for final cost objectives, the expense of the home office functions shall be segregated. These expenses shall be allocated to all benefiting or causing segments, including the segment performing the home office functions, pursuant to disclosed or established accounting practices for the allocation of home office expenses to segments.

(i) For purposes of allocating the G&A expense pool, items produced or worked

on for stock or product inventory shall be accounted for as final cost objectives in accordance with the following paragraphs:

(1) Where items are produced or worked on for stock or product inventory in a given cost accounting period, the cost input to such items in that period shall be included only once in the computation of the G&A expense allocation base and in the computation of the G&A expense allocation rate for that period and shall not be included in the computation of the base or rate for any other cost accounting period.

(2) A portion of the G&A expense pool shall be allocated to items produced or worked on for stock or product inventory in the cost accounting period or periods in which such items are produced at the rates determined for such periods except as provided in paragraph (i) (3) of this section.

(3) Where the contractor does not include G&A expense in inventory as part of the cost of stock or product inventory items, the G&A rate of the cost accounting period in which such items are issued to final cost objectives may be used to determine that portion of the G&A expense pool to be allocated to issues of stock or product inventory items.

(j) Where a particular final cost objective in relation to other final cost objectives receives significantly more or less benefit from G&A expense than would be reflected by the allocation of such expenses using a base determined pursuant to paragraph (d) of this section, the Government and the contractor shall agree to a special allocation from the G&A expense pool to the particular final cost objective commensurate with the benefits received. The amount of a special allocation to any final cost objective made pursuant to such an agreement shall be excluded from the G&A expense pool required by § 410.40(a), and the particular final cost objective's cost input data shall be excluded from the base used to allocate this pool.

#### § 410.60 Illustrations.

(a) Business Unit A has been including the cost of scientific computer operations in its G&A expense pool. The scientific computer is used predominately for research and development. Costs of the scientific computer operations should not be included in the G&A expense pool because these costs benefit a particular group of cost objectives, research and development, rather than A as a whole.

(b) Segment B performs a budgeting function, the cost of which is included in its G&A expense pool. This function includes the preparation of budgets for another segment. The cost of preparing the budgets for the other segment should be removed from B's G&A expense pool and transferred to the other segment.

(c) (1) Business Unit C has a personnel function which is divided into two parts (i) a vice president of personnel who establishes personnel policy and overall guidance, and (ii) a personnel department which handles hirings, testing,

evaluations, etc. The expense of the vice president is included in the G&A expense pool. The expense of the personnel department is allocated to the other indirect cost pools based on the beneficial or causal relationship between that expense and the indirect cost pools. This procedure is in compliance with the requirements of this Standard.

(2) Business Unit C has included selling costs as part of its G&A expense pool. Business Unit C wishes to continue to include selling costs in its G&A expense pool. Under the provisions of this Standard, Business Unit C may continue to include selling costs in its G&A pool, and these costs will be allocated over a cost input base selected in accordance with the provisions of § 410.50(d) and (e).

(3) Business Unit C has included IR&D and B&P costs in its G&A expense pool. C has used a cost of sales base to allocate its G&A expense pool.

As of January 1, 1977, (assumed for purposes of this illustration) the date on which C must first allocate its G&A expense pool in accordance with the requirements of this Standard, C has among its final cost objectives several cost reimbursement contracts and fixed price contracts subject to the CAS clause [referred to as the pre-existing contracts].

With respect to the accounting for the IR&D and B&P costs, a. during the transition period (from January 1, 1977 to and including the cost accounting period during which the pre-existing contracts are completed), C shall allocate such costs to the pre-existing contracts as part of its G&A expense pool using a cost of sales base pursuant to § 410.50(e).

b. during the transition period such costs, as part of the G&A expense pool, shall be allocated to new cost reimbursement contracts and new fixed price contracts subject to the CAS clause using a cost input base as required by § 410.50(d) and (e).

c. beginning with the cost accounting period after the transition period the IR&D and B&P costs as part of the G&A expense pool shall be allocated to all final cost objectives using a cost input base as required by § 410.50(d).

If C accounted for IR&D and B&P costs in a cost pool separate and apart from the G&A expense pool, the allocation of these costs to final cost objectives would be computed in the same way as that illustrated above unless the parties have specifically agreed to a different allocation method pursuant to existing laws and regulations.

(4) Business Unit C has included selling costs as part of its G&A expense pool. Business Unit C has used a cost of sales base to allocate the G&A expense pool. Business Unit C desires to continue to allocate selling costs using the cost of sales base. Under the provisions of this Standard, Business Unit C would account for selling costs as a cost pool separate and apart from the G&A expense pool and continue to allocate these costs over a cost of sales base.

(d) (1) Business Unit D has accounted for selling costs in a cost pool separate

and apart from its G&A expense pool and has allocated these costs using a cost of sales base. Under the provisions of this Standard, Business Unit D may continue to account for those costs in a separate pool and allocate them using a cost of sales base. Business Unit D has a total cost input base to allocate its G&A expense pool. The selling costs will become part of the cost input base used by Business Unit D to allocate the G&A expense pool.

(2) During a cost accounting period, Business Unit D buys \$2,000,000 of raw materials. At the end of that cost accounting period, \$500,000 of raw materials remain in inventory. The \$500,000 of raw materials remaining in inventory is not part of the total cost input base for the cost accounting period, because it is not allocable to the production of goods and services during that period. If all of the \$2,000,000 worth of raw material had been allocated directly to a contract during the cost accounting period, the cost input base for the allocation of the G&A expense pool would include the entire \$2,000,000.

(3) Business Unit D manufactures a variety of testing devices. During a cost accounting period, Business Unit D acquires a small production facility using its own resources, and keeps for its own use one unit of a testing device that it manufactures and sells to its customers. The acquisition cost of the building is not part of the total cost input base; however, the depreciation taken on the building would be part of the total cost input base. The costs of construction of the small production facility are not part of the total cost input base. The requirements of Cost Accounting Standard 404 provide that those G&A expenses which are identifiable with the constructed asset and are material in amount shall be capitalized as part of the cost of the production facility. If there are G&A expenses material in amount and identified with the constructed asset, these G&A expenses would be removed from the G&A expense pool prior to the allocation of this pool to final cost objectives. The cost of the testing device shall be part of the total cost input base per the requirements of Cost Accounting Standard 404 which provides that the costs of

constructed assets identical with the contractor's regular product shall include a full share of indirect cost.

(e) Business Unit E has been using a cost of sales base to allocate its G&A expense pool to final cost objectives. Business Unit E uses a calendar year as its cost accounting period. On January 1, 1976, (assumed for purposes of this illustration) Cost Accounting Standard 410 becomes effective. On January 2, 1976, Business Unit E receives a contract containing the Cost Accounting Standards clause. As a result, Business Unit E must comply with the requirements of the Standard in the cost accounting period beginning in January 1977.

As of January 3, 1977, Business Unit E has the following fixed price contracts:

(1) Contract I—A four-year contract awarded in January 1975.

(2) Contract II—A three-year contract which was negotiated in March 1976, and was awarded in September 1976.

(3) Contract III—A four-year contract awarded on January 2, 1977.

Business Unit E will allocate its G&A expense pool to these contracts as follows:

(a) Contract I—Since Contract I was in existence prior to January 1, 1977, the G&A expense pool shall be allocated to it using a cost of sales base as provided in § 410.50(e).

(b) Contract II—Since this contract was in existence prior to January 1, 1977, the G&A expense pool will be allocated to it using a cost of sales base as provided in § 410.50(e).

(c) Contract III—Since this contract was awarded after January 1, 1977, the G&A expense pool shall be allocated to this contract using a cost input base.

Business Unit E will use the transition method of allocating the G&A expense pool to final cost objectives as provided in § 410.50(e), until all contracts awarded prior to January 1, 1977, are completed (1979 if the contracts are completed on schedule). Beginning with the cost accounting period subsequent to that time, Business Unit E will use a cost input to allocate the G&A expense pool to all cost objectives.

#### ALTERNATIVE X

(f) Business Unit F is first required to allocate its costs in accordance with the requirements of CAS 410 during the fiscal year beginning January 1, 1977. Business Unit F has used a cost of sales base to allocate its G&A expense pool.

During the year 1977, Business Unit F reported the following operating data:

Total	Non-cost-accounting-standard covered work existing prior to Jan. 1, 1977	New non-cost-accounting-standard covered work	Cost-accounting-standard covered fixed price work existing prior to Jan. 1, 1977	New cost-accounting-standard covered fixed price work	Cost-accounting-standard covered cost contracts prior to Jan. 1, 1977	New cost-accounting-standard covered cost contracts
Beginning Inventory.....	\$500,000	300,000	0	200,000	0	0
Cost Input.....	+3,000,000	400,000	500,000	600,000	700,000	300,000
	3,500,000	700,000	500,000	800,000	700,000	300,000
Cost of sales.....	-2,500,000	600,000	350,000	400,000	150,000	300,000
	1,000,000	100,000	150,000	400,000	550,000	0
Ending Inventory.....	1,000,000	100,000	150,000	400,000	550,000	0

NOTE.—G & A expense \$375,000 (in accordance with the requirements of this standard).

Non-CAS covered work existing prior to January 1, 1977 may include:

(1) Government contracts which do not contain the CAS clause;

(2) Contracts other than Government contracts or customer orders awarded prior to the date the business unit must first allocate its costs in compliance with the requirements of this Standard; and

(3) Production not specifically identified with contracts or customer orders under production or work orders existing prior to the date on which a business unit must first allocate its costs in compliance with this Standard and which are limited to time or quantity.

Production under standing or unlimited work orders, continuous flow processes and the like, not identified with contracts or customer orders are to be treated as final cost objectives awarded after the date on which a business unit must first allocate its costs in compliance with the requirements of this Standard.

Business Unit F will allocate the G&A expense pool as follows:

1. Calculate the cost of sales base—\$250,000.

2. Calculate the cost of sales allocation rate—\$375,000/\$250,000=0.15.

3. Allocate a portion of the G&A expense pool to the CAS-Covered contracts existing prior to 1/1/77 using the cost of sales rate.

Cost Accounting Standard—Covered fixed price contracts \$400,000 × 0.15 ..... \$60,000

Cost Accounting Standard—Covered cost contracts \$700,000 × 0.15 ..... 105,000

Total ..... \$165,000

Total	Non-cost-accounting-standard covered work existing prior to Jan. 1, 1977	New non-cost-accounting-standard covered work	Cost-accounting-standard covered fixed price work existing prior to Jan. 1, 1977	New cost-accounting-standard covered fixed price work	Cost-accounting-standard covered cost contracts prior to Jan. 1, 1977	New cost-accounting-standard covered cost contracts
Beginning Inventory.....	\$500,000	300,000	0	200,000	0	0
Cost Input.....	+3,000,000	400,000	500,000	600,000	700,000	300,000
	3,500,000	700,000	500,000	800,000	700,000	300,000
Cost of sales.....	-2,500,000	600,000	350,000	400,000	150,000	300,000
	1,000,000	100,000	150,000	400,000	550,000	0
Ending Inventory.....	1,000,000	100,000	150,000	400,000	550,000	0

NOTE.—G & A expense \$375,000 (in accordance with the requirements of this standard).

Non-CAS covered work existing prior to January 1, 1977 may include:

(1) Government contracts which do not contain the CAS clause;

(2) Contracts other than Government contracts or customer orders awarded prior to the date the business unit must first allocate its costs in compliance with the requirements of this Standard; and

(3) Production not specifically identified with contracts or customer orders under production or work orders existing prior to the date on which a business unit must first allocate its costs in compliance with this Standard and which are limited to time or quantity.

Production under standing or unlimited work orders, continuous flow processes and the like, not identified with contracts or customer orders are to be treated as final cost objectives awarded after the date on which a business unit must first allocate its costs in compliance with the requirements of this Standard.

Business Unit F will allocate the G&A expense pool as follows:

4. Determine the amount of the G&A expense pool which remains to be allocated.

\$375,000 - \$165,000 = \$210,000

5. Calculate a cost input base for the remaining final cost objective.

\$400,000 + \$500,000 + \$500,000 + \$300,000 = \$1,700,000

6. Calculate a cost input rate.

\$210,000/\$1,700,000=0.124

7. Allocate a portion of the G&A expense pool to the new CAS-covered cost and fixed price contracts using the cost input rate.

New CAS-Covered Fixed Price Contracts.

\$500,000 × 0.124 = \$62,000

New CAS-Covered Cost Contracts.

\$300,000 × 0.124 = \$37,200

The G&A expenses applicable to Non-CAS covered work is:

\$90,000 + (\$500,000 × 0.092) = \$136,000

OR

#### ALTERNATIVE Y

(f) Business Unit F is first required to allocate its cost in accordance with the requirements of CAS 410 during the fiscal year beginning January 1, 1977. Business Unit F has used a cost of sales base to allocate its G&A expense pool.

During the year 1977, Business Unit F reported the following operating data:

Total	Non-cost-accounting-standard covered work existing prior to Jan. 1, 1977	New non-cost-accounting-standard covered work	Cost-accounting-standard covered fixed price work existing prior to Jan. 1, 1977	New cost-accounting-standard covered fixed price work	Cost-accounting-standard covered cost contracts prior to Jan. 1, 1977	New cost-accounting-standard covered cost contracts
Beginning Inventory.....	\$500,000	300,000	0	200,000	0	0
Cost Input.....	+3,000,000	400,000	500,000	600,000	700,000	300,000
	3,500,000	700,000	500,000	800,000	700,000	300,000
Cost of sales.....	-2,500,000	600,000	350,000	400,000	150,000	300,000
	1,000,000	100,000	150,000	400,000	550,000	0
Ending Inventory.....	1,000,000	100,000	150,000	400,000	550,000	0

NOTE.—G & A expense \$375,000 (in accordance with the requirements of this standard).

1. Calculate the cost of sales base—\$250,000.

2. Calculate the cost of sales allocation rate—\$375,000/\$250,000=0.15.

3. Allocate a portion of the G&A expense pool to the CAS-Covered cost contracts and fixed price contracts existing prior to 1/1/77 using the cost of sales rate.

Cost Accounting Standard—Covered Fixed Price Contracts \$400,000 × 0.15 ..... \$60,000

Cost Accounting Standard—Covered Cost Contracts \$700,000 × 0.15 ..... 105,000

Total ..... \$165,000

4. Remove from the remaining \$210,000 (\$375,000-\$165,000) pool of G&A expenses the amount applicable to the other final cost objectives existing prior to 1/1/77 using the cost of sales rate.

\$600,000 × 0.15 = \$90,000

\$210,000 - \$90,000 = \$120,000

5. Calculate a cost input base for the remaining final cost objectives.

\$500,000 + \$500,000 + \$300,000 = \$1,300,000

6. Calculate a cost input rate.

\$120,000/\$1,300,000=0.092

7. Allocate a portion of the G&A expense pool to the new CAS-Covered Contracts and Fixed Price Contracts using the cost input rate.

Covered Fixed Price Contracts.

\$500,000 × 0.092 = \$46,000

Covered Cost Contracts

\$300,000 × 0.092 = \$27,600

G&A expenses applicable to Non-CAS covered work is:

\$90,000 + (\$500,000 × 0.092) = \$136,000

(g) Business Unit G produces Item Z for stock or product inventory. The business unit does not include G&A expense as part of the inventory cost of these items. A production run of these items occurred during Cost Accounting period 1. A number of the units produced were not issued during Period 1 and are issued in Period 2. Business Unit G should apply the G&A expense rate of Period 1 to those units of item 2 issued during the period and may apply the rate of Period 2 to the units issued in Period 2. If the practice of Business Unit G is to include G&A expense as part of the cost of stock or product inventory, the inventory cost of all units of Item Z produced in Period 1 and remaining in inventory at the end of Period 1, should include G&A expense using the G&A rate of Period 1.

(h) Business Unit H produces Item X for stock or product inventory. A production run of these items was started, finished, and placed into inventory in a single cost accounting period. These items are issued during the next cost accounting period. The cost of items produced for stock or product inventory should be included in the G&A base in the same year they are produced. The cost of such items is not to be included in the G&A base on the basis of when they are issued to final cost objectives. Therefore, the time of issuance of these items from inventory to a final cost objective is irrelevant in computing the G&A base.

(i) The normal productive activity of Business Unit I includes the construction of base operating facilities for others. I uses a total cost input base to allocate G&A expense to final cost objectives. As part of a contract to construct an operating facility, I agrees to acquire a large group of trucks and other mobile equipment to equip the base operating facility. I does not usually supply such equipment. The cost of the equipment constitutes a significant part of the contract cost. A special G&A allocation to this contract shall be agreed to by the parties if they agree that in the circumstances the contract as a whole receives substantially less benefit from the G&A expense pool than that which would be represented by a cost allocation based on inclusion of the contract cost in the total cost input base.

(j) The home office of Segment J separately allocates to benefiting or causing segments significant home office expenses of (i) staff management functions relative to manufacturing, (ii) staff management functions relative to engineering, (iii) central payment of health insurance costs and (iv) residual ex-

penses. J maintains three indirect cost pools: (1) G&A expense, (ii) manufac-

ments")<sup>1</sup> were signed into law. Section 11A(c) (4) (A) of the Act 15 U.S.C. 78k-1

a proceeding, pursuant to Section 19(c) of the Act, to determine

effort, along with a report of certain additional information (including the details of

tele." The NYSE apparently does not interpret this restriction to extend to publish-

tain securities dealt in on the exchange." Unlike the NYSE, however, the Amex in-

penses. J maintains three indirect cost pools: (i) G&A expense, (ii) manufacturing overhead and (iii) engineering overhead; all Home office expenses allocated to J are included in J's G&A expense pool. This accounting practice of J does not comply with § 410.50(g). Home office residual expenses should be in the G&A expense pool, and the expenses of the staff management functions relative to manufacturing and engineering should be included in the manufacturing overhead and engineering overhead pools, respectively. The health insurance costs should be allocated in proportion to the beneficial and causal relationship between these costs and J's cost objectives.

#### § 410.70 Exceptions.

This Standard shall not apply to contractors who are subject to the provisions of Federal Management Circular 73-8 (Cost Principles for Educational Institutions) or Circular 74-4 (Principles for Determining Costs Applicable to Grants and Contracts with State and Local Governments).

#### § 410.80 Effective date.

(a) The effective date of this Cost Accounting Standard is [Reserved].  
(b) This Cost Accounting Standard shall be followed by each contractor after the start of his next fiscal year beginning after the receipt of a contract to which this Cost Accounting Standard is applicable.

ARTHUR SCHOENHAUT,  
Executive Secretary.

### SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Eel. No. 34-11623; File No. 4-180]

#### AMENDMENT OR ABROGATION OF EXCHANGE OFF-BOARD TRADING RULES Notice of Rulemaking Proceeding

The Securities and Exchange Commission today announced that it is commencing a proceeding, pursuant to Section 19(c) of the Securities Exchange Act of 1934 (the "Act") (15 U.S.C. 78s(c)), to determine (i) whether to amend or abrogate rules of national securities exchanges which limit or condition the ability of members to effect transactions otherwise than on such exchanges; and (ii) whether to compel exchanges to adopt any one of proposed §§ 240.19c-1 (Alternative A), 240.19c-1 (Alternative B) or 240.19c-1 (Alternative C), described below, or some variation thereof, to replace the foregoing existing exchange rules in the event it is determined to amend or abrogate such existing rules. The Commission also announced that it will hold oral hearings beginning Wednesday, October 1, 1975, at 10 a.m., in Room 776 at the Commission's headquarters, 500 North Capitol Street, Washington, D.C. 20549.

#### INTRODUCTION

On June 4, 1975, the Securities Acts Amendments of 1975 (the "1975 Amend-

ments")<sup>1</sup> were signed into law. Section 11A(c) (4) (A) of the Act 15 U.S.C. 78k-1 (c) (4) (A), as added by the 1975 Amendments, directed the Commission to review all rules<sup>2</sup> of national securities exchanges which limit or condition the ability of members to effect transactions in securities otherwise than on such exchanges. The legislative history of Section 11A(c) (4) (A) indicated that the Commission must review such rules de novo and must evaluate them in light of the purposes of the Act and in consideration of certain competitive standards made explicit by the 1975 Amendments.<sup>3</sup> Section 11A(c) (4) also provided that, on or before the ninetieth day following the day of enactment of the 1975 Amendments, the Commission shall (i) report to the Congress the results of this review, including the effects on competition of these rules, and (ii) commence a proceeding, in accordance with Section 19(c) of the Act, to amend any such rule imposing a burden on competition which does not appear to the Commission to be necessary or appropriate in furtherance of the purposes of the Act.

#### COMMISSION'S REPORT TO THE CONGRESS

Pursuant to the Congressional directive described above, the Commission today has transmitted to the Congress the following report of the results of its review (appendices omitted):

PRESIDENT OF THE SENATE, SPEAKER OF THE HOUSE OF REPRESENTATIVES, CONGRESS OF THE UNITED STATES, Washington, D.C.

DEAR SIRS: Section 11A(c) (4) (A) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, Pub. L. No. 94-29 (June 4, 1975), directs the Commission to review any and all rules of national securities exchanges which limit or condition the ability of members to effect transactions in securities otherwise than on such exchanges. Further, the Commission is directed to report to the Congress the results of its review, including a description of the effects on competition of such rules, and to commence a proceeding, in accordance with Section 19(c) of the Act, to amend any such rule imposing a burden on competition, if such rule does not appear to be necessary or appropriate in furtherance of the purposes of the Act. This is a report of the results of that review.

The Commission has concluded that off-board trading rules of exchanges impose burdens on competition, and the Commission is not now prepared to conclude that these burdens are necessary or appropriate in furtherance of the purposes of the Act. Accordingly, we have today, as required by Section 11A(c) (4) (A) of the Act, commenced

<sup>1</sup> Pub. L. No. 94-29, 89 Stat. 97 (June 4, 1975).

<sup>2</sup> As defined by Section 3(a) (27) of the Act (15 U.S.C. 78c(a) (27)), the term "rules of an exchange" includes the constitution, articles of incorporation, by-laws and rules of such exchange. . . . and such of the states policies, practices, and interpretations of such exchange. . . . as the Commission, by rule, may determine to be necessary or appropriate in the public interest or for the protection of investors to be deemed to be rules of such exchange. . . .

<sup>3</sup> See, Committee on Conference, Conference Report to Accompany S. 249, H.R. Rep. No. 94-229, 94th Cong., 1st Sess. 96 (1975).

a proceeding, pursuant to Section 19(c) of the Act, to determine

(i) the extent to which such rules do engender significant anticompetitive effects;

(ii) whether, although such rules are anti-competitive, there are countervailing considerations which appropriately outweigh the need to abrogate or amend such rules at the present time; and

(iii) whether such rules could be appropriately modified so as to further the purposes of the Act.

All of the nation's registered securities exchanges have rules which are specifically intended to limit or condition the ability of a member to effect transactions over-the-counter in securities listed, or admitted to unlisted trading privileges, on the exchanges. As more fully explained herein, these rules have two major effects on competition. One, restrictions on "off-board" principal transactions appear to impede the ability of an exchange member to make two-sided continuous markets in direct competition with existing specialists and existing over-the-counter market makers in listed securities ("third market makers"), and therefore limit the potential competition among dealers in listed securities which might otherwise be realized. Second, restrictions on off-board agency transactions limit the access which exchange brokers have to one segment of the professional dealer community, third market makers, in favor of another segment, exchange specialists, and thereby disadvantage third market makers in the competition for members' business.

A. Exchange Rules which Limit or Condition the Ability of Members to Effect Transactions in Securities Listed, or the Subject of Unlisted Trading Privileges, on Such Exchanges.

New York Stock Exchange, Rule 394<sup>1</sup> of the New York Stock Exchange ("NYSE") is generally thought to be the most restrictive of the off-board trading provisions of exchanges. A member is prohibited from effecting transactions in "listed stock" over-the-counter as principal or agent unless the transaction is specifically exempted<sup>2</sup> or permission is granted<sup>3</sup>.

A member is permitted by paragraph (b) of Rule 394 to effect an off-board transaction as agent so long as certain conditions are observed. Among these are the requirements that (i) the transaction be effected with a third market maker qualified pursuant to Rule 19b-1 under the Act;<sup>4</sup> (ii) a "diligent effort" be made to explore the market on the floor;<sup>5</sup> (iii) a report of such

<sup>1</sup> See Appendix A at p. A-1. Read literally, Rule 394(a) would prohibit a member from effecting transactions in listed stocks "off the exchange," but it is applied only to over-the-counter transactions and not to transactions on other exchanges. See Appendix B at pp. 1, 2.

<sup>2</sup> Certain preferred and guaranteed stocks are exempted specifically, as are off-board secondary distributions in conformity with NYSE Rule 393.

<sup>3</sup> Over the years, the NYSE has built up a specific body of interpretations permitting off-board principal transactions in certain specified situations. For example, a member is permitted to purchase stock for his own account off-board at a price below the prevailing market, without filling better bids on the specialist's book or on the floor and without reporting the transaction on the tape, in order to effect a special offering on-board pursuant to Rule 391. We understand that the exchange gave permission for 170 such off-board transactions in 1973 and 52 such transactions in 1974.

<sup>4</sup> 17 C.F.R. 240.19b-1.

effort, along with a report of certain additional information (including the details of the effort made to explore the floor and the extent of the specialist's interest), be made to a floor governor; (iv) a reoffering be made on the floor prior to an off-floor trade to permit displacement by public orders represented in the crowd and bids or offers on the specialist's book at the same price and on the same side of the market as the third market maker, and by the specialist acting as dealer, if the specialist, before the third market maker was solicited, had advised the member of the extent of his interest at an indicated price or prices at which the off-floor transaction was proposed to be made; and (v) a subsequent report be made of the particulars of the transaction. In addition, the rule requires that the diligent effort to explore the market on the floor and the report of such effort to a floor official must be made prior to any solicitation of the third market maker (indeed, transactions initiated by the third market maker have been specifically interpreted not to comply with the rule) and apparently has been interpreted to require that the member disclose his customer's order to the specialist.

Amendments to Rule 394(b) were proposed by the New York Stock Exchange in 1974.<sup>6</sup> The amendments would eliminate the requirement of a report to a floor governor prior to any solicitation of a third market maker. In addition, the amendments would alter the solicitation feature of the Rule so that if a third market maker expressed a willingness to be solicited by a member in a particular issue, that fact alone would no longer bar the transaction, assuming all other conditions of the amended procedure were satisfied. Finally, the amendments propose to alter the displacement procedure to permit floor professionals to displace the third market maker at the same or a better price if such persons indicated a willingness to transact at a specific price or prices when informed that a third market maker was to be solicited.

Off-board transactions by New York Stock Exchange specialists are governed by NYSE Rule 107.<sup>7</sup> A specialist may effect a transaction off-board only with the approval of a floor governor; such approval will not be granted unless the floor governor has determined that the regular market cannot absorb or supply the block within a reasonable period of time at reasonable prices. If permission is granted, the specialist may effect the transaction off-board without executing better bids or offers on his book which he represents as agent. The specialist may not, however, bid for or purchase stock on the exchange at destabilizing prices subsequent to an off-board purchase.

In addition to the foregoing, NYSE Rule 438 prohibits a member from publishing bids and offers for listed securities in "quotation sheets having a strictly professional client-

<sup>6</sup> The amendments were submitted on October 4, 1974, pursuant to Rule 17a-8 under the Act. After certain correspondence with the NYSE to clarify several aspects of the proposed amendments, letter from Lee A. Pickard, Director, Division of Market Regulation to James E. Buck, Secretary, New York Stock Exchange, October 24, 1974, and letter from James E. Buck, Secretary, New York Stock Exchange to Lee A. Pickard, Director, Division of Market Regulation, November 26, 1974, the Commission published the proposed amendments for public comment. Securities Exchange Act Release No. 11151 (December 20, 1974). See Appendix A at pp. A-4-A-20. No action has been taken with respect to the proposed amendments.

<sup>7</sup> See Appendix A at p. A-21.

tele."<sup>8</sup> The NYSE apparently does not interpret this restriction to extend to publishing bids or offers in an electronic quotation system. Nevertheless, it is our understanding that, in response to a member's inquiry whether he could quote two-sided markets in the National Association of Securities Dealers Quotation System ("NASDAQ"), the NYSE staff answered negatively on the grounds that the National Association of Securities Dealers ("NASD") requires all quotations in NASDAQ to be firm for 100 shares, a requirement the member would not be able to meet, since Rule 394 would require that the order be brought to the floor for execution and displacement.

American Stock Exchange. Rule 5 of the American Stock Exchange ("Amex") prohibits a member from effecting over-the-counter transactions in certain securities admitted to trading on the exchange unless the transaction is specifically exempted under the rule.<sup>9</sup> One of the exceptions covers transactions made with prior permission of the exchange. It is our understanding that, pursuant to this exception, the American Stock Exchange will approve a transaction by a member as principal or as agent for a customer if the member can "reasonably demonstrate" that a better execution can be obtained.

Prior to effecting any such transaction, the member must request permission from the exchange staff and in connection therewith "should" furnish certain details of the transaction. The staff weighs the request in terms of the character of the market, the price and size of the transaction and related factors, and will grant the request "if the Exchange is satisfied, in each instance, that the transaction can be executed more advantageously off the Exchange." In connection with the review of any such request, a staff member personally will go to the floor and review the facts with a floor official. In all, the Amex states, this approval procedure "does not exceed ten minutes."

Assuming compliance with the above procedure results in permission for an off-floor transaction, that permission is conditioned on satisfying the orders on the book at a better or the same price. The specialist and other floor professionals are also permitted to participate at the same or a better price, although, as a practical matter, since the proposed off-floor transaction is not announced on the floor, floor professionals other than the specialist would not have an opportunity to participate unless they previously had announced their interest publicly or had left a limit order for execution with the specialist.

Off-board transactions by American Stock Exchange specialists are governed by Amex Rules 187 and 189.<sup>10</sup> Specialists are prohibited from effecting off-board transactions except in certain narrow instances, namely a transaction as principal to offset another transaction made in error or a transaction as principal made with prior approval of the exchange (i) to tender securities the subject of a public offer or (ii) to decrease or liquidate a position in a security subject to a trading suspension.

American Stock Exchange Rule 482 is similar in terms to NYSE Rule 438, noted above, in prohibiting a member from listing his name in quotation sheets "having a strictly professional clientele" with respect to cer-

<sup>8</sup> See Appendix A at p. A-22.

<sup>9</sup> See Appendix A at p. A-23.

<sup>10</sup> Comments of the American Stock Exchange in response to Securities Exchange Act Release No. 11521, Commission File No. S7-543 at p. 4 (July 30, 1975).

<sup>11</sup> See Appendix A at pp. A-24-A-25.

tain securities dealt in on the exchange.<sup>11</sup> Unlike the NYSE, however, the Amex interprets this prohibition to extend to quotations in an electronic inter-dealer quotation system.

Boston Stock Exchange. Section 23, Chapter II, of the rules of the Boston Stock Exchange prohibits off-board transactions in securities admitted to trading on the exchange unless, prior to such a transaction, the member has made a bona fide effort to effect the transaction on the exchange and has received permission from the exchange to trade off-board.<sup>12</sup>

Chicago Board Options Exchange. Rule 6.49(a) of the Chicago Board Options Exchange provides that a member shall not effect off-board transactions unless (i) the member has attempted to execute the transaction on the floor and has "reasonably ascertained" that it may be executed at a better net price off the floor, and (ii) the customer has been informed of and has approved the off-floor execution.<sup>13</sup>

Cincinnati Stock Exchange. Section 26 of the By-Laws of the Cincinnati Stock Exchange requires simply that prior to an off-board transaction the member must "make an equivalent bid or offer on the floor of the exchange."<sup>14</sup>

Detroit Stock Exchange. Chapter I, Section 5 of the Detroit Stock Exchange Rules has only one requirement: the exchange must grant permission prior to any off-board transaction.<sup>15</sup>

Intermountain Stock Exchange. Similarly, Rule 9 of Article XII of the Rules of the Intermountain Stock Exchange prohibits a member from effecting an off-board transaction without the "prior permission of the Board of Governors."<sup>16</sup>

Midwest Stock Exchange. Rule 9 of Article XVII of the Rules of the Midwest Stock Exchange ("MSE")<sup>17</sup> prohibits a member from effecting an over-the-counter transaction in securities listed or admitted to unlisted trading privileges on the exchange without prior permission of an officer of the exchange.<sup>18</sup> We understand that, pursuant to interpretation, prior permission is no longer actually required although subsequent notification must be made; if, upon review, the transaction is not found to be in compliance with certain published interpretations, it apparently would then be disapproved.

Among other things, the interpretations require that any such off-floor transaction may be effected only with a broker-dealer who is "registered" pursuant to Rule 17a-9 under the Act and who is making markets in listed securities on a continuous basis, and that the order must be "made available" to the regular membership prior to the off-floor trade.<sup>19</sup>

<sup>11</sup> See Appendix A at p. A-25.

<sup>12</sup> See Appendix A at p. A-26.

<sup>13</sup> See Appendix A at p. A-27.

<sup>14</sup> See Appendix A at p. A-28.

<sup>15</sup> See Appendix A at p. A-29.

<sup>16</sup> See Appendix A at p. A-30.

<sup>17</sup> See Appendix A at p. A-31.

<sup>18</sup> See Appendix A at p. A-32.

<sup>19</sup> It is our understanding that this provision is interpreted to be inapplicable to transactions in securities in the MSE inactive post.

<sup>20</sup> The interpretations specifically require that the MSE specialist be made aware of the transaction. The specialist is permitted to participate in the off-board transaction at the same price as the off-board trade if he indicated an interest prior to the trade. If he did not indicate an interest in the order at a specified price, then he will only be allowed to participate if the third market maker's bid or offer is different from the indicated price.

to be brought to the floor for execution and

cated to specialists whereas the block mar-

In addition to the foregoing, if the off-floor transaction is to be effected by the MSE specialist for his own account, the transaction must be for a minimum of 500 shares (except in issues valued at over \$100 per share) and the specialist must be willing to bid for or to offer (depending on whether the off-board transaction was a purchase or a sale) the same amount of stock at the same price on the exchange. A transaction by an MSE floor member off-board must also be for a minimum of 500 shares (except to accommodate a regular customer) as must arbitrage transactions between the exchange and the over-the-counter market. Finally, all transactions effected off the floor by floor members must be reported in the consolidated transaction reporting system as an MSE transaction and are subject to an MSE transaction fee.

**Pacific Stock Exchange.** Rule XIII of the Pacific Stock Exchange permits off-board executions, without prior approval, provided (1) the transaction is with a broker-dealer making continuous two-sided markets in the security and who files reports pursuant to Rule 17a-9 under the Act, and (2) an equivalent bid or offer has first been made on both the Los Angeles and San Francisco floors of the Pacific Exchange.<sup>20</sup>

**PBW Stock Exchange.** Rule 132 of the PBW Stock Exchange prohibits over-the-counter transactions in securities admitted to trading on the exchange unless, prior to such a transaction, the member (1) has made a bona fide effort to effect the transaction on the exchange, and (2) receives permission from the PBW Stock Exchange to trade off-board.<sup>21</sup>

**Spokane Stock Exchange.** Rule 18.3 of the Spokane Stock Exchange prohibits any transaction off-the-floor of the exchange during the regular trading session. Spokane permits unrestricted off-floor transactions, however, during the "inter-session," a trading session about equal in length of time to the regular trading session.<sup>22</sup>

In addition to the foregoing, certain other rules of exchanges having some effect on off-board executions by members could be considered strictly as coming within the scope of review commanded by Section 11A(c)(4) (A); in the Commission's judgment, however, these rules do not appear to have a significant effect on competition, although further study may alter this view. For example, both the New York and American Stock Exchanges impose certain limitations on transactions in rights to subscribe to stock issues,<sup>23</sup> a very specialized market, and require that all transactions in bonds involving nine bonds or less be brought to their respective floors.<sup>24</sup> These rules, along with certain others, such as the so-called "New York City Rule,"<sup>25</sup> which only arguably comes within the Section 11A(c)(4) (A) directive, have been reserved for the Commission's more general review of all exchange rules required by Section 31(b) of the Securities Acts Amendments of 1975.<sup>26</sup>

<sup>25</sup> Article XIV, Section 8 of the NYSE Constitution provides:

Whenever it is adjudged in a proceeding under this Article that a member or allied member is connected either through a partner or otherwise, with another exchange or similar organization in the City of New York

#### B. Effects on Competition of Off-Board Trading Rules

The Commission has reviewed the effects on competition of the off-board trading rules described above in accordance with our perception of the legislative intent underlying Section 11A(c)(4) (A).<sup>27</sup> Thus, the

which permits dealings in any securities dealt in on the Exchange, or deals directly or indirectly upon such other exchange or organization, or deals publicly outside the Exchange in securities dealt in on the Exchange, such member or allied member may be suspended or expelled. . . .

2 CCH, *New York Stock Exchange Guide* Para. 1658 at pp. 1095-96.

Article V, Section 4(g) of the Constitution of the Amex provides:

Whenever it is adjudged in a proceeding under this Article that a member or member organization is connected, either through a partner or otherwise, with another exchange or similar organization in the City of New York which permits dealings in any securities dealt in on this Exchange, or deals directly or indirectly upon such other exchange or organization in securities listed or admitted to unlisted trading on this Exchange, such member or member organization may be suspended or expelled from membership.

2 CCH, *American Stock Exchange Guide* Para. 9043 at p. 2161.

Neither the New York nor the American Stock Exchanges have listed or traded securities listed or traded on the other, nor has such trading existed on any other exchange in New York in this century.

Section 31(b) of the Securities Acts Amendments of 1975 provides in part:

If it appears to the Commission at any time within one year of the effective date of any amendment made by this Act to the Securities Exchange Act of 1934 that the organization or rules of any national securities exchange or registered securities association registered with the Commission on the date of enactment of this Act do not comply with such Act as amended, the Commission shall so notify such exchange or association in writing, specifying the respects in which the exchange or association is not in compliance with such Act.

The Joint Explanatory Statement of the Committee of Conference stated, with respect to Section 11A(c)(4) (A):

Both the Senate bill and the House amendment contained provisions directing the elimination of restrictive rules and practices which prohibit brokers from searching out the best price for their customers or which limit or impede market making activities as inconsistent with the development of a national market system.

With respect to exchange rules which limit or condition a member's ability to transmit [sic] business or [sic] any other exchange or otherwise than on an exchange, the House bill specifically required their elimination after September 1, 1975, unless specifically reviewed and approved by the Commission. Upon review of such rules, the Commission would be required to find that (1) any limitation or condition imposed on the ability of an exchange or association member to select among competing markets was consistent with such member's agency obligation to his customer and (2) the restriction was otherwise necessary to accomplish the purposes of the Exchange Act.

The Senate bill did not attempt to eliminate specific enumerated barriers to competition. Rather, the Senate bill charged the SEC with an explicit and pervasive obligation to eliminate all present and future competitive restraints that could not be justified by the purposes of the Exchange Act. The Commission was directed to remove existing burdens on competition and to refrain from im-

Commission has sought to review off-board trading rules *de novo* in order to reach such conclusions as analysis, the current methods of doing business in the securities markets and the purposes of the Act, as amended by the Securities Acts Amendments of 1975, may dictate. In connection with the preparation of this report, therefore, the Commission solicited and received the written views of various national securities exchanges, third market makers, and other interested persons.<sup>28</sup> Nevertheless, in reaching its conclusions, the Commission has taken cognizance of the prior studies of this question, including *inter alia*, Commission hearings,<sup>29</sup> studies, policy statements and reports of advisory committees,<sup>30</sup> as well as Congressional reports.<sup>31</sup>

posing, or permitting to be imposed, any new regulatory burden "not necessary or appropriate in furtherance of the purposes" of the Exchange Act. Thus, the Commission was obligated to review existing and proposed rules of the self-regulatory organizations and to abrogate any present rule, or to disapprove any proposed rule imposing a competitive restraint neither necessary nor appropriate in furtherance of a legitimate regulatory objective. . . . The Commission's responsibility under the Senate bill is to balance the perceived anticompetitive effects of a regulatory policy or decision (whether its own or that of a self-regulatory organization) against the purposes of the Exchange Act that are advanced thereby and the costs of doing so.

The conference substitute accepts the Senate provisions with respect to competitive standards. A specific provision is added, however, concerning exchange rules which limit or condition the ability of members to effect transactions in securities otherwise than on such exchanges. The Commission is directed to review such rules *de novo* in light of the specific competitive standards added by the Securities Acts Amendments of 1975 and, on or before the 90th day following the date of enactment of the Securities Acts Amendments of 1975, to (1) report to Congress the results of its review, including the effects on competition of such rules, and (2) commence a proceeding if such rules do not meet these requirements in accordance with the provisions of new Section 19(c) of the Exchange Act.

<sup>32</sup> In contrast, the Chicago Board Options Exchange has segregated the agency and dealer functions of floor professionals. Limit orders are left with a "board broker" for execution and competing market makers are appointed for each of the option contracts traded. We understand that as many as thirty market makers compete in certain option contracts on the floor of the Chicago Board Options Exchange.

<sup>33</sup> See 4 SEC, *Institutional Investor Study Report*, H. Doc. No. 92-64, 92d Cong., 1st Sess. at 1932-1948 (1971).

The Commission has given particular scrutiny to New York Stock Exchange Rule 394. Transactions in NYSE-listed stocks account for virtually all the volume in the over-the-counter market for listed securities. Further, the rules of other national securities exchanges limiting or conditioning the ability of members to trade off-board are generally less restrictive than NYSE Rule 394.

#### TRADING BY MEMBERS AS PRINCIPAL

All exchanges, except for the Chicago Board Options Exchange, have adopted the so-called unitary specialist system. Thus, whenever a new security is admitted to trading on an exchange, it will be assigned or "allocated" to a single specialist or specialist unit. Thereafter, all transactions in that security, with exceptions not relevant here, are required to be effected at the specialist's post, and customers' orders at a price limited away from the market generally are left with the specialist for execution.<sup>34</sup>

Exchanges usually permit another class of member—the floor trader—to compete on the floor of the exchange with the specialist by buying and selling securities as principal for his own account at the specialist's post. Floor traders do not, however, make regular two-sided markets; instead, they look for special trading situations in which they can profitably commit their capital. Members' trading for their own accounts from off the floor similarly is to effectuate investment decisions. Regardless of differences in motivations, the foregoing classes of members do compete for orders and to secure trading and investment opportunities arising in the normal course of the market.

In connection with reviewing competition in the dealer function among exchange members, one other phenomenon is worthy of note. The institutionalization of the trading markets in the last decade gave rise to substantial demand for liquidity in size. Well-capitalized institutionally-oriented brokerage houses responded to this demand by providing an "upstairs" market in size for their institutional customers.<sup>35</sup> (Of course, a transaction between an institution and a member acting as principal for his own account, once negotiated "upstairs," is presently required

1972); *Report to the SEC by the Advisory Committee on a Central Market System* (March 6, 1973); *SEC Policy Statement on the Structure of a Central Market System*, Securities Exchange Act Release No. 10076 (March 29, 1973); *Preliminary Statement of the Advisory Committee on the Implementation of a Central Market System to the Securities and Exchange Commission* (December 11, 1974); *Securities and Exchange Commission Advisory Committee on the Implementation of a Central Market System—Summary Report* (July 17, 1975).

<sup>34</sup> NYSE Rule 113, 2 CCH, *New York Stock Exchange Guide* Para. 2113 at p. 2719-2720; Amex Rule 190, 2 CCH, *American Stock Exchange Guide* Para. 9330 at p. 2484.

<sup>35</sup> The specialist's position in the trading market has been described as follows: In this unique capacity the specialist stands at the heart of the Exchange market mechanism. He has intimate knowledge of the past market action of the stocks in which he specializes. He also has sole access to the specialist book showing outstanding orders both below and above the market which affords him a great competitive advantage over the public. In addition, he exercises a significant influence on the public appraisal of a security, since he is the one who quotes the market. For all these reasons, it is a matter of tremendous importance in the maintenance of a fair and orderly market that a specialist's transactions as principal be only of such kinds and in such amounts as are consistent with his function of acting as broker at the vital center of the auction market.

SEC, *Staff Report on Organization, Management, and Regulation of Conduct of Members of the American Stock Exchange*, at 23 (1962) quoted in 2 SEC, *Special Study of Securities Markets* H.R. Doc. No. 95, 88th Cong., 1st Sess. at 59 (1963).

<sup>36</sup> SEC, *Staff Report on Organization, Management, and Regulation of Conduct of Members of the American Stock Exchange*, at 23 (1962) quoted in 2 SEC, *Special Study of Securities Markets* H.R. Doc. No. 95, 88th Cong., 1st Sess. at 59 (1963).

to be brought to the floor for execution and possible displacement by orders having priority.)

Some institutional brokerage firms have evinced a willingness, and have the necessary capital, to make position bids or offers on all securities listed and traded on the primary exchanges. Others "specialize" in securities of issuers in which they have developed a particular expertise and hold themselves out as being willing to bid or offer in medium size on any security in the selected group at a price near last sale. As a general matter, however, these institutional firms do not compete directly with the specialist. Rather, it appears that these "upstairs market makers" fill a void created by specialist unwillingness to deal in substantial size, either because of regulatory restrictions on specialists or the nature and size of the risks associated with principal trades in block size.

Institutional brokerage firms have several important competitive advantages over specialists in the so-called block-trading market. Specialists on the New York and American Stock Exchanges are not permitted to accept orders directly from an institutional customer.<sup>36</sup> NYSE and Amex specialists are thereby cutoff from direct access to the institutional order flow and are unable to canvass the institutional market to put together buyers and sellers. Moreover, the upstairs members presently may charge an institutional customer a commission when purchasing from or selling to the institutional customer as principal. The specialist, however, must make net bids and offers. Also, the specialist is regulated in his trading activity and most continually provide a two-sided market whereas the upstairs firm is not under such restrictions and obligations.

In the round-lot market, however, the specialist has certain advantages over the institutional broker. All trades in a listed security must be executed at the specialist's post. Because the specialist stands at the center of any crowd which may exist and sees all the executions in his specialty stock, he is opportunistically situated to develop a "feel" for the market. Moreover, the specialist is the only exchange trader having knowledge of, and regular income from the execution of, limit orders on the book.<sup>37</sup>

As a result, two-sided market making in round-lots on exchanges is effectively allowed.

<sup>37</sup> NYSE Rule 113, 2 CCH, *New York Stock Exchange Guide* Para. 2113 at p. 2719-2720; Amex Rule 190, 2 CCH, *American Stock Exchange Guide* Para. 9330 at p. 2484.

<sup>38</sup> The specialist's position in the trading market has been described as follows:

In this unique capacity the specialist stands at the heart of the Exchange market mechanism. He has intimate knowledge of the past market action of the stocks in which he specializes. He also has sole access to the specialist book showing outstanding orders both below and above the market which affords him a great competitive advantage over the public. In addition, he exercises a significant influence on the public appraisal of a security, since he is the one who quotes the market. For all these reasons, it is a matter of tremendous importance in the maintenance of a fair and orderly market that a specialist's transactions as principal be only of such kinds and in such amounts as are consistent with his function of acting as broker at the vital center of the auction market.

SEC, *Staff Report on Organization, Management, and Regulation of Conduct of Members of the American Stock Exchange*, at 23 (1962) quoted in 2 SEC, *Special Study of Securities Markets* H.R. Doc. No. 95, 88th Cong., 1st Sess. at 59 (1963).

as equal." It is urged that specialists are

Additionally, it is important, when com-

Stock Exchanges, some may view the restrictions on the ability of specialists to compete with upstairs members in the institutional block trading market as a *quid pro quo* for the inability of the upstairs members to compete directly with the specialist by making continuous two-sided markets. It might be competitively unfair, therefore, to permit the upstairs firm to compete directly with the specialist without, at the same time, addressing those restrictions which limit the specialist's ability to compete in the institutional trading market.

#### AGENCY TRANSACTIONS BY MEMBERS IN THE OVER-THE-COUNTER MARKET FOR LISTED SECURITIES

Paragraph (b) of Rule 394 was adopted by the New York Stock Exchange in 1966, at the request of the Commission, pursuant to Section 19(b) of the Act, to permit members to effect certain transactions as agents for a customer with "qualified" third market makers.<sup>22</sup> It would appear, however, that the conditions imposed by the rule and the interpretations given to it by the NYSE may have negated its utility.<sup>23</sup>

The NYSE proposed to amend Rule 394(b) in 1974 to eliminate certain of the conditions.<sup>24</sup> As amended, Rule 394(b) would still (1) require a member to make a "diligent effort to explore the feasibility of obtaining a satisfactory execution of the order on the floor" prior to solicitation of a third market maker and (2) require the member, after receiving a bid or offer from a third market maker, to return to the floor to ask other members in the crowd if they have an order at the same or a better price as the third market maker's bid or offer. If there are such orders on the floor, the third market maker's order would be displaced in whole or in part by all such bids or offers although bids and offers by the specialist and other members for their own accounts would participate only to the extent that interest had been expressed at an indicated price or prices when the member first announced an intention to solicit a third market maker.<sup>25</sup> In addition, the NYSE apparently still would interpret

<sup>22</sup> See Securities Exchange Act Release No. 7954 (September 16, 1966).

<sup>23</sup> In response to a request from the Commission staff, the NYSE has provided the following chart:

Summary of inquiries and transactions effected pursuant to rule 394(b) from January 1969 to April 1975

	Number of inquiries	All off floor	Inquiries resulting in transactions		Nothing done on inquiry	Shares on floor	Shares off floor
			All on floor	Some on/off floor			
1969	16	6	0	1	8	5,800	64,300
1970	11	4	0	5	2	13,500	80,500

<sup>24</sup> See Appendix A at p. A-4 and discussion *supra* at pp. 3-4.

<sup>25</sup> See NYSE proposed Amendments to Rule 394(b) in Appendix A at p. A-4.

<sup>26</sup> Letter from James E. Buck, Secretary, New York Stock Exchange to Lee A. Pickard, Director, Division of Market Regulation, November 26, 1974 at p. 2.

<sup>27</sup> Only Chapter 1, Section 23(d) of the Boston Stock Exchange Rules excepts dual members from this obligation. While it is probable that dual members have simply ignored their obligation in the past to comply

with regional exchange rules after, for example, having received permission to effect an off-board principal trade pursuant to Rule 394(a), the Securities Exchange Act requires each exchange to enforce compliance by its members with its own rules.

Rule 394 may also disadvantage exchange brokers insofar as it may divert orders directly to the third market which might otherwise have been given to an exchange member for execution in the best available market in accordance with the member's professional brokerage judgment and expertise.

Since the New York Stock Exchange membership community handles the great majority of public agency business in listed securities, and since NYSE Rule 394 appears to operate as a substantial barrier to egress from that exchange, third market makers may be disadvantaged vis-a-vis exchange specialist in the competition for volume in listed securities.<sup>28</sup> Observers have also asserted that the anticompetitive effects of Rule 394 are exacerbated by its interference with a broker's ability to execute his customers' orders in a professional and capable manner in the best market available.

The barrier to competition and the interference with brokerage judgment which restrictions on a member's ability to effect agency execution with third market makers seem to represent are not as formidable today as they may once have been. First, as noted at p. 17, *supra*, five regional exchanges—the Boston, Cincinnati, Detroit, Pacific and PBW Stock Exchanges—have adopted rules which permit third market

makers to effect transactions directly on the respective floors of these exchanges and to continue to make an over-the-counter market in listed securities. Thus, some third market makers now operate as supplemental specialists on these exchanges. Since members of the New York and American Stock Exchanges which are also members of one or more of these regional exchanges can effect transactions on the regionals without regulatory inhibition, such dual members presently have access to those third market makers who have availed themselves of the opportunity to join such exchanges. Nonetheless, not all exchange members also belong to one of the exchanges which third market makers are permitted to join and only some third market makers have joined any exchange.

Second, a member of an exchange can today solicit the interest of a third market maker to participate in a transaction to be effected on the floor of an exchange. The Commission staff's 1965 report on NYSE Rule 394 found that one of the rule's most serious anticompetitive aspects was that a member was required to charge a third market maker a commission whenever an order of a third market maker was effected on an exchange (since the third market maker was treated as any other non-member customer).<sup>29</sup> The adoption of Rule 19b-3 under the Act has freed members from that requirement.<sup>30</sup> Thus, it would appear that a member of the New York Stock Exchange can today canvass the third market<sup>31</sup> and solicit the participation of a third market maker in a transaction, so long as the execution is effected on an exchange floor. Indeed, it would appear likely that exchanges would encourage such a development since their volume would be directly increased by the number of such transactions. In this regard, however, it should be noted that such canvassing would preclude use of Rule 394(b) to effect the transaction off-board on an agency basis.

Nevertheless, it must be recognized that, by substantially impeding the ability of a member to effect transactions off-floor directly with third market makers, the effect of rules such as NYSE Rule 394 is to diminish the amount of volume in which a third market maker might otherwise participate. Like any other professional trader, a third market maker generally is willing to make firm quotations only for immediate acceptance. It would therefore appear to operate as a disincentive to the third market maker's participation in a transaction to require in effect that his quotation be held firm while the exchange member attempts an execution on the floor; the third market maker may be unwilling to lose control of his order as it is taken to an exchange floor for execution, since he thereby risks a shift in current prices and an execution at a price away from his then current quotation in the third market.<sup>32</sup> Moreover, if the transaction is re-

<sup>28</sup> SEC Staff, Report: Rule 394 (1965), reprinted in *Hearings Before the Subcomm. on Commerce and Finance of the House Comm. on Interstate and Foreign Commerce*, 92d Cong., 1st Sess., pt. 6 at 3293, 3370 (1972).

<sup>29</sup> 17 C.F.R. 240.19b-3, Securities Exchange Act Release No. 11203 (January 23, 1975).

<sup>30</sup> Rule 394 only governs the solicitation of a third market maker for a transaction off-the-floor of the exchange.

<sup>31</sup> The New York Stock Exchange has taken a similar point of view in an analogous context. In connection with the amendments to Rule 394(b) proposed by the NYSE in 1974, the Commission staff asked the NYSE

quired to be effected on an exchange floor, rather than directly with the third market maker off the floor, the transaction would be reported in the consolidated transaction reporting system as an exchange trade and the third market maker would lose the advertising value of the tape print.

Finally, if the transaction is effected on the exchange, better limit bids or offers would have to be satisfied prior to the execution. Since third market makers generally trade net of commission, their acquisition price, in the case of a purchase, would be the same as the resulting tape print price, leaving them without any "cushion" to ameliorate the risk taken.<sup>33</sup> While block positioners have been willing to make position bids below the market, even though they must generally permit limit bids to participate, thus lowering the prevailing market price to their bid price, they are permitted to charge the seller a commission; accordingly the block positioner has some cushion to lessen the market risk assumed.<sup>34</sup> Indeed, it has been asserted to the Commission that if block positioners were required to trade net, so that the tape print price and their actual acquisition cost were identical, it would create a severe disincentive to positioning.<sup>35</sup> It would appear, therefore, that requiring a third market maker to be displaced might create a disincentive to participation. This is not to say that the reasons in favor of permitting bids or offers on the specialist's book to participate in discount or premium trades may not outweigh the reasons for creating incentives to dealer participation, but that the disincentives created thereby must be considered in the balance.

One commentator has urged that Rule 394 is not anticompetitive at all and indeed that elimination of Rule 394 would reduce the fairness of competition between exchange and non-exchange markets because "unequal regulation of exchange and non-exchange markets makes it impossible for any type of pure competition between them to be 'fair'".

whether a floor professional making a bid or offer prior to an off-floor execution would be held to that quotation while the member communicated with a third market maker. Letter from Lee A. Pickard, Director, Division of Market Regulation, to James E. Buck, Secretary, New York Stock Exchange, October 24, 1974, at p. 2. The NYSE replied that a floor professional should not be held for an unreasonable amount of time to a bid or offer; any other result would mean that the floor professional would in effect be "penalized" for having made the initial bid or offer. Letter from James E. Buck, Secretary, New York Stock Exchange, to Lee A. Pickard, Director, Division of Market Regulation, November 26, 1974, at p. 3.

Similarly, it would appear that members request permission to effect off-board principal purchases pursuant to Rule 394(a) primarily to avoid the book and the tape print involved with an exchange transaction below the prevailing market; the member may thereafter distribute the stock on the exchange pursuant to a special distribution plan and enjoy a substantial "spread."

or "equal."<sup>36</sup> It is urged that specialists are subject to stringent rules and regulations which, among other things, include affirmative obligations to assume risks, especially during crisis periods, which their third market counterparts can easily avoid.

On its face, this argument has a certain symmetrical appeal. Nevertheless, it is not explained whether the desired result could be achieved by other, more appropriate means. The Securities Acts Amendments of 1975 appear to have been intended to establish a presumption in favor of (i) eliminating barriers between competing markets and between market makers which are specialists and those which are not, insofar as such barriers are not otherwise in furtherance of the purposes of the Act, and (ii) equalizing regulation of competitors that enjoy similar privileges, perform similar functions and have the potential for similar market impact.<sup>37</sup> Presumably, therefore, concerns with respect to "equal regulation" could be satisfied by either eliminating the "stringent" rules and regulations which apply to exchange trading, or applying such rules to the over-the-counter market for listed securities. Moreover, it would appear that third market makers do not in fact avoid crisis periods and fail to perform a legitimate market function on a regular or continuous basis. Indeed, some have asserted that third market makers, in part because they deal exclusively with a professional clientele—broker-dealers and institutions—are compelled, as a business matter, to make continuous markets "both in rising and falling markets."

Comments of the New York Stock Exchange in response to Securities Exchange Act Release No. 11521, Commission File No. S7-543 at p. 14 (July 29, 1975) ("NYSE Comments"). The NYSE contended that:

Since Rule 394 relates only to taking orders to other than exchange markets, the issue here centers on competitive restraints among brokers and dealers, as well as between exchange and non-exchange markets. The abolition of Rule 394 would actually reduce the fairness of the competition between these elements, since the present system of unequal regulation of exchange and non-exchange markets makes it impossible for any type of pure competition between them to be "fair" or "equal."

In the absence of the protection afforded by Rule 394, the Exchange market would bear a severe competitive disadvantage vis-a-vis the third market. The Commission is aware of the stringent rules and regulations which apply to Exchange trading. These include the affirmative responsibilities of specialists to assume risks, especially during crisis periods, which their third market counterparts can easily avoid. These risks, of course, raise the cost of operating on the floor of the Exchange relative to operating in the third market.

Exchange regulation is predicated on the need to assure high-quality service to the public under all market conditions—not just when prices are rising. The specialist's affirmative marketmaking responsibility assures that he will be at his post—maintaining fair and orderly markets in his assigned stocks—both in rising and falling markets.

<sup>36</sup> See S. Rep. No. 94-75, 94th Cong., 1st Sess., at 12-16 (1975); H.R. Rep. No. 94-123, 94th Cong., 1st Sess. at 47-48 (1975); S. Doc. No. 93-13, 93d Cong., 1st Sess. at 104-105, 115-119; Subcomm. on Commerce and Finance of the Comm. on Interstate and Foreign Commerce, 92d Cong., 2d Sess., *Securities Industry Study Report* at 126-130 (1972).

<sup>37</sup> *Id.*, at 127-128.

<sup>38</sup> Sections 6(b) (5), 11A(a) (1) (C), 11A(a) (2), and 15A(b) (6) of the Act.

<sup>39</sup> *Id.*, Sections 11A(a) (1) (C) and 11A(a) (2).

<sup>40</sup> *Id.*, Sections 2, 6(b) (5) and 15A(b) (6) (2).

Additionally, it is important, when comparing regulation of exchange specialists with regulation of third market makers, to be cognizant of the privileges now associated with a specialist's position. The Commission's *Institutional Investor Study*, for example, found that the specialist's brokerage income from limit orders entrusted to him by other brokers exceeded trading income in every category of specialist measured.<sup>41</sup> Earlier, the Commission's *Special Study* had noted that the only justification for permitting a specialist to enjoy trading advantages over others is "if high standards of conduct in dealer and broker activities are defined and enforced."<sup>42</sup> The unique advantages of the specialists, and the relationship of those advantages to the regulatory fabric, were summed up by the *Special Study* as follows:

It must be remembered that the specialist is not purely dependent upon his trading acumen for his income. Not only does the book serve on occasion as an outlet for excess inventory, but the brokerage function serves as a relatively riskless source of income. . . . If the conflict of interest between the two functions is to be tolerated the duty to the customer must include the obligation to maintain markets which are fair and reasonable. . . . Since access to the floor confers substantial trading advantages, even without the special knowledge available to the specialist, the privileges enjoyed by the specialist are compatible with the statutory scheme only if his duties to the public are not terminable at will but continue reasonably through good markets and bad, through profitable and unprofitable periods.<sup>43</sup>

Assuming that exchange rules which limit or condition the ability of members to make two-sided markets in listed securities and which limit or condition the ability of a member to execute a customer's order over-the-counter with a third market maker impose burdens on competition, the questions remain whether these rules are otherwise in furtherance of the purposes of the Act.

C. Whether Off-Board Trading Restrictions of Exchanges Are Otherwise Necessary or Appropriate in Furtherance of the Purposes of the Act.

Having concluded that rules which limit or condition the ability of a member to effect a transaction off-board, as principal or agent, are anticompetitive, the Commission is obliged to determine whether such rules are nevertheless justified by reference to other regulatory goals. These purposes, insofar as off-board trading rules are concerned, are referred to or described in Sections 2, 6(b) (5), 11A(a) (1) (C), 11A(a) (2) and 15A(b) (6) of the Act, namely:

- (1) the protection of investors;<sup>44</sup>
- (2) the maintenance of fair and orderly markets;<sup>45</sup>
- (3) the removal of impediments to, and the perfection of a mechanism for, a national market system for securities;<sup>46</sup>
- (4) fair competition among brokers and dealers, among exchange markets, and be-

It is also argued that exchange off-board  
trading restrictions serve as a "stabilizing

ing rules of exchanges which limit or condi-  
tion the ability of members to effect transac-  
tion otherwise than on such exchanges are

tween exchange markets and markets other than exchange markets."

(5) prevention of unfair discrimination between customers, between brokers and between dealers;<sup>61</sup>

(6) the practicability of brokers executing investors' orders in the best market;<sup>62</sup>

(7) economically efficient execution of securities transactions;<sup>63</sup> and

(8) an opportunity, consistent with the standards indicated in subparagraphs (6) and (7) above, for investors' orders to be executed without the participation of a dealer.<sup>64</sup>

It has been asserted by one commentator that "Rule 394 is vitally necessary to protect investors and the public interest," a requirement of all exchange rules established by Section 6(b) (5) of the Act, and that the public interest lies in the maintenance of markets with liquidity, depth and continuity, adequate disclosure and safeguards against manipulation, and the financial health of the securities industry.<sup>65</sup> It is further suggested that NYSE rule 394 specifically supports these public interest goals because otherwise trades would be diverted from the floor "not so much because of competitive price considerations, but to shield transactions from the interplay of supply and demand in the public markets."<sup>66</sup> It is further asserted that, if orders are diverted from the exchange floor, prices would no longer mirror all supply and demand, and that the "public price" would be different from what it would be "had the off-floor trade occurred in the auction market," a difference "detrimental to the public investor."<sup>67</sup>

As a preliminary observation, apart from the validity of these arguments, Congress appears to have determined that it is desirable to encourage the broadest possible competition in order to achieve, to the maximum extent possible, continuity, depth and liquidity in the secondary trading markets. Among other things, it is difficult to perceive how impeding the participation of any segment of that competition—such as the third market—further that particular goal. Also, the consolidated transaction reporting system has as its major purpose the reporting of all transaction in listed securities, wherever effected, so that prices could react to all such transactions. It has not been shown that this system, coupled with enhanced competition among market makers, will not appropriately reflect all supply and demand.

It is also suggested that the Commission should avoid "major rule changes" which will "weaken existing market mechanisms" at a time when a "sensitive industry" is being called upon to adjust to "a new and significantly different [commission] rate environment . . .".<sup>68</sup> While the advent of new regulatory and other conditions for the industry may, indeed, suggest a basis for proceeding with other steps toward establishment of a national market system prior to the elimination or modification of off-board trading rules, the argument assumes, without elaboration, that modifications or elimination of Rule 394 will weaken rather than strengthen the trading markets.

Further, it is pointed that the New York State stock transfer tax provides an impetus to the erosion of trading on the primary markets in New York.<sup>69</sup> Assuming this to be a fact, it does not follow that volume will necessarily be diverted to third market makers,

at least some of whom are also located in New York. Trading could just as easily be diverted to a non-New York exchange.

It is asserted also that elimination of Rule 394 will place brokers in an impossible legal dilemma since "neither the trade nor the clearance and settlement mechanisms are presently in place to insure 'best execution'."<sup>70</sup>

Such an assertion must be squared with the obvious fact that members of the NYSE and Amex apparently are not today placed in an "impossible legal dilemma" though they are permitted to effect transactions on regional exchanges of which they are members.<sup>71</sup> Moreover, a distinction must be drawn between a rule permitting a broker to exercise his professional judgment to seek out the best market for his client, on the one hand, and a rule requiring him to secure the best price for his customers regardless of expense or other relevant considerations, on the other.

Finally, it is argued that elimination of off-board trading restrictions will result in exchange members forsaking trading floors, matching orders in-house in the most active stocks, and, when that is not possible, effecting transactions in the third market "where regulatory disparities even now offer advantages vis-a-vis trading in the stock exchanges."<sup>72</sup> The resulting fragmentation, it is urged, will permit limit orders left with the specialist to be bypassed and in general will undermine the auction market and the opportunity for public orders to meet public orders without the intervention of a dealer, which one commentator estimates amounts to one-half to two-thirds of "NYSE reported volume."<sup>73</sup> Such a result, it is contended, would be contrary to Congressional intent in determining that it is in the public interest to assure "economically efficient execution of securities transactions," the "practicability of brokers executing investors orders in the best market," and an opportunity, consistent with the foregoing, "for investors orders to be executed without the participation of a dealer."

This argument is not without appeal. Nevertheless, these apparent benefits to the markets provided by off-board trading rules must be assessed against certain important issues, such as (1) whether the competition which would result from a proliferation of upstairs market makers would further the statutory aims; (2) whether other more appropriate regulations might be adopted to prevent such potential market makers from over-reaching their customers, such as a

regulation requiring a market maker to be prepared to demonstrate that in dealing with a retail brokerage customer the price given to that customer was as good as or better than any other price generally available; (iii) what precisely the regulatory disparities are which create the incentive to trade in the third market; and (iv) whether, once these disparities are identified, equalization of regulation might be a generally more appropriate response. In addition, if the phrase "economically efficient execution of securities transactions" is identical, as this line of reasoning seems to assume, to the phrase an opportunity "for investors orders to be executed without the participation of a dealer," then it may be difficult to reconcile the statute's establishment of both as independent goals with the expressly stated view that the latter is to be achieved only when consistent with the former.

It would appear that numerous factors exert an influence on the efficiency of executions, including differences in clearing costs, communications costs and the like. In addition, differences between auction-type trading in markets and dealer markets may result in economic differences in the comparative efficiency of executions effected within the two types of markets.

In an ideal market, bids and offers would offset each other precisely at various transaction prices. Because this rarely occurs, however, certain market professionals perform a market making function, bidding and offering for their own accounts to bridge the gap between the highest available bids and the lowest available offers and smoothing out imbalances between supply and demand at particular points in time. The market maker is compensated by the profit derived from buying for his own account at a price lower than the price at which he sells for his own account. This market maker profit, or "jobber's turn," appears to be an essential ingredient of the cost to public buyers and sellers of effecting executions.

The cost of the jobber's turn would appear to be minimized in a market system characterized by a centralization of all bids and offers, and a mechanism whereby public bids and offers could meet at prices between the bid and asked prices of market makers and would take precedence over market professional bids and offers. In today's markets, the auction-type trading rules of exchanges afford the only existing mechanism for public bids and offers to meet at prices between the otherwise highest bid and lowest offer of a market maker (*i.e.*, specialist). But the existing mechanisms of exchange trading may involve offsetting inefficiencies (*e.g.*, the required use of floor brokers to perform the function of transmitting orders to the specialist, and exceptions from exchange priority and precedence rules which dilute their effects in terms of achieving economic efficiencies in transaction costs). While the over-the-counter market does not currently provide a method for orders channeled to market makers to meet between the highest market maker bid and the lowest market maker offer, availability of direct communications with over-the-counter market makers and other factors may lessen to a significant degree any additional costs associated with third market executions as compared to exchange executions.

Elimination or amendment of exchange rules which limit or condition the ability of a member to trade off-board may not lead to a loss of efficiency in executing transactions in the markets considered as a whole since, although there may be some dispersal of order flow from exchange markets, increased exposure of over-the-counter market makers to that order flow coupled with enhancement of direct competition among all market mak-

ers might result in narrower spreads between market maker and specialist bid and asked prices generally without any loss of liquidity or depth.<sup>74</sup>

Moreover, the 1975 Amendments make explicit the need to eliminate burdens on competition not necessary or appropriate in furtherance of the purposes of the Act.<sup>75</sup>

It is by no means clear that the forces of competition would not exert, of themselves, the requisite pressure on all specialists and market makers (including primary exchange specialists) to maintain fair and orderly markets, characterized by narrow spreads between bid and asked prices, continuity, depth and liquidity.

Moreover, there may be more efficient and appropriate ways of preserving or improving upon systems presently devised for the handling of limit orders; while it may continue to be appropriate to require broker-dealers to expose their transactions to limit orders entered by public customers or others, this might be accomplished through systems which utilize different communication facilities or alternative measures for insuring limit order protection.

Finally, one of the fundamental goals of a national market system, as expressed by Section 11A(a) (1) (C) (iv) of the Act, is to assure the practicability of brokers executing investors' orders in the best market. It has been suggested that exchange auction type trading, which affords an opportunity for public orders to meet without the participation of a dealer, offers the possibility of better executions for more customers (whether or not it would achieve the "best" execution of a particular order for a particular customer) than a market which encourages competing dealers. Thus, rules which limit the ability of a member to effect off-board transactions appear to be designed, among other things, to preserve the rights of customers represented on the exchanges, and even of other members trading for their own accounts (including specialists), rights which are treated as being superior to those of the customer for whom a third market execution is sought.

While Congress did authorize the Commission, in Section 11A(c) (3), to eliminate third market trading in listed securities as a solution to the most extreme problems, if stringent conditions precedent are met, Congress also specifically focused its attention on assuring that a broker in the exercise of his professional judgment had the ability to seek best execution for his customer in any existing market in light of the prevailing opportunities and circumstances at the time the broker received the order.<sup>76</sup>

"A narrowing of market maker spreads was observed in the over-the-counter market after introduction of NASDAQ; this development was not accompanied by any noticeable increase in volatility. See NASD, *NASDAQ—Third Market Study* (April, 1972). In addition, in successive test periods which NYSE specialists' quotations in securities traded in the third market were compared with quotations in NASDAQ by the NYSE staff under circumstances which permitted the NYSE specialists to be aware of both the comparison being performed by current third market quotations, the spreads between NYSE specialist bid and asked prices narrowed considerably. See Research Department, NYSE: *Some Difficulties with the NASDAQ Quotation System* (December, 1974).

## PROPOSED RULES

41815

It is also argued that exchange off-board trading restrictions serve as a "stabilizing force to facilitate development of a national market system" and are thus in furtherance of the statutory goal to remove impediments to and perfect the mechanism of a free and open market and a national market system.<sup>77</sup> Since centralization of all buying and selling interest is one of the purposes of a national market system, it is urged, elimination of existing exchange rules designed to preserve such centralization of order flow as has been achieved to date is not consistent with the objective of creating a national market system.

In directing the Commission to facilitate the development of a national market system in accordance with certain statutory findings,<sup>78</sup> and giving the Commission broad authority to achieve those goals,<sup>79</sup> the Congress evinced a preference for an approach which would permit a national market system to evolve through an interplay of competitive and economic forces interacting in a fair regulatory field, as "unnecessary regulatory restrictions are removed."<sup>80</sup> This free-market approach, which appears designed to permit the Commission to rely upon market forces rather than regulatory fiat to achieve mandated objectives (such as availability of quotations), would not seem to be given a fair chance of success if such restrictions as off-board trading rules create artificial disincentives to the achievement of the goals expressed.

In this regard, if an exchange member is compelled, by virtue of off-board trading restrictions, to route orders to the floor of an exchange, it would appear that the member would have little or no use, for example, for a quotation system reflecting indications of interest to buy or sell in other markets, nor would the member have any desire to implement modern execution facilities for customers. Under such circumstances, a market maker would be aware that the insertion of a quotation in a composite system would receive scant inquiry. Thus, it would appear that off-board trading restrictions likely impede the development of a quotation system, as well as better communication facilities to securities markets by members and modern execution facilities for securities transactions. Moreover, since present rules appear to compel transmittal of orders to the floor of an exchange, there is little if any incentive on the part of those who handle the orders, primarily specialists, to improve upon their systems of communications with the members with whom they deal or to modernize the facilities for limit orders, since by regulatory fiat they are aware that a major portion of the business will flow to them anyway.

Accordingly, while both the arguments for and against characterizing off-board trading restrictions as an impediment to a national market system must by their very nature depend upon certain assumptions, some of which perforce are speculative, it would appear more likely that off-board trading rules as presently constituted impede, rather than promote, attainment of that system.

For the foregoing reasons, the Commission is not now prepared to conclude that exist-

<sup>77</sup> NYSE Comments at p. 15.

<sup>78</sup> Sections 11A(a) (1) and (2) of the Act.

<sup>79</sup> *E.g.*, Section 11A(c) of the Act.

<sup>80</sup> H.R. Doc. No. 94-229, 94th Cong., 1st Sess. 92 (1975); S. Rep. No. 94-75, 94th Cong., 1st Sess. 7-8 (1975). That the Commission has been in fundamental agreement with this approach is evidenced by its decision to defer adoption of proposed Rule 17a-14, requesting instead that exchanges eliminate restrictions on access to quotation information they may disseminate. Securities Exchange Act Release No. 11288 (March 11, 1975).

ing rules of exchanges which limit or condition the ability of members to effect transactions otherwise than on such exchanges are necessary or appropriate in furtherance of the purposes of the Act. Accordingly, the Commission has announced today the commencement of a proceeding in accordance with the provisions of Section 19(c) of the Act to amend or abrogate such rules. Notice of the commencement of this Section 19(c) proceeding is attached hereto as Appendix E.

By the Commission.

Respectfully,

GEORGE A. FITZSIMMONS,  
Secretary.

In view of the Commission's conclusions with respect to the burdens on competition represented by exchange rules which limit or condition the ability of members to effect transactions otherwise than on such exchanges ("off-board trading rules"), enumerated above in the Commission's report to the Congress with respect to off-board trading rules, the Commission has determined to commence a rulemaking proceeding under Section 19(c) (1) of the Act to consider whether to amend or abrogate all such rules by adopting one of the proposed rules, designated §§ 240.19c-1 (Alternative A), 240.19c-1 (Alternative B) and 240.19c-1 (Alternative C), described below, or some variation thereof. These proposed rules have been drafted in such a manner as to present a broad range of possible formulations of a uniform exchange off-board trading rule. Commentators and prospective witnesses at the hearings to be conducted by the Commission are invited to comment specifically on which of these rule proposals (or some variation thereof) the Commission should adopt.

If the facts, views and evidence adduced at the hearings support the abrogation of off-board trading rules, the Commission will consider adoption of proposed § 240.19c-1 (Alternative A) which would prevent any exchange, by rule or otherwise, from prohibiting, conditioning or otherwise limiting any member, whether as principal or agent (or, alternatively, only as agent), from effecting transactions on any other exchange or over-the-counter.

If the facts, views and evidence adduced at the hearings support modification or amendment of existing off-board trading rules, the Commission will consider adoption of proposed § 240.19c-1 (Alternative A) or § 240.19c-1 (Alternative B). Proposed § 240.19c-1 (Alternative B) would require a member, prior to effecting a transaction either for his own account or the account of a customer over-the-counter (or, alternatively, over-the-counter or on another exchange):

- (1) at a price equal to or better than the best bid or the best offer on the member's exchange, to make such inquiry of the exchange floor as the member deems appropriate under the circumstances (whether by means of interrogating an electronic quotation system or otherwise) and to believe, in light of such inquiry, that all or a portion of the order may be executed over-the-counter (or, alternatively, over-the-counter or on another exchange) at a better price; or
- (2) at a price lower than the best bid or higher than the best offer on the member's exchange, to (i) inquire of the specialist to

ascertain the extent to which his order may be satisfied by limited price orders on the specialist's book; (ii) believe, in light of what he learns as a result of his inquiry, that a better price may be obtained by executing all or a portion of the order over-the-counter (or, alternatively, over-the-counter or on another exchange); and (iii) assure, either before, simultaneously with, or immediately after the off-board execution, that public orders on the specialist's book which were disclosed to the member at the time of his inquiry of the specialist, at prices better than the price to be afforded the order on-board, be satisfied at the prices bid or offered at the time of such inquiry are satisfied.

Proposed § 240.19c-1 (Alternative C) is modeled on proposed § 240.19c-1 (Alternative B), but would limit the circumstances under which a member could effect a transaction over-the-counter (or, alternatively, over-the-counter or on another exchange) on the basis of a belief that a better price can be obtained by executing all or a part of the order off-board (after such inquiry of the exchange as the member deems appropriate under the circumstances) to transactions at a price between the highest bid and the lowest offer on the exchange. In addition, for transactions to be effected off-board at other prices, proposed § 240.19c-1 (Alternative C) would require the member to:

- (1) inquire of the specialist and other members then present at the specialist's post in order to ascertain whether and at what prices the order may be satisfied by public orders (entered on the specialist's book or represented by such members) or by orders by the specialist and such members for their own accounts;
- (2) believe, as a consequence of the bids or offers elicited as a result of his disclosure, that a better price may be obtained over-the-counter (or, alternatively, over-the-counter or on another exchange) by executing all or part of the order off-board; and
- (3) assure, either before, simultaneously with, or immediately after the off-board execution that all public bids or offers which were made to the member during his preliminary inquiry and which are still outstanding are satisfied at the transaction price, and that all bids or offers which were made at that time by the specialist or other members who were present at the specialist's post during that inquiry at a price better than the transaction price are satisfied; provided that such bids or offers may be required to be satisfied at the transaction price under circumstances consistent with the rule's purposes, the public interest, and the protection of investors by an exchange rule approved by the Commission.

With respect to proposed §§ 240.19c-1 (Alternative B) and 240.19c-1 (Alternative C), the Commission is particularly interested in receiving views as to the practicability of compliance with exchange rules adopted thereunder in view of the fact that all exchanges might be required to adopt and enforce one of the exchange rules thereunder (or some variation thereof). It would appear, for example, that exchange members belonging to two or more exchanges would experience extreme difficulty in effecting such compliance in view of the fact that, with respect to orders to be effected over-the-counter (or, alternatively, over-the-counter or on any other exchange), inquiry of each exchange would have to be made, and certain bids or offers made on any of the exchanges to which such a "dual" member belongs would have to be ascertained and satisfied in connection with each off-board execution. Since this problem seems to exist today, in light of the fact that all exchanges have off-board trading rules in one form or another, the Commission is concerned that such rules currently may be unequally enforced with respect to "dual" members which effect transactions in the over-the-counter market or may not be observed at all by them.

If the facts, views and evidence adduced at the hearings support retention of existing off-board trading rules, the Commission will withdraw the rules proposed herein. With respect to the texts of proposed §§ 240.19c-1 (Alternative A), 240.19c-1 (Alternative B) and 240.19c-1 (Alternative C), the Commission wishes to receive comment directed to the reasons for preferring one rule over another (or some variation of any of them) for some or all exchanges in terms of the arguments and concerns presented in the Commission's report to the Congress with respect to off-board trading rules and in terms of the respective interest of (i) a customer whose order is sought to be executed off-board; (ii) a member representing such an order, or a bid or offer for his own account; (iii) other customers whose orders have been brought to the exchange (including institutional and small customers, and customers who have given market orders, "not held" orders, and limited price orders to their brokers); (iv) block positioning and other member firms; (v) specialists on all exchanges, in terms of their obligations and needs, with special reference to the problems presented by multiple trading; (vi) over-the-counter market makers; and (vii) exchanges (both primary and regional). Commentators should relate their discussions and analyses of the interests of the foregoing persons and entities to the provisions and purposes of the Act, as amended by the 1975 Amendments, supporting their views with such facts, data and citations to legal authorities as they deem appropriate.

The texts of proposed §§ 240.19c-1 (Alternative A), 240.19c-1 (Alternative B) and 240.19c-1 (Alternative C) are set forth below (brackets indicate certain alternative formulations of each proposed rule).

#### ALTERNATIVE A

##### § 240.19c-1 Governing Off-Board Trading By Members of Exchanges.

The rules of each national securities exchange shall provide, on and after January 2, 1976, as follows:

No rule, stated policy or practice of this exchange shall prohibit or condition, or be construed to prohibit, condition or otherwise limit, directly or indirectly, the ability of any member (acting as agent) to effect transactions on any other exchange or over-the-counter in any equity security which is listed on the exchange or to which unlisted trading privileges on the exchange have been extended.

#### ALTERNATIVE B

##### § 240.19c-1 Governing Off-Board Trading By Members of Exchanges.

The rules of each national securities exchange shall provide, on and after January 2, 1976, as follows:

No rule, stated policy or practice of this exchange shall prohibit or condition, or be construed to prohibit, condition or otherwise limit, directly or indirectly, the ability of any member, acting as agent for a customer or as principal for his own account, to effect transactions [on any other exchange or] over-the-counter in any equity security which is listed on the exchange or to which unlisted trading privileges on the exchange have been extended ("exchange securities"); provided, however, that, in connection with any such transaction effected by a member [on any other exchange or] over-the-counter:

- (1) at a price either equal to or better than the highest current bid or the lowest current offer on the exchange floor, the member shall believe, as a consequence of such inquiry of the exchange specialist in the security to be bought or sold and such other inquiry of the exchange floor as the member, in the exercise of professional judgment, deems appropriate under the circumstances (whether by means of interrogating an electronic system displaying quotations or quotation information in exchange securities or otherwise), that a better price may be obtained by executing all or a portion of the order [on another exchange or] over-the-counter; or
- (2) at a price either lower than the highest current bid or higher than the lowest current offer on the exchange floor, the member shall:

- (i) make such inquiry of the exchange specialist in the security to be bought or sold and other members of the exchange then present at the specialist's post as the member, in the exercise of professional judgment, may deem appropriate under the circumstances, to ascertain whether his bid or offer may be satisfied, in whole or in part, by limited price orders entered on the specialist's book;
- (ii) believe, in light of such information as the member may have obtained at the time of his inquiry pursuant to subparagraph (i) of this paragraph (2) as to the extent to which his bid or offer may be satisfied, in whole or in part, by limited price orders entered on the specialist's book, that a better price may be obtained by executing all or a portion of the order [on another exchange or] over-the-counter; and
- (iii) assure, either before, simultaneously with or immediately after execution of the order in a transaction effected [on another exchange or] over-the-counter, that public bids or offers at prices better than the transaction price entered on the specialist's book as limited price orders, which were disclosed in the aggregate to the member at the time of the member's inquiry pursuant to subparagraph (i) of this paragraph (2), are satisfied at the prices which were bid or offered at the time of such inquiry.

#### ALTERNATIVE C

##### § 240.19c-1 Governing Off-Board Trading By Members of Exchanges.

The rules of each national securities exchange shall provide, on and after January 2, 1976, as follows:

No rule, stated policy or practice of this exchange shall prohibit or condition, or be construed to prohibit, condition or otherwise limit, directly or indirectly, the ability of any member, acting as agent for a cus-

tomor or as principal for his own account, to effect transactions on any other exchange or over-the-counter in any equity security which is listed on the exchange or to which unlisted trading privileges on the exchange have been extended; provided, however, that, in connection with any such transaction effected by a member [on any other exchange or] over-the-counter:

- (1) at a price higher than the highest current bid but lower than the lowest current offer on the exchange floor, the member shall believe, as a consequence of such inquiry of the exchange specialist in the security to be bought or sold and such other inquiry of the exchange floor as the member, in the exercise of professional judgment, deems appropriate under the circumstances, that a better price may be obtained by executing all or a portion of the order [on another exchange or] over-the-counter; or
- (2) at a price equal to or lower than the highest current bid, or equal to or higher than the lowest current offer, on the exchange floor, the member shall:

- (i) inquire of the exchange specialist in the security to be bought or sold and other members of the exchange then present at the specialist's post to ascertain whether and at what prices such order may be satisfied, in whole or in part, by the specialist for the accounts of customers whose limited price orders have been entered on the specialist's book and for his own account, or by other members of the exchange then present at the specialist's post for the account of any customer and for their own accounts;
- (ii) believe, as a consequence of such bids or offers as the member may have received from the specialist and from other members of the exchange who were present at the specialist's post at the time of his inquiry pursuant to subparagraph (i) of this paragraph (2), that a better price may be obtained by executing all or a portion of the order [on another exchange or] over-the-counter; and
- (iii) assure, either before, simultaneously with or immediately after execution of the order in a transaction effected [on another exchange or] over-the-counter, that the public bids or offers entered on the specialist's book as limited price orders or represented by other members on the exchange floor made to the member at the time of his inquiry pursuant to subparagraph (i) of this paragraph (2) at prices equal to or better than the transaction price, and any bids or offers for the specialist's own account or for the accounts of other members made to the member at the time of his inquiry pursuant to subparagraph (i) of this paragraph (2) at prices better than the transaction price, are satisfied at the prices which were bid or offered at the time made to the member; provided, however, that bids and offers entered on the specialist's book as limited price orders or represented by other members of the exchange which were made to the member at the time of the member's inquiry pursuant to subparagraph (i) of this paragraph (2) may be required to be satisfied at the transaction price under circumstances consistent with the purposes of this rule, the public interest and the protection of investors in accordance with a rule of this exchange approved by the Securities and Exchange Commission.

Set forth below is a list of some of the more important source materials relating to rules of national securities exchanges which limit or condition the ability of members to effect transactions otherwise than on such exchanges. While the list should not be assumed to be complete, it may prove useful to interested persons who wish to submit views, data and arguments with respect to proposed §§ 240.19c-1 (Alternative A), 240.19c-1 (Alternative B) and 240.19c-1 (Alternative C).

#### PROPOSED RULES

##### Releases under the Act:

- No. 7474 (December 1, 1964) Adoption of Rule 17a-9.
- No. 7954 (September 16, 1966) Proposal to adopt Rule 19b-1.
- No. 7981 (October 20, 1966) Adoption of Rule 19b-1.
- No. 8001 (December 6, 1966) Proposal to amend Rule 17a-9.
- No. 8047 (March 22, 1967) Adoption of amendments to Rule 17a-9.
- No. 8324 (May 28, 1968) Announcement of public hearings on commission rate structure.
- No. 8348 (July 1, 1968) Description of initial phase of commission rate structure hearings.
- No. 8362 (July 28, 1968) Announcement of second phase of commission rate structure hearings.
- No. 8432 (October 21, 1968) Announcement of resumption of public hearings on commission rate structure.
- No. 8701 (December 31, 1969) Request for comment on specific questions relating to commission rates.
- No. 8923 (July 2, 1970) Announcement of resumption of public hearings to consider extension of interim service charge.
- No. 9234 (June 28, 1971) Announcement of resumption of hearings to consider NYSE proposed rate structure.
- No. 9315 (August 26, 1971) Announcement of public investigatory hearings regarding the structure, operation and regulation of the securities markets.
- No. 9529 (March 8, 1972) Notice of proposed Rule 17a-14 regarding composite quotation system.
- No. 9530 (March 8, 1972) Notice of proposed Rule 17a-15 regarding consolidated transaction reporting system.
- No. 9731 (August 14, 1972) Notice of revision of proposed Rule 17a-15.
- No. 9850 (November 8, 1972) Adoption of Rule 17a-15.
- No. 9950 (January 16, 1973) Adoption of Rule 19b-2.
- No. 10026 (March 5, 1973) Notice of receipt of joint industry plan under Rule 17a-15.
- No. 10218 (June 13, 1973) Notice of Commission comments on consolidated tape plan.
- No. 10383 (September 11, 1973) Announcement of Commission intention to eliminate fixed commission rates.
- No. 10668 (March 6, 1974) Proposed amendments to short sale rules.
- No. 10671 (March 8, 1974) Commission comments on consolidated tape plan.
- No. 10751 (April 23, 1974) Notice of Public Hearing on Intra-Member Commission Rate Schedules of Registered National Securities Exchanges.
- No. 10760 (April 26, 1974) Notice of receipt of revised consolidated tape plan.
- No. 10787 (May 10, 1974) Commission declares consolidated tape plan effective.
- No. 10790 (May 10, 1974) Notice of formation of Advisory Committee on the Implementation of a Central Market System.
- No. 10989 (August 14, 1974) Notice of revised proposed Rule 17a-14.
- No. 10986 (August 27, 1974) Procedure to eliminate fixed commission rates.
- No. 11019 (September 19, 1974) Commission letters to national securities exchanges formally requesting elimination of fixed commission rates on or before May 1, 1975.
- No. 11030 (September 27, 1974) Adoption of amendments to short sale rule.
- No. 11036 (October 3, 1974) Two week postponement of pilot phase of consolidated tape.

FEDERAL REGISTER, VOL. 40, NO. 175—TUESDAY, SEPTEMBER 9, 1975

- No. 11056 (October 17, 1974) Suspension of amendments to short sale rules.
- No. 11073 (October 24, 1974) Proposed Rules 19b-3 and 10b-22.
- No. 11131 (December 11, 1974) Preliminary Statement of the Advisory Committee on the Implementation of a Central Market System.
- No. 11151 (December 24, 1974) Proposed amendments to NYSE Rule 394.
- No. 11203 (January 23, 1975) Adoption of Rule 19b-3 requiring the unfixing of public commission rates.
- No. 11273 (March 3, 1975) Notice of correspondence regarding a delay in implementation of Phase II of consolidated tape.
- No. 11276 (March 5, 1975) Proposed amendments to short sale rules.
- No. 11288 (March 11, 1975) Written request to national securities exchanges regarding availability of quotation information.
- No. 11293 (March 13, 1975) Announcement of program to monitor impact of Rule 19b-3; Proposed Rule 17a-20.
- No. 11395 (May 2, 1975) Adoption of Rule 17a-20.
- No. 11406 (May 7, 1975) Announcement of responses from national securities exchanges regarding quotation information.
- No. 11461 (June 11, 1975) Notice of NASD filing of proposed rule changes.
- No. 11468 (June 12, 1975) Adoption of amendments to short sale rule; request for comment on certain additional proposed amendments.
- No. 11497 (June 26, 1975) Adoption of uniform net capital rule.
- No. 11521 (July 2, 1975) Request for public comment on rules of national securities exchanges which limit or condition the ability of members to effect transactions otherwise than on such exchanges.

[ 17 CFR Part 270 ]  
[Release No. IC-8902, File No. S7-514]  
**ANCSA CORPORATIONS**  
**Permanent Rule**

Notice is hereby given that the Securities and Exchange Commission proposes to adopt an amended version of previously proposed Rule 6c-2 (the "Rule") under the Investment Company Act of 1940 ("Act"), which would provide corporations organized pursuant to the Alaska Native Claims Settlement Act of 1971 ("ANCSA Corporations") and "Settlement Act", respectively) substantial exemptive relief from the requirements and prohibitions of the Act, and which would supersede temporary Rule 6c-2 (T) under the Act if adopted.

As explained in more detail under the heading "Rules and Regulations" elsewhere in this issue of the FEDERAL REGISTER, the Commission has adopted an amendment to temporary Rule 6c-2 (T) (17 CFR 270.6c-2) to make it clear that the relief afforded by the temporary rule is retroactive to December 18, 1971, the date of enactment of the Settlement Act (Rule 6c-2 is not proposed to be retroactive) and that registration pursuant to Section 8(a) of the Act (15 U.S.C. 80a-8a) is necessary to qualify for the exemptive relief afforded by the temporary rule. The exemptions the temporary rule provides are made retroactive to the date of enactment of the Settlement Act so that questions will not be raised whether ANCSA Corporations registering during the period of effectiveness of the temporary rule had violated Section 7 of the Act by operating in interstate commerce or purchasing securities in interstate commerce.<sup>1</sup> Rule 6c-2 (T) will remain in effect as now amended until such time as the Commission takes action on proposed Rule 6c-2 or rescinds Rule 6c-2 (T). Registration by an ANCSA Corporation which is an investment company pursuant to Section 8(a) during the effectiveness of Rule 6c-2 (T) will enable

<sup>1</sup> P.L. 92-203, 92d Cong., 85 Stat. 688.  
<sup>2</sup> Such activities might have been precluded by Section 7(a) (4) of the Act, which provides that an unregistered investment company may not engage in any business in interstate commerce.

such corporation to claim the relief afforded by proposed Rule 6c-2, if adopted, as well as that afforded by Rule 6c-2 (T). (ANCSA Corporations are reminded, however, that if they have registered or now register pursuant to Section 8(a) during the existence of Rule 6c-2 (T), they will become subject to Rule 6c-2 if it is adopted and to the greater burden of compliance the latter rule would impose. ANCSA Corporations which have not registered pursuant to the temporary rule should do so immediately if they are in need of its retroactive protection).

As originally proposed by the Commission on February 26, 1974, Rule 6c-2 would have exempted the ANCSA Corporations from all provisions of the Act except Sections 8(b), 9, 17, 36, and 37 (15 U.S.C. 80a-8a, 80a-9, 80a-17, 80a-36, 80a-37). The Rule is now being amended to provide, in effect, that ANCSA Corporations registering under its provisions ("ANCSA Registrants") will be subject to all provisions of the Act except Sections 8(b), 11, 12, 13, 14, 15(b), 15(d), 16, 18, 19, 20(b), 20(c), 20(d), 21(a), 22, 23, 24, 26, 27, 28, 29 30(b) (1), 30(c), 30 (f), 32(a) (2), 32(a) (4), 35(a), 35(b), and 35(c) (15 U.S.C. 80a-8b, 80a-11, 80a-12, 80a-13, 80a-14, 80a-15b, 80a-15d, 80a-16, 80a-18, 80a-19, 80a-20b, 80a-20c, 80a-20d, 80a-21(a), 80a-22, 80a-23, 80a-24, 80a-26, 80a-27, 80a-28, 80a-29, 80a-30(b) (1), 80a-30(c), 80a-30(f), 80a-32 (a) (2), 80a-32(a) (4), 80a-35a, 80a-35b, and 80a-35c), and to provide partial exemptive relief from Sections 17(a) and 17(d), and Rule 17d-1(a), and Sections 20(a), 30(a), and 30(d) of the Act (15 U.S.C. 80a-17a, 80a-17d, 17 CFR 270.17d-1(a), 80a-20a, 80a-30a, and 80a-30d). This notice, as it relates to Rule 6c-2, is being published so that interested persons will have an opportunity to comment upon the revised proposal before any final action is taken with respect to it.

The ANCSA Corporations have been organized to hold and administer the extensive land grants, mineral rights, cash, and mineral revenues intended by the Government of the United States to recompense Alaska's native Indian Aleut and Eskimo population ("Alaska Natives") for lands within the State of Alaska. In accordance with this statutory purpose, the ANCSA Corporations are owned and managed exclusively by Alaska Natives, who have been given all the shares of stock in the ANCSA Corporations. The ANCSA Corporations consist of twelve "Regional Corporations," representing the Alaska Natives residing in twelve geographical districts designated by the Department of the Interior, and more than 200 "Village Corporations" within these districts, each representing Alaska Natives residing in a village. There will also be the so-called "Thirteenth Regional Corporation" for Natives who are not residents of the State of Alaska. The organization of this corporation has been ordered by a recent court decision.

Although the ANCSA Corporations are entitled to receive substantial real estate and subsurface mineral interests, many

of such interests are not presently specifically identifiable, as they are to be selected and acquired over a four-year period in accordance with the provisions of the Settlement Act. However, distribution of significant amounts of the monetary portion of the settlement was made almost immediately upon enactment of the Settlement Act and large additional distributions of cash will be made to the ANCSA Corporations in the next few years.<sup>3</sup> As a result, during this period, at least until they have fully exercised their land grant privileges and have begun to engage primarily in owning and developing land or operating a business, a number of the ANCSA Corporations may be investment companies within the meaning of Sections 3(a) (1) and 3(a) (3) of the Act.<sup>4</sup> To date, 32 ANCSA Corporations have registered under the Act and are covered by temporary Rule 6c-2 (T).

Note: ANCSA Corporations having fewer than 100 shareholders are not investment companies within the meaning of the Act and need not register with the Commission.

As now proposed, Rule 6c-2 would remove all ANCSA Registrants from the burden of complying with certain specified requirements of the Act. Such Registrants would be obliged to comply with only those provisions which provide essential protection for the substantial pools of liquid capital they hold in trust for the Alaska Natives. Accordingly, if adopted, Rule 6c-2 would provide that ANCSA Registrants shall be exempt from Sections 8(b), 11, 12, 13, 14, 15(b), 15(d), 16, 18, 19, 20(b), 20(c), 20(d), 21, 22, 23, 24, 26, 27, 28, 29, 30(b) (1), 30(c), 30(f), 32(a) (2), 32(a) (3), 32(a) (4), 35(a), 35 (b), and 35(c) of the Act, and shall be partially exempted from the provisions of Sections 17(a) and 17(d) of the Act, and Rule 17d-1(a) thereunder, and of Sections 20(a), 30(a), and 30(d) of the Act, all as described in detail hereinafter. It is noteworthy that the format of the present proposed version of the Rule is the reverse of the original format in that the present format would, in effect, make ANCSA Registrants generally subject to the Act and exempt therefrom only as specifically provided in the Rule, whereas under the original structure ANCSA Registrants would have been generally exempted from the Act, and subject thereto only as specifically provided in the Rule. It should be recognized that this new structure would not result in the imposition of any significant additional

burdens upon ANCSA Registrants; most of the additional provisions of the Act that would be embraced by the new structure are directed to the Commission rather than to registered investment companies and pertain to matters of enforcement or administrative procedure.<sup>5</sup> The new format would also embrace the definitional sections of the Act,<sup>6</sup> which were not included in the original version of the proposed Rule.

The major substantive provisions which the present proposed version of the Rule would add to the list of provisions with which ANCSA Registrants would have been required to comply under the original proposal are the following: Sections 10(a), 15, 20(a), 30(a), 30(d), 31 (a), 31(b), and 33 (15 U.S.C. 80a-10a, 80a-15, 80a-20a, 80a-30a, 80a-30d, 80a-31a, 80a-31b, and 80a-33). As explained in more detail below, the impact of these additional provisions would be lessened substantially by the provisions the Rule would make to exempt ANCSA Registrants below a certain size from the proxy, periodic reporting, and financial record keeping requirements of the Act. In addition, the new proposed version of the Rule would afford ANCSA Registrants substantial blanket exemptions from Section 17 of the Act, beyond those which are presently provided by existing rules under Section 17.

It should also be understood that ANCSA Corporations which are not investment companies need not register with the Commission at all and would not be affected by the Rule. Other ANCSA Corporations would be subject to the Rule and eligible for its exemptions only if they register pursuant to Section 8(a) of the Act. The proposed Rule has also been modified to clarify that the exemptive relief it would afford would take effect as of the date of registration by an ANCSA Corporation pursuant to Section 8(a).

The new version of the Rule makes it clear, by not exempting ANCSA Corporations from Section 7 of the Act, that registration under the Act is required in order to obtain the exemptive relief provided by the Rule. Section 7, together with Section 8(a), has the effect of requiring ANCSA Corporations that are investment companies ("ANCSA Investment Companies") to register under the Rule if they wish to engage in certain

<sup>3</sup> To date, approximately 260 million dollars in cash have been distributed to the ANCSA Corporations as a group.

<sup>4</sup> Section 3(a) (1) defines "investment company" as an issuer which is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting, or trading in securities. Section 3(a) (3) defines "investment company" as any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of such issuer's total assets (excluding Government securities and cash items) on an unconsolidated basis.

<sup>5</sup> See, e.g., Sections 38-46, and 50-53 of the Act (15 U.S.C. 80a-38-80a-46, and 80a-50-80a-53).

<sup>6</sup> See, e.g., Sections 2(a), 3(a), 4, 5(a) and 5(b) of the Act (15 U.S.C. 80a-2(a), 80a-3 (a), 80a-4, 80a-5(a), and 80a-5(b)). Section 2(a) contains the general definitions under the Act. The inclusion of this section is appropriate to enhance compliance with the other sections included in the Rule, wherein defined terms may be used. For example, in Section 17 of the Act, the term "affiliated person" is used extensively. Section 3(a), containing the Act's definition of investment company, is described, in pertinent part, in note 4, supra. Section 4 sets forth the Act's classifications of investment companies, and Sections 5(a) and 5(b) the subclasses.

essential activities, and any such ANCSA

1934 (48 Stat. 881-905; 15 U.S.C. chapter

to protect the pools of liquid capital en-

transactions of this kind would remain

conditions the Rule would place on the

and Rule 17d-1 thereunder, where the

essential activities, and any such ANCSA Corporation wishing to qualify for the protections afforded by Rule 6c-2 would, therefore, be required to register with the Commission on Form N-8A pursuant to Section 8(a). The wording of the Rule itself has been amended to make this clear.

ANCSA Registrants would be subject under the present proposed version of the Rule to the requirements of Section 10 of the Act, which provides certain requirements as to the composition of boards of directors of registered investment companies for the purpose of establishing some degree of independence of management on such boards. ANCSA Registrants would be primarily affected by paragraphs (a), (b) (1), (b) (3), and (c) of Section 10. Section 10(a) of the Act (15 U.S.C. 80a-10a) provides that no more than 60% of an investment company's board of directors may be "interested persons" of the company. Insofar as relevant to an ANCSA Registrant, the term "interested person" is defined by Section 2(a) (9) of the Act (15 U.S.C. 80a-2(a) (9)) to include all "affiliated persons" of the Registrant and its investment adviser; members of the immediate family of persons affiliated with the investment advisers; and those holdings beneficial or legal interests as fiduciaries in securities issued by the adviser or its controlling persons; any person affiliated with a broker-dealer registered under the Securities Exchange Act of

<sup>1</sup> Section 7 of the Act (15 U.S.C. 80a-7) in effect prohibits an investment company not registered under Section 8 of the Act from selling or acquiring securities in interstate commerce or controlling any investment company engaged in such activities, and from engaging in any business in interstate commerce or controlling any company engaged in interstate commerce.

<sup>2</sup> Section 10(b) (2) of the Act (15 U.S.C. 80a-10(b) (2)) would likely not apply to ANCSA Registrants because they do not have principal underwriters at present, and in all probability will not be issuing underwritten securities in the foreseeable future. Section 10(d) of the Act (15 U.S.C. 80a-10d) applies only to open-end companies. Section 10(f), prohibiting purchases by a registered investment company during the existence of an underwriting syndicate, could apply to transactions involving ANCSA Registrants (15 U.S.C. 80a-10f). Section 10(g) would apply to any ANCSA Registrant having an advisory board (15 U.S.C. 80a-10g). Section 10(h) (15 U.S.C. 80a-10h), by its terms, would not apply to ANCSA Registrants.

<sup>3</sup> Affiliated persons are defined in Section 2(a) (3) of the Act (15 U.S.C. 80a-2(a) (3)) to include: (A) any person directly or indirectly owning, controlling, or holding with power to vote, 5 per centum or more of the outstanding voting securities of such other person; (B) any person 5 per centum or more of whose outstanding voting securities are directly or indirectly owned, controlled, or held with power to vote, by such other person; (C) any person, directly or indirectly controlling, controlled by, or under common control with, such other person; (D) any officer, director, partner, copartner, or employee of such other person; (E) if such other person is an investment company, any investment adviser thereof or any member of an advisory board thereof; and (F) if such other person is an unincorporated investment company not having a board of directors, the depositor thereof.

1934 (48 Stat. 881-905; 15 U.S.C. chapter 2B); legal counsel for the Registrant or its investment adviser (and such legal counsel's partners or employees); and anyone having a "material business or professional relationship" with the Registrant or its investment adviser or with the executive officers or controlling persons thereof.

Section 10(b) (1) of the Act (15 U.S.C. 80a-10(b) (1)) prohibits a registered investment company from employing as regular broker any director, officer, or employee of such registered company, or any person with whom such persons are affiliated, unless a majority of the board of directors of such registered company Section 10(b) (3) of the Act (15 U.S.C. 80a-10(b) (3)) prohibits a registered investment company from having an investment banker or an affiliated person thereof as director, officer, or employee unless a majority of its board of directors consists of persons who are not investment bankers or affiliated persons of any investment banker. Section 10(c) of the Act (15 U.S.C. 80a-10(c)) in pertinent part, prohibits a registered investment company from having a majority of its board of directors consisting of the officers, directors, or employees of any one bank.

ANCSA Registrants would also be subject to the provisions of Section 15 of the Act (15 U.S.C. 80a-15), as it pertains to the investment advisory agreements into which such Registrants may enter.<sup>4</sup> However, the provisions of Section 15 dealing with shareholder action with respect to the advisory agreement would not be applicable in the case of ANCSA Registrants. Thus, ANCSA Registrants would be subject to Section 15 (a) of the Act (15 U.S.C. 80a-15a), insofar as it requires an advisory contract to be in writing, to describe precisely all compensation to be paid thereunder, to be renewed each year by the board of directors, to be terminable by the board at any time on 60 days' notice, and to be terminable automatically upon assignment. In addition, Section 15(c) of the Act (15 U.S.C. 80a-15c), in pertinent part, would require that the investment advisory agreement initially be approved by and renewed only upon the approval of a majority of the registrant's directors who were not parties to the agreement or interested persons of any such party. Such directors would have to cast their votes on the advisory agreement in person at a meeting called for the purpose of voting on such approval. Additionally, it would be the duty of the directors of the registrant to request and evaluate and the duty of the adviser to furnish such information as may reasonably be necessary to evaluate the terms of the advisory contract.

As originally proposed, the Rule would have required ANCSA Registrants to comply with the provisions of Section 17 of the Act and the rules thereunder as provisions of the Act deemed essential

<sup>10</sup> The Rule assumes that ANCSA Registrants do not and will not have principal underwriting agreements.

to protect the pools of liquid capital entrusted to the corporations for the benefit of the Alaska Natives. Section 17 and such rules, generally speaking, would protect the shareholders of ANCSA Registrants from self-dealing by management and other affiliates, particularly persons who would be affiliated with the ANCSA Corporations through "insider" relationships, such as investment advisers, officers, and directors, by prohibiting these affiliates from entering into transactions with their ANCSA Corporations without obtaining Commission approval.<sup>11</sup> It would also require the ANCSA Corporations to make certain arrangements for the custody of their securities and similar investments and provide fidelity bonding for certain of their officers and employees.<sup>12</sup>

As a result of comments received on the original proposal to adopt Rule 6c-2, the Commission has revised the Rule to provide substantial blanket exemptions from Sections 17(a) and 17(d) of the Act, and Rule 17d-1(a) thereunder, for affiliated transactions involving ANCSA Registrants, under circumstances and conditions which would make it unlikely that overreaching, unfairness, or disadvantage to an ANCSA Registrant would be involved. However, the Rule would not provide significant blanket relief for transactions involving ANCSA Registrants and their affiliated persons where such affiliated persons were natural persons<sup>13</sup> or non-ANCSA Registrants. Most

<sup>11</sup> Section 17(a) of the Act, as here pertinent, prohibits an affiliated person of a registered investment company, or any affiliated person of such a person, from selling property to, or purchasing, or borrowing property from the registered company, or any company controlled by such registered company, without a prior Commission order pursuant to Section 17(b). An exemptive order may be obtained under Section 17(b) if the Commission finds, upon application, that the evidence establishes that the terms of the proposed transaction, including the consideration to be paid, or received, are reasonable and fair and do not involve overreaching on the part of any person concerned and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

On the other hand, Section 17(d) and Rule 17d-1 thereunder, as here pertinent, prohibit affiliated persons, and their affiliates, from participating in joint enterprises or arrangements with registered investment companies or their controlled companies without a prior Commission order obtained pursuant to Rule 17d-1(a). Rule 17d-1(b) (17 CFR § 17d-1(b)) provides that the Commission will, in passing upon such applications, consider whether the participation of the registered investment company or its controlled company in the proposed transaction is consistent with the provisions, policies and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

<sup>12</sup> See Sections 17(f) and 17(g) of the Act (15 U.S.C. 80a-17(f) and 80a-17(g)) and Commission rules thereunder.

<sup>13</sup> For an example of this type of transaction, see in the *Matter of Kikiktatruk Inupiat Corporation*, et al. File No. 812-3801, Investment Company Act Rel. No. 8851, July 18, 1975.

transactions of this kind would remain subject to Commission review pursuant to Section 17(b) of the Act or Rules 17d-1(a) and 17d-1(b) thereunder.

As now proposed, the Rule would provide an automatic exemption from Section 17(a) of the Act, and Section 17(d) of the Act and Rule 17d-1 thereunder, for transactions involving ANCSA Registrants under the following conditions:

(1) participation in the transaction by any ANCSA Registrant could not exceed \$50,000;

(2) the board of directors of each ANCSA Registrant would be required to make a determination that participation by such ANCSA Registrant in the proposed transaction would be fair and reasonable and would not involve any overreaching of its shareholders;

(3) (a), where all of the directors of an ANCSA Registrant were "disinterested" in the proposed transaction, the participation by the ANCSA Registrant would have to be approved by a majority of such directors or (b), where one or more directors of any such ANCSA Registrant were not disinterested, the proposed transaction could still be consummated without a Commission order provided (i) that the ANCSA Registrant were a Village Corporation, (ii) the proposed transaction received the approval of a majority of the disinterested directors of the ANCSA Registrant and a majority of the disinterested directors of the Regional Corporation for such ANCSA Registrant, and (iii) that such Regional Corporation was not itself a party to the transaction;

(4) the board of directors of each participating ANCSA Registrant would be required to request from each affiliated person of any ANCSA Registrant, or from an affiliated person of such affiliated person, who is a party to the proposed transaction, the information reasonably necessary to make the required determination, and to evaluate such information prior to making the determination;

(5) each such affiliated person would be required to receive a certified copy of the required determination made by each group of directors prior to consummation of the proposed transaction.<sup>14</sup>

The term "disinterested director" in the proposed Rule is defined as a director having no financial interest in the transaction other than his interest as a shareholder of the ANCSA Registrant involved.

The foregoing exemption should provide a reasonable degree of freedom to ANCSA Registrants to enter into transactions between and among themselves where the dollar value of participation by each of them is relatively small. Illustrative of the type of affiliated transaction which would be exempt, and the

<sup>14</sup> In this connection, see Section 15(c) of the Act.

<sup>15</sup> The purpose of this requirement would be to assure that the affiliated persons, to whom the prohibitions of Sections 17(a), 17(d), and Rule 17d-1 run, receive notification that the determination required by the Rule had in fact been made prior to consummation of the transaction.

conditions the Rule would place on the exemption, is the following hypothetical transaction:

Village Corporations V, W, X, Y, and Z, each of which is an ANCSA Registrant located in the "A" Region, enter into a joint venture agreement with the Alaska Lumber Company ("ALC") to develop certain timber lands in their region, each ANCSA Registrant agreeing to commit \$40,000 of its funds to the joint venture. The chief executive officer and principal stockholder of ALC is Jones, a member of the board of directors of Y Corporation and President of A Corporation, the Regional Corporation for the district in which V, W, X, Y, and Z are located. Y has five persons on its board, including, in addition to Jones, Smith, a minority stockholder of ALC. The board of directors of each ANCSA Registrant makes the determination, based in part upon information furnished by ALC, that participation by such Registrant in the proposed joint enterprise would be fair and reasonable and would not involve any overreaching of its shareholders. This determination was made, in the case of W, X and Z, by majority vote of the directors; in the case of Y, a favorable determination was made by two of the three disinterested directors, as well as by Jones and Smith, so that the proposal received the requisite approval by Y. In the case of V Corporation, the board of directors of which includes Wilson, whose paving company has contracted with ALC to build access roads through the timber lands, the approval was obtained by a 2 to 1 majority of the three disinterested directors. Because not all of the directors of Y and V are disinterested directors of A, the Regional Corporation, which has five men, including Smith and Wilson on its board, each man representing one of the five villages in the region. This approval is obtained, notwithstanding the fact that one of the three disinterested directors votes against the proposal on the grounds that the joint venture would be undercapitalized unless A committed at least \$50,000 of its funds to the enterprise. A, of course, would be precluded from participating in the transaction because Jones, Smith and Wilson each has a financial interest in the proposed transaction.

Thus, in the hypothetical situation described above, the proposed joint enterprise could be undertaken without obtaining a Commission exemptive order pursuant to Section 17(b) (15 U.S.C. 80a-17(b)) or Rule 17d-1. However, if each of the five directors of A had a financial interest in the joint enterprise, the transaction would not be exempt and could not be consummated without a Commission order. The transaction might be exempt under Rule 17a-6 and Rule 17d-1(d) (5), as modified by the Rule and explained hereinafter, provided that A Corporation owned no securities of any of the Village ANCSA Registrants and any director owning any such securities was disqualified from voting on the transaction.

Rule 6c-2 would provide additional freedom to ANCSA Registrants to deal with each other by expanding for transactions involving ANCSA Registrants the automatic exemptions now provided by Rules 17a-6 and 17d-1(d) (5) (17 C.F.R. 270.17a-6 and 270.17d-1(d) (5)). Rule 17a-6 and 17d-1(d) (5) presently provide automatic exemptions for transactions otherwise prohibited, respectively, by Sections 17(a) and 17(d) of the Act

and Rule 17d-1 thereunder, where the likelihood of overreaching or disadvantage to the investment company is reduced by the condition that no person in a position to influence the decisions of the registered investment company ("upstream affiliate") is a party to the transaction or has a financial interest in a party to the transaction (other than the registered investment company).<sup>16</sup> Rule 6c-2 would enlarge these exemptions in three ways. First, it would extend to transactions involving ANCSA Registrants the relief which paragraph (a) of Rule 17a-6 provides only for transactions involving licensed Small Business Investment Companies ("SBICs") and venture capital companies. Thus, Rule 6c-2 would eliminate, for purposes of transactions involving ANCSA Registrants, the distinction drawn by paragraph (b) of Rule 17a-6 between public and "non-public" companies,<sup>17</sup> so that if the basic conditions of Rule 17a-6 were met the automatic exemption would be triggered regardless of whether or not public or "non-public" companies were involved in such transactions. Joint transactions under Section 17(d) would, of course, be automatically exempted where the conditions of that rule, as modified by Rule 6c-2, were met, and no modification would be necessary with respect to the non-public company issue since Rule 17d-1(d) (5) makes no such distinction.

Second, Rule 6c-2 would widen the exemptions afforded by both Rule 17a-6 and 17d-1(d) (5) for transactions involving ANCSA Registrants by, in effect, removing from the upstream affiliate group persons directly or indirectly under common control with the ANCSA Registrant.<sup>18</sup> Thus the Rule would provide that, where two or more Village ANCSA Registrants are participating in a transaction and they would be deemed affiliated persons of each other only because they were in the same region, such Registrants would not be deemed affiliated

<sup>16</sup> Persons in the upstream affiliate category would include, for ANCSA Registrant purposes, the officers, directors, employees, investment adviser, and controlling persons of the ANCSA Registrant, owners of more than 5% of the outstanding shares of the company, persons under common control with the company, except as explained infra, p. 21, or any affiliated persons of these persons.

<sup>17</sup> Paragraph (b) of Rule 17a-6 provides the same exemption which paragraph (a) provides for transactions involving SBICs and venture capital companies for transactions involving all other types of investment companies except that under paragraph (b) any controlled or affiliated companies involved must be "non-public," i.e., their outstanding securities must be beneficially owned by not more than 100 persons.

<sup>18</sup> The provisions which would in effect be nullified for transactions involving ANCSA Registrants are paragraphs (4) and (D) of Rules 17a-6(a) and 17d-1(d) (5), respectively, which include among the upstream affiliate group persons directly or indirectly controlled by the registered investment company (except persons who, if they were not directly or indirectly controlled by the registered investment company, would not be directly or indirectly under the control of a person who controls the registered investment company).

persons provided that (A) their Regional Corporation did not own any securities issued by either of them, and (B) any director of the Regional Corporation who owned any securities issued by such Village ANCSA Registrants would be disqualified from voting on the proposed transaction. This modification would allow co-operative ventures between and among Village ANCSA Registrants in the region to occur without the necessity of a Section 17 application, notwithstanding an affiliation between the village entities based upon the controlling influence which the Regional Corporations may have over the Village Corporations pursuant to certain provisions of the Settlement Act. The conditions which the Rule would impose upon the availability of this relief are designed to reduce the likelihood of overreaching in such transactions by requiring that the Regional Corporation not own any securities issued by the Village Corporations and by stipulating that, if any director of the Regional Corporation owns any securities issued by the Village Corporations, such director would be ineligible to vote upon the proposed transaction.

Third, Rule 60-2 would eliminate for ANCSA Registrants the requirement that a registered investment company not commit more than 5 percent of its assets to a proposed joint enterprise exempted from Section 17(d) by Rule 17d-1(d)(5). This modification is deemed appropriate because the possibility that public shareholders of companies controlled by ANCSA Registrants would be disadvantaged in joint transactions would appear to be minimal.

The effect of the foregoing exemption may be illustrated by the following hypothetical transaction:

The X, Y and Z Village Corporations are ANCSA Registrants situated in the A Region, for which the A Corporation, also a registered investment company, is the Regional Corporation. X, Y and Z enter into an agreement with the Alaska Construction Company ("ACC") to build a dam across a certain river within the region, and it is estimated that the project will cost approximately \$3 million. X, Y and Z each agree to commit \$500,000 to the enterprise, and A agrees to provide the remaining \$1.5 million. Wilson, a director of A, is a resident of X and as such is a stockholder of X Corporation; Jones, a director of A, is a resident of Y and as such is a stockholder of Y Corporation; Smith, a director of A, is a resident of Z and as such is a stockholder of Z Corporation. It is clear that this transaction would not qualify for the minimum dollar amount exemption described above. However, it is also apparent that, in the absence of additional circumstances, the transaction would qualify, regardless of whether public or non-public companies are involved, for the expanded relief provided by Rules 17a-6 and 17d-1(d)(5). The participation by X, Y and Z in the enterprise would not destroy the exemption afforded by these rules even though they may be deemed persons under common control by A because Rule 60-2 eliminates this class of persons from the category of upstream affiliates for purposes of transactions involving ANCSA Registrants. Each of the companies involved can commit more than 5% of its assets to the transaction without destroying the exemption. Wilson, Jones and Smith did not participate in the vote by directors of A on the transaction; the

remaining seven directors, each representing a village in the A Region, and none of whom had a financial interest in the enterprise, approved the transaction. Thus, the joint enterprise could be effected without a Commission order pursuant to Section 17(b) or Rule 17d-1. If, however, the circumstances were to change so that a person in the prohibited category became a party to the transaction, or acquired a financial interest in the transaction, or the Regional Corporation owned securities issued by any of the Village Corporations participating in the transaction, the automatic exemption would not be available. For example, assuming the basic set of facts set forth above, suppose that Brown, the treasurer of X, decides three months after the joint enterprise has commenced to buy shares of the common stock of ACC. In so doing, Brown would be acquiring a financial interest in a party to the joint enterprise, and because he is not a non-executive employee the transaction would not qualify for the exemptions afforded by Rules 17a-6 and 17d-1(d)(5) by reason of subparagraphs (c)(1)(iv) and (iii)(d), respectively, of those rules.<sup>19</sup>

The foregoing illustration shows the effect upon ANCSA Registrants of Rules 17a-6 and 17d-1(d)(5) as modified by the proposed Rule. The modifications are designed to give ANCSA Registrants the freedom to deal with each other in the manner contemplated by the Settlement Act under conditions which make it unlikely that overreaching of or disadvantage to the ANCSA Registrant would be involved.

Section 20(a) of the Act (15 U.S.C. 80a-20a) and the rules thereunder are included among the provisions of the act from which ANCSA Registrants of a certain size would not be exempted in order to insure that the larger ANCSA Registrants make full disclosure of relevant facts to their shareholders if and when they solicit proxies in connection with the election of directors and other matters requiring shareholder approval.<sup>20</sup>

<sup>19</sup> Both of these provisions include within the upstream affiliate category employees of the registered investment company. Subparagraph (c)(1)(iv) of Rule 17a-6 and subparagraph (iii)(d) of Rule 17d-1(d)(5) both define the term "financial interest," as used in the rules to exclude an interest of a "non-executive" employee. However, the treasurer of a corporation would not be deemed a "non-executive" employee.

<sup>20</sup> Rule 20a-1 under Section 20(a) (17 CFR 270.20a-1) requires that proxy solicitation respecting a security issued by a registered investment company be effected in compliance with Rules 20a-2 and 20a-3 under the Act (17 CFR 270.20a-2 and 270.20a-3), and with all rules and regulations adopted pursuant to Section 14(a) of the Securities Exchange Act (15 U.S.C. Chapter 2B).

Rule 20a-2 requires that the proxy statement contain specified information in addition to that required by the proxy rules under the Exchange Act, if action is to be taken with respect to (1) the selection of directors and the solicitation is by or for management or by or for an investment adviser, or (2) an investment advisory contract. Rule 20a-3 requires disclosure in the proxy statement regarding the material interests of officers, directors, and nominees for election as directors of registered investment companies under certain circumstances enumerated in Item 7 of Schedule 14A under the Exchange Act or if action is to be taken with respect to an investment advisory contract.

The Rule would exempt ANCSA Registrants having fewer than 500 shareholders and less than a million dollars in total assets from these requirements on the grounds that ANCSA Registrants ought not to be subjected to a greater burden of compliance with respect to proxy solicitation than non-investment companies.

Section 21(b) (15 U.S.C. 80a-21b) of the Act prohibits a registered investment company from making loans to persons who control the registered company or who are under common control with such company. The applicability of this section (ANCSA Registrants would be exempted from Section 21(a)) would prohibit, for example, loans between Village ANCSA Registrants in the same region, and loans from a Village ANCSA Registrant to its Regional Corporation. These prohibitions would apply, notwithstanding the relief afforded by the Rule for affiliated transactions under Section 17.

ANCSA Registrants having 500 or more shareholders and more than a million dollars in total assets would be required to file an annual report with the Commission, pursuant to Section 30(a) of the Act (15 U.S.C. 80a-30a) and Rule 30a-1 thereunder (17 CFR 270.30a-1). Smaller ANCSA Registrants would be exempt from these provisions but would instead be required to file copies of the audit reports required by the Settlement Act, as presently provided by Rule 60-2(T).<sup>21</sup> The basis for applying Section 30(a) to ANCSA Registrants having 500 or more shareholders and more than a million dollars in total assets is again the criteria established by the Exchange Act, which limits its periodic reporting requirements to issuers of this size.<sup>22</sup> Smaller ANCSA Registrants would be exempt from Section 30(a) and Rule 30a-1 thereunder but would instead be required to file with the Commission copies of the Settlement Act reports.<sup>23</sup>

To simplify the annual reporting process for the larger ANCSA Registrants, the Rule would instruct such Registrants to answer the items on Form N-5R, the annual report form used by SBICs registered under the Act rather than Form N-1R, the form generally prescribed for annual reports of registered management companies. Form N-5R would be more suitable for ANCSA Registrants than Form N-1R because virtually all the items on Form N-5R would be applicable to ANCSA Registrants and would call for nearly all the information the Commission would want with respect to them, whereas at least thirty-two<sup>24</sup> of the seventy-one items, nearly half, of Form N-1R would not apply to ANCSA Registrants. The Rule would instruct ANCSA Registrants to disregard the Instructions as to Financial State-

<sup>21</sup> See Investment Company Act Release No. 8251, February 26, 1974.

<sup>22</sup> See Sections 12(g) and 13(a) of the Exchange Act.

<sup>23</sup> See Sections 7(O) and 8(c) of the Settlement Act [43 U.S.C. § 1606(O) and § 1607(c) (1970 Ed., Supp. III)].

<sup>24</sup> See Items 1.02, 1.03, 1.08, 1.07, 1.11, 1.18, 1.19, 1.29, 1.34-1.39, 2.01, 2.03, 2.04, 2.05, 2.06, 2.13, 2.14, 2.15, 2.16, 2.23-2.29, 2.31, and 2.32 of Form N-1R.

ments provided on Form N-5R and to follow in lieu thereof the instructions the Rule itself provides with respect to financial statements. Those instructions are based on the requirements of Form N-1R and would require an ANCSA Registrant to file as part of its annual report the following financial statements, all in accordance with the requirements of Regulation S-X (17 CFR Part 210): (1) a certified balance sheet as of the close of the fiscal year; (2) certified statements of income and expense, realized and unrealized gain or loss on investments, and changes in net assets, each as required by Rules 6-04, 6-05, 6-06, and 6-08 of Regulation S-X, respectively (17 CFR 210.6-04, 210.6-05, 210.6-06, and 210.6-08); (3) a certified consolidated balance sheet of the ANCSA Registrant and its subsidiaries as of the close of the fiscal year of the registrant, in accordance with Rule 6-02 (17 CFR 210.6-02) of Regulation S-X; (4) certified consolidated statements of income and expense, realized and unrealized gain or loss on investments, and changes in net assets for the ANCSA Registrant and its subsidiaries, consolidated for the fiscal year, each as specified in Rules 6-04, 6-05, 6-06, and 6-08 of Regulation S-X, respectively; and (5) the financial statements for each subsidiary not consolidated which would be required if the subsidiary were itself an ANCSA Registrant.<sup>25</sup>

All ANCSA Registrants regardless of size would be exempt from the requirement of filing quarterly reports with the Commission provided by Section 30(b) (1) of the Act (15 U.S.C. 80a-30(b)(1)). This exemption results from the fact that the express purpose of the quarterly reporting requirement is to keep current the information and documents contained in the registration statement of the registered investment company; since ANCSA Registrants would be exempted under the Rule from the registration statement requirement of Section 8(b) of the Act (15 U.S.C. 80a-8b), they would thereby be exempt from the quarterly reporting requirements of Section 30(b)(1).

The proposed Rule would exempt ANCSA Registrants from the requirements of Section 30(d) of the Act (15 U.S.C. 80a-30(d)), and Rule 30d-1 thereunder (17 CFR 270.30d-1), to the extent that such section, together with such rule, requires reports to be transmitted to shareholders more than once annually. The basis for this exemption is again the principle that ANCSA Registrants should not be burdened with a greater reporting requirement than that which is imposed upon non-investment companies by the Exchange Act. The Exchange Act does not require reports to shareholders more than once annually, in conjunction with the proxy solicitation requirements of

<sup>25</sup> This requirement would be subject to Rules 4-03 and 6-02-3 of Regulation S-X (17 CFR 210.4-03 and 210.6-02-3) regarding group statements of unconsolidated subsidiaries.

Section 14 of the Exchange Act. Annual reports to Alaska Native shareholders should be sufficient to provide them with the information they need to vote intelligently on matters of corporate policy and management.

Rule 30d-1 requires such reports to contain a balance sheet accompanied by a statement of the aggregate value of investments on the date of such balance sheet, a list showing the amounts and values of securities owned on the date of such balance sheet, a statement of income for the period covered by the report, a statement of surplus, a statement of the aggregate remuneration paid by the company during the reporting period to management and a statement of the aggregate dollar amount of purchases and sales of investment securities.

As now proposed, the Rule would subject ANCSA Registrants having more than one million dollars in total assets and 500 or more shareholders to the recordkeeping requirements of Section 31(a) and 31(b) of the Act (15 U.S.C. 80a-31a and 80a-31b). Smaller ANCSA Registrants would be required to maintain and preserve the records underlying the audit reports required by Sections 7(c) and 8(c) of the Settlement Act. The Act's recordkeeping requirements would supplement the Rule's reporting requirements and would provide a more effective means of preventing misuse of the liquid assets held by the larger companies than the recordkeeping provisions of the Settlement Act. The Act's recordkeeping requirements are fairly extensive, but they should serve a useful purpose, not only in assisting the Commission's regulatory function but in educating the managers of ANCSA Registrants in financial recordkeeping practices.

Section 31(a), in pertinent part, requires every registered investment company and its investment adviser to maintain and preserve accounts, books and other documents constituting the financial record of the investment company. Section 31(b) requires that all records maintained pursuant to Section 31(a) be subject to examination by the staff of the Commission. Rule 31a-1 under the Act describes those records which must be maintained by registered investment companies, certain majority-owned subsidiaries thereof, and other persons having transactions with investment companies.

Paragraph (a) under the rule requires that the accounts, books, and other documents relating to the investment company's business, which constitute the record forming the basis for financial statements and auditor certificates required to be filed with the Commission, be maintained and kept current. Paragraph (b) of the rule itemizes the records that must be maintained and specifies the information that they should reflect. Paragraphs (c), (d), (e), and (f) describe the accounts, books, records, and documents that are required to be maintained by certain other related persons.

Rule 31a-2 describes those records which are required to be preserved by registered investment companies, certain

majority-owned subsidiaries thereof, and other persons having transactions with registered investment companies. The rule specifies the periods for which various records should be preserved, and the form (i.e., microfilm, etc.) in which they may be stored.

Rule 31a-3 (17 CFR 270.31a-3) states that if records required to be maintained and preserved pursuant to Rules 31a-1 and 31a-2 are maintained or preserved by persons other than the persons required to maintain or preserve such records, a written agreement is necessary. Where a bank or member of a national securities exchange acts as custodian, transfer agent, or dividend disbursing agent, such bank or exchange member must agree in writing to make any records relating to such service available upon request and to preserve records required by Rule 31a-1 so as to conform with Rule 31a-2. Parties other than banks or exchange members performing custodian, transfer agent, or dividend disbursing services must agree in writing that the related records are the property of the person required to maintain and preserve such records and will be surrendered promptly upon request.

Section 32(a)(1) (15 U.S.C. 80a-32(a)(1)) of the Act prohibits a registered investment company from filing with the Commission any certified financial statement without the independent accountant having been selected by majority vote of the company's independent directors. However, the Rule exempts ANCSA Registrants from the further requirements of Section 32(a) that the selection be ratified by the shareholders, that the accountant's tenure be terminable at the will of a majority of the shareholders, and that the accountant's certificate be addressed to both the directors and the security holders. The Commission believes that these additional requirements would not be meaningful in the case of ANCSA Registrants.

Section 33 (15 U.S.C. 80a-33) of the Act requires registered investment companies and affiliated persons who are defendants in civil actions brought by the investment company or by a security holder in a derivative capacity against an officer, director, investment adviser, trustee, or depositor of the company to file with the Commission copies of all papers filed in such proceedings. The application of Section 33 of the Act will alert the Commission to the initiation, development and results of litigation involving the ANCSA Registrants and their insiders, which might in turn have implications under the securities laws.

The foregoing paragraphs provide an outline of the major substantive provisions of the Act which would be made applicable to ANCSA Registrants as a result of amendments to the proposed rule. Interested persons are referred to the notice<sup>26</sup> originally proposing Rule 60-2 for further textual explanation of the purposes of the Rule and of subjecting ANCSA Registrants to Sections 9, 17, 36,

<sup>26</sup> Investment Company Act Rel. No. 8251, February 26, 1974.

and 37. Interested persons are reminded of the fact that the present proposed version of the Rule would embrace a number of other sections of the Act, some of which could have a substantive impact upon ANCSA Registrants,<sup>2</sup> but most of which are either enabling sections,<sup>3</sup> empowering the Commission to take certain measures to enforce the Act, or general procedural<sup>4</sup> sections which are appropriate to the overall administration of the Act. The applicability of these sections to ANCSA Registrants and to matters pertaining to ANCSA Registrants should not place additional burdens of a significant nature upon the Alaska Native shareholders or affiliated persons of ANCSA Registrants.

Rule 6c-2 is proposed pursuant to Sections 6(c), 38(a), and 39 of the Act. Section 6(c) of the Act provides that the Commission by rule, regulation, or order may conditionally or unconditionally exempt any person, security, or transaction or any class of persons, securities, or transactions from any provision or provisions of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes intended by the policy and provisions of the Act. Section 38(a) states, in part, that the Commission shall have the authority from time to time to make, issue and amend such rules and regulations as are necessary or appropriate to the exercise of powers conferred upon the Commission elsewhere in the Act. Section 39 states in part that, subject to the Federal Register Act, rules and regulations of the Commission under the Act shall be effective upon publication in the manner prescribed by the Commission.

#### COMMISSION ACTION

Pursuant to the authority in sections 6(c), 38(a) and 39 of the Investment Company Act of 1940, the Securities and Exchange Commission proposes to amend § 270.6c-2 of Chapter II of Title 17 of the Code of Federal Regulations by changing the present temporary regulation thereunder to read as follows:

#### § 270.6c-2 Exemption for corporations organized pursuant to the Alaska Native Claims Settlement Act of 1971.

Any corporation organized pursuant to the Alaska Native Claims Settlement Act of 1971 ("ANCSA Corporation" and "Settlement Act" respectively) shall be exempt from the following provisions of the Act: Sections 8(b), 11, 12, 13, 14, 15(b), 15(d), 16, 18, 19, 20(b), 20(c), 20(d), 21(a), 22, 23, 24, 26, 27, 28, 29, 30(b)(1), 30(c), 30(f), 32(a)(2), 32(a)(3), 32(a)(4), 35(a), 35(b), and 35(c), and any rules adopted by the Commission under such sections. Such exemptive relief shall be available to any ANCSA Cor-

<sup>2</sup> See, e.g., Sections 47-49 of the Act (15 U.S.C. 80a-47-80a-49).

<sup>3</sup> See, e.g., Sections 41, 42, 45 and 46 of the Act (15 U.S.C. 80a-41, 80a-42, 80a-45, and 80a-46).

<sup>4</sup> See, e.g., Sections 38-40, 43, 44, 46, and 50-53 of the Act (15 U.S.C. 80a-38-80a-40, 80a-43, 80a-44, 80a-46, and 80a-50-80a-53).

poration which registers with the Commission in the manner prescribed by Section 8(a) ("ANCSA Registrant") and shall take effect as of the date of such registration. In addition to the foregoing, the following special exemptions and instructions shall be applicable to ANCSA Registrants:

(a) ANCSA Registrants shall be exempt from the requirements of Section 15(a) of the Act to the extent that it provides for approval of advisory agreements by majority vote of shareholders.

(b) A transaction shall be exempt from the prohibitions of Sections 17(a) and 17(d), and Rule 17d-1 under Section 17(d), provided that:

(1) The amount of assets to be committed by each ANCSA Registrant which is a party to the transaction is less than \$50,000 in value; and

(2) The board of directors of each ANCSA Registrant participating therein has determined that such participation will be fair and reasonable and does not involve any overreaching of its shareholders and such determination meets the following conditions:

(i) Where all members of the board of an ANCSA Registrant are disinterested directors, as defined in paragraph (c)(1) of this section, the determination shall be made by majority vote of such directors;

(ii) Where one or more members of the board of directors of such ANCSA Registrant is not a disinterested director, such determination shall be made by a vote of the majority of the disinterested directors of such ANCSA Registrant and approved by a vote of a majority of the disinterested directors of the regional corporation for such ANCSA Registrant, and such regional corporation shall not be a party to the transaction;

(iii) Where one or more members of a regional corporation is not a disinterested director, such corporation shall not be a party to a transaction exempted by this paragraph (b), notwithstanding the fact that every director of each village corporation participating in the transaction is a disinterested director; and further provided

(iv) (A) The directors of an ANCSA Registrant voting with respect to a proposed transaction pursuant to the terms of this paragraph (b) shall request from each affiliated person of any ANCSA Registrant, or from an affiliated person of such affiliated person, who is a party to such transaction such information as may reasonably be necessary to make the determination by each group of directors required by the terms of this section (b), and to evaluate such information prior to making such determination;

(B) Each such affiliated person, and each such affiliated person of such affiliated person, shall have received a certified copy of the determination made by each group of directors required by this paragraph (b) prior to consummation of the proposed transaction.

(c) For the purpose of determining the availability of the exemption provided by paragraph (b) of this section:

(1) The term "disinterested director" shall mean a director who has no direct

or indirect financial interest in the proposed transaction for which the exemption is sought other than by reason of his interest as a shareholder in an ANCSA Registrant.

(2) The terms "village corporation" and "regional corporation" shall be as defined in the Settlement Act.

(d) For purposes of Rules 17a-6 and 17d-1(d)(5) under Section 17 of the Act, the following special provisions shall apply with respect to transactions involving ANCSA Registrants:

(1) The exemption provided by paragraph (a) of Rule 17a-6 shall be available as if the ANCSA Registrant which is a party to such transaction were a company principally engaged in the business of underwriting, furnishing capital to industry, financing promotional enterprises, purchasing securities of issuers for which no ready market is in existence, and reorganizing companies or similar activities;

(2) The exemption provided by Rule 17a-6 and 17d-1(d)(5) shall be available without regard to whether or not an ANCSA Registrant, or a company it controls, commits in excess of 5% of its assets to a proposed joint enterprise within the meaning of such rule;

(3) For purposes of both Rule 17a-6 and Rule 17d-1(d)(5), where two or more ANCSA Registrants which are village corporations are parties to a proposed transaction, and would be deemed affiliated persons of each other only because they are deemed controlled persons of the regional corporation for the region in which they are located, such ANCSA Registrants shall not be deemed affiliated persons of each other provided (i) that such regional corporation does not own any securities issued by such ANCSA Registrants and (ii) that any member of the board of directors of such regional corporation who owns any securities of such ANCSA Registrants is disqualified from voting upon the proposed transaction.

(e) An ANCSA Registrant which does not have total assets exceeding one million dollars and 500 or more shareholders shall be exempt from the requirements of Section 20(a) of the Act.

(f) An ANCSA Registrant which does not have total assets exceeding one million dollars and 500 or more shareholders shall be exempt from the requirements of Section 30(a) of the Act; however, such Registrants shall file with the Commission certified copies of the audit reports required to be filed by Sections 7(c) and 8(c) of the Settlement Act.

(g) An ANCSA Registrant having total assets exceeding one million dollars and 500 or more shareholders shall be subject to Section 30(a) of the Act and Rule 30a-1(a) thereunder; for purposes of complying with these requirements an ANCSA Registrant shall file its annual report with the Commission on Form N-5R, the form prescribed for small business investment companies, provided, however, That instructions provided on Form N-5R under the heading "Instructions As To Financial Statements" shall not apply to an ANCSA Registrant, and

the following instructions shall be applicable in lieu thereof: An ANCSA Registrant subject to Section 30(a) of the Act shall file the following financial statements with its annual report on Form N-5R, all in accordance with the requirements of Regulation S-X: (1) a certified balance sheet or statement of assets and liabilities as of the close of the fiscal year; (2) certified statements of income and expense, realized and unrealized gain or loss on investments, and changes in net assets, each as required by Rules 6-04, 6-05, 6-06, and 6-08 of Regulation S-X, respectively; (3) a certified consolidated balance sheet of the ANCSA Registrant and its subsidiaries as of the close of the fiscal year of the registrant, in accordance with Rule 6-02 of Regulation S-X; (4) certified consolidated statements of income and expense, realized and unrealized gain or loss on invest-

ments, and changes in net assets for the registrant and its subsidiaries, consolidated for the fiscal year, each as specified in Rules 6-04, 6-05, 6-06, and 6-08 of Regulation S-X, respectively; and (5) the financial statements for each subsidiary not consolidated which would be required if the subsidiary were itself a registrant.

(h) All ANCSA Registrants shall be exempt from the requirements of Section 30(d) and Rule 30d-1 thereunder to the extent that such section, together with such rule, require reports to be transmitted to shareholders of an ANCSA Registrant more than once annually.

NOTE: Additional relief from the Act covering the period from December 18, 1971 until the adoption of the present rule is available pursuant to temporary Rule 6c-2(T) to any ANCSA Corporation which was registered in the manner prescribed by Section 8(a) and remained so registered during the effectiveness of such temporary rule.

(Sections 6(c), 38(a), 39, 54 Stat. 800, 841, 842, 15 U.S.C. 80a-6(c), 80a-38(a), 80a-39)

All interested persons are invited to submit views and comments with respect to proposed Rule 6c-2, in writing, to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, on or before October 1, 1975. All communications with respect to this matter should refer to File No. S7-514. Such communications will be available for public inspection. Information on the Commission's adoption of temporary Rule 6c-2(T) is found elsewhere in this issue of the FEDERAL REGISTER.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### DEPARTMENT OF DEFENSE

#### Department of the Army ARMED FORCES EPIDEMIOLOGICAL BOARD Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), announcement is made of the following committee meeting:

An ad hoc Study Team operating as a subcommittee of the Armed Forces Epidemiological Board will meet 26 September 1975 in Room 1E235, Forrestal Building, Washington, D.C. from 0900 to 1600 hours. The purpose of the meeting is to review the current US Army Medical Department physical examination policy and to provide advice regarding the scope of periodic physical examinations for active duty Army personnel. The proposed agenda includes a discussion of current policy and procedures, proposed additional screening procedures and the development of improved health maintenance programs.

This meeting is open to the public, but limited by space accommodations.

Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, AFEB in writing, prior to the meeting, at the following address: Executive Secretary, AFEB, Room 1B412 Pentagon, Washington, D.C. 20310.

DUANE G. ERICKSON,  
LTC, MSC, USA,  
Executive Secretary.

### DEPARTMENT OF THE INTERIOR

#### Bureau of Indian Affairs

[Dockets Nos. 161, 222, and 224]

#### YAKIMA TRIBES OF INDIANS OF THE YAKIMA RESERVATION

#### Notice of Public Hearing Regarding Use or Distribution of Indian Judgment Funds, Claims

SEPTEMBER 4, 1975.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2.

Notice is hereby given in accordance with provisions of the Use or Distribution of Indian Judgment Funds Act of October 19, 1973 (Public Law 93-134), that a public hearing will be held be-

ginning at 2 p.m. on September 27, 1975, at the Toppenish Community Center, Toppenish, Washington, on a proposed plan leading to a recommendation to be made to the Congress regarding the use and/or distribution of monies awarded to the Yakima Tribes of Indians of the Yakima Reservation in Dockets 161, 222, and 224.

A copy of the proposed plan for use and/or distribution of these judgment monies will be made available on request by the Area Director, Bureau of Indian Affairs, Portland Area Office, P.O. Box 3785, Portland, Oregon 97208, or the Superintendent, Bureau of Indian Affairs, Yakima Agency, P.O. Box 632, Toppenish, Washington 98948.

Individuals or organizations may express their oral or written views by appearing at this hearing, or they may submit written comments for inclusion in the official record of the hearing to the Area Director at the above address by October 4, 1975.

MORRIS THOMPSON,  
Commissioner of Indian Affairs.

#### Bureau of Land Management ROSEBURG DISTRICT MULTIPLE USE ADVISORY BOARD Meeting

Notice is hereby given that the Bureau of Land Management, Roseburg District Multiple Use Advisory Board will meet at 9 a.m., on October 2, 1975, at the Roseburg District Office, 777 NW. Garden Valley Boulevard, Roseburg, Oregon.

The agenda will include a review of the Advisory Board Charter, election of officers, status reports of major district programs and review of proposed SBA set-aside timber sale programs.

The meeting will be open to the public insofar as seating is available. Time will be available for brief statements from members of the public, but those wishing to make oral statements must inform the chairman in writing prior to the meeting. Interested persons may file a written statement with the Board for its consideration. They should be sent to Chairman, District Advisory Board, in care of the District Manager, Bureau of Land Management, 777 NW. Garden Valley Boulevard, Roseburg, Oregon 97470.

WILLIAM R. ROUSE,  
Acting Roseburg District Manager.

#### National Park Service

#### GATEWAY NATIONAL RECREATION AREA, BROOKLYN, NEW YORK

##### Notice of Meeting

Notice is hereby given that the process of developing a master plan for Gateway National Recreation Area will continue on Wednesday, October 1st at 7:30 p.m. with a workshop at Floyd Bennett Field, Bldg. 272, Flatbush Avenue, Brooklyn, New York. Additional Workshops will be held:

Saturday, October 4th—1:00 p.m.—Sandy Hook Chapel, Fort Hancock, Sandy Hook, N.J.  
Wednesday, October 8th—7:30 p.m.—Staten Island Conf. Room, Great Kills Park, Staten Island, N.Y.  
Thursday, October 9th—7:30 p.m.—Howard Johnsons, Route 1 & 9, Haynes Street, Newark, N.J.  
Saturday, October 11th—1:00 p.m.—Fort Tilden Chapel Bldg., Breezy Point, N.Y.  
Tuesday, October 14th—7:30 p.m.—City Univ. of New York, Graduate School, 33 West 42nd Street, New York City.

## NOTICES

The workshops will provide an opportunity for public suggestions, ideas and comments on the management and development of the Recreation Area. The information gained from these workshops will be used by the National Park Service in preparing a draft master plan for Gateway. The public will be given additional opportunities for review as the plan develops.

Copies of basic information relating to Gateway National Recreation Area and a set of management objectives are available upon request from the Public Involvement Office, Gateway National Recreation Area, Floyd Bennett Field 11234. The Superintendent's telephone number is 212-252-8104.

Dated: August 19, 1975.

DENIS P. GALVIN,  
Acting Regional Director,  
North Atlantic Region.

### DEPARTMENT OF COMMERCE

#### Bureau of the Census

#### VOTING RIGHTS ACT AMENDMENT OF 1975

##### Determinations Under Title III

In accordance with the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973, et seq.), as amended by the Voting Rights Act Amendment of 1975, Public Law 94-73) the Bureau of the Census has determined that the political subdivisions in the following table have more than five percent of their citizen population of a specified language minority group and meet the requirement for coverage under Title III of the Act Amendment for that minority. Determinations for additional subdivisions in these and other States will appear in later issues of the FEDERAL REGISTER.

Dated: September 3, 1975.

VINCENT P. BARABBA,  
Director,  
Bureau of the Census.

#### Domestic and International Business Administration

#### IMPORTERS' TEXTILE ADVISORY COMMITTEE

##### Public Meeting

The Importers' Textile Advisory Committee will meet at 10:30 a.m. on October 16, 1975, in Room 6802, Department of Commerce, 14th & Constitution Avenue, N.W., Washington, D.C. 20230.

The Committee, which is comprised of 20 members, was established by the Secretary of Commerce on August 13, 1963 to advise U.S. Government officials of the effects on import markets of cotton, wool and man-made fiber textile agreements.

The agenda for the meeting is as follows:

1. Review of import trends.
2. Implementation of textile agreements.
3. Report on conditions in the domestic market.
4. Other business.

A limited number of seats will be available to the public. The public will be permitted to file written statements with the Committee before or after the meeting. To the extent time is available at the end of the meeting, the presentation of oral statements will be allowed.

Copies of the minutes of the meeting will be made available on written request addressed to the Office of Textiles, Room 2815, U.S. Department of Commerce, 14th & Constitution Avenue, N.W., Washington, D.C. 20230.

Further information concerning the Committee may be obtained from Arthur Garel, Director, Office of Textiles, Main Commerce Building, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-967-5078.

Dated: August 20, 1975.

ALAN POLANSKY,  
Deputy Assistant Secretary for  
Resources and Trade Assistance.

[FR Doc.75-23903 Filed 9-8-75; 8:45 am]

#### MANAGEMENT-LABOR TEXTILE ADVISORY COMMITTEE

##### Public Meeting

The Management-Labor Textile Advisory Committee will meet at 2:00 p.m. on October 15, 1975 and November 19, 1975, in Room 6802, Department of Commerce, 14th & Constitution Avenue, N.W., Washington, D.C. 20230.

The Committee, which is comprised of 40 members, was established by the Secretary of Commerce on April 23, 1962 to advise U.S. Government officials on problems and conditions in the textile and apparel industry and furnish information on world trade in textiles and apparel.

The agenda for each meeting will be as follows:

1. Review of import trends.
2. Implementation of textile agreements.
3. Report on conditions in the domestic market.
4. Other business.

A limited number of seats will be available to the public. The public will be permitted to file written statements with the Committee before or after each meeting. To the extent time is available at the end of the meetings, the presentation of oral statements will be allowed.

Copies of the minutes of the meetings will be made available on written request addressed to the Office of Textiles, Room 2815, U.S. Department of Commerce, 14th & Constitution Avenue, N.W., Washington, D.C. 20230.

Further information concerning the Committee may be obtained from Arthur

Garel, Director, Office of Textiles, Main Commerce Building, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-967-5078.

Dated: August 20, 1975.

ALAN POLANSKY,  
Deputy Assistant Secretary for  
Resources and Trade Assistance.

[FR Doc.75-23904 Filed 9-8-75; 8:45 am]

#### National Bureau of Standards

##### FABRICS FOR BOOK COVERS

##### Voluntary Product Standard; Action on Proposed Withdrawal

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of Voluntary Product Standard PS 9-68, "Fabrics for Book Covers."

It has been determined that this standard is technically inadequate, no longer used by the industry and that revision would serve no useful purpose. The subject matter of PS 9-68 is adequately covered by Book Manufacturers' Institute BMI-675, "Fabrics for Book Covers." This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the FEDERAL REGISTER of May 2, 1975 (40 FR 19225) to withdraw this standard.

The effective date for the withdrawal of this standard will be November 10, 1975. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce procedures.

ERNEST AMBLER,  
Acting Director.

SEPTEMBER 3, 1975.

[FR Doc.75-23827 Filed 9-8-75; 8:45 am]

#### INSTANT NONFAT DRY MILK

##### Intent To Withdraw Voluntary Product Standard

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the intent to withdraw Voluntary Product Standard PS 37-70, "Package Quantities of Instant Nonfat Dry Milk."

It has been tentatively determined that the standard is no longer generally used by the industry and that revision of this Voluntary Product Standard would serve no useful purpose.

Any comments or objections concerning the intended withdrawal of this standard should be made in writing to the Standards Development Services Section, National Bureau of Standards, Washington, D.C. 20234, on or before October 9, 1975. The effective date of

withdrawal, if appropriate, will be not less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of withdrawal.

ERNEST AMBLER,  
Acting Director.

#### National Oceanic and Atmospheric Administration

##### MARINE PETROLEUM AND MINERALS ADVISORY COMMITTEE

##### Supplemental Notice of Open Meeting

As was previously announced the meeting of the Marine Petroleum and Minerals Advisory Committee (the "Committee"), which was planned for July 22-23, 1975, will be held from 9:00 a.m. until 4:30 p.m. on September 22, 1975 and from 9:00 a.m. until 12 noon on September 23, 1975 in Room 6802 of the Department of Commerce Building, 14th Street between E and Constitution Avenue NW., Washington, D.C.

The meeting will be open for public observation and approximately 35 seats will be available for the public on a first-come, first-served basis. Although advanced notification is not required, because of building security procedures the public is required to notify the Executive Secretary (whose name, address, and telephone number are given below) of their attendance plans by 4:00 p.m. on September 18, 1975 to facilitate access.

The Committee was established to advise the Secretary of Commerce on matters pertinent to the Department of Commerce's responsibilities related to marine petroleum and marine minerals resources, on means to facilitate cooperation between the private sectors and government in these matters, and on related Law of the Sea affairs. The members represent the industrial, labor, academic, legal, environmental and economic sectors concerned with the management, use, conservation and development of marine petroleum and marine minerals resources.

Included in the matters for consideration, and the approximate times for their consideration are as follows:

September 22, 1975

9:00—Welcoming Remarks, Announcements, and Chairman's Report on Actions Taken with Respect to the Committee's March Recommendations.

9:15—Law of the Sea and the Report of the Working Group on International Ocean Investment Conditions (including Discussion and Proposed Committee Actions).

10:00—Coffee Break.

10:15—Continue Consideration of the Topic.

11:30—Recess for Lunch.

1:00—Report of the Working Group on Impacts of Offshore Oil and Gas Development, Discussion, and Proposed Committee Actions.

## NOTICES

41829

- 2:30—Remarks to the Committee by the Secretary of Commerce.
- 3:30—Resume Consideration of Working Group Report.
- 4:30—Adjourn for the Day.

SEPTEMBER 23, 1975

- 9:00—Opening Remarks and Announcements.
- 9:05—Report on the Deep Ocean Mining Environmental Study (DOMES).  
—Introduction.  
—DOMES Plans and Accomplishments.  
—Discussions.
- 10:15—Coffee Break.
- 10:30—NOAA Marine Hard Minerals Initiative.
- 11:15—Topics Suggested by Members and Plans for Next Committee Meeting.
- 12:00—Adjourn.

Interested persons may submit written statements relevant to the Committee's areas of interest before or after the meeting or by mailing such statements to the Executive Secretary at the address below.

Inquiries regarding the Committee or the meeting may be directed to the Executive Secretary, Amor L. Lane, National Oceanic and Atmospheric Administration (MR3), 6010 Executive Boulevard, Rockville, Maryland 20852 (Telephone: 301-496-8323).

T. P. GLEITER,  
Assistant Administrator for Administration, National Oceanic and Atmospheric Administration.

#### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

##### Office of Interstate Land Sales Registration

[Docket No. N-75-422]

##### AMERICAN CAPITAL LAND CORP.

##### Notice of Hearing

In the matter of American Capital Land Corporation d/b/a Gulf Park Estates OILSR No. 0-2756-28-49, Doc. No. 75-96-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. American Capital Land Corporation d/b/a Gulf Park Estates, D. C. Armbrust, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued July 16, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for American Capital Land Corporation, located in Jackson County, Mississippi, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 8, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 1, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 17, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

JAMES W. MAST,  
Administrative Law Judge.

##### GROVELAND HIGHLANDS

##### Notice of Hearing

In the matter of Groveland Highlands, OILSR No. 0-1419-09-402 Doc. No. Y-919-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Groveland Highlands, Oscar Burstein, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), was served a Notice of Proceedings and Opportunity for Hearing issued July 22, 1975, which was published in the FEDERAL REGISTER July 29, 1975, pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Groveland Highlands, located in Polk County, Florida, contain untrue statements of material fact or omit to state material facts required to be stated therein as necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 8, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 10, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before October 3, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b) (1).

be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 2, 1975.

By the Secretary.

JAMES W. MAST,  
Administrative Law Judge.

##### HORIZON CITY SUBDIVISION

##### Notice of Hearing

In the matter of Horizon City Subdivision, OILSR No. 0-0034-49-1, 0-0352-49-17, 0-0734-49-24, 0-0851-49-29, 0-0034-49-1(A-L), Doc. No. 75-104-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Horizon Properties Corporation, Sidney Nelson, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued July 1, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Horizon City Subdivision, located in El Paso County, Texas, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed a Motion for More Definite Statement received July 11, 1975, in response to the Notice of Proceedings and Opportunity for Hearing. On July 18, 1975, the undersigned ordered, among other things, that the Secretary furnish the Respondent with a More Definite Statement. Accordingly, on July 29, 1975, a More Definite Statement was issued and duly served on Respondent. The Respondent filed an Answer, received August 11, 1975, in response to the More Definite Statement.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 2, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 19, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the suspension of the Statement of

ington, D.C. 20410 on or before September 18, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b) (1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 28, 1975.

By the Secretary.

JAMES W. MAST,  
Administrative Law Judge.

[Docket No. N-75-423]

##### PADRE ISLAND CORPUS CHRISTI

##### Notice of Hearing

In the matter of Padre Island Corpus Christi, OILSR No. 0-0043-49-2(B), Docket No. ED-75-12.

Pursuant to 15 U.S.C. 1706(b) and 24 CFR 1720.155(b), Notice is hereby given that:

1. Padre Investment Corporation, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Suspension dated July 18, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(b) and 24 CFR 1710.45(a) informing the developer that its Statement of Record submitted June 20, 1975, for Padre Island Investment Corporation, Padre Island Corpus Christi located in Corpus Christi, Texas, was not effective pursuant to the Act, and the regulations contained in 24 CFR Part 1710.

2. The Respondent filed an Answer dated August 1, 1975, in answer to the allegations of the Notice of Suspension dated July 18, 1975.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Suspension.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(b) and 24 CFR 1720.155(b), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Suspension will be held before Judge James W. Mast, Administrative Law Judge, in Room 7146, Department of HUD Building, 451 7th Street, S.W., Washington, D.C., on September 24, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 19, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the suspension of the Statement of

Record, herein identified, shall continue until vacated by order of the Secretary, pursuant to 24 CFR 1720.155.

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: August 28, 1975.

By the Secretary.

JAMES W. MAST,  
Administrative Law Judge.

##### PARADISE ACRES

##### Notice of Hearing

In the matter of Paradise Acres, OILSR No. 0-2456-09-733 Doc. No. 75-108-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Equitable Development Corporation, Bernard H. Horowitz, President and Director, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued July 18, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Paradise Acres, located in Broward County, Florida, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 11, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 9, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 25, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of

Record, herein identified, shall be issued

which shall be deemed to be true, and an

#### PARADISE LAKES AND HIGHLANDS PARK ESTATES

##### Notice of Hearing

In the matter of Paradise Lakes and Highlands Park Estates, OLSR No. 0-2563-09-765, 0-3318-09-901, Doc. No. 75-107-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Equitable Development Corporation, Bernard H. Horowitz, President and Director, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued July 18, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b) (1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Paradise Lakes and Highlands Park Estates, located in Broward County, Florida, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 11, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C. on October 9, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C. 20410 on or before September 25, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of

[Dockets Nos. 26494, 27573; Order 75-9-9]

#### INTERNATIONAL AIR TRANSPORT ASSOCIATION

##### Order Relating to Currency Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 3rd day of September 1975.

Docket 26494, Agreement C.A.B. 25352, R-1 through R-5.

Docket 27573, Agreement C.A.B. 25338, R-1 through R-4.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreements, adopted by mail vote, have been assigned the above C.A.B. agreement numbers.

The agreements propose currency-related discounts for passenger and cargo air transportation originating in Lebanon. Insofar as they directly affect air transportation as defined by the Act, the agreements would apply a discount of 15 percent on North and Mid-Atlantic normal fares, as well as on cargo rates. Fares and rates from Lebanon are presently established by conversion from specified U.S. dollar fares/rates at the IATA exchange rate of 3.10 Lebanese pounds=\$1.00, whereas the current market rate is about 2.29 Lebanese pounds=\$1.00. The subject agreement would bring cargo rates from Lebanon into much closer alignment with current exchange rates, and will be approved consistent with our action approving similar discounts from strong-currency European countries.

Pursuant to the Federal Aviation Act of 1958 and particularly sections 102, 204(a) and 412 thereof, the Board does not find that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act:

Agreement CAB	IATA Resolution
25338:	
R-1	JT12 (Mail 870) 022H.
R-2	JT12 (Mail 871) 022J.
R-3	200 (Mail 258) 022K.
R-4	JT23 (Mail 361) 022mm.
	JT123 (Mail 756) 022mm.

Agreement CAB	IATA Resolution
25352:	
R-1	200 (Mail 255) 022dd.
R-2	JT23 (Mail 359) 022v. JT 123 (Mail 754) 022v.
R-3	JT12 (Mail 868) 022w.
R-4	JT12 (Mail 868) 022y.
R-5	JT12 (Mail 868) 022z.

Accordingly, it is ordered, That: Agreements C.A.B. 25338, R-1 through R-4, and C.A.B. 25352, R-1 through R-5, be and hereby are approved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

#### ENVIRONMENTAL PROTECTION AGENCY

[FRL 428-1, PP4G1470/T8]

##### CHEVRON CHEMICAL CO.

Renewal of Temporary Tolerance; Diquat (6,7-dihydrodipyrido (1,2-a:2',1'-c)pyrazidinium)

On August 6, 1974, the Environmental Protection Agency (EPA) gave notice (39 FR 28316) that Chevron Chemical Co., 940 Hensley St., Richmond CA 94804, had been granted a temporary tolerance for residues of the herbicide and plant regulator diquat (6,7-dihydrodipyrido (1,2-a:2',1'-c)-pyrazidinium) derived from application of the dibromide salt and calculated as the cation in or on potatoes at 0.2 part per million. This tolerance expired July 31, 1975.

The petitioner has requested a 1-year renewal of the temporary tolerance to permit continued testing to obtain additional data and to permit the marketing of potatoes treated in accordance with an experimental use permit that is being issued concurrently to Chevron Chemical Co. under the Federal Insecticide, Fungicide, and Rodenticide Act.

Based on data submitted in the petition and other relevant material, it is concluded that the renewal of the temporary tolerance will protect the public

health. The temporary tolerance, therefore, is being renewed for diquat for distribution under the Chevron Chemical Co. name and on condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Chevron Chemical Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires September 2, 1976. Residues not in excess of this temporary tolerance remaining in or on the above raw agricultural commodity after the expiration of this tolerance will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit and temporary tolerance.

(Section 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)))

Dated: September 2, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc.75-23821 Filed 9-8-75;8:45 am]

[FRL 421-3]

#### MINNESOTA

##### Marine Sanitation Device Standard

On April 7, 1975, notice was published that the State of Minnesota had petitioned the Administrator, Environmental Protection Agency, by regulation, to completely prohibit the discharge from a vessel of any sewage (whether treated or not) into the waters of the Great Lakes within Minnesota pursuant to section 312(f) (4) of Pub. L. 92-500 (40 FR 15439, April 7, 1975).

Comments in opposition to the petition were received from the U.S. Coast Guard, the Maritime Administrator of the U.S. Department of Commerce, Lauderdale Marina, Inc., of Fort Lauderdale, Florida, Boat Owners Association of the United States, Great Lakes Cruising Club, Lake Carriers' Association, the Co-Chairman of the Boating Pollution Control Committee, National Boating Federation, Hyde Products, Inc., of Westlake, Ohio and Hubbard Broadcasting, Inc., of St. Paul, Minnesota.

The petition from the State of Minnesota and all comments received have been carefully considered by the Environmental Protection Agency. The petition is denied on the ground that no substantiating information has been submitted showing that the designated waters require water quality protection greater than that afforded by the Federal standard.

The Environmental Protection Agency supports fully the complete prohibition

of the discharge from all vessels of any sewage, whether treated or not, into waters where it can be determined that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available, or into specified waters where the protection and enhancement of water quality are shown to require such action.

Should the State of Minnesota resubmit a petition under section 312(f) (3) of Pub. L. 92-500, or for specified waters under section 312(f) (4), the information and comments filed pursuant to the April 7 notice will be incorporated by reference into any such petition.

Dated: September 2, 1975.

RUSSELL E. TRAIN,  
Administrator.

[FR Doc. 75-23813 Filed 9-8-75; 8:45 am]

[FRL 427-7; PP 5G1617/T7]

#### MOBAY CHEMICAL CORP.

#### Establishment of a Temporary Tolerance; O-Ethyl S,S-Diphenyl Phosphorodithioate

Chemagro Agricultural Div., Mobay Chemical Corp., PO Box 4913, Kansas City MO 64120, submitted a pesticide petition (PP 5G1617) to the Environmental Protection Agency (EPA). This petition requested that a temporary tolerance be established for residues of the fungicide O-ethyl S,S-diphenyl phosphorodithioate in or on rice grain at 0.1 part per million.

This temporary tolerance would permit the marketing of the rice grain when treated in accordance with an experimental use permit which is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act. (A related document concerning establishment of a feed additive tolerance also appears in today's FEDERAL REGISTER.)

The data submitted in the petition and other relevant material have been evaluated, and it has been determined that the tolerance is adequate to cover residues resulting from proposed experimental use and that such tolerance will protect the public health. Therefore, the temporary tolerance is established as requested for the fungicide for distribution under the Mobay Chemical Corp. name with the following provisions:

1. The total amount of the active fungicide to be used must not exceed the quantity authorized by the experimental use permit.

2. Mobay Chemical Corp. must notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request, make the records available to any authorized officer or employee of the EPA or Food and Drug Administration.

3. Rice straw treated under this experimental use permit must not be used for feed purposes. The rice straw must remain in the field and be plowed under.

The temporary tolerance expires on July 24, 1976. Residues not in excess of this temporary tolerance remaining in or

on the above raw agricultural commodity after expiration of the tolerance will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit and temporary tolerance. The temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health.

Section 408(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(j)].

Dated: September 2, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FRL 424-3]

#### NEW STATIONARY SOURCES OF AIR POLLUTION

#### Standards of Performance; Opacity Provisions: Response to Public Comments

On April 22, 1975 (40 FR 17778), the Environmental Protection Agency (EPA) published a notice inviting comments from all interested persons on amendments to 40 CFR 60.11 and Reference Method 9 of Appendix A to Part 60 which were published on November 12, 1974 (39 FR 39872). Comments were requested also on the report entitled "Reevaluation of Opacity Standard of Performance for Asphalt Concrete Plants." A total of 75 comment letters was received, 30 of which came from the asphalt concrete industry, 13 from State and local air pollution control agencies, 4 from Federal agencies, and the remainder from miscellaneous industries and interested individuals.

All comments have been carefully considered, and EPA has determined that no revisions should be made to the provisions of § 60.11, Reference Method 9, or to the opacity standard of performance for asphalt concrete plants. The Freedom of Information Center, Room 202 West Tower, 401 M Street, S.W., Washington, D.C., has copies of the comment letters received and a summary of the issues and Agency responses available for public inspection. In addition, copies of the issue summary may be obtained upon written request from the EPA Public Information Center (PM-215), 401 M Street, S.W., Washington, D.C. 20460 (specify—Public Comment Summary: Opacity Provisions Under Standards of Performance for New Stationary Sources of Air Pollution).

The most significant comments are summarized and discussed below.

#### ASPHALT OPACITY STANDARD

On March 8, 1974 (39 FR 9308), EPA promulgated standards of performance with respect to particulate matter emissions of new asphalt concrete plants. These standards limited emissions to less than 90 mg/dscm (milligrams per dry standard cubic meter) and to less than 20 percent opacity. Petitions for review were brought by two parties in the U.S.

Court of Appeals for the District of Columbia Circuit, challenging, among other things, the opacity standard. *National Asphalt Pavement Association et al. v. Train*, Nos. 74-1332, 74-1388. At the same time there was pending before that Court an action in which the opacity requirement of an earlier standard of performance had been challenged on many of the same grounds, *Portland Cement Association v. Ruckelshaus*, No. 72-1073. On June 29, 1973, the Court had remanded to EPA for further consideration several issues, including the issue of whether opacity observations could be made with reasonable accuracy. *Portland Cement Association v. Ruckelshaus*, 486 F.2d 375, 401. EPA's response to that remand, filed with the Court on November 5, 1974 and published on November 12, 1974 (39 FR 39872), stated EPA's findings on the matters remanded for consideration. In light of the importance of those findings to the asphalt concrete plant opacity standard, EPA undertook a reappraisal of the opacity standard. These findings were reported in "Reevaluation of Opacity Standard of Performance for Asphalt Concrete Plants," November 1974, which was made available for public reading on January 3, 1975 (40 FR 831).

In response to the April 22, 1975, notice inviting public comment, EPA received comments to the effect that: 1) opacity observations are too inaccurate to be used in enforcement of standards, 2) the level of 20 percent is not appropriate, and 3) the opacity standard has not previously been applied to fugitive emissions.

1. *Inaccuracy of opacity observations.* EPA's response to the remand in the Portland cement case discusses in great detail the various arguments that have been advanced to support this position, as well as recent EPA data showing that out of 769 opacity observations, 763 (99.3 percent) were performed with an error not exceeding +7.5 percent based on single sets of the average of 24 readings. No new evidence was presented by these comments. The U.S. Court of Appeals for the D.C. circuit on May 22, 1975, upheld EPA's position that opacity observations can be made within reasonable accuracy. *Portland Cement Association v. Ruckelshaus*, 513 F.2d 506, 508. EPA believes that opacity observations taken in accordance with Reference Method 9 are sufficiently accurate to be used as a valid means of enforcing opacity standards.

2. *Level of the opacity standard.* One local air pollution control agency stated that the level of the standard is too high because asphalt concrete plants can achieve no visible emissions (zero percent opacity). Commentators from the asphalt concrete industry argued that 20 percent opacity cannot be achieved by asphalt concrete plants using best adequately demonstrated control technology. These comments challenged the validity of EPA's analysis which indicated that the opacity standard was established at a level which required proper operation and maintenance of best demonstrated control technology. None of the commentators provided any data

which showed EPA's analysis to be in error. EPA believes that the opacity standard should not be increased since the data support the conclusion that asphalt concrete plants which achieve the concentration standard will also achieve the 20 percent opacity standard. Further, because of opacity levels which may be encountered at plants with large diameter stacks or with atypically small diameter particulate matter, the level of the opacity standard should not be decreased as suggested by the local air pollution control agency. The tests and studies EPA has conducted support this analysis and the opacity standard will not be revised.

3. *Fugitive emissions.* Three commentators believed that the reevaluation report was the first time EPA had indicated that the opacity standard is applicable to fugitive emission sources. Both as proposed and promulgated, the regulation prohibits the discharge from any affected facility any gases which exhibit 20 percent opacity or greater. The regulation defines "affected facility" as any combination of the following: dryers; systems for screening, handling, storing, and weighing hot aggregate; systems for mixing asphalt concrete; and the loading, transfer, and storage systems, associated with emission control systems. (The proposed regulation was applicable to the same systems in an asphalt concrete plant, but the systems were specified in a slightly different manner.) The purpose of applying the opacity standard to all of these components in an asphalt concrete plant is to require proper ducting and control of all emissions whether from the control device or any other part of the plant. A standard of performance for asphalt concrete plants applicable to a control device would be meaningless if significant quantities of emissions were allowed to by-pass the air pollution control device. EPA has clearly evidenced its intent to regulate fugitive emissions and shall continue to apply the opacity standard to fugitive emissions.

#### REFERENCE METHOD 9

The revisions to Reference Method 9 that were the subject of this comment period were promulgated on November 12, 1974 (39 FR 39872), having been proposed on September 11, 1974 (39 FR 35852). Several comments were received after completion of the November 12, 1974 (39 FR 39872), changes to Reference Method 9 and 40 CFR 60.11. These late comments were considered with the comments received in response to the April 22, 1975 (40 CFR 17778), notice. Most commentators on Method 9 took the opportunity to challenge not only the revisions but the previously promulgated provisions of Method 9, and such general comments were also considered by EPA.

Comments on Reference Method 9 were generally of the following nature: 1) concern over the possibility that observations made under non-ideal conditions could result in an apparent violation of the opacity standard, and 2) concern over the possibility of applying the

method in such a way as to deny due process of law.

1. *Non-ideal viewing conditions.* Several commentators suggested that Reference Method 9 should be amended further to expressly prohibit taking opacity observations under certain extreme conditions. As with all reference methods of Appendix A to Part 60, the requirements of Reference Method 9 were established to ensure obtaining data with minimum error. Consequently, the reference methods do not discuss procedures that deviate from the requirements for obtaining data with an acceptable error tolerance. As pointed out by the commentators, observations made under certain extreme and unusual conditions might incorrectly indicate a violation of the applicable opacity standard. However, Reference Method 9 requires sufficient documentation of conditions that, should an observation be made under such conditions, and should an enforcement action be brought, the court hearing the case could make an independent assessment as to the validity of the observation. EPA has determined that Reference Method 9 is sufficiently valid and reliable for determining compliance with opacity standards.

2. *Due process of law.* Several commentators argued that the opacity observations could be performed in such a way as to deny due process of law. Some commentators argued specifically that they should be notified before observations are made. EPA does not agree with the commentators that due process requires that notice be given before tests are made. It is essential as a matter of law that a party against whom a violation is alleged have an opportunity to review the evidence against him. Meaningful review means that the party must be able to assess the evidence and present his own evidence as to the validity of the opacity observation. As written, the method does not deny him that opportunity.

It is EPA's practice to notify plant operators in advance of an opacity observation unless there is reason to believe that such notification may result in modification of emissions. The normal procedure followed in an opacity observation is to request entry to the facility in order to conduct a complete inspection. If the operations of the source are such that emissions cannot be modified to be nonrepresentative of actual emissions or if the layout of the facility requires inspection from within the facility, then the owner or operator is notified prior to observation. If there is reason to believe that prior notification could result in nonrepresentative emissions, notification is provided by the inspector immediately following completion of the observation. EPA believes this procedure will provide for effective enforcement and will not deny any party the right of due process of law. In any individual case the judgment as to whether the party had adequate opportunity to rebut the evidence would be made on the record by a court.

#### 40 CFR 60.11

EPA amended 40 CFR 60.11 on November 12, 1974 (39 FR 39872), to account for two points which arose during the *Portland* remand considerations. Recognizing that anomalous situations may present a possibility of a plant complying with a mass or concentration emission standard while violating the opacity standard, EPA amended § 60.11 (e) to allow an owner or operator of any such facility to apply to the Administrator for establishment of a special opacity standard. Section 60.11(b) was amended to allow results of continuous monitoring by transmissometers to be used as probative but not conclusive evidence of the actual opacity of an emission.

Most comments on § 60.11(e) centered around the propriety or impropriety of allowing some sources to meet different standards than others and the administrative problems of implementing this procedure. EPA's extended study on opacity has indicated that no plant operating within the known range of applicable variables will need to request a special opacity standard. However, it is desirable to allow flexibility to deal with an anomalous case, such as a plant with a significantly larger than expected stack diameter. Regardless of establishment of any special opacity standard, the emissions from the source must be reduced to the level of the applicable concentration or mass standard. Thus, the special opacity standard will not be a waiver or a license to pollute. Nor will there be enough of these petitions to make special opacity standards a burden to administer.

Comments on § 60.11(b) dealt with the question of whether visual or instrumental opacity observations should be given precedence. EPA believes that the accuracy of Reference Method 9 has been sufficiently demonstrated that it should remain the primary and accepted means for determining compliance with opacity standards. However, it is reasonable to allow a source to present transmissometer data as evidence of opacity in cases where visual observations indicate a violation. Consequently, EPA will not revise § 60.11(b) at this time.

Dated: September 2, 1975.

RUSSELL E. TRAIN,  
Administrator.

[FRL 427-8; PP3G1381/T9]

#### ROHM AND HAAS CO.

#### Renewal of Temporary Tolerance; 2,4-Dichlorophenyl P-Nitrophenyl Ether

On October 11, 1974, the Environmental Protection Agency (EPA) gave notice (39 FR 36638) that Rohm and Haas Co., Independence Mall West, Philadelphia PA 19105, had been granted a temporary tolerance for combined negligible residues of the herbicide 2,4-dichlorophenyl p-nitrophenyl ether and its metabolites containing the diphenyl ether linkage in or on wheat grain and

straw at 0.1 part per million. This tolerance will expire October 4, 1975.

The petitioner has requested a 1-year renewal of the temporary tolerance to permit continued testing to obtain additional data and to permit the marketing of wheat grain and straw treated in accordance with an experimental use permit that is being issued concurrently to Rohm and Haas Co. under the Federal Insecticide, Fungicide, and Rodenticide Act.

Based on data submitted in the petition and other relevant material, it is concluded that the renewal of the temporary tolerance will protect the public health. The temporary tolerance, therefore, is being renewed for 2,4-dichlorophenyl p-nitrophenyl ether and its metabolites containing the diphenyl ether linkage for distribution under the Rohm and Haas Co. name and on condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Rohm and Haas Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or Food and Drug Administration.

This temporary tolerance expires October 4, 1976. Residues not in excess of this temporary tolerance remaining in or on the above raw agricultural commodities after expiration of this tolerance will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit and temporary tolerance.

(Section 408(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(j)]).

Dated: September 2, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc.75-23880 Filed 9-8-75; 8:45 am]

[FRL 427-4; PF5G1623/T10]

#### UPJOHN CO.

Establishment of a Temporary Tolerance; N-(2,4-dimethylphenyl)-N-[[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide

The Upjohn Co., Agricultural Div., Kalamazoo MI 49001, submitted a pesticide petition (PP 5G1623) to the Environmental Protection Agency (EPA). This petition requested that a temporary tolerance be established for residues of the insecticide N-(2,4-dimethylphenyl)-N-[[[2,4-dimethylphenyl]imino]methyl]-N-methylmethanimidamide and its metabolites N-(2,4-dimethylphenyl)-N-methylmethanimidamide and N-(2,4-dimethylphenyl) formamide in or on the following raw agricultural commodities:

grapefruits, lemons, oranges, and tangerines at 1 part per million (ppm); in meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep at 0.05 ppm; and in milk at 0.01 ppm.

The original petition included the citrus fruit tangelos, but in accordance with 40 CFR 180.1(h), this commodity is included under the general raw agricultural commodity category tangerines.

This temporary tolerance will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit which is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act. (A related document concerning establishment of a feed additive tolerance also appears in today's FEDERAL REGISTER.)

The data submitted in the petition and other relevant material have been evaluated, and it has been determined that the tolerances are adequate to cover residues resulting from the proposed experimental use, and that such tolerances will protect the public health. The temporary tolerances are, therefore, established for the insecticide for distribution under the Upjohn Co. name with the following provisions:

1. The total amount of the active insecticide to be used must not exceed the quantity authorized by the experimental use permit.

2. The Upjohn Co. must notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire September 2, 1976. Residues not in excess of this temporary tolerance remaining in or on the above raw agricultural commodities after expiration of these tolerances will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit and temporary tolerances. The temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health.

(Section 408(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(j)]).

Dated: September 2, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FRL 427-5; OPP-33000/313]

#### NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) pub-

lished in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of Section 3(c) (1) (d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by each applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street, SW, Washington DC 20460.

On or before November 10, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under Section 3(c) (1) (D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW, Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after November 10, 1975.

Dated: September 2, 1975.

JOHN B. RITCH, Jr.,  
Director, Registration Division.

#### NEW YORK TERMINAL CONFERENCE, ET AL.

##### Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 19, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Thomas D. Wilcox, Esq., Attorney at Law, 919 Eighteenth Street, N.W., Washington, D.C. 20006.

Agreement No. T-3156, between the New York Terminal Conference (NYTC), and Australia/Eastern U.S.A. Shipping Conference, Iberian/U.S. North Atlantic Westbound Freight Conference, Marseilles/North Atlantic U.S.A. Freight Conference, North Atlantic Mediterranean Freight Conference, U.S. Atlantic & Gulf/Australia New Zealand Conference, West Coast of Italy, Sicilian and Adriatic Ports/North Atlantic Range Conference, North Atlantic Westbound Freight Association, Continental North Atlantic Westbound Freight Conference, and Scandinavia-Baltic/U.S. North Atlantic Westbound Freight Conference (Steamship Conferences), represents an Interim Settlement Agreement to resolve certain conflicts concerning the establishment of

free time and demurrage practices and charges at the Port of New York, which are at issue in Docket No. 74-45.

The agreement provides that: (1) the NYTC will adopt and publish the presently existing free time and demurrage rules and charges of the Steamship Conferences; (2) effective with (1) above, each steamship conference will cancel its presently existing free time and demurrage rules and charges, and provide in its ocean tariff that NYTC's free time and demurrage rules and charges shall be observed by each steamship conference; (3) the Steamship Conferences and the NYTC agreed to meet and discuss free time and demurrage practices applicable at the Port of New York for the purpose of establishing, with the approval of the Federal Maritime Commission, uniform rules and charges governing free time and demurrage, especially in the matter of container and containerized cargoes; (4) unless ordered to do so by the Federal Maritime Commission, no changes will be made in the present rules or charges by any party until the parties establish uniform free time and demurrage rules and charges; and (5) the NYTC and the Steamship Conferences agree to apply jointly for the indefinite postponement of FMC Docket No. 74-45.

By Order of the Federal Maritime Commission.

Dated: September 3, 1975.

JOSEPH C. POLKING,  
Assistant Secretary.

## FEDERAL POWER COMMISSION

[Docket Nos. CP69-41]

## ALGONQUIN GAS TRANSMISSION CO.

## Petition To Amend

SEPTEMBER 2, 1975.

Take notice that on August 15, 1975, Algonquin Gas Transmission Company (Petitioner), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket Nos. CP69-41 a petition to amend the order issuing a certificate of public convenience and necessity in said docket pursuant to Section 7(c) of the Natural Gas Act by authorizing Petitioner to sell natural gas to Philadelphia Electric Company (Philadelphia), Pottsville Gas Company, et al. (Pottsville), and South Jersey Gas Company (South Jersey) through April 15, 1976 pursuant to Rate Schedule SNG-1, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

	Philadelphia	Pottsville	South Jersey	Total
Contract demand total (1,000,000 Btu).....	684,000	273,600	684,760	1,642,360
Demand revenues at \$1.434/1,000,000 Btu.....	\$1,021,804	\$406,758	\$1,023,031	\$2,451,593
Commodity revenues at \$3.553/1,000,000 Btu.....	2,240,134	806,054	2,242,623	5,288,811
Total revenues.....	3,261,938	1,212,812	3,265,654	7,740,204

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 24, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and

Petitioner proposes to sell for resale to Philadelphia, Pottsville and South Jersey, from October 16, 1975, through April 15, 1976, approximately 10,805 million Btu per day of gas pursuant to Rate Schedule SNG-1. Petitioner states that the gas that would be sold is expected to be needed to alleviate the expected curtailments to Philadelphia, Pottsville and South Jersey by Transcontinental Gas Pipe Line Corporation and Texas Eastern Transmission Corporation. Petitioner states that it would sell gas to Philadelphia, Pottsville and South Jersey on exactly the same terms and conditions and at the same rates as it will be made available to Petitioners' other customers of the service.

Petitioner states that the following quantities of SNG-1 gas would be sold:

Company:	Volume (million Btu per day)
Philadelphia .....	4,500
Pottsville .....	1,800
South Jersey .....	4,505

Petitioner states that it proposes in the instant petition to amend to render the proposed service on the same terms and conditions as SNG-1 service is rendered to customers who have contracted for the service pursuant to long-term contracts. Petitioner states further that it is proposing a firm, not a best efforts, service and that existing and the proposed service would be subject to ratable curtailment.

Petitioner states that other customers under its Rate Schedule SNG-1 have not contracted for the full plant outputs to be produced at its subsidiary, Algonquin SNG, Inc.'s Freetown, Massachusetts, plant, so that it offered SNG-1 service to buyers on a temporary basis. Petitioner further states that it expects that all SNG-1 gas will be sold to basic customers in the 1976-1977 heating season.

It is indicated in the petition to amend that the temporary customers, Philadelphia, Pottsville and South Jersey, contracted for SNG-1 service which, at the time they executed the contracts, was sold in the range of \$5.50 per million Btu. It is stated that utilizing the rate filed in Docket No. RP75-88 for the SNG service and on the basis of an approximate 85 percent level of service, the deliveries and revenues for the three temporary customers would be as follows:

	Philadelphia	Pottsville	South Jersey	Total
Contract demand total (1,000,000 Btu).....	684,000	273,600	684,760	1,642,360
Demand revenues at \$1.434/1,000,000 Btu.....	\$1,021,804	\$406,758	\$1,023,031	\$2,451,593
Commodity revenues at \$3.553/1,000,000 Btu.....	2,240,134	806,054	2,242,623	5,288,811
Total revenues.....	3,261,938	1,212,812	3,265,654	7,740,204

Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a

party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,  
Secretary.

[Docket Nos. CI75-201, CI75-529, CI75-530, CI75-531, CI75-532, CI75-533, CI75-534, CI75-557]

## ATLANTIC RICHFIELD CO., ET AL.

## Order To Show Cause Setting Date for Formal Hearing Consolidating Proceedings and Prescribing Formal Procedures

SEPTEMBER 2, 1975.

On September 30, 1974, Atlantic Richfield Company (Atlantic) filed in Docket No. CI75-201 an Application pursuant to Section 7(b) of the Natural Gas Act; on February 28, 1975, the Altex Corporation (Altex) and Jewel Osborn now Storey, W. B. Osborn, Jr., Executor of the Estate of W. B. Osborn, Deceased, Charlotte Osborn Barrett, Betty Osborn Biedenbarn, and W. B. Osborn, Jr., (all hereinafter known as Osborns) filed in Docket Nos. CI75-529, CI75-530, CI75-531, CI75-532, CI75-533, and CI75-534, respectively, applications pursuant to Section 7(b) of the Natural Gas Act and on March 20, 1975, STENTEX, Inc., (Stentex) filed in Docket No. CI75-557 an application pursuant to Section 7(b) of the Natural Gas Act.

All the applications, save the one by Altex, ask for permission and approval to abandon the sales of natural gas to Altex for resale in interstate commerce to Tennessee Gas Pipeline Company (TGP) from the Alice, East Alice and Tom Graham Fields located in Jim Wells County, Texas. Altex's application is for permission and approval to abandon the resale of natural gas in interstate commerce to TGP.

Atlantic requests abandonment of its sale from the Tom Graham Field to Altex, which sale was made pursuant to a contract dated February 27, 1957, and authorized in Docket No. G-3894. Atlantic indicated that no sales have been made to Altex under Atlantic's FPC Rate Schedule No. 22 since 1963, that the contract expired on its own terms on July 3, 1970, and that the lands covered under its Rate Schedule No. 22 have been assigned to W. H. Doran on January 12, 1961.

The Osborns request authorization to abandon gas sales to Altex from the Alice and East Alice Fields, which sales were made pursuant to a contract dated December 10, 1953, under W. B. Osborn, Jr.'s small producer certificate in Docket No. CS71-126. In support of their application, the Osborns allege that their wells are depleted, and production ceased on September 20, 1974, and that efforts to restore production have failed.

Stentex requests authorization to abandon a sale of gas to Altex from the Tom Graham Field, which sale was made under a contract dated December 11,

1953, authorized by Stentex's small producer certificate in Docket No. CS75-14. In support of its abandonment application, Stentex alleges that Altex has abandoned its gathering system and lines due to depletion and uneconomic conditions.

Altex requests authorization to abandon its sale of gas to TGP covered under a contract dated December 11, 1953, on file as Altex's FPC Gas Rate Schedule No. 1 previously authorized in Docket No. G-4102. Altex indicates that all wells dedicated under its supply contracts ceased to produce and last production was delivered on September 20, 1974.

On April 18, 1975, TGP filed a petition to intervene in opposition to Altex's application for abandonment. TGP stated that it had verbally requested Altex to supply its release of acreage if, in fact, all wells have been plugged and abandoned but as of the date of its petition TGP had received no copy of such a release. TGP's petition indicates that TGP was receiving approximately 161 Mcf of gas per day until September 1974 from Altex, and that later Altex advised TGP that production ceased on September 20, 1974, and all wells were plugged and abandoned. Finally, TGP's petition indicates that the estimated remaining recoverable reserves dedicated to it from the wells which have supplied Altex to be approximately 2 Bcf. Because TGP has opposed Altex's application and because TGP's participation may be in the public interest we will grant its intervention since no other party can adequately represent its interest.

We note that TGP's petition to intervene raises serious questions beyond TGP's position of protecting its supply of dedicated gas, in that it raises grave issues with regard to Applicants' proposed abandonment of gas sales. TGP alleges that Altex indicated that the wells supplying it were plugged and that further reserves of gas are estimated by TGP to be dedicated to it from the wells subject to the applications. It appears, therefore, to us that quantities of gas which have been dedicated to the interstate market may have been removed without Commission approval pursuant to Section 7(b) of the Natural Gas Act. As it is well established that there can be no withdrawal of gas once dedicated to the interstate market from continued interstate movement without approval of the Commission under Section 7(b), the sales proposed to be abandoned by Applicants may only lawfully be terminated after such Commission approval. This order will, therefore, direct that a hearing be convened to ascertain facts and circumstances underlying the jurisdictional operations of all the hereinabove mentioned Applicants pursuant to the Natural Gas Act, 15 U.S.C. 717, et seq. with regard to all the dedications of natural gas to Altex and to the interstate market by Altex to TGP hereinbefore mentioned.

In view of the foregoing, we are directing

<sup>1</sup> Atlantic Refining Co., v. P.S.C.N.Y., 380 U.S. 378, 389 (1954); Sunray Mid-Continent Oil Co. v. FPC, 364 U.S. 136, 156 (1960).

## NOTICES

ing the Applicants in this proceeding to show cause why they or any one of them should not be found in violation of Section 7(b) of the Natural Gas Act and the Commission's Regulations thereunder for not having first secured the requisite authorization before abandoning jurisdictional sales of natural gas.

## The Commission finds:

(1) It may be that some or all of the Applicants hereinabove mentioned are in violation of the Natural Gas Act and the Commission's Regulations thereunder.

(2) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that a public hearing be held on the matters involved and issues presented in these proceedings as hereinbefore described.

(3) Due to the related nature of the applications and since there may be common questions of law or fact involved, it is appropriate to consolidate the proceeding in Docket Nos. CI75-201, CI75-529, CI75-530, CI75-531, CI75-532, CI75-533, CI75-534, and CI75-557.

(4) Participation by TGP in this proceeding may be in the public interest.

## The Commission orders:

(A) All Applicants hereinbefore described shall show cause, if any there be, at the hearing directed in paragraph (D) below, why they or each of them should not be held in violation of Section 7(b) of the Natural Gas Act and the Commission's Regulations thereunder for not having obtained authorization before abandoning jurisdictional sales and related facilities as hereinbefore described.

(B) The proceedings in Docket Nos. CI75-201, CI75-529, CI75-530, CI75-531, CI75-532, CI75-533, CI75-534, and CI75-557 are consolidated for the purposes of hearing and decision since there are common questions of law and fact involved.

(C) Pursuant to the authority of the Natural Gas Act, particularly Sections 7, 14, 15, and 16 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act (18 CFR, Chapter I), a public hearing concerning the matters involved and the issues presented in these proceedings as hereinbefore set forth will be held in a hearing room of the Federal Power Commission, Washington, D.C., commencing at 10:00 a.m. (EDT) on October 7, 1975. All Applicants in this proceeding shall file with the Secretary of the Commission and serve upon the Presiding Administrative Law Judge, the Commission Staff, and all other parties, testimony and exhibits addressing the specific issues set forth in this order, including, but not limited to, evidence of the price which would be necessary for each of the Applicants, which allege economic hardship, to continue the production of gas from the reserves which are the subject of their abandonment applications, as well as, any other testimony and exhibits, which they propose to offer at the hearing, on or before September 23, 1975.

(D) The case of TGP on all issues in this proceeding, inclusive of those specified in this order, shall be filed and served

## NOTICES

on all parties, the Commission Staff and the Presiding Administrative Law Judge on or before September 23, 1975.

ingly, we shall establish hearing procedures to determine the propriety of granting or denying Columbia's request for accounting and

tion for extension of time on August 18, pending action by the Commission on their notices of withdrawal of interven-

and United will redeliver such gas to Florida Gas.

Upon consideration, notice is hereby given that the procedural dates for all

graph C of Order), and (2) MP&L's inclusion of CWIP in its rate base, (Paragraph E of Order).

## NOTICES

on all parties, the Commission Staff and the Presiding Administrative Law Judge on or before September 23, 1975.

(E) An Administrative Law Judge to be designated by the Chief Administrative Law Judge for the purpose [See Delegation of Authority, 18 CFR 3.5(d)], shall preside at the hearing in this proceeding and shall prescribe relevant procedural matters not herein provided.

(F) Tennessee Gas Pipeline Company is permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission: *Provided, however*, that the participation of such intervenor shall be limited to matters affecting asserted rights and interests specifically set forth in the petition to intervene, and *Provided, further*, that admission of said intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in this proceeding.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket No. RP75-99]

**COLUMBIA GAS TRANSMISSION CORP.**  
**Order Denying Motion for Reconsideration and Rescheduling Procedural Dates**

SEPTEMBER 2, 1975.

On August 4, 1975, Columbia Gas Transmission Corporation (Columbia) filed a motion for reconsideration of our order issued July 29, 1975, which order set for hearing Columbia's request (pursuant to Section 154.38(d)(5)(a) of the Regulations) for advance Commission approval for accounting and rate treatment for a proposed R&D project. Columbia's proposed project involves a determination of reservoir and production characteristics achieved through the application of existing and new stimulation techniques on gas shales of the Upper and Middle Devonian Age Formations in the Appalachian Basin.

Columbia's application indicates that the Public Service Commission of the State of New York (New York) initially requested a hearing on the matter but has now agreed to withdraw its request for a hearing. We note that by letter to the Secretary filed August 4, 1975, New York indicated that it now supported Columbia's proposal and that:

... [s]ince it would appear that New York was the only intervenor who requested a hearing and that this fact may be responsible for the Commission's order of July 29, 1975, we would appreciate your bringing this to the immediate attention of the Commission.

In light of the above, Columbia requests that the Commission terminate the proceedings and approve Columbia's request for approval of the project.

In our July 29, 1975, order we indicated the following:

Our review of Columbia's request indicates that the proposed project may not be in the nature of research and development. Accord-

ingly, we shall establish hearing procedures to determine the propriety of granting or denying Columbia's request for accounting and rate approval of its proposed project.

Thus while we considered the views of New York in setting this matter for hearing, such views were not determinative. We found upon our own review that a hearing on this matter was necessary, to protect the public interest by assuring that Columbia's rates are just and reasonable.

Accordingly, we shall deny Columbia's Motion for Reconsideration of our July 29, 1975, order and re-schedule the procedural dates accordingly.<sup>1</sup>

**The Commission finds:**

Good cause exists to deny Columbia's August 4, 1974, Motion for Reconsideration of our July 29, 1975, order in this proceeding, as hereinafter ordered.

**The Commission orders:**

(A) Columbia's August 4, 1975, Motion for Reconsideration of our July 29, 1975, order is denied.

(B) On or before September 9, 1975, Columbia shall present its direct case in this proceeding. The Commission Staff or any intervenors shall serve prepared testimony and exhibits on September 23, 1975. Any rebuttal evidence by Columbia shall be served on or before October 3, 1975. The public hearing herein ordered shall convene on October 15, 1975, at 10:00 A.M. Initial briefs shall be filed on November 14, 1975. The Initial Decision shall be issued on or before November 30, 1975.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket No. CP75-262]

**COLUMBIA GULF TRANSMISSION CO.**  
**AND TENNESSEE GAS PIPELINE CO., A**  
**DIVISION OF TENNECO, INC.**

**Extension of Time**

SEPTEMBER 3, 1975.

By order issued July 21, 1975, the Commission directed a prehearing conference in the above docket on September 10, 1975, and submission of flow diagrams and gas supply data on or before August 25, 1975.

Columbia Gulf Transmission Company filed a telegram on August 20, 1975, requesting an indefinite suspension of the requirements of the Commission's July 21 order pending the filing of appropriate amendments in Docket Nos. CP75-262 and CP75-359. Columbia Gulf states that interveners have filed to withdraw petitions for interventions as continued exploration has added significantly to the available gas supply in the area.

United Gas Pipeline Company and Sea Robin Pipeline Company filed a joint pe-

<sup>1</sup> By Notice issued August 7, 1975, the procedural dates in this proceeding were suspended pending Commission action on Columbia's Motion.

tion for extension of time on August 18, pending action by the Commission on their notices of withdrawal of intervention.

Take notice that the dates for prehearing conference and filing of data as set forth in the Commission's order of July 21, 1975, ordering paragraph (B) and (C) are hereby extended to the following dates:

Prehearing conference November 11, 1975:

Filing of data on or before October 23, 1975.

[SEAL] KENNETH F. PLUMB,  
Secretary.

**EL PASO NATURAL GAS CO.**

**Modification of Date of Hearing**

AUGUST 29, 1975.

On August 13 and 14, 1975, El Paso Natural Gas Company (El Paso) and Pennzoil Producing Company (Pennzoil) filed motions to extend the procedural dates fixed by order issued July 16, 1975, in the above matter. By notice issued August 18, 1975, the date for filing direct testimony was extended but action on the motion to extend the date of the hearing was deferred.

On August 21, 1975, Beren Corporation filed an answer to the above-designated motions of El Paso and Pennzoil requesting that the date of hearing in this proceeding be extended to September 30, 1975. The answer states that all parties have been notified and have no objection.

Notice is hereby given that the date of hearing in the above matter is modified to September 30, 1975.

KENNETH F. PLUMB,  
Secretary.

[Docket No. CI76-117]

**FLORIDA GAS EXPLORATION CO.**  
**(OPERATOR), ET AL**

**Notice of Application**

SEPTEMBER 3, 1975.

Take notice that on August 22, 1975, Florida Gas Exploration Company (Operator), et al. (Applicant) Post Office Box 44, Winter Park, Florida 32789, filed in Docket No. CI76-117 and application for a certificate of public convenience and necessity pursuant to Section 7 of the Natural Gas Act and Section 2.75 of the Commission's Rules of Practice and Procedure to authorize Applicant to sell natural gas from the Ichibon (Hockley) Field, Bee County, Texas to Florida Gas Transmission Company. Applicant proposes to sell its share of gas to Florida Gas Transmission Company (Florida Gas). Also Applicant states that it will deliver such gas into the facilities of United Gas Pipe Line Company (United) at a point on United's existing pipeline

and United will redeliver such gas to Florida Gas.

Applicant is seeking a rate of 54.95 cents per Mcf with a 1 cent escalation at the end of each year of term plus tax reimbursement of all "additional tax" assessed by State or Federal Government which is greater than those levied on the date of the contract, plus Btu adjustment.

Applicant states that it is affiliated with the purchaser, Florida Gas.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 24, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

Secretary.

[FR Doc.75-23878 Filed 9-8-75; 8:45 am]

[Docket Nos. E-9502 and E-9499]

**MINNESOTA POWER AND LIGHT CO.**  
**Order Denying Application for Rehearing**  
SEPTEMBER 2, 1975.

By order issued July 18, 1975, the Commission rejected in part a filing made by Minnesota Power and Light Company (MP&L or the Company) on June 18, 1975, in the instant docket. Minnesota's filing consisted of proposed increases in its rates and charges to seventeen municipal customers, one privately-owned electric system customer, and two rural electric cooperative customers. In addition, MP&L filed for an increase in the transmission service rates applicable to its three transmission service customers, and filed notice of cancellation pursuant to its contract with two of its wheeling customers.

On July 8, 1975, a pleading in the instant docket was filed by 17 wholesale customers (Petitioners) requesting, inter alia, leave to intervene, rejection of the tendered rate schedules applicable to them or, in the alternative, requesting a full 5 month's suspension of the filings as to them. Two of the arguments raised by Petitioners were (1) that the filing of increased rates as to Standby Service to the Village of Hibbing (Hibbing), the City of Two Harbors (Two Harbors), and the City of Virginia (Virginia) should be rejected as violative of the fixed-rate, fixed-term contracts relating to the service with these customers, and (2) the filing wrongfully included Construction Work In Progress (CWIP) in rate base.

On July 11, 1975, MP&L filed a response to Petitioners pleading. As to the above arguments of Hibbing, Virginia, and Two Harbors, MP&L stated that the proposed revised riders for Standby Service to these three customers, is similar to that filed in Docket No. E-8494; however, it has not been collecting increased rates from them for Standby Service.<sup>1</sup>

The Commission in its Order issued July 18, 1975 (Order) in Docket E-9502, rejected in part and accepted for filing and suspended in part Minnesota's filing. Two parts of the filing rejected by the Commission were (1) MP&L's rate filing as it applies to Standby Service to Hibbing, Virginia, and Two Harbors (Para-

<sup>1</sup> By Order issued Apr. 29, 1974, in Docket No. E-8494, similar revised riders for Standby Service to the same customers were rejected by the Commission.

graph C of Order), and (2) MP&L's inclusion of CWIP in its rate base. (Paragraph F of Order).

On August 4, 1975, Minnesota filed an Application for Rehearing of the Commission's July 18, 1975 order. MP&L cites as grounds for its application the two arguments previously cited, namely, (1), the Commission's rejection of the rate increase to Hibbing, Virginia, and Two Harbors, and (2) the Commission's exclusion of Construction Work In Progress (CWIP) in rate base. For the reasons hereinafter stated, we shall deny rehearing of our July 18, 1975 order.

Minnesota's first argument regarding the Standby Service to Hibbing, Virginia, and Two Harbors is similar to the arguments made by Minnesota in Docket No. E-8494 with respect to that issue. In Docket No. E-8494, as well as in our July 18, 1975, order in this proceeding, we found that Minnesota had no right to file a unilateral rate change for Standby Service to Hibbing, Virginia, and Two Harbors since the contractual terms governing such service were fixed-rate and fixed term in nature. The fact that Minnesota has appealed this issue in Docket No. E-8494 to the United States Court of Appeals for the District of Columbia Circuit<sup>2</sup> is not persuasive. In light of the fact that Minnesota has raised no facts or principles of law which require modification of our finding regarding the Standby Service issue in our July 18, 1975, order, we shall deny Minnesota's application for rehearing regarding this issue.

MP&L's second ground for rehearing is its allegation that Construction Work In Progress (CWIP) was wrongfully excluded from rate base.<sup>3</sup> MP&L states that the Green Mountain case,<sup>4</sup> upon which intervenors relied in making their objection to MP&L's inclusion of CWIP in rate base, "is unsound law and contrary to past Commission practice." MP&L states further that the Commission's electric rate regulations do not prohibit the inclusion of CWIP in rate base, and MP&L cites two cases where the Commission has allowed CWIP to be included in rate base.<sup>5</sup>

The *Green Mountain* case does not establish new law, rather, that holding is consistent upon our established policy of refusing to grant final authorization for the inclusion of CWIP in any Company's rate base. The *Green Mountain*

<sup>2</sup> Minnesota Power & Light Company, 51 FPC 1422 (1974); rehearing denied. FPC issued June 17, 1974, in Docket No. E-8494; reconsideration denied. FPC issued September 3, 1974, in Docket No. E-8494.

<sup>3</sup> Minnesota Power & Light Company v. Federal Power Commission, Case No. 74-1796.

<sup>4</sup> CWIP as used herein refers to costs associated with facilities which will not be constructed and in operation before the end of the test period.

<sup>5</sup> Green Mountain Power Company, Docket No. E-9446 (June 13, 1975).

<sup>6</sup> New England Power Service Co., Docket Nos. E-9136 and E-9140 (December 31, 1974) and Georgia Power Co., Docket No. E-9091 (December 26, 1974).

E  
P  
9  
7  
5

order has precedent value in stating a continuing legal policy in this respect. In response to MP&L's questioning of our authority to make such exclusion where the electric regulations do not prohibit CWIP in rate base, we have already addressed ourselves to this argument in the *Green Mountain* case. Also, the order issued December 31, 1974, in *New England Power Service Co.* and relied on by MP&L, was modified on August 5, 1975, by Commission's order in the same docket " . . . Granting Motion For Summary Disposition And Ordering Refunds." This order was issued in response to a Motion for Reconsideration filed by Municipal Customers and it stated that "that portion of NEPCO's filing reflecting the inclusion of CWIP in rate base is severed from this docket and dismissed." Similarly, the order issued December 26, 1974, in *Georgia Power Co.* and relied on by MP&L, was also modified by Commission order issued August 5, 1975, in response to appropriate motions by Staff and intervenors. This order amended the December 26, 1974, order by stating that "That portion of Georgia Power's filing . . . that reflects the inclusion of CWIP in rate base is severed from this docket and dismissed." Accordingly, neither case cited by MP&L supports the position that CWIP should be allowed in rate base, and therefore the cases cited are not supportive of MP&L's argument.

Accordingly, we shall reaffirm our initial position as stated in paragraph (c) of order issued July 18, 1975, in Docket Nos. E-9499 and E-9502.

#### The Commission finds:

MP&L's August 4, 1975, Application for Rehearing of our July 18, 1975, order in these dockets presents no facts or principles of law which would provide an appropriate basis for modification of said order.

#### The Commission orders:

(A) MP&L's Application for Rehearing of our July 18, 1975, order in these dockets is hereby denied.

(B) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-23879 Filed 9-8-75; 8:45 am]

[Docket No. E-9502]

#### MINNESOTA POWER & LIGHT CO. Order Granting Untimely Petition To Intervene

SEPTEMBER 2, 1975.

On June 18, 1975, the Minnesota Power & Light Company (MP&L), tendered for filing proposed increases in its rates and charges to seventeen municipal customers, one privately-owned electric system customer, and two rural electric cooperative customers. Notice of MP&L's filing was issued on June 24, 1975, with

comments, protests, or petitions to intervene due on or before July 18, 1975.

On August 7, 1975, the Public Service Commission of Wisconsin (Public Service) filed out of time a petition to intervene in the above-captioned proceeding. Public Service states that it did not seek timely intervention in this proceeding because of the heavy workload under which it is now operating. Public Service states further that its intervention will not interfere with the procedural dates already scheduled in this proceeding.

#### The Commission finds:

Participation of The Public Service Commission of Wisconsin in this proceeding may be in the public interest.

#### The Commission orders:

(A) The Public Service Commission of Wisconsin is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order in the Federal Register.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-23880 Filed 9-8-75; 8:45 am]

[Docket No. RP75-20]

#### MISSISSIPPI RIVER TRANSMISSION CORP.

Further Extension of Procedural Dates  
August 29, 1975.

On August 28, 1975, Mississippi River Transmission Corporation filed a motion to extend the procedural dates fixed by order issued October 31, 1974, as most recently modified by notice issued June 30, 1975, in the above-designated matter. The motion states that the parties have been notified and have no objection.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Intervenor, Testimony, October 3, 1975.  
Service of Company, Rebuttal, October 24, 1975.  
Hearing, November 4, 1975 (10:00 a.m. EST).

By direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-23881 Filed 9-8-75; 8:45 am]

[Docket No. CP75-333]

#### NORTHERN NATURAL GAS CO.

Order Granting Intervention, Setting Date for Formal Hearing and Prescribing Procedures

SEPTEMBER 3, 1975.

On May 9, 1975, Northern Natural Gas Company (Northern) filed in Docket No. CP75-333 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain sales measuring station facilities and the sale and delivery of natural gas in the states of Kansas, Oklahoma and Texas.

Northern proposes to construct and operate 53 delivery stations to sell and deliver through its Peoples Natural Gas Division (Peoples) natural gas in the states of Kansas, Oklahoma and Texas and to sell certain volumes of natural gas to Southern Union Gas Company (Southern Union) and West Texas Natural Gas Company (West Texas) for resale to certain of Northern's pipeline right-of-way grantors. Northern estimates that the total cost of all proposed facilities is \$54,977 and that the total sales volume involved is 177,134 Mcf of gas.

The application by Northern was noticed on May 20, 1975, with protests or petitions to intervene due by June 12, 1975. On June 12, 1975, Terra Chemicals International, Inc. (Terra) filed a petition to intervene in opposition to the application. Terra which operates an ammonia plant in which large quantities of natural gas are utilized purchases its gas on a firm contract basis from a distributor supplied by Northern. Terra stated it is opposed to Northern providing additional service or service of any amount to new customers, other than right-of-way grantors who may compel service under state law, when Northern is in curtailment and requested a formal hearing. However, on August 5, 1975, Terra filed a motion to withdraw its request for a formal hearing and expressed its current view that a hearing is unnecessary based on assurances given by Northern that the supply-demand projections set forth in Northern's recent curtailment case in Docket No. RP74-102 will not be affected by the instant application.

No other protest or petitions to intervene have been filed.

Northern is presently experiencing serious curtailment on its system and

<sup>1</sup> Northern proposes to install and operate 35 delivery stations in Kansas and one in Texas to make direct sales of natural gas to customers through Peoples. Northern alleges that the firm volumes to be so delivered will be provided from Peoples' presently authorized contract demand or from capacity of existing pipeline facilities in the producing areas where contract demand rate schedules are not applicable.

<sup>2</sup> Northern proposes to construct minor sales measuring stations and to sell gas for resale to Southern Union to serve 14 right-of-way grantors in Oklahoma. Northern also proposes to sell gas for resale to West Texas to serve three right-of-way grantors located in Texas.

grant of the instant application may place additional burdens on Northern's existing customers. We believe that a formal hearing should be convened to develop a complete record in this proceeding. Such proceeding should develop, inter alia, a record regarding:

1. The specific end use involved in each of the primary end use categories (Crop Drying, Irrigation, Feed Lot, Commercial and Domestic Heat) proposed to be served as a result of this application including their relationship as to priority of use as set forth in § 2.78 of the Commission's General Policy and Interpretations;

2. The availability of alternate fuels to serve these requirements.

3. A detailed description of how Northern proposes to supply natural gas for the proposed new and additional sales and the source of such gas supply.

4. The impact of serving new and additional sales on Northern's existing customers; and

5. How the public convenience is advanced by adding additional service while existing customers are being curtailed.

#### The Commission finds:

(1) It is necessary and appropriate that the proceeding in Docket No. CP75-333 be set for formal hearing.

(2) Participation by Terra Chemicals International, Inc., in Docket No. CP75-333 may be in the public interest.

#### The Commission orders:

(A) Northern Natural Gas Company, and all supporting intervenors, shall file testimony and exhibits comprising their case in chief on or before September 17, 1975.

(B) A formal hearing shall be convened in the proceeding in Docket No. CP75-333 in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426 on October 8, 1975 at 10:00 a.m. (EDT). The Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for the purpose—see Delegation of Authority 18 C.F.R. 3.5(d)—shall preside at the hearing in this proceeding and shall prescribe relevant procedures not herein provided.

(C) Terra Chemicals International, Inc. is permitted to intervene in Docket No. CP75-333, subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in Docket No. CP75-333.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-23882 Filed 9-8-75; 8:45 am]

[Docket Nos. CP75-294, CP75-296]

#### NORTHWEST PIPELINE CORP. AND MOUNTAIN FUEL SUPPLY CO.

Order Providing for Hearing, Denying Request for Temporary Authorization, Consolidating Proceedings, Granting Interventions and Establishing Procedures

August 29, 1975.

On April 10, 1975, in Docket No. CP75-294, Northwest Pipeline Corporation (Northwest) filed an application pursuant to Section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale to, the transportation for, and exchange of natural gas from the Barrel Springs Area of Carbon County, Wyoming, with Mountain Fuel Supply Company (Mountain Fuel).

On April 11, 1975, in Docket No. CP75-296, Mountain Fuel filed an application pursuant to Section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange with and transportation of natural gas for Northwest as well as the construction and operation of certain facilities necessary therefor. Additionally, it requests the issuance of a temporary certificate authorizing commencement of the aforesaid transportation and exchange of natural gas by May 1, 1975.

Northwest has acquired a new source of gas supply in the Barrel Springs Area of Carbon County, Wyoming, located approximately 92 miles from the nearest point on its transmission system. In order to make the volumes of natural gas purchased by it in the Barrel Springs Area available to its transmission system, Northwest consummated a Gas Purchase, Transportation and Exchange Agreement dated February 17, 1975 with Mountain Fuel. The agreement is for a primary term of five years following the initial deliveries of natural gas thereunder and on a year to year basis thereafter.

During the term of the above-mentioned agreement, Northwest proposes to deliver to Mountain Fuel all volumes of natural gas purchased by it from producers in the Barrel Springs Area, which are estimated to aggregate 6,000 Mcf per day initially, at a point on Mountain Fuel's existing 10-inch line also located in Carbon County. Northwest proposes to construct pursuant to its 1975 budget-type certificate in Docket No. CP75-107 at an estimated cost of \$1,471,730 and to operate the necessary gathering system in the Barrel Springs Area as well as approximately 24 miles of 8½ inch O.D. lateral connecting the gathering system to the aforementioned delivery point on Mountain Fuel's 10-inch transmission line. Mountain Fuel proposes to install and connect metering facilities at a cost of about \$11,900 for the purpose of receiving the gas proposed to be delivered by Northwest at this point.

Mountain Fuel has the option to purchase 25 percent of the volumes of natural gas delivered by Northwest for

exchange, which option Northwest believes will be exercised by Mountain Fuel. The charges for such gas to Mountain Fuel would include, in addition to the cost of the gas, Northwest's cost of service, embracing a return on its investment in the gathering, compressor and treating facilities and the lateral line. The proposed initial rate for such cost-of-service is 16½ cents per Mcf.

Mountain Fuel will redeliver to Northwest the remainder of the exchange gas after exercising its option to purchase a portion thereof at an existing point of interconnection between the facilities of the two companies west of Green River in Sweetwater County, Wyoming, where Northwest is currently authorized to sell and deliver natural gas to Mountain Fuel. The volumes of gas delivered and received for exchange will be balanced on a Btu basis. Mountain Fuel's initial transportation charge for the gas to be redelivered will be 4 cents per Mcf.

Notice of Northwest's application in Docket No. CP75-294 was published on April 29, 1975, in the FEDERAL REGISTER, setting May 14, 1975, as the date by which any protests or petitions for leave to intervene were to be filed. A timely petition for leave to intervene was filed by Cascade Natural Gas Corporation, and Washington Natural Gas Company filed a petition for leave to intervene out of time. Neither of them requests a formal hearing.

Notice of Mountain Fuel's application in Docket No. CP75-296 was published on April 30, 1975, in the FEDERAL REGISTER, also requiring that any protests or petitions for leave to intervene be filed on or before May 14, 1975. Northwest filed a timely petition for leave to intervene; and Colorado Interstate Gas Company (CIG), a Division of Colorado Interstate Corporation, and Western Transmission Corporation (Western) filed a joint petition for leave to intervene in opposition to both subject applications and request a formal hearing. On May 29, 1975, Northwest filed an answer opposing the joint petition by CIG and Western and requesting that their petition be denied, or, alternatively, their request for a hearing be denied on the ground that there are no facts in issue.

In their petition, CIG and Western allege inter alia that the central point of the Barrel Springs location is within 7.5 miles of Western's existing 12-inch pipeline, which has unused capacity and interconnects with CIG's pipeline facilities at a point about 26 miles northward. They further allege that since CIG's pipeline facilities now interconnect with those of Northwest at Green River in Sweetwater County, they could transport the Barrel Springs gas to Northwest without duplication of existing facilities and thereby provide the service at an overall greater economy.

In its answer, Northwest asserts that it evaluated CIG's written proposal relating to transportation and exchange of the Barrel Springs gas prior to its elec-

tion to contract with Mountain Fuel because of the overall superiority of the latter's proposal. Northwest further asserts that no duplication of facilities will result from implementing the Mountain Fuel arrangement because it anticipates a future gas development in the southerly direction along the route of its proposed gathering line and away from the facilities of Western.

Although Northwest urges that the request by CIG and Western to hold a formal hearing on the subject applications should be denied, we are of the view that the matters raised in the above-mentioned pleadings require determination on the basis of an evidentiary record. Accordingly, we shall schedule hearing procedures pursuant to which the applicants and other parties may submit testimony and exhibits in support of their respective positions. Inasmuch as the applications in Docket No. CP75-294 and Docket No. CP75-296 involve similar questions of law and fact, they should be heard and decided on the basis of a consolidated hearing record.

In view of the lack of a clear showing of a current emergency on the Mountain Fuel system and the contested nature of these applications, we shall deny Mountain Fuel's request for temporary authorization.

#### The Commission finds:

(1) Good cause exists to consolidate the proceedings in Docket Nos. CP75-294 and CP75-296 for purposes of hearing and decision, to set the consolidated proceeding for formal hearing, and to establish procedures for that hearing.

(2) Good cause exists to deny the request contained in Northwest's answer filed on May 29, 1975, i.e. to deny the joint petition for leave to intervene by CIG and Western or, alternatively, deny their request for hearing.

(3) Although the petition of Washington Natural Gas Company was not timely filed, good cause exists for permitting its intervention.

(4) The participation of each of the above-named petitioners in the consolidated proceeding may be in the public interest.

(5) Good cause has not been shown for the issuance of the requested temporary authorization to Mountain Fuel.

#### The Commission orders:

(A) The proceedings in Docket Nos. CP75-294 and CP75-296 are hereby consolidated for purposes of hearing and decision.

(B) Pursuant to the provisions of the Natural Gas Act, particularly Sections 4, 5, 7, and 15 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act, a public hearing shall be held on October 2, 1975, at 10:00 a.m. (EDT) in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning the issue of whether certificates of public convenience and necessity should be granted as requested by the applicants and the issue of the justness and reasonableness of the transportation rates to be charged.

(C) The request contained in Northwest's answer filed on May 29, 1975, as hereinbefore noted is denied.

(D) Mountain Fuel's request for temporary authorization hereby is denied.

(E) On or before September 11, 1975, Northwest, Mountain Fuel, and those in support shall serve with the Commission and upon all other parties to the proceeding their testimony and exhibits in support of the applications, including support by Northwest and Mountain Fuel for their respective proposed transportation rates to be charged.

(F) On or before September 23, 1975, all other parties desiring to present their views shall serve with the Commission and upon all other parties to the proceeding their testimony and exhibits in support of their position.

(G) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—See Delegation of Authority, 18 CFR 3.5(d)—shall preside at, and control, this consolidated proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure and the purposes expressed in this order.

(H) Each of the above-named petitioners is hereby permitted to intervene in this consolidated proceeding subject to the Rules and Regulations of the Commission: *Provided, however*, that the participation of such interveners shall be limited to matters affecting asserted rights and interests specifically set forth in their petitions to intervene; and, *provided, further*, that the admission of such interveners shall not be construed as recognition by the Commission that they or any of them might be aggrieved by any order or orders entered in this proceeding.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23883 Filed 9-8-75;8:45 am]

[Docket No. CP76-59]

#### NORTHWEST PIPELINE CORP.

##### Notice of Application

SEPTEMBER 2, 1975.

Take notice that on August 20, 1975, Northwest Pipeline Corporation (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP76-59 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale of natural gas to be received from November 1, 1976, through April 30, 1976, on a best efforts basis for exchange from Pacific Gas Transmission Company (PGT), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that it has entered into an emergency exchange agreement with PGT and Pacific Gas and Electric Company (PG&E) dated August 1, 1975. Applicant further states that pursuant to this agreement, PG&E would deliver

on a best efforts basis natural gas in addition to those volumes to which Applicant is presently receiving through the facilities of PGT. Applicant states further that deliveries would be made at existing points of interconnection between Applicant and PGT at Stanfield, Oregon, and at Spokane, Washington, and that the volumes that PGT would deliver under the emergency agreement would not exceed 150,000 Mcf of gas per day and 1,200,000 Mcf over the term of the agreement. It is stated that PGT would commence delivery of gas on the later of either the date of issuance of the necessary regulatory authorization or November 1, 1975, and would continue deliveries through April 30, 1976. Deliveries would be made to Applicant if and to the extent that PG&E, a customer of PGT, determines that it can temporarily postpone the reception of such volumes from PGT.

Applicant requests authorization for the sale of the exchange gas under proposed Rate Schedule ES-1, on a day-to-day basis, to customers receiving service under Rate Schedules ODL-1 and DS-1. The proposed service would be for the protection of firm priority 1 and 2 customers as defined in Section 2.78 of the Commission's General Policy and Interpretations (18 CFR 2.78), and would be in lieu of requesting protection from Applicant's general pipeline system supply.

Applicant proposes to charge those customers purchasing gas under the proposed Rate Schedule ES-1 31.29 cents per therm for all gas delivered plus their pro rata share of any additional amounts which PGT might charge Applicant in accordance with the August 1, 1975, agreement.

For the forthcoming heating season it is stated Applicant is projecting a peak day shortfall in its gas supply of 350,000 Mcf of gas per day and a seasonal (October through April) shortfall of approximately 240,000 Mcf per day. In addition to the shortfall in available gas supply, Applicant's LNG facility which was scheduled for operation during the 1975-76 heating season will not be fully operational. Applicant states as originally proposed, the LNG facility was to have a vaporization capacity of 150,000 Mcf of gas per day and a seasonal storage capacity of 1,200,000 Mcf. Applicant currently projects that the LNG facility will be complete in late November 1975, but expects that such service as may be available from the LNG facility will be extremely limited during the 1975-76 heating season. The application states that the volumes of natural gas to be made available to Applicant's customers as a result of the grant of the authorization requested herein will, when available, substantially reduce the impact of curtailment on priority 1 and 2 consumers within the market areas served by Applicant's distributor customers.

Applicant proposes to provide service under Rate Schedule ES-1 only to the extent PGT can deliver exchange gas from November 1, 1975, through April 30, 1976. Applicant will, to the extent PGT

and PG&E can accept volumes of exchange gas from May 1, 1976, through September 30, 1976, redeliver all exchange volumes received from PGT. The volumes so redelivered would be purchased primarily from Westcoast Transmission Company. Applicant states that it currently schedules its gas supply so as to minimize takes from domestic sources during the summer period and maximize takes from its Canadian supply to meet its off-peak summer requirements. Therefore, to the extent Applicant's requirements during the summer of 1976 are increased as a result of having to redeliver exchange volumes to PGT, Applicant expects that such increased requirement will be satisfied from Canadian supply sources. Based upon present projections, Applicant expects to be able to redeliver the volumes to PGT without curtailment of its customers during the summer period.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 25, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.  
[FR Doc.75-23884 Filed 9-8-75;8:45 am]

[Docket Nos. E-9497, E-9068, E-9118]

#### OHIO EDISON CO., ET AL.

##### Order Consolidating Proceedings for Purposes of Investigation, Hearing, and Decision

SEPTEMBER 3, 1975.

On October 15, 1974, the City of Cuyahoga Falls, Ohio, filed in Docket No. E-

9068 a complaint against the rates of its wholesale electric supplier, Ohio Edison Company (Ohio Edison), and requested that the company's rates be investigated. The complaint was accompanied by a petition with the signatures of approximately 3,500 residents of the Cuyahoga Falls area.

Notice of the complaint was issued on November 19, 1974, providing for written comments to be submitted on or before December 9, 1974. On December 2, 1974, Ohio Edison filed an answer to the complainant alleging the inadequacy of Cuyahoga Falls' submittal as constituting a complaint within the meaning of the Commission's rules of practice, and further alleging that its charges are in strict accordance with its applicable FPC rate schedule and the Commission's regulations. Ohio Edison concludes its answer by requesting that the complaint be dismissed.

On February 5, 1975, Cuyahoga Falls submitted a letter to the Commission's Secretary in which it stated the following:

The specific complaint pertains to the fact that industrial users within the City of Cuyahoga Falls which is governed by the PUCC receives a rate much less than the wholesale electric rate for the City of Cuyahoga Falls. The City of Cuyahoga Falls could be saving approximately \$20,000 per month if they were not discriminated against by Ohio Edison. The discrimination comes into effect when Ohio Edison is able to offset the differences between the consumption of municipality and an industrial user by stating that one is under the jurisdiction of PUCC and the other is under the Federal Power Commission.

On November 11, 1974, the City of Gallon, Ohio filed in Docket No. E-9118 a complaint against Ohio Edison similar to that previously filed by Cuyahoga Falls. The complaint was accompanied by a petition signed by a number of residents of the Gallon, Ohio area. Notice of Gallon's complaint was issued on December 4, 1974, providing for comments to be filed on or before January 4, 1975. On January 6, 1975, Ohio Edison answered Gallon's complaint. Ohio Edison's answer follows in both form and content its answer of December 2, 1974, to the complaint of Cuyahoga Falls.

On February 13, 1975, Ohio Edison filed separately in each complaint docket (1) a notice of withdrawal of its prior answer to the complaint, (2) a motion for dismissal of the petition (complaint), and (3) a memorandum in support of the motion to dismiss. Ohio Edison argues that the individuals signing the Cuyahoga Falls and Gallon petitions have no standing because they are not themselves customers of Ohio Edison, but are instead customers of the respective Cuyahoga Falls and Gallon municipal electric distribution systems. Ohio Edison further argues that the complaints do not meet the requirements of the Commission's rules and regulations, and that in fact the cities have failed to allege any complaint against the company.

We disagree with Ohio Edison concerning the issue of standing. We conclude that the complaints here at issue were made by the Cities of Cuyahoga Falls and Gallon, each of which is a

wholesale customer of Ohio Edison. This conclusion is not changed by the fact that the complaints were supported and accompanied by petitions signed by users of electricity in the cities. We believe the signatory petitioners likewise have standing to complain since they are directly affected by Ohio Edison's wholesale rate to the cities. If Ohio Edison's wholesale rates to Cuyahoga Falls and Gallon were in fact excessive, (a finding we do not make and which we postulate solely for purposes of illustration), the excessive charges may be borne by the ultimate consumers within the cities' service areas.

The issue of whether a valid complaint has been filed is more difficult. As to the issue of form, Section 1.6 of the Commission's Rules of Practice and Procedure provides only that a complaint may be made by letter or other writing and that it contain the name and address of the complainant and the party against whom the complaint is directed. These very general and liberal standards have been substantially complied with. As to the question of substance, however Section 1.6 requires that there be submitted "a statement of the facts forming the basis for the conclusion that there has been a violation of an act administered by this Commission or of a rule, regulation, or order issued by the Commission."

With the exception of the alleged rate discrimination issue raised by Cuyahoga Falls, which is discussed below, the complaints here at issue are very general in nature. On June 13, 1975, Ohio Edison filed with the Commission in Docket No. E-9497 an application for a general increase in rates to its wholesale customers including Cuyahoga Falls and Gallon. On August 5, 1975, the Commission suspended the company's proposed rate increase, and ordered that a hearing be held to determine the justness and reasonableness of the proposed rates. Cuyahoga Falls and Gallon were permitted to intervene in the proceeding.

It appears that the existing rate proceeding in Docket No. E-9497 encompasses all of the issues raised or presumed to be raised in the complaints of Cuyahoga Falls and Gallon, including, inter alia the reasonableness of Ohio Edison's claimed investments and expenses, including fuel costs. It therefore appears reasonable to consolidate these complaints with the pending general rate proceeding in Docket No. E-9497 for purposes of investigation, hearing and decision.

With respect to Cuyahoga Falls' claim of alleged rate discrimination, this same argument was raised in Docket No. E-9497. The cities there argued that they could face a "price squeeze" in competing with Ohio Edison for industrial customers. However in its August 5, 1975, suspension order, the Commission stated:

The Commission must utilize a cost plus fair return standard for establishing the justness and reasonableness of wholesale rates and does not have the authority under the Federal Power Act to set wholesale rates predicated upon retail rates over which we have no jurisdiction. We shall therefore limit this proceeding so as to exclude consideration of the price squeeze issue. We are aware of

Cities' reliance upon Conway Corporation v. P.P.C., 510 F. 2d 1204 (1975). However the court in Conway stayed its mandate pending

determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any

Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the

The "base royalty rate" is 78¢ per Mcf for 1975 and will increase 1.5¢ per Mcf annually beginning January 1, 1976.

#### The Commission orders:

(A) Those portions of the petitions (A) filed by Pennzoil and Shell in Docket Nos. RI76-8 and RI76-10 relating to a

tendered supplemental data intended to make complete its original filing of June 23, 1975. This action is in response to a deficiency letter issued by the Secretary

Cities' reliance upon Conway Corporation v. F.P.C., 510 F.2d 1204 (1975). However, the court in Conway stayed its mandate pending appeal by the Commission. Accordingly, Cities may renew its request for consideration of the price squeeze issue when and if the Conway decision becomes final. (Footnote omitted)

We find that for the reasons expressed in the above-quoted order, the complaint proceedings should and will be subject to the same exclusion of the "price squeeze" issue.

In view of the action being taken with respect to the subject complaints, Ohio Edison's motions for dismissal of the said complaints have become moot.

#### The Commission finds:

It is necessary and proper in the public interest and in carrying out the provisions of the Federal Power Act that the complaints filed herein by the cities of Cuyahoga Falls and Gallon, Ohio be consolidated with the proceeding in Docket No. E-9497 for purposes of investigation, hearing and decision.

#### The Commission orders:

(A) The complaints filed by the City of Cuyahoga Falls, Ohio in Docket No. E-9068 and the City of Gallon, Ohio in Docket No. E-9117 are hereby consolidated with the proceeding in Docket No. E-9497 for purposes of investigation, hearing, and decision.

(B) The procedural schedule established in the order of August 5, 1975, in Docket No. E-9497 shall govern the consolidated proceedings.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission,

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23885 Filed 9-8-75;8:45 am]

[Docket Nos. E-9409 and E-9410]

#### OKLAHOMA GAS AND ELECTRIC CO. Filing of Revised Fuel Adjustment Clause

SEPTEMBER 2, 1975.

Take notice that on August 15, 1975, the Oklahoma Gas and Electric Company tendered for filing a revised fuel adjustment clause in each of the above-referenced dockets. These clauses were filed in response to a letter from the Secretary of the Commission which stated that the previous clauses did not conform to Section 35.14 of the Commission's Regulations as amended by Order No. 517. The instant filings purport to cure this deficiency.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 19, 1975. Protests will be considered by the Commission in

determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23886 Filed 9-8-75;8:45 am]

[Docket No. E-7777 (Phase II)]

#### PACIFIC GAS AND ELECTRIC CO.

##### Extension of Time

AUGUST 29, 1975.

On August 27, 1975, Southern California Edison Company filed a motion to extend the time within which to respond to the amended petitions to intervene filed on August 15, 1975 by the Cities of Anaheim, Riverside, Banning, Colton and Azusa, California (Cities) and Anza Electric Power Cooperative, Inc. (Anza), in the above-designated matter.

Upon consideration, notice is hereby given that the time within which to respond to the amended petitions to intervene filed on August 15, 1975 by Cities and Anza is extended to and including September 17, 1975.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23887 Filed 9-8-75;8:45 am]

[Docket No. FR 76-91]

#### PACIFIC POWER & LIGHT CO.

##### Modification of Rate Schedule

SEPTEMBER 3, 1975.

Take notice that Pacific Power & Light Company (Pacific) on August 28, 1975, tendered for filing, in accordance with Section 35.13 of the Commission's Regulations, a new rate schedule for power and energy sales to City of Powell, Wyoming (City). This rate schedule supersedes Pacific's existing rate schedule designated FPC No. 90.

The proposed rate schedule provides for a change in structure of the rate charged City by Pacific. Pacific states that this proposed change in rate structure is to conform to the high voltage rate charged to larger customers in the State of Wyoming. Pacific states that to be consistent with this rate structure results in an approximate 15 percent increase in the cost of electric service to City. In addition, since City has elected to use Pacific's transformation facilities a use-of-facilities charge has been included by Pacific.

Pacific requests waiver of the Commission's notice requirements to permit the new rate schedule to become effective June 1, 1975, which it claims is the date of commencement of service.

A copy of this filing was supplied to the Wyoming Public Utility Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal

Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23888 Filed 9-8-75;8:45 am]

[Docket Nos. RI76-8, RI76-10]

#### PENNZOIL PRODUCING CO. AND SHELL OIL CO.

##### Order Denying Petitions for Special Relief, Setting Date for Hearing on Applications for Abandonment, and Consolidating Filings

AUGUST 29, 1975.

On July 1, 1975 and July 18, 1975, Pennzoil Producing Company (Pennzoil) and Shell Oil Company (Shell), respectively, filed petitions in Docket Nos. RI76-8 and 76-10 for special relief from the just and reasonable rates under Opinion Nos. 598 and 699, as amended. The relief sought was for certain gas from the Gibson Field, Terrebonne Parish, Louisiana, under lease from Williams, Inc. et al. (Williams) and which is being sold to United Gas Pipe Line Company under FPC Gas Rate Schedule Nos. 234 (Pennzoil) and 202 (Shell). In the alternative, both petitioners requested authorization to abandon the royalty share of gas, effective January 1, 1974, but no later than October 1, 1975.

The gas is produced from acreage covered by leases with Williams dated August 29, 1934, and July 24, 1952. The 1934 lease provides that Pennzoil and Shell make royalty payments on the gas production thereunder equal to  $\frac{1}{4}$  of the market value prevailing at the well. The 1952 lease between Williams and Shell provides for royalty equal to  $\frac{1}{4}$  of that value. In letters dated June 7, 1973, the March 27, 1974, Williams demanded increased payments based on the market value clauses in the leases. His demands unmet, Williams declared both leases terminated on June 5, 1974. A lawsuit ensued out of which a settlement agreement dated June 18, 1975, was signed. That agreement provides that the instant petitions would be filed with the Commission seeking authorization for either of the following:

(A) Payment of royalty on each Mcf produced from the 1934 lease equal to  $\frac{1}{4}$ , and from the 1952 lease equal to  $\frac{1}{4}$  of the total of:

- (1) the higher of
- (A) the base royalty rate or
- (B) the base alternative rate, plus
- (2) 7¢ per Mcf or the full amount of the Louisiana severance tax, plus
- (3) any Btu adjustments from 1000 Btu's

The "base royalty rate" is 78¢ per Mcf for 1975 and will increase 1.5¢ per Mcf annually beginning January 1, 1976. "Base alternative rate" is 150% of the highest area or national rate permitted or, in the case of deregulation, is the average of the three highest prices provided in sales for resale in the South Louisiana area; or

(B) Abandonment of that share of the gas sold under the leases attributable to Williams' royalty interests.

Should we take the course outlined in (A), Petitioners and United would amend their 1959 contract to provide for increased royalty payments by United, which payments they request be made effective January 1, 1974, but no later than October 1, 1975. Petitioners' filing for the royalty increase will also contain a surcharge for royalty on volumes delivered between January 1, 1974, and the date of the Commission's final order.

In the event we authorized (B), United agreed to amend the 1959 contract to reflect the release of the royalty portion of the gas from the contract. A further proviso to the settlement agreement would permit cancellation of the agreement by either party should we not grant authorization prior to February 1, 1976. Due to the time limitation stated above, Petitioners also requested accelerated procedures, including the waiver of the intermediate decision, if a formal hearing were held.

The basic thrust of Petitioners' argument is that, pursuant to Placid Oil Co. et al. v. F.P.C., 483 F.2d 880 (5th Cir. 1973), the Commission may grant special relief where higher than average royalties make a rate charged inappropriate. Petitioners state that United Gas Pipe Line Company, to whom they sell the gas, is in severe curtailment and is willing to pay the higher prices to keep the gas in its systems. Therefore, Petitioners argue, the public convenience and necessity warrants United's retaining this gas at the higher prices rather than risking termination of the leases in question and the possible diversion of the gas thereunder to the intrastate market.

#### The Commission finds:

(1) There is no justification for allowing a producer to pass through higher royalty costs to the consumer without a showing that Petitioners' overall costs are higher than those reflected in our opinion No. 699-H.

(2) There is no basis for allowing a temporary surcharge for the purpose of permitting a producer to recover retroactive royalty payments.

(3) It is in the public interest that the petitions, insofar as they request abandonment of the gas subject to the royalty owner's interest, be set for hearing.

(4) Inasmuch as the petitions of Shell and Pennzoil involve identical issues and parties, the public interest will be served by disposing of these matters in the same hearing.

(5) The requested shortened hearing procedures with respect to accelerated dates is hereby granted. However, no good cause exists for granting the request for waiver and omission of the intermediate decision.

#### The Commission orders:

(A) Those portions of the petitions (A) filed by Pennzoil and Shell in Docket Nos. RI76-8 and RI76-10 relating to a request for rate increases due to increases in royalty payments are hereby denied.

(B) Those portions of the petitions relating to temporary surcharges for back royalty payments by Shell and Pennzoil are hereby denied.

(C) Pursuant to the Natural Gas Act, particularly Sections 4, 5, 7, 15, and 16 thereof, the Commission's Rules of Practice and Procedure, and the regulations under the Act (18 CFR, Chapter I), those portions of the Shell-Pennzoil petitions relating to the abandonment of the gas associated with royalty owners' interests are set for the purpose of hearing and disposition.

(D) The portion of the petitions to abandon sales of royalty volumes filed by Pennzoil and Shell in Docket Nos. RI76-8 and RI76-10, respectively, are hereby consolidated for the purpose of hearing and disposition.

(E) A public hearing on the issues presented by the portion of the petitions to abandon sales of royalty volumes shall be held commencing September 23, 1975, at 10:00 A.M. (EDT) in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

(F) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5 (d)), shall preside at the hearing in this proceeding pursuant to the Commission's Rules of Practice and Procedure. The Presiding Administrative Law Judge shall issue his initial decision on or before November 26, 1975.

(G) Applicants and any intervenor supporting the application shall file their direct testimony and evidence on or before September 9, 1975. All testimony and evidence shall be served on the Presiding Administrative Law Judge, the Commission Staff, and all other parties to the proceeding.

(H) The Commission Staff and all intervenors opposing the application shall file their direct testimony and evidence on a date to be fixed by further order of the Presiding Administrative Law Judge. All such testimony and evidence shall be served upon the Presiding Administrative Law Judge and all other parties.

(I) Any party or Staff Counsel desiring to oppose any filed exceptions shall file such objections on or before December 19, 1975.

By the Commission,

[SEAL] KENNETH F. PLUMB,  
Secretary.

#### PUBLIC SERVICE CO. OF NEW MEXICO Filing of Supplemental Data

SEPTEMBER 2, 1975.

Take notice that on August 25, 1975, Public Service Company of New Mexico

FEDERAL REGISTER, VOL. 40, NO. 175—TUESDAY, SEPTEMBER 9, 1975

tendered supplemental data intended to make complete its original filing of June 23, 1975. This action is in response to a deficiency letter issued by the Secretary of the Federal Power Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 16, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

**SOUTHERN NATURAL GAS CO.  
Extension of Procedural Dates**

August 29, 1975.

On August 14, 1975, Staff Counsel filed a motion to extend the procedural dates fixed by order issued May 15, 1975, in the above-designated matter.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Staff Testimony, November 24, 1975.

Service of Intervenor Testimony, December 8, 1975.

Service of Company Rebuttal, December 22, 1975.

Hearing, January 13, 1976 (10:00 a.m. EST).

KENNETH F. PLUMB,  
Secretary.

[Docket No. CP76-57]

**TEXAS EASTERN TRANSMISSION CORP.  
Notice of Application**

September 2, 1975.

Take notice that on August 15, 1975, Texas Eastern Transmission Corporation (Applicant) P.O. Box 2521, Houston, Texas 77001, filed in Docket No. CP76-57 an application pursuant to Section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural

**NOTICES**

gas for Lukens Steel Company, Vistron Corporation, and unspecified industrial consumers for high priority uses,<sup>1</sup> all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that it is presently curtailing customers at the rate of 700,000 Mcf of gas per day or 25.2 percent of its customers' requirements. Applicant further states that in the period from November 1, 1975, through April 1, 1976, that it estimates that the curtailment level will average approximately 773,000 Mcf of gas per day or approximately 28 percent of requirements. Applicant alleges that it has little hope of purchasing any meaningful additional gas supplies during the coming heating season and that there is the possibility of ameliorating the impact of such estimated shortages on high priority industrial and commercial users of gas by transporting gas produced from onshore and offshore non-federal domain for high priority users to offset the curtailments imposed upon such users. Applicant states that in its opinion significant volumes of natural gas are available in the onshore Gulf Coast area for direct, nonjurisdictional sales for high priority industrial and commercial consumption.

Applicant states that Lukens Steel Company (Lukens) and Vistron Corporation (Vistron) are industrial consumers with high priority industrial requirements of gas. Applicant further states that Lukens and Vistron have contracted with Mobil Oil Corporation (Mobil) for the purchase of gas during the 1975-76 heating season to offset curtailments by their suppliers Columbia Gas of Pennsylvania, Inc., and Columbia Gas of Ohio, respectively, for such high priority usage.<sup>2</sup> It is stated that the price that Lukens and Vistron pay Mobil for such gas in each instance would be determined on the basis of the arithmetical average of Mobil's prices in effect for the period from initial delivery to January 1, 1976, and from January 1, 1976, to April 1, 1976, under Mobil's presently existing two highest volumes gas sales contracts for gas sales in Jefferson and Orange Counties, Texas, involving comparable quality gas. It is further stated that the average price of such gas is currently \$1.90 per million Btu. The gas which would be purchased is said to be limited to direct industrial consumption and would, on a daily basis, be transported and delivered to replace volumes curtailed by the distributor suppliers of Lukens and Vistron.

<sup>1</sup> High priority use is stated to be those users set forth in Section 2.78 of the Commission's General Policy and Interpretations (18 CFR 2.78), priority category 2 and priority category 3 which would have been priority category 2 had the gas been purchased on a firm basis.

<sup>2</sup> Lukens Steel Company is said to use gas in the manufacture of carbon and alloy steel plates and associated heavy plate products. Vistron Corporation is said to use gas in the production of ammonia for industrial and agricultural purposes.

Applicant states that it has agreed to transport the volumes purchased by Lukens and Vistron, limited in volume to those amounts required to make up the volumes of gas curtailed for high priority usage. The transportation would be on an interruptible basis to assure that the pipeline capacity for high priority uses is not preempted. For the transportation service Applicant proposes to charge an amount equal to Applicant's rate for deliveries in the particular zone at which the proposed delivery would be made at 100 percent daily contract quantity load factor level, less Applicant's purchased gas costs and less Applicant's fuel cost. Applicant further states that it would reduce the delivery volume by 3 percent to offset volumes used by Applicant in the performance of the proposed transportation service and to assure that higher priority customers are not adversely affected.

Applicant proposes to transport up to 20,000 Mcf of gas per day for Lukens up to 40,000 Mcf of gas per day for Vistron. Applicant states that the gas would be delivered to Columbia Gas Transmission Corporation at existing delivery points by means of existing facilities for redelivery to Lukens and Vistron.

Applicant further requests in the instant application that the Commission grant a blanket authorization to transport gas for its indirect industrial and commercial users for high priority purposes under the terms, conditions and procedures hereinafter stated and to install any tap and metering facilities necessary to institute the proposed service. Said service is proposed to be offered and rendered under the following circumstances and conditions:

(1) Applicant would transport gas under the terms and conditions of Rate Schedules TS and such transportation and would be limited to gas produced from onshore and offshore non-federal domain areas which generally is not otherwise available for purchase on a jurisdictional basis.

(2) The proposed procedure would be effective through the end of 1975-1976 heating season and would cover contracts which provide for initial deliveries for high priority industrial and commercial use in this period.

(3) Applicant would file with the Commission a copy of each service agreement made between it and the industrial or commercial purchaser, together with a copy of the gas sales contract between the purchaser and the seller of gas, and a statement which would set forth the following facts:

(a) That gas to be transported would only be used to offset curtailments of high priority industrial or commercial uses by Applicant's customers;

(b) That Applicant has the capacity to so transport the gas through its existing system that no additional facilities are required except taps and meters to receive gas from the producers involved, and that the transportation would not preempt capacity needed for Applicant's firm requirements;

**NOTICES**

(c) Whether or not the gas to be transported is believed to be available for sale to Applicant or any other pipeline for resale in interstate commerce; and

(d) Whether the price paid for such gas is comparable to and consistent with prices being paid by intrastate buyers for gas similarly situated.

(4) Service of such filings would be made on all Applicant's customers and interested state commissions. Applicant proposes that if the Commission does not reject or disapprove the filing by Applicant of the service agreement and related information within 30 days, the service agreement would become effective and Applicant would commence the service. Applicant proposes that if the Commission should reject any such filing, Applicant would not be authorized to commence the service proposed and that such filing could be withdrawn without prejudice to refiling by Applicant for separate authorization.

Applicant states that under its proposal to render the unspecified transportation services, high priority industrial and commercial consumers could have the full benefit of gas which would otherwise not be available in interstate commerce. Applicant further alleges that even though the Commission could not regulate directly the end use of gas so transported, through the mechanism for review and approval or disapproval of the transportation arrangements, it could attract gas to the interstate market for the stated high priority uses and thus improve the overall nationwide use factor of natural gas.

Applicant states that the authorization proposed herein for the unspecified services is experimental in nature and would be limited to contracts which involve initial deliveries during the 1975-1976 heating season.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 22, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own re-

view of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23895 Filed 9-8-75;8:45 am]

[Docket Nos. RP74-48 and RP75-3; AP76-1]

**TRANSCONTINENTAL GAS PIPE LINE  
CORP.**

**Order Rejecting Advance Payments  
Tracking Filing and Granting Intervention**

August 29, 1975.

On July 16, 1975, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing seven revised tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2.<sup>1</sup> This filing is made, Transco states, in accordance with Section 6 of Article III of the "Agreement as to Rates of Transcontinental Gas Pipe Line Corporation" (Agreement). Said Agreement, representing a settlement of all but three issues in Docket Nos. RP74-48 and RP75-3, was certified to the Commission for approval on May 16, 1975, by Presiding Administrative Law Judge Isaac D. Benkin.

According to Transco, the purpose of the filing is to increase its rates to reflect the inclusion in rate base of advance payments in the amount of \$6,863,293, which amount has not previously been included in rate base.

The proposed revised tariff sheets also reflect additional advance payments made by Transco in the amounts of \$32,287,081 and \$14,442,642. Those amounts were the subject of previous advance payment tracking filings made by Transco on May 16, 1975 (AP75-1), and June 16, 1975 (AP75-2), respectively.<sup>2</sup>

Transco proposes that the instant filing be made effective September 1, 1975,

<sup>1</sup> These seven revised sheets are designated Fourth Substitute Thirteenth Revised Sheet No. 5 and Fourth Substitute Ninth Revised Sheet No. 6 to First Revised Volume No. 1; and Sixth Substitute Fourteenth Revised Sheet No. 52, Fifth Substitute First Revised Sheet No. 121, Sixth Substitute Tenth Revised Sheet No. 321, Sixth Substitute Sixth Revised Sheet No. 416, and Sixth Substitute Fifth Revised Sheet No. 495 to Original Volume No. 2.

<sup>2</sup> By orders issued June 30, 1975, and July 25, 1975, respectively, Transco's advance payments tracking filings were rejected because we had not yet acted on the aforementioned Agreement, pursuant to which the tracking filings were made. However, those rejections were without prejudice to Transco's right to make advance payment tracking filings in the event the tracking provision is approved at a later date.

subject to Commission approval of the Agreement.

Public notice of the subject filing was issued on June 24, 1975, with comments, protests and petitions to intervene due on or before August 8, 1975. A timely petition for leave to intervene was filed by Sun Oil Company. Good cause appearing, said petition shall be granted, as hereinafter ordered and conditioned.

As noted above, the instant advance payments tracking filing is made pursuant to a provision in the settlement agreement in the captioned dockets. This provision would permit, subject to certain conditions, the tracking of advances from Transco to producers of natural gas. However, because we have not yet taken any action on said settlement agreement, Transco, as of this date, has no authority to track the advance payments here in question. Accordingly, the instant filing must be rejected as premature. This rejection is, however, without prejudice to Transco's right to make advance payments tracking filings in the event the tracking provision is approved at a later date.

*The Commission finds:*

(1) Good cause exists to grant Sun Oil Company's petition for leave to intervene in this proceeding, as hereinafter ordered and conditioned.

(2) Good cause exists to reject the tariff sheets listed in footnote 1 of this order, without prejudice to Transco's right to make advance payments tracking filings in the event the aforementioned advance payments tracking provision is approved at a later date.

*The Commission orders:*

(A) Sun Oil Company is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) Transco's July 16, 1975, advance payments tracking filing is hereby rejected, without prejudice to Transco's right to make advance payments tracking filings in the event the tracking provision in question is approved by this Commission at a later date.

(D) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket Nos. RP74-89 (AP76-1)]

**TRUNKLINE GAS CO.****Order Amending Prior Order**

August 29, 1975.

On August 22, 1975, we issued an order at this docket which provided for a hearing to investigate into the justness and reasonableness of Trunkline's proposed rate increase, as tendered for filing on July 18, 1975, insofar as it reflects costs related to eleven advance payments. Omitted from that order was the date upon which Staff is to serve its prepared testimony and exhibits. Therefore, we shall amend our order of August 22, 1975 to establish a revised procedural schedule.

**The Commission orders:**

Ordering Paragraphs (A) and (D) of our order of August 22, 1975 are hereby amended to read as follows:

(A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 8, and 15 thereof, and the Commission's Rules and Regulations, a public hearing shall be held on January 13, 1976, in a hearing room of the Federal Power Commission, Washington, D.C. 20426, concerning the justness and reasonableness of the rates proposed in this proceeding by Trunkline insofar as they reflect costs related to the eleven advance payments listed in Footnote 3 above.

(D) On or before October 14, 1975, Trunkline shall serve its prepared testimony and exhibits. On or before December 2, 1975, the Commission Staff shall serve its prepared testimony. On or before January 2, 1976, the company shall serve its rebuttal evidence, if any.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket Nos. RP74-20 and RP74-83]

**UNITED GAS PIPE LINE CO.****Extension of Procedural Dates**

August 29, 1975.

On June 30, 1975, United Gas Pipe Line Company filed a motion to extend the procedural dates fixed by order issued May 16, 1974, as most recently modified by notice issued June 2, 1975, in the above-designated matter. The motion states that the parties have been notified and have no objection.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of United Testimony on Proposed Settlement, September 29, 1975.

Service of Staff Testimony on Proposed Settlement, October 13, 1975.

Service of Intervenor Testimony on Proposed Settlement, October 27, 1975.

Service of United Rebuttal Testimony, November 11, 1975.

Hearing, December 2, 1975 (10:00 a.m. EST).

By direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-23898 Filed 9-8-75; 8:45 am]

**NOTICES**

[Docket No. ER76-45]

**CONSUMERS POWER CO.****Order Accepting for Filing and Suspending Proposed Rate Increase, Granting Interventions, Providing for Hearing Establishing Procedures, Denying Motion To Reject and Providing for Responses to Motion for Summary Disposition**

August 29, 1975.

On July 30, 1975, Consumers Power Company (Consumers or Company) tendered for filing revised tariff sheets containing superseding rate schedules which would increase the Company's wholesale service rates to named partial and full requirement customers (Customers).<sup>1</sup> The proposed rates would increase revenues from Customers by \$5,065,720 (33%) for the twelve month period ending December 31, 1975. Concurrently, Consumers tendered for filing a Schedule of Rates Governing Wholesale For Resale Electric Service (Standard Service Agreement) which Consumers intends to serve upon all customers upon expiration of their present agreements. The rates contained in the Standard Service Agreement are the same as those in the superseding rate schedules referred to above, and provide for interim compensation to Consumers for the installation or modification of facilities necessary to serve particular customers. This Standard Service Agreement is proposed to be substituted for the existing individual contract form of rate schedule in order to standardize Consumers wholesale rate form and terms and conditions of service, in order to permit more efficient administration of its wholesale business. Consumers proposes that its filed Standard Service Agreement be made effective for each of its wholesale for resale customers upon the expiration or termination of the customer's presently effective wholesale for resale contract. Consumers proposes to make the superseding rate schedules effective on August 30, 1975.

Consumers states that the reason for the increase in rates is that the Company's present earnings from its wholesale electric service are inadequate as a result of ongoing inflation, and that the rate of return from its wholesale business will be only 2.59% based upon forecasted 1975 conditions. Consumers states further that in order to meet the requirements of its customers, it will be required to expend approximately \$3 billion in construction activities during the five-year period 1976 through 1980 and that much of this construction expenditure must be financed with outside capital. Consumers states that the new rates, which modify the demand and energy rate structures and charges, are necessary if the Company is going to be able to finance this necessary construction program. The Company in its new rate filing is also proposing to eliminate the rate differential between total requirement purchasers and partial requirement purchasers in its wholesale for resale

<sup>1</sup> See Appendix A for Rate Schedules and Customer listing.

rate by the adoption of a single schedule of rates for all of its wholesale customers, and to revise its fuel cost adjustment clause to comply with FPC Order No. 517, issued November 13, 1974.

Notice of Consumer's filing was issued on August 7, 1975, with comments, protests, or petitions to intervene due on or before August 25, 1975.

On August 19, 1975, a Petition to Intervene was filed by Edison Sault Electric Company (Edison). Edison stated that it purchases electric energy from Consumers and serves customers at retail and also sells electric energy at wholesale to one customer, Cloverland Electric Cooperative. Edison alleges, inter alia, that it is presently purchasing from Consumers electric energy for resale under a contract entered into between the parties dated December 1, 1966. However, Edison and Consumers have entered into a new contract dated November 21, 1974, which will become effective when Edison's new submarine cable is placed into service, which date is anticipated to be October 1, 1975. Upon the effective date of the new contract, the contract between Edison and Consumers dated December 1, 1966, and all amendments and supplements thereto, will be cancelled. The new contract was tendered to the Commission for filing by Consumers on April 11, 1975, with a request for waiver of notice requirements, but it has not as yet been accepted. Edison's position is that it is inappropriate for Consumers to now propose new rates when it has an agreement pending before the Commission with Edison which has not yet become effective. Edison states further that under the proposed rates, its cost of power from Consumers would increase 41.5% or \$510,379 for the twelve months ended August 31, 1975.

On August 20, 1975, a Petition to Intervene was filed by Alpena Power Company (Alpena), who states that it receives a major portion of its energy requirements from Consumers, and it is Consumers' largest wholesale customer, and therefore a substantial portion of the proposed increase will have to be borne by Alpena.

On August 25, 1975, a Petition to Intervene was filed with a motion entitled "Motion to Reject Filing, Motion For Summary Judgement, Protest and Petition to Intervene of Twelve Publicly-Owned Wholesale Customers" (Systems).<sup>2</sup> Systems urge that the filing be rejected because the Period II cost data submitted by Consumers is not substantiated. We have reviewed Consumers' Period II data and find it substantially complies with our filing requirements. However, the burden will be upon Consumers in the hearing hereinafter ordered to "establish the validity and accuracy of each of their cost estimates" (Order 487, mimeo at p. 3).

<sup>2</sup> Cities of Bay City, Chalevoix, Coldwater, Harbor Springs, Hillsdale, Marshall Petoskey, Portland, St. Louis and Union City, The Village of Chelsea and the Southeastern Michigan Electric Cooperative, Inc.; all located in Michigan.

Systems urges that summary judgement be granted on that portion of the rate filing reflecting Consumers' proposal to adopt normalization of the tax effect of liberalized depreciation as well as comprehensive interperiod tax normalization of the items covered in Order No. 530.<sup>3</sup> Systems argue that in order to adopt normalization for rate purposes of the items in Order No. 530 as well as for liberalized depreciation, Consumers must show tax deferral rather than a permanent tax savings. Systems argue that Consumers direct evidence fails to show a tax deferral and therefore its request for normalization of the tax effect of liberalized depreciation as well as the items covered in Order No. 530 must be summarily denied.

Because of the importance of this issue, we believe it appropriate to provide an opportunity for all parties, including the Commission Staff, to respond to Systems motion for summary disposition concerning the normalization proposals of Consumers. Accordingly, we shall delay action on Systems motion to allow all parties 15 days from the date of issuance of this order to respond to Systems motion for summary disposition of the normalization issues, pursuant to Section 1.12(c) of the Commission's Regulations.

Systems also argue that certain items underlying Consumers' proposed rates are excessive including, inter alia, its request for a 9.95% overall rate of return which yields a 15.5% return on common equity, allegedly excessive maintenance expense, allegedly improper allocation of fuel stock, and improper rate design by the addition of more demand blocks. We believe the allegations made by Systems, while not sufficient to cause rejection of the filing, raise issues which may require development in the evidentiary proceedings hereinafter ordered.

As a further basis for rejection of Consumers' filing, Systems argue that the proposed rates would create an unlawful "price squeeze" by foreclosing Systems from competing with Consumers for retail loads. This Commission has consistently held that it must utilize a cost plus fair return standard for establishing the justness and reasonableness of the wholesale rate and does not have the authority under the Federal Power Act to set the wholesale rate predicated upon retail rates over which we have no jurisdiction.<sup>4</sup> We shall therefore limit this proceeding so as to exclude consideration of the price squeeze issue. We are aware of Systems' reliance upon *Conway Corporation v. F.P.C.*, 510 F.2d 1264 (1975). However, the Court in *Conway* stayed its mandate pending appeal by the Commission. Ac-

<sup>3</sup> FPC issued June 18, 1975, in Docket Nos. R-424 and R-446.

<sup>4</sup> See e.g., *Virginia Electric and Power Company*, Docket No. E-9147, order issued January 22, 1975; *Carolina Power and Light Company*, Docket No. E-8884, order issued August 26, 1974; *Wisconsin Public Service Corporation*, Docket No. E-8867, order issued August 23, 1974; and *Pacific Gas and Electric Company*, Docket No. E-7777, order issued March 14, 1974.

**NOTICES**

cordingly, Systems may renew their request for consideration of the price squeeze issue when and if the *Conway* decision becomes final.

In addition to the "price squeeze" issue, Systems raise allegations of other allegedly anti-competitive allegations involving, inter alia, the appropriateness of certain contract language, pooling, arrangements of interchange and coordination which Consumers is a member. In order to fully investigate these allegations, we shall institute a separate phase (Phase II), which will be the subject of a hearing and decision separate and apart from the investigation of the rates we have ordered below for the purpose of developing a complete evidentiary record concerning allegedly anti-competitive language contained in Consumers' currently effective rate schedules proposed to be continued in the rate schedules filed herein.<sup>5</sup>

All of the intervenors urge that suspension for the full five-month statutory period is proper in this case. The Commission must utilize a cost plus fair return standard for establishing the justness and reasonableness of the proposed wholesale rates. We believe that the circumstances of this case indicate thirty day suspension is proper. *Municipal Light Boards of Reading and Wakefield, Mass. v. F.P.C.*, 450 F.2d 1341 (D.C. Cir. 1971), cert. denied, 405 U.S. 989 (1972).

Evidence relevant to the issues raised by the instant filing should be submitted by all parties including the Commission Staff. Consumers is requesting herein that it be allowed a Period II rate of return on common equity of 15.50 percent and an overall rate of return of 9.95 percent. We note that Consumers is requesting the increase in part to finance approximately \$3 billion in construction activities during the five year period 1976 through 1980. All parties, including Staff, are directed to present evidence as to how their rate of return recommendations relate to Consumers' alleged financing requirements and should address themselves specifically to Consumers' statements that its return at present rates is 5.05 percent; that its price earnings ratio has declined from 22.3 in 1965 to 10.9 in 1973; that its common stock, yielding approximately 14 percent in current dividends, was selling at 50 percent of book value in May, 1975; that its stock earnings per share decreased from \$2.41 in 1973 to \$1.34 in 1974, and dividends have not increased since February, 1970; and that allowance for funds used during construction were 62 percent of 1974 earnings on common equity.

A review of Consumers' submittal indicates that among other things, it has normalized the tax effect of interest associated with construction work in progress in the income tax calculation, and made direct assignment of transmission facilities and related costs.

Our review of Consumers' proposed rates filed herein indicates that the proposed rates have not been shown to be

<sup>5</sup> See orders listed in Footnote 4 above.

just and reasonable. We shall, therefore, accept Consumers' tendered tariff sheets and Standard Service Agreement for filing and suspend the use thereof for thirty days, when the tariff sheets will be permitted to become effective, and the Standard Service Agreement will be permitted to be substituted for the individual agreements as they expire, subject to refund. We shall also provide for an evidentiary hearing to test the lawfulness of the proposed rates as contained in the filed tariff sheets and the Standard Service Agreement.

**The Commission finds:**

(1) Consumers' filing should be accepted for filing and suspended for thirty days, as hereinafter ordered.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of Consumers' proposed rate changes.

(3) The participation of Edison, Alpena, and Systems in these proceedings may be in the public interest.

**The Commission orders:**

(A) Consumers' filing is hereby accepted for filing and suspended for thirty days until September 30, 1975, when the proposed rates will go into effect, subject to refund and the Standard Service Agreement incorporating these rates may be substituted for the individual contract forms as they expire or are terminated.

(B) Pursuant to the authority of the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held on November 27, 1975, at 10 a.m., in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, concerning all issues, other than those issues to be considered in Phase II of these proceedings hereinafter ordered, which bear on the lawfulness and reasonableness of the rates and charges proposed in Consumers' filing (Phase I). Phase I shall be subject to the procedures set forth in Ordering Paragraph (C) below.

(C) On or before October 16, 1975, the Commission Staff shall serve its prepared testimony and exhibits. Prepared testimony and exhibits of intervenors, if any, shall be served on or before October 30, 1975. Company rebuttal shall be served on or before November 13, 1975.

(D) A second phase (Phase II) of this proceeding is hereby instituted for the development of a complete evidentiary record concerning the anticompetitive provisions of Consumers' contracts and over which this Commission has jurisdiction to grant relief. Intervenor evidence in support of their allegations as to these anticompetitive provisions in Consumers' contracts shall be filed on or before December 9, 1975. Staff evidence, if any, shall be filed on or before January 20, 1976. Consumers shall file its prepared evidence on or before February 3, 1976. Any intervenor rebuttal evidence shall

load was 10.8% higher than in 1973, (2) 1974-1975 1976 construction budget is

(2) Good cause exists to permit the intervention of the above-mentioned

(D) The above-mentioned petitioners are hereby permitted to intervene in this

be filed on or before February 24, 1976. A public hearing for the purpose of cross-examination of the filed testimony and exhibits shall commence on March 9, 1976, in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, at 10 a.m.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose, (See Delegation of Authority, 18 CFR 3.5 (d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure.

(F) Nothing contained herein shall be construed as limiting the rights of parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure.

(G) Edison and Alpena are hereby permitted to intervene in these proceedings, subject to the Rules and Regulations of the Commission; *Provided, how-*

*ever.* That the participation of such intervenors shall be limited to matters affecting rights and interests specifically set forth in their petition to intervene; and *Provided, further,* That the admission of such intervenors shall not be considered as recognition by the Commission that they might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(H) Pursuant to Section 1.12(c) of the Regulations, all parties shall file responses, within 15 days of the date of issuance of this order, to Systems' motion for summary disposition concerning Consumers' request to reflect in its rates comprehensive interperiod tax normalization, and normalization of the tax effect of liberalized depreciation. Pending such responses, we shall withhold action on Consumers' motion.

(I) Systems' motion to reject Consumers' filing is denied.

(J) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-23758 Filed 9-8-75;8:45 am]

[Docket No. ER76-39]

#### KANSAS POWER AND LIGHT CO.

Order Accepting for Filing and Suspending Proposed Rate Increase, Granting Petition To Intervene, Instituting Proceedings, and Establishing Dates

August 29, 1975.

On July 28, 1975, the Kansas Power and Light Company (KPL) tendered for filing proposed Schedules of Rates and Charges for Wholesale Service-Municipalities to supersede and replace those rate provisions of KPL's contract rate schedules presently in effect and on file with the Commission, which relate to thirty-four (34) wholesale municipal customers (Municipals).<sup>1</sup>

According to KPL, the proposed changes would increase revenues from jurisdictional sales and service by \$360,053 (approximately 22.25% overall).

<sup>1</sup> See Appendix A for designations.

based on the twelve-month period ending March 31, 1975, and increase its rate of return from 4.33% to 8.36% over the same period. KPL states that the changes embodied in the proposed schedules include (1) revised capacity and energy charges, (2) revision of the fuel adjustment clause to conform to the requirements of Section 35.14 of the Commission's Regulations as well as to increase the base cost of fuel, (3) revision of the power factor adjustment in determination of billing capacity, (4) extension of credits to the customer for metering at transmission voltage and for substation ownership, and (5) addition of a minimum net monthly bill of \$100. KPL requests an effective date of September 1, 1975, for the proposed changes to all customers except the City of Herington (Herington). The proposed effective date for Herington is January 23, 1976.

Notice of KPL's filing was issued on August 11, 1975, with protests or petitions to intervene due on or before August 20, 1975. On August 20, 1975, the Municipals filed a "Motion To Reject, Protest And Petition To Intervene Of The Kansas Wholesale Municipal Customers". Municipals' motion makes the four following allegations: 1) KPL's filing as to twenty-five of the thirty-four Municipals is prohibited by the terms of its contracts with those cities, and should be rejected under the *Sierra-Mobile* doctrine; 2) KPL's filing should be rejected as failing to conform to Section 35.13(b) of the Commission's Rules and Regulations; 3) the proposed rate increases to the Municipals are discriminatory vis-a-vis both other wholesale and/or retail customers of the company, and 4) the proposed rate schedule changes are unjust and unreasonable and should be suspended for the full five-month period. Due to the complexity of the issues raised in Municipals' motion to reject, we shall defer action on that motion until a later date.

Our review of KPL's filing and the issues raised therein indicates that the proposed changes have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. Accordingly, we shall suspend the proposed changes for thirty days and establish hearing procedures to determine the justness and reasonableness of KPL's filing. This action is without prejudice to our disposition of the Municipal motion to reject.

Evidence relevant to the issues raised by the instant filing should be submitted by all parties including the Commission Staff. Without limiting the rights of the parties, including Staff, in presenting such further evidence as they deem relevant and material, we hereby direct that the parties and our Staff present evidence which addresses itself to the reliability and relevancy of KPL's statements that: (1) its 1974 net hourly peak

<sup>2</sup> *United Gas Pipeline Co. v. Mobile Gas Service Corp.*, 350 U.S. 332 (1956) and *F.P.C. v. Sierra Pacific Power Co.*, 350 U.S. 348 (1956).

load was 10.8% higher than in 1973, (2) KPL's 1975-1979 construction budget is currently estimated at over \$477,325,000, 60% of which must be financed by the issuance of additional securities and 85% of which is committed for electric production and transmission plant, (3) KPL will own 64% of each of four 700,000 kilowatt capacity units currently being constructed as part of the Jeffrey Energy Center, the first of which is scheduled for completion in 1978, (4) the imbedded annual cost of KPL's first mortgage bonds has increased approximately 78% since the current rates were established in 1963, (5) KPL's fuel costs for generation are approximately four times the level which prevailed when the current rates were established, (6) KPL's municipal wholesale customers, as a class, have shifted from a moderate to a high coincident peak with the company (lowering their annual system load factor below 35%), (7) KPL's proposed 8.36% rate of return is not adequate, (8) KPL's common stock is currently selling below book value, (9) KPL will be required to issue common equity securities within the next two years, (10) attrition will cause KPL to earn substantially less on its new investments in the future than is necessary to prevent a declining rate of earnings in future years, (11) production plant was allocated on the basis of annual coincident demand at maximum system peak hour (an allocation based on average monthly coincident peak demand would have resulted in a greater allocation of production plant to the municipal wholesale customers), although transmission plant was allocated on the basis of average monthly coincident peak demands, (12) administrative and general expenses were allocated between payroll related and property related expenses, and (13) KPL applied \$32,077 of donations to the electric department of the company. Witnesses should further direct their attention to the following items: (1) normalization of the tax effect of capitalized items in the income tax allocation, (2) normalization of the tax effect of the interest associated with construction work in progress in the income tax calculation, (3) use of end of test period rate base, (4) functionalization of general plant by functional plant ratios, and (5) cost of service treatment of deferred fuel expense.

The Commission finds. (1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in KPL's revised rate schedule proposed in this docket and that the tendered rate schedules be suspended as hereinafter provided.

(2) Good cause exists to permit the intervention of the above-mentioned Municipal intervenors.

The Commission orders. (A) Pending a hearing and a decision thereon, KPL's proposed changes in its rates and charges, tendered on July 28, 1975, for customers other than the city of Herington are accepted for filing and suspended for thirty days, the use thereof deferred until October 1, 1975, subject to refund. The proposed change in rates and charges for the city of Herington is to become effective on February 23, 1976, subject to refund. This action is without prejudice to our disposition of the motion to reject filed by the Municipals on August 20, 1975.

(B) Pursuant to authority of the Federal Power Act, particularly Section 205 thereof, and the Commission's Rules and Regulations (18 CFR, Chapter I), a hearing for purposes of cross-examination concerning the lawfulness and reasonableness of the rates and charges in KPL's FPC Rate Schedule, as proposed to be amended herein shall be held commencing on January 27, 1976, at 10 a.m., EST, in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(C) On or before December 9, 1975, the Commission Staff shall serve its prepared testimony and exhibits. Any intervenor evidence will be filed on or before December 23, 1975. Any rebuttal evidence by KPL shall be served on or before January 13, 1976.

(D) The above-mentioned petitioners are hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Commission; *Provided, however,* that the participation of such intervenors shall be limited to matters affecting the rights and interests specifically set forth in the respective petitions to intervene; and *Provided, further,* that the admission of such intervenors shall not be construed as recognition that they or any of them might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose, (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure.

(F) Nothing contained herein shall be construed as limiting the rights of parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure.

(G) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

# FEDERAL RESERVE SYSTEM FEDERAL OPEN MARKET COMMITTEE Authorization for System Foreign Currency Operations

In accordance with its rules regarding availability of information there is set forth below paragraph 2 of the Committee's Authorization for Foreign Currency Operations in the form that became effective August 29, 1975. The change from the form previously in effect consisted of an increase in the swap arrangement with the Bank of Mexico from \$180 million equivalent to \$360 million equivalent.

The Federal Open Market Committee directs the Federal Reserve Bank of New York to maintain reciprocal currency arrangements ("swap" arrangements) for the System Open Market Account for periods up to a maximum of 12 months with the following foreign banks, which are among those designated by the Board of Governors of the Federal Reserve System under Section 214.5 of Regulation N, Relations with Foreign Banks and Bankers, and with the approval of the Committee to renew such arrangements on maturity:

Foreign bank:	Amount of arrangement (millions of dollars equivalent)
Austrian National Bank	250
National Bank of Belgium	1,000
Bank of Canada	2,000
National Bank of Denmark	250
Bank of England	3,000
Bank of France	2,000
German Federal Bank	2,000
Bank of Italy	3,000
Bank of Japan	2,000
Bank of Mexico	360
Netherlands Bank	500
Bank of Norway	250
Bank of Sweden	300
Swiss National Bank	1,400
Bank for International Settlements:	
Dollars against Swiss francs	600
Dollars against other European currencies	1,250

By order of the Federal Open Market Committee, September 4, 1975.

ARTHUR L. BROIDA,  
Secretary.

[FR Doc. 75-2390 Filed 9-8-75; 8:45 am]

## INTERNATIONAL TRADE COMMISSION

[332-77]

### CONDITIONS OF COMPETITION BETWEEN DOMESTIC AND IMPORTED SHRIMP

#### Notice of Investigation and Public Hearing

The United States International Trade Commission has instituted, on its own motion, an investigation, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)), of the conditions of competition in the United States between domestic and imported shrimp. The shrimp, which may be fresh, chilled, frozen, prepared, or preserved (including pastes and sauces), are imported under item 114.45 of the Tariff Schedules of the United States.

## NOTICES

In its investigation, the United States International Trade Commission will be concerned with the effects of imports of shrimp on domestic shrimp fishermen and domestic processors of shrimp and shrimp products. It invites the submission of information on the product characteristics of imported and domestic shrimp; the characteristics of the domestic industries fishing for shrimp and processing shrimp and shrimp products; U.S. consumption, production, imports and exports of shrimp and shrimp products; inventories held in the United States; pricing practices, price trends, and price relationships between imported and domestic shrimp and shrimp products; trends of the major cost elements and profitability of operations of fishermen and processors; and characteristics of, and developments in, the shrimp industries of the major foreign supplying countries.

Public hearings in connection with the investigation will be held in Kodiak, Alaska, at 10:00 a.m., AST, on Wednesday, October 29, 1975, at a place to be announced; New Orleans, Louisiana, at 10:00 a.m., CST, on Tuesday, November 11, 1975, at a place to be announced; and Washington, D.C., at 10:00 a.m., EST, on Tuesday, November 18, 1975, in the Hearing Room, United States International Trade Commission, 701 E Street, NW. Requests for appearances at the Kodiak hearing should be submitted in writing, to the Secretary of the Commission on or before October 23, 1975; requests for appearances at the New Orleans and Washington hearings should be submitted on or before November 5 and November 12, respectively.

Issued: September 4, 1975.

By order of the Commission.

[SEAL] KENNETH R. MASON,  
Secretary.

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[75-60]

### NASA RESEARCH AND TECHNOLOGY ADVISORY COUNCIL PANEL ON RESEARCH

#### Meeting

The NASA Research and Technology Advisory Council Panel on Research will meet on September 29 and 30, 1975, at NASA Headquarters, Washington, D.C. 20546. The meeting will be held in Room 625 of Federal Office Building 10B, 600 Independence Avenue SW. Members of the public will be admitted on a first-come, first-served basis, limited by the seating capacity of the room which is about 40 persons. All visitors must sign in prior to attending the meeting.

The Panel on Research of the NASA Research and Technology Advisory Council serves in an advisory capacity only. Its Chairman is Professor A. Hertzberg, and there are 12 members. The following list sets forth the approved agenda and schedule for the meeting of this Panel on Research on September 29 and 30, 1975. For further information, please contact Mr. F. C. Schwenk, Area Code, 202, 755-2488.

SEPTEMBER 29, 1975

Time	Topic
9:00 a.m.	Remarks by the Chairman (Purpose: To report to the Panel on the most recent Research and Technology Advisory Council meeting.)
9:15 a.m.	Remarks by the Executive Secretary (Purpose: To brief the Panel on recent activities in NASA Headquarters which may affect the work of the Panel on Research.)
10:00 a.m.	Report by Dr. Richard Seebass, Panel Member (Purpose: To present to the rest of the Panel information obtained while attending briefings on NASA planning studies.)
11:15 a.m.	Presentation by Mr. William Hayes (Purpose: To provide background information to the Panel on the OAST Space Technology Workshop.)
1:00 p.m.	Presentation by Dr. Kenneth Billman (Purpose: To present results of the Basic Research Working Group efforts as part of the OAST Space Technology Workshop.)
2:00 p.m.	Panel Discussion (Purpose: To discuss presentations and prepare findings and recommendations for NASA.)

SEPTEMBER 30, 1975

9:00 a.m.	Panel Discussion Continued (Purpose: To continue discussion and preparation of findings and recommendations for NASA.)
11:00 a.m.	Preparation of Committee Report (Purpose: To summarize discussions and recommendations.)
1:00 p.m.	Consideration of Future Panel Activities (Purpose: To define areas of further study by the Panel on Research.)
2:00 p.m.	Adjournment.

SEPTEMBER 2, 1975.

DUWARD L. CROW,  
Assistant Administrator for  
DOD and Interagency Affairs,  
National Aeronautics and  
Space Administration.

[FR Doc. 75-23830 Filed 9-8-75; 8:45 am]

## NATIONAL ENDOWMENT FOR THE HUMANITIES

### FELLOWSHIPS PANEL

#### Meeting

AUGUST 28, 1975.

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that a meeting of the Fellowships Panel will be held at Washington, D.C. on October 17 and 18, 1975, from 9:00 a.m. to 5:30 p.m.

## NOTICES

The purpose of the meeting is to review Independent Fellowship applications submitted to the National Endowment for the Humanities for 1976-77 fellowship grants.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, N.W., Washington, D.C. 20506 or call area code 202-382-2031.

JOHN W. JORDAN,  
Advisory Committee  
Management Officer.

[FR Doc. 75-23828 Filed 9-8-75; 8:45 am]

## NUCLEAR REGULATORY COMMISSION

### ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE STERLING POWER PROJECT NUCLEAR UNIT NO. 1

#### Meeting

In accordance with the purposes of Sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on the Sterling Power Project Nuclear Unit No. 1 will hold a meeting on September 24, 1975 at the Town of Sterling Highway Shop Addition, Sterling, N.Y. The purpose of this meeting is to explore the site-related aspects of this application of the Standardized Nuclear Power Plant System (SNUPPS).

The agenda for the subject meeting shall be as follows:

Wednesday, September 24, 1975, 8:30 a.m. The Subcommittee will meet in closed Executive Session, with any of its consultants who may be present, to explore their preliminary opinions, based upon their independent review of safety reports submitted by the Applicant and the NRC Staff, regarding matters which should be covered during the following open meeting in order to formulate a Subcommittee report and recommendation to the full Committee.

9:00 a.m. until the conclusion of business. The Subcommittee will meet in open session to hear presentations by representatives of the Rochester Gas and Electric Company and the NRC Staff and will hold discussions with these groups regarding the site-related aspects of the application for a construction permit as well as other matters relating to the standard design.

At the conclusion of the open session, the Subcommittee will caucus in a brief, closed session to determine whether the matters identified in the initial closed session have

been adequately covered and whether the project is ready for review by the full Committee. During this session, Subcommittee members and consultants will discuss their final opinions and recommendations on these matters. Upon conclusion of this caucus, the Subcommittee will meet again in brief open session to announce its determination.

In addition to these closed deliberative sessions, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring with the NRC Staff and the Applicant matters involving proprietary information, particularly with regard to specific features of the plant design and plans related to plant security.

I have determined, in accordance with Subsection 10(d) of Public Law 92-463, that it is necessary to conduct the above closed sessions to protect the free interchange of internal views in the final stages of the Subcommittee's deliberative process (5 U.S.C. 552(b)(5)) and to protect confidential proprietary or plant security information (5 U.S.C. 552(b)(4)). Separation of factual material from individuals' advice and opinions while closed Executive Sessions are in progress is considered impractical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incomplete open session from one day to the next.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by mailing a readily reproducible copy thereof, postmarked no later than September 17, 1975, to Mr. John C. McKinley, Office of the Executive Secretary, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, D.C. 20555 or by filing at the ACRS Office a readily reproducible copy two working days prior to the meeting. Written statements should be limited to safety related areas which are within the purview of the Committee. Background information concerning items to be considered at this meeting can be found in the Preliminary Safety Analysis Report and related documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Oswego City Library, 120 East Second Street, Oswego, N.Y. 13126. Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St. NW., Wash., D.C. 20555 after December 24, 1975. Copies may be obtained upon payment of appropriate charges.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral

statements in safety related areas within the Committee's purview at an appropriate time chosen by the Chairman of the Subcommittee.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 22, 1975 to the Office of the Executive Secretary of the Committee (telephone 202/634-1920, Attention: Mr. John C. McKinley) between 8:15 a.m. and 5:00 p.m., Eastern Daylight Time.

(d) Questions may be propounded only by members of the Subcommittee and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Persons with agreements or orders permitting access to proprietary information, other than plant security information, may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Secretary of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Designated Federal Employee for the meeting, Mr. John C. McKinley of the ACRS Office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion of the meeting will be available for inspection on or after October 1, 1975 at the NRC Public Document Room, 1717 H St. NW., Wash., D.C. 20555, and at the Oswego City Library, 120 East Second Street, Oswego, N.Y. 13126. Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St. NW., Wash., D.C. 20555 after December 24, 1975. Copies may be obtained upon payment of appropriate charges.

Dated: September 4, 1975.

JOHN C. HOYLE,  
Advisory Committee  
Management Officer.

**PACIFIC GAS AND ELECTRIC CO.**  
Issuance of Amendment to Facility  
Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 10 to Facility Operating License No. DPR-7 issued to Pacific Gas & Electric Company which revised Technical Specifications for operation of the Humboldt Bay Power Plant Unit No. 3, located near Eureka, California. The amendment is effective as of its date of issuance.

The amendment changes the required frequency of submitting Operating Report from semiannual to annual.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated November 27, 1974, (2) Amendment No. 10 to License No. DPR-7, with Change No. 52 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this August 29, 1975.

For the Nuclear Regulatory Commission,

ROBERT W. REID,  
Chief, Operating Reactors  
Branch No. 4, Division of Reactor Licensing.

[FR Doc.75-23858 Filed 9-8-75; 8:45 am]

[Dockets Nos. 50-259 and 50-260]

**TENNESSEE VALLEY AUTHORITY**  
Issuance of Amendments to Facility  
Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Facility Operating License No. DPR-33 and Amendment No. 11 to Facility Operating License No. DPR-52 issued to Tennessee Valley Authority for operation of the Browns Ferry Nuclear Plant, Units 1 and 2, located in Limestone County, Alabama. The amendments are effective as of their date of issuance.

The amendments modify the licenses to authorize modifications to Units 1 and 2 in conformance with "Plan for Evaluation, Repair, and Return to Service of

Browns Ferry Units 1 and 2 (March 22, 1975 Fire)" in accordance with the licensee's request dated August 29, 1975. These amendments do not authorize return to operation of Units 1 and 2. That authorization will be the subject of another action upon completion of our review of the total restoration work required.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since the amendments do not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendments dated August 29, 1975, (2) Amendment No. 14 to License No. DPR-33 and Amendment No. 11 to License No. DPR-52, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Athens Public Library, South and Forrest, Athens, Alabama 35611.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this September 2, 1975.

For the Nuclear Regulatory Commission,

ROBERT A. PURPLE,  
Chief, Operating Reactors  
Branch No. 1, Division of Reactor Licensing.

**NATIONAL SCIENCE FOUNDATION**  
ADVISORY PANEL FOR WEATHER  
MODIFICATION

**Notice of Part Open Meeting**

In accordance with the Federal Advisory Committee Act, P.L. 92-463, the National Science Foundation announces the following meeting:

NAME: Advisory Panel for Weather Modification.

DATE: September 25 and 26, 1975.

TIME: 7:00 p.m. each evening.

PLACE: YMCA Conference Center, Estes Park, Colorado.

TYPE OF MEETING: Part Open—Open 9/25 (7-9 p.m.); 9/26 (7-10 p.m.); Closed 9/25 (9-10 p.m.).

CONTACT PERSON: Mr. Currie S. Downie, Program Manager for Weather Modification, Room 1132, National Science Foundation, Washington, D.C. 20550, telephone (202) 632-4380. Anyone who plans to attend this meeting should notify Mr. Downie no later than 9/19/75.

SUMMARY MINUTES: May be obtained from the Committee Management Coordination Staff, Management Analysis Office, Rm. 248, National Science Foundation, Washington, D.C. 20550.

PURPOSE OF ADVISORY PANEL: To provide advice on program planning and maximizing potential research payoff and societal benefit and on the impact of the Foundation's research support program on the scientific community in weather modification.

AGENDA: Will include the following discussions and presentations:

**SEPTEMBER 25**

- 7:00 Introductory Remarks.
- 7:15 Efforts by the Panel Emphasizing the Importance and Potential of Weather Modification.
- 7:45 Agriculture Meteorological Experiment (AGRIMEX).
- 8:15 Wind Shear—Aviation hazard.
- 8:45 NSF Budget for FY 76 and Program and Plans for FY 76 and 77.
- 9:00 Review and evaluation of specific Weather Modification proposals (Closed).

**SEPTEMBER 26**

- 7:00 Peer Review.
- 7:30 Design and Evaluation of Weather Modification Experiments.
- 8:00 Hall Suppression.
- 8:30 Panel Discussion—future program planning.

REASON FOR CLOSING: The Panel will be reviewing, discussing and evaluating individual research proposals. These proposals contain information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals.

AUTHORITY TO CLOSE MEETING: These matters are within the exemptions of 5 U.S.C. 552(b) (4), (5), and (6). The closing of this portion of the meeting is in accordance with the determination by the Director of the National Science Foundation dated February 21, 1975, pursuant to the provision of Section 10(d) of Public Law 92-463.

FRED K. MURAKAMI,  
Committee Management Officer.

**PRESIDENT'S ADVISORY  
COMMITTEE ON REFUGEES**

**NOTICE OF PUBLIC MEETING**

Notice is hereby given, pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463), that the next meeting of the President's Advisory Committee on Refugees will be held on September 24, 1975, beginning at 10:00 a.m. in Room 2008, New Executive Office Building, 17th and Pennsylvania, N.W., Washington, D.C. 20503.

The President's Advisory Committee on Refugees is established under Exec-

[File No. 500-1]

utive Order 11860 and is governed by the

set down for hearing. Any such request

of the Bonds preclude Pennsylvania from redeeming any of the Bonds prior

be served personally or by mail (air mail if the person being served is located

are referred to the application on file with the Commission for a statement of the representations contained therein.

utive Order 11860 and is governed by the provisions of 5 USC Appendix I. The Committee shall advise the President and heads of appropriate Federal agencies concerning the expeditious and coordinated resettlement of refugees, including: health and environmental matters related to resettlement; interrelationship of the governmental and volunteer roles in resettlement; educational and cultural adjustments required by these efforts; the general well-being of resettled refugees and their families and such other related concerns as the President may, from time to time, specify.

The meeting of the Committee shall be open to the public.

The proposed agenda includes reports from Committee members and staff, a presentation by representatives of the National Center for Vietnamese Resettlement, discussion of the Interim Report to the President, discussion of other planned reports, a progress report on Project Friendship, statistical reports on resettlement provided by the Interagency Task Force, and other appropriate items as may later be included.

Records shall be kept of all Committee proceedings (and shall be available for public inspection at the library of the Department of Health, Education, and Welfare located in Room 1436, 330 Independence Avenue, S.W., Washington, D.C. 20201).

Signed at Washington, D.C. on September 3, 1975.

ROGER D. SEMERAD,  
Executive Director, President's  
Advisory Committee on Refugees.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

BBI, INC.

Suspension of Trading

AUGUST 29, 1975.

The common stock of BBI, Inc., being traded on the American and the Philadelphia-Baltimore-Washington Stock Exchanges pursuant to provisions of the Securities Exchange Act of 1934 and all other securities of BBI, Inc. being traded otherwise than on a national securities exchange; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such exchanges and otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on the above mentioned exchanges and otherwise than on a national securities exchange is suspended, for the period from September 1, 1975 through September 10, 1975.

By the Commission.

### MIDWEST STOCK EXCHANGE INC.

Applications for Unlisted Trading Privileges and Opportunity for Hearing

AUGUST 29, 1975.

The above named national securities exchange had filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stock of the following company, which security is listed and registered on one or more other national securities exchanges:

CAMPBELL RED LAKE MINES LTD., FILE NO. 7-4748

Upon receipt of a request, on or before September 14, 1975 from any interested person, the Commission will determine whether the application shall be

set down for hearing. Any such request should state briefly the nature of the interest of the person making the request and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on the said application by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C., 20549 not later than the date specified. If no one requests a hearing, this application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[Rel. No. 19154]

### PENNSYLVANIA POWER CO.

Proposed Issue and Sale of First Mortgage Bonds at Competitive Bidding and Issue of Bonds for Sinking Fund Purposes

In the matter of Pennsylvania Power Company, 1 East Washington Street, New Castle, Pennsylvania 16103; (70-5731).

Notice is hereby given that Pennsylvania Power Company ("Pennsylvania"), an electric utility subsidiary of Ohio Edison Company, a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transactions.

Pennsylvania proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, up to \$25,000,000 principal amount of First Mortgage Bonds ("Bonds") in one or more series, each series to mature in not less than 5 and not more than 30 years. Pennsylvania proposes further that it will decide on the number of new series of the Bonds to be created and the maturity of the Bonds at a subsequent date and then notify prospective bidders of its decision not less than 72 hours prior to the bidding. The price of the Bonds, which will be not less than 100% (unless Pennsylvania shall authorize a lower percentage not less than 99%) but not greater than 102.75% of the principal amount thereof and accrued interest, will be determined by competitive bidding. The Bonds will be issued under a Mortgage and Deed of Trust dated as of November 1, 1945, between Pennsylvania and First National City Bank of New York, as trustee, as heretofore supplemented and as to be further supplemented by a supplemental indenture to be executed in connection with this issuance. The terms

of the Bonds preclude Pennsylvania from redeeming any of the Bonds prior to October 1, 1980, if such redemption is for the purpose of refunding the Bonds with proceeds of funds borrowed at a lower effective interest cost.

Pennsylvania also proposes to issue \$1,169,000 principal amount of First Mortgage Bonds, 3¼% series, due 1982 to the First National City Bank, as trustee, under its Indenture dated November 1, 1945, as amended and supplemented (particularly by the third Supplemental Indenture dated February 1, 1952) and to surrender such bonds (hereinafter "Sinking Fund Bonds") to the trustee in accordance with the Indenture's sinking fund requirements. The Sinking Fund Bonds are to be identical in all respects to those authorized by the Commission on February 1, 1974 (HCAR No. 18274). The Bonds and the Sinking Fund Bonds will be issued against property additions and a portion of the principal amount of bonds to be retired November 1, 1975.

The proceeds realized from the sale of the Bonds will be applied to the payment of \$9,793,000 principal amount of First Mortgage Bonds, 2¾% Series due November 1, 1975, to repay short-term indebtedness (estimated to aggregate \$13,700,000 at the time of the sale of the Bonds) and to reimburse Pennsylvania's treasury in part for monies expended for the construction of new facilities and improvement of existing facilities. Pennsylvania proposes to use the Sinking Fund Bonds solely to obtain the inclusion in its general funds of the sinking fund payments on deposit, and required to be made on or before December 1, 1975, with the trustee under the sinking fund provisions of the Indenture. The cash so acquired by Pennsylvania will be applied to its 1975 construction program or to reimburse its treasury in part for monies expended for such purpose.

The fees and expenses to be incurred by Pennsylvania in connection with the issuance and sale of the Bonds will be filed by amendment. The fees and expenses to be incurred by Pennsylvania in connection with the issuance of the Sinking Fund Bonds are estimated not to exceed \$2,250 including approximately \$750 in legal fees. It is stated that the Pennsylvania Public Utility Commission has jurisdiction over the proposed transactions and that no other state commission or federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 26, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should

be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application as filed, or as it may be amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

### SAGITTARIUS FUND, INC.

Notice of Filing of Application Pursuant to Section 8(f) of the Act for an Order Declaring That Company Has Ceased to Be an Investment Company

AUGUST 29, 1975.

Notice is hereby given that The Sagittarius Fund, Inc., 545 Madison Avenue, New York, New York 10022, ("Applicant"), registered under the Investment Company Act of 1940 (the "Act") as a diversified, open-end, management investment company, filed an application on August 5, 1975, pursuant to Section 8(f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons

are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a Delaware corporation, registered under the Act on February 5, 1968. Applicant states that a Plan of Liquidation and Dissolution was adopted on February 6, 1975 by vote of a majority of the outstanding voting securities of Applicant. Pursuant to such Plan, substantially all of the assets of Applicant have been distributed pro rata to the stockholders of Applicant. On July 3, 1975, a Certificate of Dissolution of Applicant was filed with the Secretary of State of the State of Delaware.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 23, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following September 23, 1975, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

Office of the Secretary

## NOTICES

The Commission's Report Coordinating Group (Advisory) will hold a meeting on September 22, 1975 at the Securities and Exchange Commission, 500 North Capitol Street, Room 776, Washington, D.C. The meeting will commence at 10:00 a.m. local time and will be for the purpose of discussing the development of simplified trading forms and assessment forms.

The Group's meetings are open to the public. Any interested person may attend and appear before or file statements with the advisory committee. Said statements, if in written form, may be filed before or after the meeting. Oral statements shall be made at the time and in the manner permitted by the Report Coordinating Group.

The Report Coordinating Group was formed to assist the Commission in developing a coherent, industry-wide, coordinated reporting system. In carrying out this objective, the Report Coordinating Group is to review all reports, forms and similar materials required of broker-dealers by the Commission, the self-regulatory community and others. The Group is advising the Commission on such matters as eliminating unnecessary duplication in reporting, reducing reporting requirements where feasible, and developing the FOCUS Report of financial and operational information. (Securities Exchange Act Release No. 10612; Securities Exchange Act Release No. 10959; Securities Exchange Act Release No. 11140; Securities Exchange Act Release No. 11149).

Information concerning the meeting, including the procedures for submitting statements to the Group, may be obtained by contacting: Mr. Daniel J. Pillero II, Secretary, SEC Report Coordinating Group, Securities and Exchange Commission, Washington, D.C. 20549.

<sup>1</sup> Veterans Administration Central Office, 810 Vermont Ave., NW., Washington, D.C. 20130.  
<sup>2</sup> Sheraton Americana Hotel, 2500 Calvert St. NW., Washington, D.C. 20008.  
<sup>3</sup> Quality Inn Downtown, Massachusetts Ave. and Thomas Circle NW., Washington, D.C. 20005.  
<sup>4</sup> San Francisco Hilton, 333 Mason St., San Francisco, Calif. 94101.

<sup>5</sup> Royal Inn, South Airport Blvd., South San Francisco, Calif. 94080.

These meetings will be for the purpose of evaluating the scientific merit of research conducted in each specialty by Veterans Administration investigators working in Veterans Administration hospitals and clinics.

The meetings will be open to the public up to the seating capacity of the rooms at the start of each meeting to discuss the general status of the program. In accordance with the provision set forth in section 552(b)(5), title 5, United States Code, all of the Merit Review Board meetings will be closed to the public after approximately one-half hour from the start, for the review, discussion and evaluation of initial, pending and renewal research projects.

The closed portion of the meetings involve: discussion, examination, reference to, and oral review of site visits, staff and consultant critiques of research protocols, and similar documents which are exempt from disclosure under the inter-agency memoranda exemption (exemption (5)) to section 552(b) of title 5, United States Code. The portion of the meeting which necessitates examination of these documents will be closed to prevent inadvertent disclosure of these exempt records.

Because of the limited seating capacity of the rooms, those who plan to attend should contact Gerald Libman, Chief, Program Development and Review Division, Medical Research Service, Veterans Administration, Washington, DC, (202) 389-5065 at least two days prior to each meeting. Minutes of the meeting and rosters of the members of the Boards may be obtained from this source.

Dated: September 3, 1975.

#### DEPARTMENT OF LABOR

##### Office of the Secretary

SKF INDUSTRIES INCORPORATED OF PHILADELPHIA, ALTOONA, PENNSYLVANIA

[TA-W-75]

#### Notice of Negative Determination Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-75; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 8, 1975 in response to a worker petition received on July 3, 1975 by the International Union of United Steelworkers of America (AFL-CIO), which was filed on behalf of workers producing bearings at the Altoona plant of SKF Industries, Incorporated of Philadelphia, Pennsylvania.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 30336) on July 18, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of SKF Industries, Incorporated, its customers, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

#### SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Monthly employment in June 1975 was 15 percent below its level for October 1974. Average monthly employment during the first half of 1975 was 16 percent lower than in the same period in 1974.

#### SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total production in units for 1974 was one percent lower than in 1973. Total production in units for the first half of 1975 was 25 percent lower than in the first half of 1974.

## NOTICES

INCREASED IMPORTS CONTRIBUTED TO THE DECLINE IN PRODUCTION OF CERTAIN TYPES OF TRUCKS IN THE UNITED STATES.

MC 121060 Sub 19. Arrow Truck Lines, Inc., now assigned September 10, 1975 at Chicago, Illinois.

from specified points in Texas, to East St. Louis, Illinois and St. Louis, Missouri.

Counties, and those points in Horry County, S.C. within 50 miles of Fair-

ning, including points on the indicated portions of the highways specified. The

202 and west of New York Highway 112 extending between Patchogue and Port

## NOTICES

# INCREASED IMPORTS CONTRIBUTED IMPORTANTLY

Imports of ball bearings from 1973 to 1974 increased slightly by 3 percent. The import to production ratio decreased from 55.1 to 50.0 from 1973 to 1974. The import to consumption ratio fell from 17.1 to 17.0 during the same period. Imports of ball bearings in the first five months of 1975 decreased 29 percent from the same period in 1974.

Imports of roller bearings, other than tapered, in the first five months of 1975 decreased 10 percent from the same period in 1974. During this period the import to production ratio of roller bearings fell from 11 percent to 8.6 percent.

Evidence developed during the course of the investigation indicates that the reason for the plant's reduction in sales was the sharp decline in demand for bearings which first occurred in December 1974. Most customers of SKF indicated that they have decreased their purchases of both domestic and off-shore bearings because of the poor economic conditions in the country, especially in the automobile industry.

## CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with bearings produced at the Alcoa plant of SKF Industries, Incorporated did not contribute importantly to the total or partial separation of the workers or to the absolute decline in sales or production of the Division.

Signed at Washington, D.C. this 2nd day of September 1975.

HERBERT N. BLACKMAN,  
Associate Deputy Under Secretary  
for Trade and Adjustment Policy.

### ASSIGNMENT OF HEARINGS

SEPTEMBER 4, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 130193 Sub 21, Roberts & Oake, Inc., now being assigned November 3, 1975 (1 day), at Kansas City, Missouri, in a hearing room to be later designated.

MC 115331 Sub 301, Truck Transport Incorporated, a Corporation, now being assigned November 4, 1975 (1 day), at Kansas City, Missouri, in a hearing room to be later designated.

## NOTICES

MC 121060 Sub 19, Arrow Truck Lines, Inc., now assigned September 10, 1975 at Chicago, Illinois; will be held in Room 286, 219 South Dearborn Street.

MC 128383 Sub 61, Pinto Trucking Service, Inc., now assigned September 15, 1975 at Chicago, Illinois; will be held in Room 286, 219 South Dearborn Street.

MC 125777 Sub 148, Jack Gray Transport, Inc., now assigned September 17, 1975 at Chicago, Illinois; will be held in Room 834, 219 South Dearborn Street.

No. 36095, Investigation Into Lawfulness of Off-Line Limitations Placed on Non-Assigned Hopper Cars, now being assigned for a Pre-hearing Conference on October 6, 1975, at the Offices of the Interstate Commerce Commission, Washington, D.C.

### COLLECTION OF FREIGHT CHARGES ON SUBSTANTIALLY LOST OR DESTROYED SHIPMENTS OF HOUSEHOLD GOODS

#### Extension of Time

SEPTEMBER 4, 1975.

At the request of Alan F. Wohlstetter, attorney for Household Goods Carriers' Bureau and American Movers Conference, the time for filing representations in the above-entitled proceeding has been extended from September 8, 1975, to September 15, 1975.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[FR Doc.75-23942 Filed 9-8-75;8:45 am]

### FOURTH SECTION APPLICATIONS FOR RELIEF

SEPTEMBER 4, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43039—*Acids and Chemicals from Points in Texas*. Filed by Southwestern Freight Bureau, Agent (No. B-556), for interested rail carriers. Rates on acids and chemicals, in tank-car loads, as described in the application,

from specified points in Texas, to East St. Louis, Illinois and St. Louis, Missouri. Grounds for relief—Market competition.

Tariff—Supplement 146 to Southwestern Freight Bureau, Agent, tariff 354-C, I.C.C. No. 5084. Rates are published to become effective on October 1, 1975.

FSA No. 43040—*Returned Shipments of Newsprint Paper Winding Cores from Sheldon, Texas to Points in Kansas*. Filed by Southwestern Freight Bureau, Agent (No. B-551), for interested rail carriers. Rates on newsprint paper and returned shipments of newsprint paper winding cores, in carloads, as described in the application, from Sheldon, Texas, to points in Kansas, also returned shipments in the reverse direction.

Grounds for relief—Market competition, returned shipments.

Tariff—Supplement 45 to Southwestern Freight Bureau, Agent, tariff 306-F, I.C.C. No. 5104. Rates are published to become effective on October 7, 1975.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

### IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

#### Elimination of Gateway Letter Notices

SEPTEMBER 4, 1975.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination Rules* (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before September 19, 1975. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 64112 (Sub-No. E21), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 27276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, commodities in bulk, household goods as defined by the Commission, commodities requiring special equipment, and those injurious or contaminating to other lading), between points in Marion, Marlboro, and Dillon

Counties, and those points in Horry County, S.C., within 50 miles of Fairmont, N.C., on the one hand, and, on the other, Baltimore, Md., Bridgeton, N.J., points in Virginia on and east of U.S. Highway 15 (except those in Accomack and Northampton Counties, Va.), and points in Pennsylvania on and east of a line extending from the Maryland-Pennsylvania State line along U.S. Highway 111 to York, Pa., and on and south of a line extending from York, along U.S. Highway 30 to junction U.S. Highway 202, and thence along U.S. Highway 202 through New Hope, Pa., to the Pennsylvania-New Jersey State line. The purpose of this filing is to eliminate the gateways of Henderson, N.C., and points in North Carolina within 50 miles of Fairmont, N.C.

No. MC 64112 (Sub-No. E22), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, commodities in bulk, household goods as defined by the Commission, commodities requiring special equipment, and those injurious or contaminating to other lading), between Dillon and Marlboro Counties, S.C., and points in Marion and Horry Counties, S.C., west and north of a line beginning at the North Carolina-South Carolina State line and extending along U.S. Highway 17, to junction South Carolina Highway 90, thence along South Carolina Highway 90 to junction U.S. Highway 378, thence along U.S. Highway 378 to the Marion-Florence County line, on the one hand, and, on the other, points in that part of Connecticut south of a line extending from New Haven, Conn., through Ansonia, Sandy Hook, and Brookfield, Conn., to the Connecticut-New York State line, points in that part of New York south of U.S. Highway 202 and west of New York Highway 112 extending between Patchogue and Port Jefferson, Long Island, N.Y., and points in that part of New Jersey and Pennsylvania bounded by a line beginning at the New Jersey-New York State line and extending along U.S. Highway 202 to junction U.S. Highway 46, thence along U.S. Highway 46 to junction U.S. Highway 206, thence along U.S. Highway 206 to Trenton, N.J., thence along U.S. Highway 1 to Philadelphia, Pa., thence along U.S. Highway 30 to Camden, N.J., thence along the east bank of the Delaware River to Penns Grove, N.J., thence along U.S. Highway 130 to junction New Jersey Highway 44 (formerly U.S. Highway 130), thence along New Jersey Highway 44 to Paulsboro, N.J., thence to Clementon, N.J., thence through Mt. Holly and Freehold, N.J., to the Atlantic Ocean, thence along the east bay and river shores of New Jersey to the New Jersey-New York State line, and thence along the New York-New Jersey State line to point of beginning, including points on the indicated portions of the highways specified. The purpose of this filing is to eliminate the gateway of Philadelphia, Pa., and Rockingham, N.C.

No. MC 64112 (Sub-No. E23), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, commodities in bulk, household goods as defined by the Commission, commodities requiring special equipment, and those injurious or contaminating to other lading), between points in South Carolina south of a line extending from the North Carolina-South Carolina State line extending along U.S. Highway 17 to junction South Carolina Highway 90, thence along South Carolina Highway 90 to junction U.S. Highway 378, thence along U.S. Highway 378 to the Horry-Marion County line, thence along the southern boundaries of Marion, Dillon, Darlington, and Chesterfield Counties to the South Carolina-North Carolina State line, on the one hand, and, on the other, points in South Carolina south of a line extending from the North Carolina-South Carolina State line along U.S. Highway 17 to junction South Carolina Highway 90, thence along South Carolina Highway 90 to Conway, S.C., thence along U.S. Highway 378 to the Horry-Marion County line, thence along the southern boundaries of Marion, Dillon, Darlington, and Chesterfield Counties to the South Carolina-North Carolina State line. The purpose of this filing is to eliminate the gateways of points in Marlboro and Dillon Counties, S.C., Philadelphia, Pa., and Weldon or Rockingham, N.C., and points within 50 miles of Fairmont, N.C.

No. MC 64112 (Sub-No. E24), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, commodities in bulk, household goods as defined by the Commission, commodities requiring special equipment, and those injurious or contaminating to other lading), between points in that part of Connecticut south of a line extending from New Haven, Conn., through Ansonia, Sandy Hook, and Brookfield, Conn., to the Connecticut-New York State line, points in that part of New York south of U.S. Highway 202, and thence along U.S. Highway 202 through New Hope, Pa., to the Pennsylvania-New Jersey State line. The purpose of this filing is to eliminate the gateways of Red Oak or Rockingham, N.C., points in Dillon and Marlboro Counties, S.C., and points within 50 miles of Fairmont, N.C.

No. MC 64112 (Sub-No. E25), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, class A and B explosives, commodities in bulk, household goods as defined by the Commission, commodities requiring special equipment, and those injurious or contaminating to other lading), between points in that part of Connecticut south of a line extending from New Haven, Conn., through Ansonia, Sandy Hook, and Brookfield, Conn., to the Connecticut-New York State line, points in that part of New York south of U.S. Highway 202, and thence along U.S. Highway 202 through New Hope, Pa., to the Pennsylvania-New Jersey State line, and thence along the New Jersey-New York State line to point of beginning, including points on the indicated portions of the highways specified. The purpose of this filing is to eliminate the gateway of Philadelphia, Pa., and Rockingham, N.C., and points within 50 miles of Fairmont, N.C.

Paulsboro, N.J., thence to Clementon, N.J., thence through Mt. Holly and Freehold, N.J., to the Atlantic Ocean, thence along the east bay and river shores of New Jersey to the New Jersey-New York State line, and thence along the New Jersey-New York State line to point of beginning, including points on the indicated portions of the highways specified. The purpose of this filing is to eliminate the gateways of (a) Sumter County, S.C.; (b) points in Dillon and Marlboro Counties, S.C.; (c) points within 50 miles of Fairmont, N.C.; and (d) Philadelphia, Pa.

No. MC 64112 (Sub-No. E30), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper*, from points in Beaufort, Brunswick, Carteret, Craven, Dave, Hyde, Jones, New Hanover, Onslow, Pamlico, Pender, Tyrrell, and Washington Counties, N.C., to points in Pennsylvania, north of U.S. Highway 22 from the New Jersey-Pennsylvania State line to Harrisburg, Pa., and west of Interstate Highway 83 from Harrisburg to the Pennsylvania-Maryland State line, New Jersey, New York (except those points on Long Island east of the New York, N.Y., commercial zone as defined by the Commission), Connecticut, Massachusetts, and Rhode Island. The purpose of this filing is to eliminate the gateway of Plymouth, N.C.

No. MC 64112 (Sub-No. E31), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper*, from points in Buncombe, Henderson, Clay, Macon, Jackson, and Transylvania Counties, N.C., and those points in Haywood County, N.C., on and south of U.S. Highway 19 to points in Massachusetts, Rhode Island, and those in Connecticut on and north of a line extending from New Haven, Conn., through Ansonia, Sandy Hook, and Brookfield, Conn., to the Connecticut-New York State line, thence points in New York north and east of a line beginning at the Connecticut-New York State line and extending along U.S. Highway 202 to junction Interstate Highway 87, thence along Interstate Highway 87 to junction New York Highway 23, thence along New York Highway 23 to Cairo, N.Y., thence along New York Highway 149 to Middleburg, N.Y., thence along New York Highway 30 to the United States-Canada International Boundary line, points in New Jersey on and south of a line from Camden, N.J., via New Jersey Highway 30 to Clementon, N.J., thence through Mt. Holly and Freehold, N.J., to the Atlantic Ocean, and to Concord, N.H., and Portland, Maine. The purpose of this filing is to eliminate the gateways of Concord, N.C., and points within 25 miles thereof, and Plymouth, N.C.

No. MC 64112 (Sub-No. E32), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* (except in bulk), from points in Charleston County, S.C., to points in Connecticut, Portland, Maine, points in Massachusetts, Concord, N.H., points in New Jersey, points in New York (except those points on Long Island east of the New York, N.Y., commercial zone as defined by the Commission), points in Pennsylvania north of U.S. Highway 22 from the New Jersey-Pennsylvania State line to Harrisburg, Pa., and west of Interstate Highway 83 from Harrisburg, Pa., to the Pennsylvania-Maryland State line, points in Rhode Island. The purpose of this filing is to eliminate the gateways of points in Dillon County, S.C., Plymouth, N.C., and Fairmont, N.C., and points within 50 miles thereof.

No. MC 64112 (Sub-No. E33), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* (except commodities in bulk), from points in South Carolina on, south, and east of a line beginning at the North Carolina-South Carolina State line along U.S. Highway 601 to junction U.S. Highway 1, thence along U.S. Highway 1 to the South Carolina-Georgia State line (except points in Charleston County, S.C.), to points in Pennsylvania bounded by a line beginning at the New Jersey-Pennsylvania State line and extending along U.S. Highway 22 to Harrisburg, Pa., thence along U.S. Highway 15 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction Pennsylvania Highway 120, thence along Pennsylvania Highway 120 to Ridgway, Pa., thence along U.S. Highway 219 to junction Pennsylvania Highway 321, thence along Pennsylvania Highway 321 to Kane, Pa., thence along U.S. Highway 6 to Warren, Pa., thence along U.S. Highway 62 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to point of beginning, including points on said boundary line, points in Connecticut, Massachusetts, Rhode Island, Portland, Maine, Concord, N.H., and points in New York (except those points on Long Island east of the New York, N.Y., commercial zone as defined by the Commission), located on and east of a line extending from the Pennsylvania-New York State line along U.S. Highway 11 to junction New York Highway 79, thence along New York Highway 79 to Ithaca, N.Y., thence along New York Highway 96 and 96A to Geneva, N.Y., thence along New York Highway 14 to Lake Ontario, including points on said boundary line; points in that part of Pennsylvania bounded by a line beginning at the New Jersey-Pennsylvania State line and extending along U.S. Highway 22 to junction Pennsylvania Highway 145, thence along Pennsylvania Highway 93 to Hazelton, Pa., thence along Pennsylvania

No. MC 64112 (Sub-No. E34), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* (except in bulk), from Augusta, Ga., to points in Connecticut; Portland, Maine; points in Massachusetts; Concord, N.H.; points in New Jersey; points in New York (except those points on Long Island east of the New York, N.Y., commercial zone as defined by the Commission), located on and east of a line extending from the Pennsylvania-New York State line along U.S. Highway 62 to junction New York Highway 60, thence along New York Highway 60 through Dunkirk, N.Y., to Lake Erie; points in that part of Pennsylvania bounded by a line beginning at the New Jersey-Pennsylvania State line and extending along U.S. Highway 22 to Harrisburg, Pa., thence along U.S. Highway 15 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction Pennsylvania Highway 120, thence along Pennsylvania Highway 120 to Ridgway, Pa., thence along U.S. Highway 219 to junction Pennsylvania Highway 321, thence along Pennsylvania Highway 321 to Kane, Pa., thence along U.S. Highway 6 to Warren, Pa., thence along U.S. Highway 62 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to point of beginning, including points on said boundary line; and points in Rhode Island. The purpose of this filing is to eliminate the gateways of points in Sumter County, S.C., points in Dillon County, S.C., points within 50 miles of Fairmont, N.C., and Plymouth, N.C.

No. MC 64112 (Sub-No. E35), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* (except in bulk), from Atlanta and Columbus, Ga., to points in Connecticut; Portland, Maine; points in Massachusetts; Concord, N.H.; points in New Jersey; points in New York (except those points on Long Island east of the New York, N.Y., commercial zone as defined by the Commission), located on and east of a line extending from the Pennsylvania-New York State line along U.S. Highway 11 to junction New York Highway 79, thence along New York Highway 79 to Ithaca, N.Y., thence along New York Highway 96 and 96A to Geneva, N.Y., thence along New York Highway 14 to Lake Ontario, including points on said boundary line; points in that part of Pennsylvania bounded by a line beginning at the New Jersey-Pennsylvania State line and extending along U.S. Highway 22 to junction Pennsylvania Highway 145, thence along Pennsylvania Highway 93 to Hazelton, Pa., thence along Pennsylvania

Highway 309 to junction Interstate Highway 83 to the New York-Pennsylvania State line, including points on said boundary line; points in Rhode Island. The purpose of this filing is to eliminate the gateways of points in Sumter County, S.C., points in Dillon County, S.C., points within 50 miles of Fairmont, N.C., and Plymouth, N.C.

No. MC 64112 (Sub-No. E36), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* and *paper products* (except commodities in bulk), from Chicago, Ill., to points in that part of North Carolina east of U.S. Highway 29. The purpose of this filing is to eliminate the gateway of Reidsville or Charlotte, N.C.

No. MC 64112 (Sub-No. E37), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* and *paper products* (except commodities in bulk), from Chicago, Ill., to points in that part of Virginia located on, east, and south of a line extending from the North Carolina-Virginia State line along U.S. Highway 15 to junction U.S. Highway 360, thence along U.S. Highway 360 to Richmond, Va., thence along Virginia Highway 33 to the Chesapeake Bay. The purpose of this filing is to eliminate the gateway of Reidsville, N.C.

No. MC 64112 (Sub-No. E38), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* and *paper products* (except in bulk), from Chicago, Ill., to points in Anderson, Cherokee, Greenville, Greenwood, Laurens, Newberry, Pickens, Spartanburg, Union, and York Counties, S.C. The purpose of this filing is to eliminate the gateway of Asheville, N.C.

No. MC 64112 (Sub-No. E39), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* and *paper products* (except in bulk), from Chicago, Ill., to points in that part of South Carolina, on, east, and south of U.S. Highway 1. The purpose of this filing is to eliminate the gateways of points within 25 miles of Concord, N.C., Fairmont, N.C., and 50 miles radius and points in Dillon and Marlboro Counties, S.C.

No. MC 64112 (Sub-No. E40), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products* (except in bulk), from Chicago, Ill., to Augusta, Ga. The purpose of this filing is to eliminate the gateways of points in Sumter County, S.C., and Asheville, N.C.

No. MC 64112 (Sub-No. E41), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from Cincinnati and Hamilton, Ohio, to points in that part of North Carolina on, east, and south of a line beginning at the Virginia-North Carolina State line and extending along U.S. Highway 29 to junction U.S. Highway 158, thence along U.S. Highway 158 to Mocksville, N.C., thence along U.S. Highway 64 to junction U.S. Highway 21, thence along U.S. Highway 21 to Charlotte, N.C., thence along U.S. Highway 29 to the North Carolina-South Carolina State line. The purpose of this filing is to eliminate the gateway of Asheville, N.C., and points within 25 miles of Concord, N.C.

No. MC 64112 (Sub-No. E42), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from points in that part of North Carolina on, east, and south of a line beginning at the Virginia-North Carolina State line extending along U.S. Highway 29 to junction U.S. Highway 158, thence along U.S. Highway 158 to Mocksville, N.C., thence along U.S. Highway 64 to junction U.S. Highway 21, thence along U.S. Highway 21 to Charlotte, N.C., thence along U.S. Highway 29 to the North Carolina-South Carolina State line to Cincinnati and Hamilton, Ohio. The purpose of this filing is to eliminate the gateway of Asheville, N.C., and points within 25 miles of Concord, N.C.

No. MC 64112 (Sub-No. E43), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from Troy, Ohio, to points in North Carolina bounded by a line extending from the North Carolina-South Caro-

lina State line along U.S. Highway 21 to junction U.S. Highway 64, thence along U.S. Highway 64 to the Atlantic Ocean, thence along the ocean shores to the North Carolina-South Carolina State line, thence along the North Carolina-South Carolina State line to point of beginning, including points on said boundary line. The purpose of this filing is to eliminate the gateways of Asheville, N.C., and points within 25 miles of Concord, N.C.

No. MC 64112 (Sub-No. E44), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from points in North Carolina bounded by a line extending from the North Carolina-South Carolina State line along U.S. Highway 21 to junction U.S. Highway 64, thence along U.S. Highway 64 to the Atlantic Ocean, thence along the ocean shores to the North Carolina-South Carolina State line, thence along the North Carolina-South Carolina State line to point of beginning, including points on said boundary lines to Troy, Ohio. The purpose of this filing is to eliminate the gateway of Asheville, N.C.

No. MC 64112 (Sub-No. E45), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from Middletown, Ohio, to points in that part of North Carolina on, east, and south of a line beginning at the North Carolina-South Carolina State line and extending along U.S. Highway 21 to junction U.S. Highway 64 at or near Statesville, N.C., thence along U.S. Highway 64 to junction Interstate Highway 85, thence along Interstate Highway 85 to the North Carolina-Virginia State line. The purpose of this filing is to eliminate the gateway of Asheville, N.C., and points within 25 miles of Concord, N.C.

No. MC 64112 (Sub-No. E46), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from points in that part of North Carolina on, east, and south of a line beginning at the North Carolina-South Carolina State line and extending along U.S. Highway 21 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction Interstate Highway 85, thence along Interstate Highway 85 to the North Carolina-Virginia State line to Middletown, Ohio. The purpose of this

filing is to eliminate the gateway of Asheville, N.C., and points within 25 miles of Concord, N.C.

No. MC 64112 (Sub-No. E47), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. The purpose of this filing is to eliminate the gateway of points within 25 miles of Concord, N.C. (Barber, N.C.).

No. MC 64112 (Sub-No. E56), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale grocery and food business houses (except fresh meat, eggs, poultry, and products of food-processing and meat packinghouses, and packinghouse products and advertising material and premiums for food processing and meat packinghouses, from points in North Carolina bounded by a line beginning at the North Carolina-Virginia State line along U.S. Highway 52 to junction U.S. Highway 601, thence along U.S. Highway 601 to Salisbury, N.C., thence along U.S. Highway 29 to junction U.S. Highway 21, thence along U.S. Highway 21 to the North Carolina-South Carolina State line, thence along the southern border of the North Carolina-South Carolina State line to U.S. Highway 221, thence along U.S. Highway 221 to junction U.S. Highway 74, thence

along U.S. Highway 74 to junction U.S. Highway 25, thence along U.S. Highway 25 to the North Carolina-Tennessee State line, thence along the North Carolina-Tennessee State line to the North Carolina-Virginia State line and thence to point of beginning, including points on said highways to points in South Carolina bounded by a line beginning at the North Carolina-South Carolina State line along U.S. Highway 521 to junction South Carolina Highway 9, thence along South Carolina Highway 9 to Fort Lawn, S.C., thence along U.S. Highway 21 to junction North Carolina Highway 97, thence along North Carolina Highway 97 to junction U.S. Highway 521, thence along U.S. Highway 521 to junction U.S. Highway 52, thence along U.S. Highway 52 to the Atlantic Ocean, thence along the Atlantic-South Carolina shore to the North Carolina-South Carolina State line, thence along the North Carolina-South Carolina State line to the southern boundary of Dillon County, S.C., thence along the southern boundaries of Dillon, Marlboro, Darlington, and Chesterfield Counties to the North Carolina-South Carolina State line, thence to point of beginning along the North Carolina-South Carolina State line, including points on the above highways. The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

No. MC 64112 (Sub-No. E57), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale grocery and food business houses (except fresh meat, eggs, poultry, and products of food-processing and meat packinghouses, from points in North Carolina bounded by a line beginning at the North Carolina-Virginia State line extending along U.S. Highway 52 to junction U.S. Highway 601, thence along U.S. Highway 601 to Salisbury, N.C., thence along Interstate Highway 85 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction U.S. Highway 1, thence along U.S. Highway 1 to the North Carolina-Virginia State line, thence along the North Carolina-Virginia State line to point of beginning, including points on said highways, to points in South Carolina bounded by a line beginning at the North Carolina-South Carolina State line extending along U.S. Highway 521 to junction North Carolina Highway 9, thence along North Carolina Highway 9 to Fort Lawn, S.C., thence along U.S. Highway 21 to junction North Carolina Highway 97, thence along North Carolina Highway 97 to junction U.S. Highway 601, thence along U.S. Highway 601 to junction U.S. Highway 21, thence along U.S. Highway 21 to the Atlantic Ocean, thence along the Atlantic shore line to the South Carolina-Georgia State line to Interstate Highway 85, thence

along Interstate Highway 85 to junction U.S. Highway 29 thence along U.S. Highway

New York Highway 112 extending between Patchogue, and Port Jefferson,

No. MC 64932 (Sub-E94), filed June 3, 1974. Applicant: ROGERS CARTAGE

tank vehicles, from Chicago Heights, Ill., to points in Pennsylvania and West Vir-

a line beginning at Lake Michigan and extending along U.S. Highway 27 to junction U.S. Highway 10 to junction

No. MC 64932 (Sub-E128), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill.

along Interstate Highway 85 to junction U.S. Highway 29 thence along U.S. Highway 29 to junction Interstate Highway 85, thence along Interstate Highway 85 to the North Carolina-South Carolina State line and along said line in an easterly direction to point of beginning, including points on said highways. The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

No. MC 64112 (Sub-No. E58), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in containers, from the plant site and storage facilities of Exxon Corporation at Baton Rouge, La., to points in that part of South Carolina located on and north of a line extending from the North Carolina-South Carolina State line along U.S. Highway 21 to Ft. Lawn, thence along South Carolina Highway 9 to Lancaster, thence along U.S. Highway 521 through Georgetown to the Atlantic Ocean. The purpose of this filing is to eliminate the gateways of Fairmont, N.C., points within 50 miles thereof, and points in Dillon and Marlboro Counties, S.C.

No. MC 64112 (Sub-No. E59), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in containers, from the plant site and storage facilities of Exxon Corporation at Baton Rouge, La.; points in Virginia on and east of U.S. Highway 15 (except points in Accomack and Northampton Counties); Baltimore, Md.; points in Pennsylvania on and east of a line extending from the Maryland-Pennsylvania State line along U.S. Highway 111 to York, Pa., and on and south of a line extending from York, along U.S. Highway 30 to junction U.S. Highway 202, and thence along U.S. Highway 202 to the Pennsylvania-New Jersey State line; Bridgeton, N.J.; and points in that part of New Jersey bounded by a line beginning at the New Jersey-New York State line and extending along U.S. Highway 402 to junction U.S. Highway 46, thence along U.S. Highway 46 to Trenton, N.J., thence along the east bank of the Delaware River to Penns Grove, N.J., thence along U.S. Highway 130 to junction New Jersey Highway 44, thence along New Jersey Highway 44 to Paulsboro, N.J., thence through Mt. Holly and Freehold, N.J., to the Atlantic Ocean, thence along the east bay and river shores of New Jersey to the New Jersey-New York State line, thence along the New Jersey-New York State line to point of beginning, including points on the indicated portions of the highway specified; points in that part of New York south of U.S. Highway 202 and west of

New York Highway 112 extending between Patchogue, and Port Jefferson, Long Island, N.Y.; points in that part of Connecticut south of a line extending from New Haven, Conn., through Ansonia, Sandy Hook, and Brookfield, Conn., to the Connecticut-New York State line. The purpose of this filing is to eliminate the gateways of Durham, N.C., or Durham, N.C. and Philadelphia, Pa.

No. MC 64112 (Sub-No. E60), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, as described by the Commission in 61 M.C.C. 209, in containers, from points in Chesterfield, Dillon, Darlington, and Marlboro Counties, S.C., to points in Florida (except points in Duval County). The purpose of this filing is to eliminate the gateway of Charleston, S.C.

No. MC 64112 (Sub-No. E61), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, as described by the Commission in 61 M.C.C. 209, in containers, from points in North Carolina and South Carolina within 50 miles of Fairmont, N.C. (except points in Dillon, Darlington, Chesterfield, and Marlboro Counties), to points in Florida (except points in Duval County). The purpose of this filing is to eliminate the gateways of points in Dillon or Darlington Counties, S.C., and Charleston, S.C.

No. MC 64112 (Sub-No. E62), filed May 14, 1974. Applicant: NORTHEASTERN TRUCKING CO., P.O. Box 26276, Charlotte, N.C. 28213. Applicant's representative: Harry Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, as described by the Commission in 61 M.C.C. 209, in containers, from points in that part of North Carolina on and east of a line extending from the North Carolina-Virginia State line along U.S. Highway 29 to junction U.S. Highway 158 at or near Reidsville, N.C., thence along U.S. Highway 158 to junction U.S. Highway 220, thence along U.S. Highway 220 to junction U.S. Highway 1, thence along U.S. Highway 1 to the North Carolina-South Carolina State line, excluding the points in North Carolina within 50 miles of Fairmont, N.C., to points in Florida (except points in Duval County). The purpose of this filing is to eliminate the gateways of Charleston, S.C., Fairmont, N.C., and points within 50 miles thereof, and points in Dillon and Marlboro Counties, S.C.

No. MC 64932 (Sub-E94), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, from Detroit, Mich., to points in New Jersey, New York, Pennsylvania, and West Virginia. The purpose of this filing is to eliminate the gateway of Ferndale, Mich.

No. MC 64932 (Sub-E119), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid petroleum chemicals*, in bulk, in tank vehicles, from Wood River, Ill., to points in Arkansas, Louisiana, Oklahoma, those in Texas on and east of a line beginning at the Oklahoma-Texas State line and extending along U.S. Highway 77 to junction U.S. Highway 377, to junction U.S. Highway 81, to junction U.S. Highway 183, to junction Texas Highway 71, to junction U.S. Highway 77, to junction U.S. Highway 90, to junction U.S. Highway 90, to junction U.S. Highway 75, to the Gulf of Mexico (St. Louis, Mo.), \* those in Colorado and New Mexico on and east of U.S. Highway 85, and those in Texas on and west of a line beginning at the Texas-Oklahoma State line and extending along U.S. Highway 77 to junction U.S. Highway 377, to junction U.S. Highway 81, to junction U.S. Highway 183, to junction Texas Highway 71, to junction U.S. Highway 77, to junction U.S. Highway 90, to junction U.S. Highway 90, to junction U.S. Highway 75, to the Gulf of Mexico (Louisiana, Mo., and Mercedia, Ill.), \* and Kansas, Minnesota, Nebraska, and Wisconsin (Pike County, Mo.). \* The purpose of this filing is to eliminate the gateways as indicated by asterisks above.

No. MC 64932 (Sub-E120), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from Chicago Heights, Ill., to points in New Jersey, New York, those in Pennsylvania on, north and east of a line beginning at the Ohio-Pennsylvania State line and extending along U.S. Highway 22 to junction Pennsylvania Highway 51, to junction Pennsylvania Highway 136, to junction Pennsylvania Highway 31, to junction U.S. Highway 219 to the Pennsylvania-West Virginia State line, and those in West Virginia on and east of a line beginning at the Pennsylvania-West Virginia State line and extending along Interstate Highway 19 to junction Interstate Highway 250, to junction U.S. Highway 60 to the West Virginia-Virginia State line, (Ferndale, Mich.), \*; and *Liquid chemicals* (except those derived or produced from petroleum) in bulk, in

tank vehicles, from Chicago Heights, Ill., to points in Pennsylvania and West Virginia (Hammond, Ind.). \* The purpose of this filing is to eliminate the gateways as indicated by asterisks above.

No. MC 64932 (Sub-E121), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, and *paint products* restricted to paint materials, synthetic resin, resin compound surface coating, ester gum paint oil, varnish, glycerine, and liquid glue, in bulk, in tank vehicles, from those points in Pennsylvania on, north, and east of a line beginning at the Ohio-Pennsylvania State line and extending along U.S. Highway 22 to junction Pennsylvania Highway 51, to junction Pennsylvania Highway 136, to junction Pennsylvania Highway 31, to junction U.S. Highway 219, to the Pennsylvania-West Virginia State line, to those points in Indiana on and west of a line beginning at the Indiana-Michigan State line and extending along Indiana Highway 23 to junction Indiana Highway 331, to junction U.S. Highway 30 to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan.

No. MC 64932 (Sub-E122), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, from points in Kansas to those points in Michigan on and east of a line beginning at Lake Michigan and extending along U.S. Highway 27 to junction U.S. Highway 127, to the Michigan-Ohio State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan.

No. MC 64932 (Sub-E123), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, (except petroleum products as defined by the Commission) in bulk, in tank vehicles, from Joliet, Ill., to those points in Colorado on and east of U.S. Highway 85. The purpose of this filing is to eliminate the gateway of the plant site of National Starch and Chemical Corporation at Mercedia, Ill.

No. MC 64932 (Sub-E124), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, between those points in Michigan on and east of

a line beginning at Lake Michigan and extending along U.S. Highway 27 to junction U.S. Highway 10 to junction Michigan Highway 47 to junction U.S. Highway 23 to junction Michigan Highway 59 to junction Interstate Highway 96 to junction U.S. Highway 23 to junction Michigan Highway 50 to Lake Erie, on the one hand, and, on the other, those points in Indiana on and south of a line beginning at the Ohio-Indiana State line and extending along U.S. Highway 30 to junction Interstate Highway 69 to junction Interstate Highway 465 to junction U.S. Highway 40 to the Indiana-Illinois State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan.

No. MC 64932 (Sub-E125), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, from points in the Chicago, Ill., Commercial zone, to points in New Jersey, New York, Pennsylvania, and those in West Virginia on and east of a line beginning at the Pennsylvania-West Virginia State line and extending along U.S. Highway 119 to junction U.S. Highway 250 to junction U.S. Highway 219 to the Virginia-West Virginia State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan.

No. MC 64932 (Sub-E126), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from Blue Island, Ill., and points within one and one-half miles thereof, to those points in Missouri on and west of a line beginning at the Iowa-Missouri State line and extending along Missouri Highway 5 to junction U.S. Highway 36, to the Missouri-Illinois State line. The purpose of this filing is to eliminate the gateway of East Chicago, Ind. and Hartford, Ill.

No. MC 64932 (Sub-E127), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, as defined in the report in *The Maxwell Co.*, Extension-Addyston, 63 M.C.C. 677, 681, in bulk, in tank vehicles, from Lemont, Ill., to points in Kentucky, Michigan (except Midland, Michigan), Minnesota, Missouri, Ohio, and points in Wisconsin on and north of a line beginning at the Mississippi River and extending along U.S. Highway 18 to junction U.S. Highway 151, to Lake Michigan. The purpose of this filing is to eliminate the gateway of points in Indiana in the Chicago, Ill., Commercial zone.

No. MC 64932 (Sub-E128), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from those points in Michigan on and east of a line beginning at Lake Michigan and extending along U.S. Highway 27 to junction U.S. Highway 127, to the Michigan-Ohio State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan, and Marshall, Illinois.

No. MC 64932 (Sub-E129), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from East Chicago, Ind., and points within 10 miles thereof, to those points in Missouri on and west of a line beginning at the Iowa-Missouri State line and extending along Missouri Highway 5 to junction U.S. Highway 36, to the Missouri-Illinois State line. The purpose of this filing is to eliminate the gateway of Hartford, Ill.

No. MC 64932 (Sub-E130), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, from those points in Michigan on, south and east of a line beginning at Saginaw Bay and extending along U.S. Highway 10 to junction Michigan Highway 47 to junction U.S. Highway 23 to junction Michigan Highway 59 to junction Interstate Highway 96 to junction U.S. Highway 23, to the Michigan-Ohio State line, to those points in Minnesota on and south of U.S. Highway 12, and those in Wisconsin on and south of a line beginning at the Minnesota-Wisconsin State line and extending along U.S. Highway 12 to junction Wisconsin Highway 29 to Lake Michigan. The purpose of this filing is to eliminate the gateway to Ferndale, Michigan.

No. MC 64932 (Sub-E131), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals* (except chemicals derived or produced from petroleum), in bulk, in tank vehicles, from those points in Ohio on, east, and north of a line beginning at Lake Erie and extending along Ohio Highway 83 to junction U.S. Highway 224, to the Ohio-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan and Chicago Heights, Illinois.

No. MC 64932 (Sub-E132), filed June 3, 1974. Applicant: ROGERS CARTAGE

eliminate the gateway of Wadsworth, Ohio.

No. MC 64932 (Sub-E132), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from those points in Ohio on, east, and north of a line beginning at Lake Erie and extending along Ohio Highway 83 to junction Interstate Highway 224 to the Ohio-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan and the plant sites of Baird Chemical Industries, Inc., located at or near Mapleton, Illinois.

No. MC 64932 (Sub-E133), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, from those points in Ohio on, east and north of a line beginning at the Michigan State line and extending along Interstate Highway 75 to junction U.S. Alt. Highway 20, to U.S. Highway 20, to junction U.S. Highway 250, to junction U.S. Highway 224 to the Ohio-Pennsylvania State line, to points in Minnesota and Wisconsin. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan.

No. MC 64932 (Sub-E134), filed June 3, 1974. Applicant: ROGERS CARTAGE CO., 10735 So. Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: W. F. Farrell (same). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and paint*, in bulk, in tank vehicles, from those points in Ohio on, east and north of a line beginning at Lake Erie and extending along Ohio Highway 83 to junction Interstate Highway 224 to the Ohio-Pennsylvania State line, to those points in Indiana in the Chicago, Ill. Commercial Zone, those in Illinois on and north of a line beginning at the Indiana-Illinois State line and extending along U.S. Highway 30 to junction Interstate Highway 80 to the Illinois-Iowa State line and those in Michigan on and north of Interstate Highway 94. The purpose of this filing is to eliminate the gateway of Ferndale, Michigan.

No. MC 78228 (Sub-No. E21), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Ohio on and west of a line beginning at Lake Erie, and extending along Ohio Highway 528 to Garrettsville, Ohio, thence along Ohio Highway 88 to Ravenna, Ohio, thence along Ohio Highway 14 to Edinburg, Ohio,

thence along Ohio Highway 183 to Alliance, Ohio, thence along Ohio Highway 183 to junction Ohio Highway 800, thence along Ohio Highway 800 to Dover, Ohio, thence along Ohio Highway 39 to junction Ohio Highway 93, thence along Ohio Highway 93 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 16, thence along U.S. Highway 16 to junction Ohio Highway 60, thence along Ohio Highway 60 to Zanesville, Ohio, thence along Ohio Highway 93 to junction Ohio Highway 56, thence along Ohio Highway 56 to junction Ohio Highway 180, thence along Ohio Highway 180 to junction Ohio Highway 159, thence along Ohio Highway 159 to Chillicothe, Ohio, thence along U.S. Highway 23 to the Ohio-Kentucky State line, to points in Delaware on and north of a line beginning at the Delaware-Maryland State line, thence along Delaware Highway 44 to Pearson, Del., thence along Delaware Highway 8 to the Delaware River, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E22), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from Ashland, Ky., to points in Cecil County, Md., on and east of Maryland Highway 272, restricted against liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E23), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in McKean, Warren, Erie, Crawford, Mercer, Vanango, Forest, and Lawrence Counties, Pa., on and west of U.S. Highway 219 and Pennsylvania Highway 66 to points in Virginia on and west of U.S. Highway 52, restricted against liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E24), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in New York on, north and west of a line beginning at the Pennsylvania-New York State line, and extending along

U.S. Highway 62 to the junction of New York Highway 39, thence along New York Highway 39 to junction Alternate U.S. Highway 20, thence along Alternate U.S. Highway 20 to junction U.S. Highway 15, thence along U.S. Highway 15 to Lake Ontario, to points in Virginia on and west of a line beginning at the Virginia-North Carolina State line and extending along Virginia Highway 8 to Christiansburg, Va., thence along U.S. Highway 460 to the West Virginia-Virginia State line, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E25), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in New York on and west of a line beginning at Lake Ontario, thence along U.S. Highway 15 to Lakeville, N.Y., thence along Alternate U.S. Highway 20 to Genesee, N.Y., thence along New York Highway 63 to junction New York Highway 408, thence along New York Highway 408 to junction New York Highway 16, thence along New York Highway 16 to Olean, N.Y., thence along New York Highway 16A to the New York-Pennsylvania State line, to those points in Virginia on and west of a line beginning at the Virginia-North Carolina State line, thence along U.S. Highway 52 to the Virginia-West Virginia State line, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E26), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in Ohio on and west of a line beginning at Lake Erie and extending along Ohio Highway 306 to Aurora, Ohio, thence along Ohio Highway 43 to Hartsville, Ohio, thence along Ohio Highway 619 to Portage Lakes, Ohio, thence along Ohio Highway 93 to junction Ohio Highways 93 and 241, thence along Ohio Highway 241 to Millersburg, Ohio, thence along U.S. Highway 62 to Millwood, Ohio, thence along U.S. Highway 36 to Marysville, Ohio, thence along Ohio Highway 4 to Springfield, Ohio, thence along U.S. Highway 68 to Xenia, Ohio, thence along U.S. Highway 42 to the junction of U.S. Highway 52 and Interstate Highway 275, thence along Interstate Highway 275 to junction Interstate Highway 275 and U.S. Highway 52, thence along U.S. Highway 52 to the Ohio-Kentucky State

line, to those points in Maryland on and east of Maryland Highway 36, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E28), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Ohio on, north, and west of a line beginning at the Ohio-Pennsylvania State line, thence along Ohio Highway 82 to Warren, Ohio, thence along Ohio Highway 5 to junction Ohio Highway 225, thence along Ohio Highway 225 to Alliance, Ohio, thence along Ohio Highway 183 to junction Ohio Highway 800, thence along Ohio Highway 800 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction U.S. Highway 22, thence along U.S. Highway 22 to Zanesville, Ohio, thence along Ohio Highway 93 to McArthur, Ohio, thence along U.S. Highway 50 to Chillicothe, Ohio, thence along U.S. Highway 20 to Portsmouth, Ohio, to points in Wilcomico, Somerset, and Worcester Counties, Md., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E29), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Ohio on, north, and west of a line beginning at the Ohio River and extending along Ohio Highway 133 to junction U.S. Highway 50, thence along U.S. Highway 50 to Hillsboro, Ohio, to junction Ohio Highway 138, thence along Ohio Highway 138 to junction U.S. Highway 22 to Zanesville, Ohio, thence along Interstate Highway 70 to junction Ohio Highway 93, thence along Ohio Highway 93 to junction Ohio Highway 39, thence along Ohio Highway 39 to Carrolltown, Ohio, thence along Ohio Highway 9 to Salem, Ohio, thence along U.S. Highway 62 to the Ohio-Pennsylvania State line, to points in Accomack and Northampton Counties, Va., and Chesapeake, Hampton, Newport News, Norfolk, Portsmouth, and Virginia Beach, Va., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E30), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Ohio except Ashtabula, Columbiana, Jefferson, Belmont, and Monroe Counties, to points in Connecticut on and east of Interstate Highway 91, and New Haven, Conn., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to

eliminate the gateway of Wadsworth, Ohio.

Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Ohio on, north, and west of a line beginning at the Ohio-Kentucky State line at Cincinnati, thence along U.S. Highway 22 to Circleville, Ohio, thence along U.S. Highway 23 to junction Interstate Highway 270 south of Columbus, Ohio, thence along Interstate Highway 270 east to junction Interstate Highway 70, thence along Interstate Highway 70 to junction Ohio Highway 13, thence along Ohio Highway 13 to Newark, Ohio, thence along Ohio Highway 16 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction U.S. Highway 62 near Canton, Ohio, thence along U.S. Highway 62 to junction Ohio Highway 44, thence along Ohio Highway 44 to Lake Erie, to Petersburg, Richmond, and Fredericksburg, Va., and those points in Virginia on, north, and east of a line beginning at the Virginia-North Carolina State line, thence along Interstate Highway 95 to Interstate Highway 495, thence along Interstate Highway 495 to the Maryland-Virginia State line in Fairfax County, Va., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E31), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Ohio on, west, and north of a line beginning at the Indiana-Ohio State line, thence along U.S. Highway 224 to Findlay, Ohio, thence along U.S. Highway 23 to junction U.S. Highway 30N, thence along U.S. Highway 30N to junction U.S. Highway 30, thence along U.S. Highway 30 to East Canton, Ohio, thence along Ohio Highway 44 to Lake Erie, to points in Virginia on and east of U.S. Highway 52, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E32), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Ohio except Ashtabula, Columbiana, Jefferson, Belmont, and Monroe Counties, to points in Connecticut on and east of Interstate Highway 91, and New Haven, Conn., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to

eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E33), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Ashtabula County, Ohio, to points in New London County, Conn., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E34), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from those points in Ohio on and west of a line beginning at Lake Erie and extending along Ohio Highway 528 to junction U.S. Highway 422, thence along U.S. Highway 422 to Warren, Ohio, thence along Ohio Highway 45 to Salem, Ohio, thence along Ohio Highway 9 to Carrolltown, Ohio, thence along Ohio Highway 39 to New Philadelphia, Ohio, thence along Interstate Highway 77 to junction Ohio Highway 78, thence along Ohio Highway 78 to junction Ohio Highway 13, thence along Ohio Highway 13 to Athens, Ohio, thence along U.S. Highway 33 to the Ohio-West Virginia State line to points in Connecticut, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E35), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Ohio (except Ashtabula County), to points in Essex, Middlesex, Norfolk, Suffolk, Bristol, Plymouth, and Barnstable Counties, Mass., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E36), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Ohio (except Ashtabula, Columbiana, Jeffer-

son, Belmont, and Monroe Counties), to points in Massachusetts, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E37), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Ashtabula County, Ohio, to points in Barnstable County, Mass., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E38), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from those points in Ohio on and west of a line beginning at Lake Erie, thence along Ohio Highway 534 to Damascus, Ohio, thence along Ohio Highway 173 to Alliance, Ohio, thence along Ohio Highway 183 to junction Ohio Highway 800, thence along Ohio Highway 800 to junction Ohio Highway 39, thence along Ohio Highway 39 to junction Ohio Highway 93, thence along Ohio Highway 93 to the Ohio-Kentucky State line, to points in New Jersey, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E39), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from Ashland, Ky., to points in New Jersey, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E40), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Lawrence County, Pa., to points in Essex and Barnstable Counties, Mass., restricted against the transportation of liquid commodities in bulk, in tank vehicles.

hicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E41), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from Ashland, Ky., to points in Connecticut, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E42), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from Ashland, Ky., to points in Massachusetts, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E43), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from those points in Wood, Pleasants, Tyler, Wetzell, Marshall, Ohio, Brooke, and Hancock Counties, W. Va., on and north of U.S. Highway 50 to those points in Massachusetts on and north of Massachusetts Highway 2, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E44), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from those points in Pleasants and Wood Counties, W. Va., on and north of U.S. Highway 50 to points in Massachusetts. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E45), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from those points in Pennsylvania on and west of U.S. Highway 219 to those points in Indiana on and north of U.S. Highway 30. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

*additives*, in bulk, from points in Ohio (except points in Ashtabula, Trumbull, Mahoning, Jefferson, Harrison, Belmont, Monroe, Noble, Washington, and Meigs Counties, that part of Columbiana County east of Ohio Highway 9, and that part of Athens County east of Ohio Highways 346 and 377), to points in that part of New Jersey on and east of a line beginning at the Atlantic Ocean near Asbury Park, N.J., thence along New Jersey Highway 33 to junction with the Garden State Parkway, thence along the Garden State Parkway to junction New Jersey Highway 506, thence along New Jersey Highway 506 to junction New Jersey Highway 23, thence along New Jersey Highway 23 to junction U.S. Highway 202, thence along U.S. Highway 202 to the New York-New Jersey State line. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E46), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from points in Hancock County, W. Va., to points in Windham County, Conn., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E47), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, in bulk, from those points in Wood and Pleasants Counties, W. Va., on and north of U.S. Highway 50 to those points in Connecticut on, east, and north of a line beginning at the Long Island Sound near New Haven, Conn., thence along Connecticut Highway 34 to the junction of Interstate Highway 84, thence along Interstate Highway 84 to the Connecticut-New York State line, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E48), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in Pennsylvania on and west of U.S. Highway 219 to those points in Indiana on and north of U.S. Highway 30. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E49), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in New York west of a line beginning at Lake Ontario and extending along U.S. Highway 15 to Lakeville, N.Y., thence along Alternate U.S. Highway 20 to Geneseo, N.Y., thence along New York Highway 63 to junction New York Highway 408, thence along New York Highway 408 to junction New York Highway 16, thence along New York Highway 16 to Olean, N.Y., thence along New York Highway 16A to the New York-Pennsylvania State line to those points in Indiana on and north of U.S. Highway 30. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E50), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in West Virginia on and north of U.S. Highway 50 (except points in Wood and Pleasants Counties), to points in that part of Indiana on and north of U.S. Highway 30. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E51), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from Ashland, Ky., to those points in Michigan on and north of a line beginning at Lake St. Clair, thence along U.S. Highway 12 to junction Interstate Highway 94, thence along Interstate Highway 94 to Battle Creek, Mich., thence along Michigan Highway 89 to Lake Michigan. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E52), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from Ashland, Ky., to those points in New York on and west of New York Highway 12. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E53), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from points in Marshall, Ohio, Brooke, and Hancock Counties, W. Va., to those points in Oswego, Cayuga, Onondaga, Madison, Oneida, Lewis, and Jefferson Counties, N.Y., on or west of New York Highway 12. The purpose of the filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E54), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in West Virginia on and north of U.S. Highway 50, to points in Michigan. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E55), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from points in Wood and Pleasants Counties, W. Va., on and north of U.S. Highway 50 to those points in New York on and west of New York Highway 12. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E56), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in Wood and Pleasants Counties, W. Va., on and north of U.S. Highway 50 to points in that part of Indiana on and north of U.S. Highway 30 (except points in Whitely and Allen Counties). The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E57), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in New York on, north, and west of a line beginning at Lake Erie, thence along New York Highway 17 to junction U.S. Highway 20, thence along U.S. Highway 20 to the junction with New York Highway 39, thence along New York Highway 39 to Leicester, N.Y., thence along Alternate U.S. Highway 20

*additives* (except in bulk), from those points in New York west of a line beginning at Lake Ontario and extending along U.S. Highway 15 to Lakeville, N.Y., thence along Alternate U.S. Highway 20 to Geneseo, N.Y., thence along New York Highway 63 to junction New York Highway 408, thence along New York Highway 408 to junction New York Highway 16, thence along New York Highway 16 to Olean, N.Y., thence along New York Highway 16A to the New York-Pennsylvania State line, to points in Michigan. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E58), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from points in that part of Pennsylvania on and west of U.S. Highway 219 to points in Michigan. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E59), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from points in New York west of a line beginning at Lake Ontario and extending along U.S. Highway 15 to Lakeville, N.Y., thence along Alternate U.S. Highway 20 to Geneseo, N.Y., thence along New York Highway 63 to junction New York Highway 408, thence along New York Highway 408 to junction New York Highway 16, thence along New York Highway 16 to Olean, N.Y., thence along New York Highway 16A to the New York-Pennsylvania State line, to those points in Cabell, Jackson, Kanawha, Mason, Putnam, Roane, Wirt, and Wood Counties, W. Va., on and north of U.S. Highway 60. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E60), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in New York on, north, and west of a line beginning at Lake Erie, thence along New York Highway 17 to junction U.S. Highway 20, thence along U.S. Highway 20 to the junction with New York Highway 39, thence along New York Highway 39 to Leicester, N.Y., thence along Alternate U.S. Highway 20

to junction U.S. Highway 15, thence along U.S. Highway 15 to Lake Ontario, to those points in Cabell, Calhoun, Clay, Fayette, Greenbrier, Jackson, Kanawha, Mason, Nicholas, Putnam, Roane, Wirt, and Wood Counties, W. Va., on and north of U.S. Highway 60. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E61), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in Pennsylvania on, north, and west of a line beginning at the New York-Pennsylvania State line and extending along U.S. Highway 219 to Kane, Pa., thence along U.S. Highway 6 to Sheffield, Pa., thence along Pennsylvania Highway 948 to junction Pennsylvania Highway 666, thence along Pennsylvania Highway 666 to junction U.S. Highway 62, thence along U.S. Highway 62 to the Ohio-Pennsylvania State line, to those points in Cabell, Jackson, Kanawha, Mason, Putnam, Roane, Wirt, and Wood Counties, W. Va., on and north of U.S. Highway 60. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E62), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from points in Erie County, Pa., to points in Cabell, Calhoun, Clay, Fayette, Greenbrier, Jackson, Kanawha, Mason, Nicholas, Putnam, Roane, Wirt, and Wood Counties, W. Va., on and north of U.S. Highway 60. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E63), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in Pennsylvania on, west, and north of a line beginning at the New York-Pennsylvania State line, and extending along U.S. Highway 219 to junction U.S. Highway 322, thence along U.S. Highway 322 to junction Interstate Highway 80, thence along Interstate Highway 80 to Barkleyville, Pa., thence along Pennsylvania Highway 8 to junction Pennsylvania Highway 108, thence along Pennsylvania Highway 108 to the Pennsylvania-Ohio State line, to those points in Cabell, Kanawha, and Putnam Counties, W. Va.,

on and north of U.S. Highway 60. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E64), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in Ohio on and north of U.S. Highway 224 and on and east of Ohio Highway 511, to those points in Cabell, Jackson, Kanawha, Mason, Putnam, Roane, Wirt, and Wood Counties, W. Va., on and north of U.S. Highway 60. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E65), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives* (except in bulk), from those points in Ohio on and west of a line beginning at Lake Erie, and extending along Ohio Highway 44 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction Interstate Highway 77, thence along Interstate Highway 77 to the Ohio-West Virginia State line, to those points in New York on and east of a line beginning at Lake Ontario and extending along New York Highway 57 to Syracuse, thence along Interstate Highway 81 to junction New York Highway 26, thence along New York Highway 26 to the Pennsylvania-New York State line on and west of New York Highway 12. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E64), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in Pennsylvania south and west of a line beginning at the Ohio-Pennsylvania State line and extending along U.S. Highway 62 to Mercer, Pa., thence along U.S. Highway 19 to junction Pennsylvania Highway 388, thence along Pennsylvania Highway 388 to Energy, Pa., thence along Pennsylvania Highway 65 to Rochester, Pa., thence along Pennsylvania Highway 18 to junction Pennsylvania Highway 60, thence along Pennsylvania Highway 60 to junction Pennsylvania Highway 980, thence along Pennsylvania Highway 980 to junction Interstate Highway 79, thence along Interstate Highway 79 to Washington, Pa., thence along U.S. Highway 19 to the Pennsylvania-West Virginia State line, to those points in

New Hampshire on and north of U.S. Highway 2, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E85), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from that part of West Virginia north and west of a line beginning at the Ohio-West Virginia State line and extending along U.S. Highway 50 to Clarksburg, W. Va., thence along U.S. Highway 19 to Fairmont and Arnettsville, W. Va., thence along an unnumbered highway to junction West Virginia Highway 7, thence along West Virginia Highway 7 to the Pennsylvania-West Virginia border, to those points in Maine on, north, and east of a line beginning at the United States-Canada International Boundary line, thence along Interstate Highway 95 to junction Maine Highway 212, thence along Maine Highway 212 to junction Maine Highway 11, thence along Maine Highway 11 to the United States-Canada International Boundary line, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E86), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in Hancock, Broke, Ohio, Marshall, Wetzel, Tyler, Pleasants, Ritchie, and Wood Counties, W. Va., on and north of U.S. Highway 50 to those points in Maine north of Maine Highway 25, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E87), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in West Virginia north and west of a line beginning at the Ohio-West Virginia State line and extending along U.S. Highway 50 to Clarksburg, W. Va., thence along U.S. Highway 19 to Worthington, W. Va., thence along an unmarked highway to the Pennsylvania-West Virginia State line, to those points in New Hampshire on and north of a line beginning at the

Vermont-New Hampshire State line and extending along New Hampshire Highway 110 to junction U.S. Highway 2, thence along U.S. Highway 2 to the New Hampshire-Maine State line, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E88), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in Hancock, Brooke, Ohio, Marshall, Wetzel, Tyler, Wood, and Pleasants Counties, W. Va., on and north of U.S. Highway 50 to those points in New Hampshire on and north of a line beginning at the Vermont-New Hampshire State line and extending along New Hampshire Highway 9 to Keene, N.H., thence along New Hampshire Highway 101 to junction New Hampshire Highway 101A, thence along New Hampshire Highway 101A to junction U.S. Highway 3, thence along U.S. Highway 3 to the New Hampshire-Massachusetts State line, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E89), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in Hancock, Brooke, Ohio, Marshall, Wetzel, Tyler, Pleasants, and Wood Counties, W. Va., on and north of U.S. Highway 50 to those points in Vermont north of Vermont Highway 9, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E90), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from points in Pleasants and Wood Counties, W. Va., to points in Rhode Island, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E91), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative:

Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from those points in Pleasants and Wood Counties, W. Va., on and north of U.S. Highway 50 to points in Vermont, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E92), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from Ashland, Ky., to points in Rhode Island, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E93), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from Ashland, Ky., to points in Vermont, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E94), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from Ashland, Ky., to points in New Hampshire, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E95), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from Ashland, Ky., to points in Maine, restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E96), filed May 30, 1975. Applicant: J. MILLER

EXPRESS, INC., 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry sand additives*, from Ashland, Ky., to points in New Castle County, Del., restricted against the transportation of liquid commodities in bulk, in tank vehicles. The purpose of this filing is to eliminate the gateway of Wadsworth, Ohio.

No. MC 78228 (Sub-No. E99), filed June 30, 1975. Applicant: J. MILLER EXPRESS, CO., 2310 Grant Building, Pittsburgh, Pa. 15219. Applicant's representative: Thomas M. Mulroy (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories* from points in Pennsylvania on and west of Highway 219 to points in Illinois. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co. at Wampum, Pa.

No. MC 78228 (Sub-No. E100), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in Pennsylvania on and west of U.S. Highway 219 to points in Illinois on and west north of a line beginning at Lake Michigan, thence along U.S. Highway 66 to junction Illinois Highway 53, thence along Illinois Highway 53 to junction U.S. Highway 66, thence along U.S. Highway 66 to junction Interstate Highway 74, thence along Interstate Highway 74 to junction Illinois Highway 9, thence along Illinois Highway 9 to the Illinois-Iowa State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co., at Greenville, Pa.

No. MC 78228 (Sub-No. E101), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in Pennsylvania bounded by a line beginning at the Pennsylvania-Ohio State line, thence along Pennsylvania Highway 5 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to U.S. Highway 219, thence along U.S. Highway 219 to junction Pennsylvania Highway 281, thence along Pennsylvania Highway 281 to junction Pennsylvania Highway 711, thence along Pennsylvania Highway 711 to junction Interstate Highway 70, thence along Interstate Highway 70 to junction U.S. Highway 119, thence along U.S. Highway 119 to junction Pennsylvania Highway 51, thence along Penn-

sylvan Highway 51 to junction Interstate Highway 15, thence along Interstate Highway 15 to Marion, Ind., by motor vehicle, over irregular routes, to junction Pennsylvania Highway 240,

Indiana Highway 15 to Marion, Ind., by motor vehicle, over irregular routes, to junction Pennsylvania Highway 240,

sylvania Highway 51 to junction Interstate Highway 279, thence along Interstate Highway 279 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to the place of beginning to points in Illinois on, west, and north of a line beginning at Lake Michigan, thence along U.S. Highway 66, to junction Illinois Highway 83, thence along Illinois Highway 83 to junction Interstate Highway 57, thence along Interstate Highway 57 to the Illinois-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co., at Greenville, Pa.

No. MC 78228 (Sub-No. E102), filed June 30, 1975. Applicant: J. MILLER EXPRESS, INC., 2310 Grant Building, Pittsburgh, Pa. 15219. Applicant's representative: Thomas M. Mulroy (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories* from points in Pennsylvania, bounded by a line beginning at the Pennsylvania-Ohio State line, thence along Pennsylvania Highway 5 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to U.S. Highway 219, thence along U.S. Highway 219 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to the place of beginning to points in the State of Illinois. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co. at Greenville, Pa.

No. MC 78228 (Sub-No. E103), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in Pennsylvania on and west of U.S. Highway 219 to points in Indiana on and west of U.S. Highway 219 to points in Indiana on and west of a line beginning at the Michigan-Indiana State line, thence along Indiana Highway 19 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Indiana Highway 47, thence along Indiana Highway 47 to junction Indiana Highway 32, thence along Indiana Highway 32 to Crawfordsville, Ind., thence along U.S. Highway 136 to the Indiana-Illinois State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co. at Wampum, Pa.

No. MC 78228 (Sub-No. E104), filed May 30, 1975. Applicant: J. MILLER EXPRESS, 152 Wabash Street, Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor

vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in that part of Pennsylvania bounded by a line beginning at the Pennsylvania-Ohio State line, thence along Pennsylvania Highway 5 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to U.S. Highway 219, thence along U.S. Highway 219 to junction Pennsylvania Highway 281, thence along Pennsylvania Highway 281 to junction U.S. Highway 40, thence along U.S. Highway 40 to junction Pennsylvania Highway 51, thence along Pennsylvania Highway 51 to junction Interstate Highway 279, thence along Interstate Highway 279 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to the place of beginning to points in that part of Indiana on and west of a line beginning at the Indiana-Michigan State line, thence along Indiana Highway 19 to Elkhart, Ind., thence along Indiana Highway 33 to Fort Wayne, Ind., thence along Indiana Highway 3 to junction Indiana Highway 67, thence along Indiana Highway 67 to junction U.S. Highway 31, thence along U.S. Highway 31 to the Indiana-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co., at Wampum, Pa.

No. MC 78228 (Sub-No. E105), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from those points in Pennsylvania bounded by a line beginning at the Pennsylvania-Ohio State line, thence along U.S. Highway 6 to junction Pennsylvania Highway 27, thence along Pennsylvania Highway 27 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction U.S. Highway 62, thence along U.S. Highway 62 to the New York-Pennsylvania State line, thence along the New York-Pennsylvania State line to junction U.S. Highway 219, thence along U.S. Highway 219 to junction Interstate Highway 76, thence along Interstate Highway 76 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Pennsylvania-West Virginia State line, thence along the Pennsylvania-West Virginia State line to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to the place of beginning to points in Indiana. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co. at Wampum, Pa.

No. MC 78228 (Sub-No. E106), filed June 30, 1975. Applicant: J. MILLER EXPRESS, INC., 2310 Grant Building, Pittsburgh, Pa. 15219. Applicant's representative: Thomas M. Mulroy (same as

above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in Pennsylvania on and west of U.S. Highway 219, to points in Indiana on or west of a line beginning at the Indiana-Michigan State line, thence along Indiana Highway 19 to the junction of U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 421, thence along U.S. Highway 421 to junction U.S. Highway 24, thence along U.S. Highway 24 to the Indiana-Illinois State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co. at Greenville, Pa.

No. MC 78228 (Sub-No. E107), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in Pennsylvania bounded by a line beginning at the Pennsylvania-Ohio State line, thence along Pennsylvania Highway 5 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to U.S. Highway 219, thence along U.S. Highway 219 to junction Interstate Highway 76, thence along Interstate Highway 76 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to the place of beginning to points in Indiana on and west of a line beginning at the Indiana-Michigan State line, thence along Indiana Highway 19 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Indiana Highway 47, thence along Indiana Highway 47 to junction U.S. Highway 41, thence along U.S. Highway 41 to Terre Haute, Ind., thence along U.S. Highway 40 to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co., at Greenville, Pa.

No. MC 78228 (Sub-No. E108), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in that part of Pennsylvania on, west, and north of a line beginning at the Pennsylvania-New York State line, thence along U.S. Highway 219 to junction U.S. Highway 30, thence along U.S. Highway 30 to Pittsburgh, Pa., thence along Pennsylvania Highway 65 to Rochester, Pa., thence along Pennsylvania Highway 68 to the Pennsylvania-Ohio State line to points in Indiana on and west of a line beginning at the Indiana-Michigan State line, thence along

Indiana Highway 15 to Marion, Ind., thence along Indiana Highway 9 to junction U.S. Highway 31, thence along U.S. Highway 31 to the Indiana-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co., at Greenville, Pa.

No. MC 78228 (Sub-No. E109), filed May 30, 1975. Applicant: J. MILLER EXPRESS, INC., 152 Wabash St., Pittsburgh, Pa. 15220. Applicant's representative: Thomas M. Mulroy, 2310 Grant Bldg., Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*,

by motor vehicle, over irregular routes, transporting: *Non-clay refractories*, from points in Pennsylvania bounded by a line beginning at the Pennsylvania-Ohio State line, thence along Pennsylvania Highway 58 to junction U.S. Highway 322, thence along U.S. Highway 322 to Meadville, Pa., thence along Pennsylvania Highway 77 to junction Pennsylvania Highway 27, thence along Pennsylvania Highway 27 to Warren, Pa., thence along U.S. Highway 62 to the Pennsylvania-New York State line, thence along the Pennsylvania-New York State line to junction U.S. Highway 219, thence along U.S. Highway 219

to junction Pennsylvania Highway 240, thence along Pennsylvania Highway 240 to Indiana, Pa., thence along U.S. Highway 422 to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to the place of beginning to points in Indiana. The purpose of this filing is to eliminate the gateway of the facilities of Universal Refractory Co., at Greenville, Pa.

By the Commission.

## FEDERAL ELECTION COMMISSION

[11 CFR Part 113]

[Notice 1975-41]

## OFFICE AND FRANKING ACCOUNTS: EXCESS CAMPAIGN CONTRIBUTIONS

## Notice of Hearing, Time and Place

The Federal Election Commission published a notice of hearings to be held on Tuesday and Wednesday, September 16 and 17, 1975, in the FEDERAL REGISTER,

Volume 40, No. 164—Friday, August 22, 1975, at page 36869 entitled "Office and Franking Accounts: Excess Campaign Contributions—Notice of Hearing", Notice 1975-31.

The Federal Election Commission today publishes notice that these hearings will be held on the date specified in the earlier notice in the main courtroom at the United States Court of Claims, 717 Madison Place (Lafayette Square), NW., Washington, D.C. 20005. The hearings will commence at 10:00 a.m. and run

until 12:30 p.m., reconvene at 2:00 p.m. and adjourn at 4:00 p.m.

All questions regarding the above notice should be addressed to the Office of General Counsel, Federal Election Commission, 1325 K Street NW., Washington, D.C. 20463, or telephone 202-382-5839.

Dated: September 4, 1975.

THOMAS B. CURTIS,  
Chairman for the  
Federal Election Commission.

## FEDERAL ELECTION COMMISSION

[Notice 1975-40]

## PRESIDENTIAL PRIMARY MATCHING FUNDS

## Interim Guideline

Notice 1975-40, Supplementing Interim Guideline Published as Notice 1975-22 at 40 FR 33817, August 11, 1975.

I. *Eligibility for Payment From The Presidential Primary Matching Payment Account.* A candidate for nomination for election as President of the United States will satisfy the eligibility requirement in 26 U.S.C. § 9033(b)(3) if he or she certifies to the receipt of, and has in fact received, gifts of money in the requisite amounts made by a written instrument identifying the individual making the gift by full name and mailing address. Gifts of money will be considered only to the extent that the total amounts contributed by any one individual do not exceed \$250 and are contributed on or after January 1, 1975.

For purposes of the foregoing and subject to Part II below:

A. "written instrument" means a check, money order, or other instrument containing the requisite information in-

cluding a written receipt for a cash gift (not exceeding \$100 and not made in violation of 18 U.S.C. § 615) issued by or on behalf of the donee candidate; countersigned in ink by the donor; and including the donor's full name, residential address, amount and date of the gift.

B. "gift of money" does not include a subscription, loan, advance or deposit of money, or anything of value, or anything described in 26 U.S.C. § 9032(4) (B), (C), and (D).

C. to be considered a contribution for matching purposes, the gift of money must be received by the candidate or his or her committee and deposited in a designated campaign depository.

II. *Aggregate Amount of Contributions That Satisfy Initial Eligibility for Matching Payments.* Contributions that qualify under the foregoing are determined without regard to costs incurred by a candidate (seeking nomination for election to the office of President) in raising the aggregate amount required under section 9033(b)(3), except that gifts of money received due to an event, sale or other occurrence which confers a private benefit upon the contributor are contributions only to the extent that the amount received exceeds the cost or, in appropriate

cases, the fair market value of the private benefit. The candidate or committee must maintain records to establish the cost or fair market value.

III. *Matchable Contributions After Initial Eligibility Is Established.* After initial eligibility is established under 26 U.S.C. § 9033, a candidate for presidential nomination will be entitled to matching payments in accordance with 25 U.S.C. § 9034. The Commission will in due course, by regulation or other announcement, provide guidance regarding the schedule and manner of such matching payments.

IV. *Commission's General Audit Authority and Duties.* Candidates for nomination for election to the office of President should note the Commission's general authority and duties under 2 U.S.C. § 437d and 438. They should also note the prohibition in 18 U.S.C. § 614 on the making of contributions in the name of another person and the knowing acceptance of such contributions.

Dated: September 2, 1975.

THOMAS B. CURTIS,  
Chairman for the  
Federal Election Commission.

**FEDERAL COMMUNICATIONS  
COMMISSION  
SPONSORSHIP IDENTIFICATION RULES**

**Applicability**

SEPTEMBER 3, 1975.

Revision of May 6, 1963 Public Notice, as modified by April 21, 1975 Public Notice.

With the development of broadcast service along private commercial lines, meaningful government regulation of the various broadcast media has from an early date embraced the principle that listeners are entitled to know by whom they are being persuaded. Thus, as far back as the Radio Act of 1927 and continuing with section 317 of the Communications Act of 1934 there has been an unvarying requirement that all matter broadcast by any station for a valuable consideration is to be announced as paid for or furnished, and by whom.

On September 13, 1960, a bill (S. 1893) was signed into law amending section 317 of the Act to redefine the situations in which broadcast licensees must make sponsorship identification announcements. In addition, the law (Public Law 86-752) added a new section 508 to the Act requiring disclosure by persons other than broadcast licensees who provide or receive valuable consideration for the inclusion of any matter in a program intended for broadcast. The persons to whom section 508 relates had previously not been directly subject to any previous provisions of the Act. Subsection (e) of the revised section 317 directs the Commission to prescribe appropriate rules and regulations to implement the Congressional intent expressed in the new wording of section 317. In adopting this legislation, the Congress also set forth a series of twenty-seven examples to illustrate the intended effect of the proviso clause in amended section 317(a).

In 1963, the Commission revised the sponsorship identification rules for the broadcast services (34 F.C.C. 829) thereby implementing amended section 317. By Report and Order, adopted April 17, 1975, in Docket No. 19513, these rules were further amended (and consolidated as new section 73.1212) effective May 30, 1975 (FCC 75-417). When the 1963 rule revision was made, the Commission also adopted a Public Notice, entitled "Applicability of Sponsorship Identification Rules," which contained thirty-six illustrative interpretations (40 F.C.C. 141), including the twenty-seven examples set forth by the Congress. These interpretations, except for Interpretation 33, are consistent with the 1975 rule revisions. To reflect the provisions of new section 73.1212, Interpretation 33 was revised by Public Notice, dated April 21, 1975 (FCC 75-418). The 1975 Report and Order also amended the sponsorship identification rules for origination cablecasting (section 76.221) to conform to the new section 73.1212 for broadcasting. The interpretations of the 1963 Public Notice as modified by the 1975 Public Notice are applicable to origination cablecasting as well as to the broadcast

**NOTICES**

services. The present document is a revision of the 1963 Public Notice, incorporating both the 1975 rule changes and the revised Interpretation 23.

There follows hereafter section 317 and section 508 of the Act, the Commission's revised rules and the thirty-six illustrative interpretations.

Section 317 reads as follows:

SEC. 317. (a)(1) All matter broadcast by any radio station for which any money, service or other valuable consideration is directly or indirectly paid, or promised to or charged or accepted by, the station so broadcast, from any person, shall, at the time the same is so broadcast, be announced as paid for or furnished, as the case may be, by such person: *Provided*, That "service or other valuable consideration" shall not include any service or property furnished without charge or at a nominal charge for use on, or in connection with, a broadcast unless it is so furnished in consideration for an identification in a broadcast of any person, product, service, trademark, or brand name beyond an identification which is reasonably related to the use of such service or property on the broadcast.

(2) Nothing in this section shall preclude the Commission from requiring that an appropriate announcement shall be made at the time of the broadcast in the case of any political program or any program involving the discussion of any controversial issue for which any films, records, transcriptions, talent, scripts, or other material or service of any kind have been furnished, without charge or at a nominal charge, directly or indirectly, as an inducement to the broadcast of such program.

(b) In any case where a report has been made to a radio station as required by section 508 of this Act, or circumstances which would have required an announcement under this section had the consideration been received by such radio station, an appropriate announcement shall be made by such radio station.

(c) The licensee of each radio station shall exercise reasonable diligence to obtain from its employees, and from other persons with whom it deals directly in connection with any program or program matter for broadcast, information to enable such licensee to make the announcement required by this section.

(d) The Commission may waive the requirement of an announcement as provided in this section in any case or class of cases with respect to which it determines that the public interest, convenience or necessity does not require the broadcasting of such announcement.

(e) The Commission shall prescribe appropriate rules and regulations to carry out the provisions of this section.

Section 508 reads as follows:

SEC. 508. (a) Subject to subsection (d), any employee of a radio station who accepts or agrees to accept from any person (other than such station) or any person (other than such station) who pays or agrees to pay such employee, any money, service or other valuable consideration for the broadcast of any matter over such station shall, in advance of such broadcast, disclose the fact of such acceptance or agreement to such station.

(b) Subject to subsection (d), any person who, in connection with the production or preparation of any program or program matter which is intended for broadcasting over any radio station, accepts or agrees to accept, or pays or agrees to pay, any money, service or other valuable consideration for the inclusion of any matter as a part of such pro-

gram or program matter, shall, in advance of such broadcast, disclose the fact of such acceptance or payment or agreement to the payee's employer, or to the person for whom such program or program matter is being produced, or to the licensee of such station over which such program is broadcast.

(c) Subject to subsection (d), any person who supplies to any other person any program or program matter which is intended for broadcasting over any radio station shall, in advance of such broadcast, disclose to such other person any information of which he has knowledge, or which has been disclosed to him, as to any money, service or other valuable consideration which any person has paid or accepted, or has agreed to pay or accept, for the inclusion of any matter as a part of such program or program matter.

(d) The provisions of this section requiring the disclosure of information shall not apply in any case where, because of a waiver made by the Commission under section 317 (d), an announcement is not required to be made under section 317.

(e) The inclusion in the program of the announcement required by section 317 shall constitute the disclosure required by this section.

(f) The term "service or other valuable consideration" as used in this section shall not include any service or property furnished without charge or at a nominal charge for use on, or in connection with, a broadcast, or for use on a program which is intended for broadcasting over any radio station, unless it is so furnished in consideration for an identification in such broadcast or in such program of any person, product, service, trademark, or brand name beyond an identification which is reasonably related to the use of such service or property in such broadcast or such program.

(g) Any person who violates any provision of this section shall for each such violation, be fined not more than \$10,000 or imprisoned not more than one year, or both.

Section 73.1212 of the Commission's rules, applicable in common to the broadcast services, reads as follows:

§ 73.1212 *Sponsorship identification; list retention; related requirements.* (a) When a broadcast station transmits any matter for which money, service, or other valuable consideration is either directly or indirectly paid or promised to, or charged or accepted by such station, the station, at the time of the broadcast, shall announce (i) that such matter is sponsored, paid for, or furnished, either in whole or in part, and (ii) by whom or on whose behalf such consideration was supplied: *Provided, however*, That "service or other valuable consideration" shall not include any service or property furnished either without or at a nominal charge for use on, or in connection with, a broadcast unless it is so furnished in consideration for an identification of any person, product, service, trademark, or brand name beyond an identification reasonably related to the use of such service or property on the broadcast.

(1) For the purposes of this section, the term "sponsored" shall be deemed to have the same meaning as "paid for."

(b) The licensee of each broadcast station shall exercise reasonable diligence to obtain from its employees, and from other persons with whom it deals directly in connection with any matter for broadcast, information to enable such licensee to make the announcement required by this section.

(c) In any case where a report has been made to a broadcast station as required by section 508 of the Communications Act of 1934, as amended, of circumstances which would have required an announcement under this section had the consideration been received by such broadcast station, an

appropriate announcement shall be made by such station.

(d) In the case of any political broadcast matter or any broadcast matter involving the discussion of a controversial issue of public importance for which any film, record, transcription, talent, script, or other material or service of any kind is furnished, either directly or indirectly, to a station as an inducement for broadcasting such matter, an announcement shall be made both at the beginning and conclusion of such broadcast on which such material or service is used that such film, record, transcription, talent, script, or other material or service has been furnished to such station in connection with the transmission of such broadcast matter: *Provided, however*, That in the case of any broadcast of 5 minutes duration or less, only one such announcement need be made either at the beginning or conclusion of the broadcast.

(e) The announcement required by this section shall, in addition to stating the fact that the broadcast matter was sponsored, paid for or furnished, fully and fairly disclose the true identity of the person or persons, or corporation, committee, association or other unincorporated group, or other entity by whom or on whose behalf such payment is made or promised, or from whom or on whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (d) of this section are furnished.

Where an agent or other person or entity contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known or by the exercise of reasonable diligence, as specified in paragraph (b) of this section, could be known to the station, the announcement shall disclose the identity of the person or persons or entity on whose behalf such agent is acting instead of the name of such agent. Where the material broadcast is political matter or matter involving the discussion of a controversial issue of public importance and a corporation, committee, association or other unincorporated group, or other entity is paying for or furnishing the broadcast matter, the station shall, in addition to making the announcement required by this section, require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group, or other entity shall be made available for public inspection at the local office specified by the licensee under Section 1.526 of this Chapter. If the broadcast is originated by a network, the list may, instead, be retained at the headquarters office of the network or at the location where the originating station maintains its public inspection file under Section 1.526 of this Chapter. Such lists shall be kept and made available for a period of two years.

(f) In the case of broadcast matter advertising commercial products or services, an announcement stating the sponsor's corporate or trade name, or the name of the sponsor's product, when it is clear that the mention of the name of the product constitutes a sponsorship identification, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the broadcast.

(g) The announcement otherwise required by section 317 of the Communications Act of 1934, as amended, is waived with respect to the broadcast of "want ad" or classified advertisements sponsored by an individual. The waiver granted in this paragraph shall not extend to a classified advertisement or want ad sponsorship by any form of business enterprise, corporate or otherwise. Whenever

sponsorship announcements are omitted pursuant to this paragraph, the licensee shall observe the following conditions:

(1) Maintain a list showing the name, address, and (where available) the telephone number of each advertiser;

(2) Attach the list to the program log for the day when such broadcast was made; and

(3) Make this list available to members of the public who have a legitimate interest in obtaining the information contained in the list.

(h) Any announcement required by section 317(b) of the Communications Act of 1934, as amended, is waived with respect to feature motion picture film produced initially and primarily for theatre exhibition.

NOTE.—The waiver heretofore granted by the Commission in its Report and Order adopted November 16, 1960 (FCC 60-1369; 40 FCC 95), continues to apply to programs filmed or recorded on or before June 20, 1963, when § 73.654, the predecessor television rule, went into effect.

(i) Commission interpretations in connection with the provisions of the sponsorship identification rules are contained in the Commission's Public Notice, entitled "Applicability of Sponsorship Identification Rules," dated May 6, 1963 (40 FCC 141), as modified by Public Notice, dated April 21, 1975 (FCC 75-418). Further interpretations are printed in full in various volumes of the Federal Communications Commission Reports.

Section 76.221 of the Commission's rules, applicable to cable television systems, reads as follows:

§ 76.221 *Sponsorship identification; list retention; related requirements.* (a) When a cable television system engaged in origination cablecasting presents any matter for which money, service, or other valuable consideration is either directly or indirectly paid or promised to, or charged or accepted by such system, the system, at the time of the cablecast, shall announce (i) that such matter is sponsored, paid for, or furnished, either in whole or in part, and (ii) by whom or on whose behalf such consideration was supplied: *Provided, however*, That "service or other valuable consideration" shall not include any service or property furnished either without or at a nominal charge for use on, or in connection with, a cablecast unless it is so furnished in consideration for an identification of any person, product, service, trademark, or brand name beyond an identification reasonably related to the use of such service or property on the cablecast.

(1) For the purposes of this section, the term "sponsored" shall be deemed to have the same meaning as "paid for."

(b) Each system engaged in origination cablecasting shall exercise reasonable diligence to obtain from its employees, and from other persons with whom it deals directly in connection with any matter for cablecasting, information to enable such system to make the announcement required by this section.

(c) In the case of any political origination cablecast matter or any origination cablecast matter involving the discussion of public controversial issues for which any film, record, transcription, talent, script, or other material or service of any kind is furnished, either directly or indirectly, to a system as an inducement for cablecasting such matter, an announcement shall be made both at the beginning and conclusion of such cablecast on which such material or service is used that such film, record, transcription, talent, script, or other material or service has been furnished to such system in connection with the transmission of such cablecast matter: *Provided, however*, That in the case of any

**NOTICES**

cablecast of 5 minutes' duration or less, only one such announcement need be made either at the beginning or conclusion of the cablecast.

(d) The announcement required by this section shall, in addition to stating the fact that the origination cablecasting matter was sponsored, paid for or furnished, fully and fairly disclose the true identity of the person or persons, or corporation, committee, association or other unincorporated group, or other entity by whom or on whose behalf such payment is made or promised, or from whom or on whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (c) of this section are furnished. Where an agent or other person or entity contracts or otherwise makes arrangements with a system on behalf of another, and such fact is known or by the exercise of reasonable diligence, as specified in paragraph (b) of this section, could be known to the system, the announcement shall disclose the identity of the person or persons or entity on whose behalf such agent is acting instead of the name of such agent. Where the origination cablecasting material is political matter or matter involving the discussion of a controversial issue of public importance and a corporation, committee, association or other unincorporated group, or other entity is paying for or furnishing the matter, the system shall, in addition to making the announcement required by this section, require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group, or other entity shall be made available for public inspection at the local office of the system. Such lists shall be kept and made available for a period of two years.

(e) In the case of origination cablecast matter advertising commercial products or services, an announcement stating the sponsor's corporate or trade name, or the name of the sponsor's product, when it is clear that the mention of the name of the product constitutes a sponsorship identification, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the cablecast.

(f) The announcement otherwise required by this section is waived with respect to the origination cablecast of "want ad" or classified advertisements sponsored by an individual. The waiver granted in this paragraph shall not extend to a classified advertisement or want ad sponsorship by any form of business enterprise, corporate or otherwise. Whenever sponsorship announcements are omitted pursuant to this paragraph, the licensee shall observe the following conditions:

(1) Maintain a list showing the name, address, and (where available) the telephone number of each advertiser;

(2) Make this list available to members of the public who have a legitimate interest in obtaining the information contained in the list.

(h) The announcements required by this section are waived with respect to feature motion picture film produced initially and primarily for theatre exhibition.

NOTE.—The waiver heretofore granted by the Commission in its Report and Order, adopted November 16, 1960 (FCC 60-1369; 40 FCC 95), continues to apply to programs filmed or recorded on or before June 20, 1963, when § 73.654(e), the predecessor television rule, went into effect.

(i) Commission interpretations in connection with the provisions of the sponsorship identification rules for the broadcasting services are contained in the Commission's Public Notice, entitled "Applicability of Sponsorship Identification Rules," dated

May 6, 1963 (40 FCC 141), as modified by

Public Notice, dated April 21, 1975 (FCC 75-418).

Further interpretations are printed in full in various volumes of the Federal Communications Commission Reports.

Section 76.221 of the Commission's rules, applicable to cable television systems, reads as follows:

§ 76.221 *Sponsorship identification; list retention; related requirements.* (a) When a cable television system engaged in origination cablecasting presents any matter for which money, service, or other valuable consideration is either directly or indirectly paid or promised to, or charged or accepted by such system, the system, at the time of the cablecast, shall announce (i) that such matter is sponsored, paid for, or furnished, either in whole or in part, and (ii) by whom or on whose behalf such consideration was supplied: *Provided, however*, That "service or other valuable consideration" shall not include any service or property furnished either without or at a nominal charge for use on, or in connection with, a cablecast unless it is so furnished in consideration for an identification of any person, product, service, trademark, or brand name beyond an identification reasonably related to the use of such service or property on the cablecast.

(1) For the purposes of this section, the term "sponsored" shall be deemed to have the same meaning as "paid for."

(b) Each system engaged in origination cablecasting shall exercise reasonable diligence to obtain from its employees, and from other persons with whom it deals directly in connection with any matter for cablecasting, information to enable such system to make the announcement required by this section.

(c) In the case of any political origination cablecast matter or any origination cablecast matter involving the discussion of public controversial issues for which any film, record, transcription, talent, script, or other material or service of any kind is furnished, either directly or indirectly, to a system as an inducement for cablecasting such matter, an announcement shall be made both at the beginning and conclusion of such cablecast on which such material or service is used that such film, record, transcription, talent, script, or other material or service has been furnished to such system in connection with the transmission of such cablecast matter: *Provided, however*, That in the case of any

cablecast of 5 minutes' duration or less, only one such announcement need be made either at the beginning or conclusion of the cablecast.

(d) The announcement required by this section shall, in addition to stating the fact that the origination cablecasting matter was sponsored, paid for or furnished, fully and fairly disclose the true identity of the person or persons, or corporation, committee, association or other unincorporated group, or other entity by whom or on whose behalf such payment is made or promised, or from whom or on whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (c) of this section are furnished. Where an agent or other person or entity contracts or otherwise makes arrangements with a system on behalf of another, and such fact is known or by the exercise of reasonable diligence, as specified in paragraph (b) of this section, could be known to the system, the announcement shall disclose the identity of the person or persons or entity on whose behalf such agent is acting instead of the name of such agent. Where the origination cablecasting material is political matter or matter involving the discussion of a controversial issue of public importance and a corporation, committee, association or other unincorporated group, or other entity is paying for or furnishing the matter, the system shall, in addition to making the announcement required by this section, require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group, or other entity shall be made available for public inspection at the local office of the system. Such lists shall be kept and made available for a period of two years.

(e) In the case of origination cablecast matter advertising commercial products or services, an announcement stating the sponsor's corporate or trade name, or the name of the sponsor's product, when it is clear that the mention of the name of the product constitutes a sponsorship identification, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the cablecast.

(f) The announcement otherwise required by this section is waived with respect to the origination cablecast of "want ad" or classified advertisements sponsored by an individual. The waiver granted in this paragraph shall not extend to a classified advertisement or want ad sponsorship by any form of business enterprise, corporate or otherwise. Whenever

sponsorship announcements are omitted pursuant to this paragraph, the licensee shall observe the following conditions:

(1) Maintain a list showing the name, address, and (where available) the telephone number of each advertiser;

(2) Make this list available to members of the public who have a legitimate interest in obtaining the information contained in the list.

(h) The announcements required by this section are waived with respect to feature motion picture film produced initially and primarily for theatre exhibition.

NOTE.—The waiver heretofore granted by the Commission in its Report and Order, adopted November 16, 1960 (FCC 60-1369; 40 FCC 95), continues to apply to programs filmed or recorded on or before June 20, 1963, when § 73.654(e), the predecessor television rule, went into effect.

(i) Commission interpretations in connection with the provisions of the sponsorship identification rules for the broadcasting services are contained in the Commission's Public Notice, entitled "Applicability of Sponsorship Identification Rules," dated

May 6, 1963 (49 FCC 141), as modified by Public Notice, dated April 21, 1975 (FCC 75-418). Further interpretations are printed in full in various volumes of the Federal Communications Commission Reports. The interpretations made for the broadcasting services are equally applicable to origination cablecasting.

The following are illustrative interpretations of section 317 and the Commission's rules. Interpretations 1 to 27, inclusive are incorporated without change from House Report 1800 (86th Congress, 2d Session):

A. *Free records.* 1. A record distributor furnishes copies of records to a broadcast station or a disc jockey for broadcast purposes. No announcement is required unless the supplier furnished more copies of a particular recording than are needed for broadcast purposes. Thus, should the record supplier furnish 50 or 100 copies of the same release, with an agreement by the station, express or implied, that the record will be used on a broadcast, an announcement would be required because consideration beyond the matter used on the broadcast was received.

2. An announcement would be required for the same reason if the payment to the station or disc jockey were in the form of cash or other property, including stock.

3. Several distributors supply a new station, or a station which has changed its program format (e.g. from "rock and roll" to "popular" music), with a substantial number of different releases. No announcement is required under section 317 where the records are furnished for broadcast purposes only; nor should the public interest require an announcement in these circumstances. The station would have received the same material over a period of time had it previously been on the air or followed this program format.

4. Records are furnished to a station or disc jockey in consideration for the special plugging of the record supplier or performing talent beyond an identification reasonably related to the use of the record on the program. If the disc jockey were to state: "This is my favorite new record, and sure to become a hit; so don't overlook it," and it is understood that some such statement will be made in return for the record and this is not the type of statement which would have been made absent such an understanding, and the supplying of the record free

<sup>1</sup>In view of the attention which has been given to the problem of free records, they are treated herein as a special category. It should be noted, however, that the same principles apply to records as to other property or services furnished for use on or in connection with a broadcast.

<sup>2</sup>A question has been raised with respect to a situation where a distributor furnishes to a station free of charge an entire music library with the understanding, express or implied, that only its records would be played on the station. To the extent that such an arrangement may run afoul of the antitrust laws or may constitute an abdication by the station of its licensee responsibility, an announcement under section 317 would not cure it.

of charge, an announcement would be required since it does not appear that in those circumstances the identification is reasonably related to the use of the record on that program. On the other hand, if a disc jockey, in playing a record, states: "Listen to this latest release of performer 'X', a new singing sensation," and such matter is customarily interpolated in the disc jockey's program format and would be included whether or not the particular record had been purchased by the station or furnished to it free of charge, it would appear that the identification by the disc jockey is reasonably related to the use of the record on that particular program and there would be no announcement required.

B. *Where payment in any form other than the matter used on or in connection with the broadcast is made to the station or to anyone engaged in the selection of program matter.* 5. A department store owner pays an employee of a producer to cause to be mentioned on a program the name of the department store. An announcement is required.

6. An airline pays a station to insert in a program a mention of the airline. An announcement is required.

7. A perfume manufacturer gives five dozen bottles to the producer of a giveaway show, some of which are to be identified and awarded to winners on the show, the remainder to be retained by the producer. An announcement is required since those bottles of perfume retained by the producer constitute payment for the identification.

8. An automobile dealer furnishes a station with a new car, not for broadcast use, in return for broadcast mentions. An announcement is required; the car constituting payment for the mentions.

9. A Cadillac is given to an announcer for his own use in return for a mention on the air of a product of the donor. An announcement is required since there has been a payment for a broadcast mention.

C. *Where service or property is furnished free for use on or in connection with a program, but where there is neither payment in consideration for broadcast exposure of the service or property, nor an agreement for identification of such service or property beyond its mere use on the program.* 10. Free books or theater tickets are furnished to a book or dramatic critic of a station. The books or plays are reviewed on the air. No announcement is required. On the other hand, if 40 tickets are given to the station with the understanding, express or implied, that the play would be reviewed on the air, an announcement would be required because there has been a payment beyond the furnishing of a property or service for use on or in connection with a broadcast.

11. News releases are furnished to a station by Government, business, labor and civic organizations, and private persons, with respect to their activities, and editorial comment therefrom is used on a program. No announcement is required.

12. A Government department furnishes air transportation to radio newscasters so they may accompany a for-

eign dignitary on his travels through out the country. No announcement is required.

13. A municipality provides street props on a program. No announcement is required.

14. A hotel permits a program to originate on its premises. No announcement is required. If, however, in return for the use of the premises, the producer agrees to mention the hotel in a manner not reasonably related to the use made of the hotel on that particular program, an announcement would be required.

15. A refrigerator is furnished for use as part of the backdrop in a kitchen scene of a dramatic show. No announcement is required.

16. A Coca-Cola distributor furnishes a Coca-Cola dispenser for use as a prop in a drugstore scene. No announcement is required.

17. An automobile manufacturer furnishes his identifiable current model car for use in a mystery program, and it is used by a detective to chase a villain. No announcement is required. If it is understood, however, that the producer may keep the car for his personal use, an announcement would be required. Similarly, an announcement would be required if the car is loaned in exchange for a mention on the program beyond that reasonably related to its use, such as the villain saying: "If you hadn't had that speedy Chrysler, you never would have caught me."

18. A private zoo furnishes animals for use on a children's program. No announcement is required.

19. A university makes one of its professors available to give lectures in an educational program series. No announcement is required.

20. A well-known performer appears as a guest artist on a program at union scale because the performer likes the show, although the performer normally commands a much higher fee. No announcement is required.

21. An athletic event promoter permits broadcast coverage of the event. No announcement is required in absence of other payment by the promoter or agreement to identify in a manner not reasonably related to the broadcast of the event.

D. *Where service or property is furnished free for use on or in connection with a program, with the agreement, express or implied, that there will be an identification beyond mere use of the service or property on the program.* 22. A refrigerator is furnished by X with the understanding that it will be used in a kitchen scene on a dramatic show and that the brand name will be mentioned. During the course of the program the actress says: "Donald go get the meat from my new X refrigerator." An announcement is required because the identification by brand name is not reasonably related to the particular use of

<sup>3</sup>Of course, in all these cases, if there is payment to the station or production personnel in consideration for the exposure, an announcement is required.

such refrigerator in this dramatic program.

23. (a) A refrigerator is furnished by X for use as a prize on a giveaway show, with the understanding that a brand identification will be made at the time of the award. In the presentation, the master of ceremonies briefly mentions the brand name of the refrigerator, its cubic content, and such other features as serve to indicate the magnitude of the prize. No announcement is required because such identification is reasonably related to the use of the refrigerator on a giveaway show in which the costly or special nature of the prizes is an important feature of this type of program.

(b) In addition to the identification given in (a) above, the master of ceremonies says: "All you ladies sitting there at home should have one of these refrigerators in your kitchen," or "Ladies, you ought to go out and get one of these refrigerators." An announcement is required because each of these statements is a sales "pitch" not reasonably related to the giving away of the refrigerator on this type of program.

The significance of the distinction between the identification in (a) and that in (b) is, that in (a) it is no more than the natural identification which a broadcaster would give to a refrigerator as a prize if he had purchased the refrigerator himself and had no understanding whatever with the manufacturer as to any identification. That is to say, in situation (a), had the broadcaster purchased the refrigerator he would have felt it necessary, in view of the nature of the show, adequately to describe the magnitude of the prize which was being given to the winner. On the other hand, the broadcaster would not, where he had purchased the refrigerator, have made the type of identification in situation (b), thus providing a free sales "pitch" for the manufacturer.

24. (a) An airplane manufacturer furnishes free transportation to a cast on its new jet model to a remote site, and the arrival of the cast at the site is shown as part of the program. The name of the manufacturer is identifiable on the fuselage of the plane in the shots taken. No announcement is required because in this instance such identification is reasonably related to the use of the service on the program.

(b) Same situation as in (a), except that after the cameraman has made the foregoing shots he takes an extra closeup of the identification insignia. An announcement is required because the closeup is not reasonably related to the use of the service on the program.

25. (a) A station produces a public service documentary showing development of irrigation projects. Brand X tractors are furnished for use on the program. The tractors are shown in a manner not resulting in identification of the brand of tractors except as may be recognized from the shape or appearance of the tractors. No announcement is required since the identification is reasonably related to the use of the tractors on the program.

(b) Same situation as in (a), except that the brand name of the tractor is visible as it appears normally on the tractor. No announcement is required for the same reason.

(c) Same situation as in (b), except that a closeup showing the brand name in a manner not required in the nature of the program is included in the program, or an actor states: "This is the best tractor on the market." An announcement is required as this identification is beyond that which is reasonably related to the use of the tractor on the program.

26. (a) A bus company prepares a scenic travel film which it furnishes free to broadcast stations. No mention is made in the film of the company or its buses. No announcement is required because there is no payment other than the matter furnished for broadcast and there is no mention of the bus company.

(b) Same situation as in (a), except that a bus, clearly identifiable as that of the bus company which supplied the film, is shown fleetingly in highway views in a manner reasonably related to that travel program. No announcement is required.

(c) Same situation as in (a), except that the bus, clearly identifiable as that of the bus company which supplied the film, is shown to an extent disproportionate to the subject matter of the film. An announcement is required, because in this case by the use of the film the broadcaster has impliedly agreed to broadcast an identification beyond that reasonably related to the subject matter of the film.

27. (a) A manufacturer furnishes a grand piano for use on a concert program. The manufacturer insists that enlarged insignia of its brand name be affixed over normal insignia on the piano. An announcement is required if an enlarged brand name is shown.

(b) Conversely, if the piano furnished has normal insignia and during the course of the televised concert the broadcast includes occasional closeups of the pianist's hands, no announcement is required even though all or part of the insignia appears in these closeups. Here the identification of the brand name is reasonably related to the use of the piano by the pianist on the program. However, if undue attention is given the insignia rather than the pianist's hands, an announcement would be required.

28. (a) An automobile manufacturer or dealer furnishes to a producer of television programs a number of automobiles with the understanding that the producer will use them, or some of them, in some of his programs which call for the use of automobiles; and that the automobiles may be used for other business purposes in connection with the production of the programs, such as transporting the cast, crew, equipment and supplies from location to location or transporting executive personnel to business meetings in connection with the production of the programs. There is no understanding that there will be any identification on the television programs beyond an identification which is reasonably related to the use of the automobiles on the programs. No other consideration is involved. Under such uses, no announcement is required.

(b) If, in addition to the facts stated in (a), it is understood between the producer and the supplier that one or more of the automobiles may be, and they are, used for other purposes not related to the production of the program, an announcement is required.

29. (a) A hotel permits a program to originate from its premises and furnishes hotel services, such as room and board, for cast, production and technical staff, and also furnishes other elements for use in connection with the programs to be broadcast, such as electricity and cable connections, free of charge, and with no other consideration. There is no understanding that there will be an identification of the hotel on the program beyond that reasonably related to the use made of the hotel on the program. No announcement is required.

(b) If the hotel pays money or furnishes free or at a nominal charge any services or items which are not for use on or in connection with the program (e.g., furnishing free or at a nominal charge room and board for the producer for any period of time not related to the production of the program at the hotel site), an announcement is required.

E. *Effective date.* 30. Does section 317 as amended on September 13, 1960 apply to programs or portions of programs produced or recorded prior to September 13, 1960? No, unless valuable consideration was provided to a broadcast station (rather than to a producer or other person) for the broadcast of the program or the inclusion of any program matter therein and the program was broadcast after said date.

F. *Nature of the announcement.* 31. A station broadcasts spot announcements which solicit mail orders from listeners. The sponsor is merely referred to in the announcements and in the mail order address as "Flower Seeds" or "Real Estate" or "The Record Man." Such a reference to the sponsor of the announcements is insufficient to constitute compliance with the Commission's sponsorship identification rules because it is limited to a description of the product or service being advertised. The announcement requirement contemplates the explicit identification of the name of the manufacturer or seller of goods, or the generally known trade or brand name of the goods sold. (See Commission's Public Notice entitled "Sponsor Identification on Broadcast Station," FCC 50-1207, 6 R.R. 835.)

32. A station broadcasts "Teaser" announcements utilizing catch words, slogans, symbols, etc., designed to arouse the curiosity of the public by telling it that something is "coming soon." The sponsor of the announcements is not named therein, nor is any generally known trade or brand name given, but it is the intention of the station and the advertiser to inaugurate at a later date a series of conventional spot announcements at

the conclusion of the "teaser" campaign. directors of that entity. If the broadcast the source of kinescopes is under an ad-

the conclusion of the "teaser" campaign. Announcements of this type do not comply with the Commission's sponsorship identification rules. All commercial matter must contain an explicit identification of the advertiser or the generally known trade or brand name of the goods being advertised. (See *Memorandum Opinion and Order In The Matter of Amendment of § 3.119(e) of the Commission's Rules*, FCC 59-939, 18 R.R. 1860.)

33. A station broadcasts an announcement or other material on behalf of a candidate for public office or on behalf of the proponents or opponents of a bond issue (or any other controversial issue of public importance). The station announces a "disclaimer" or states that the matter "was a paid political announcement." Such announcement *per se* does not comply with the sponsorship identification rule. The rule does not require that either of these type of announcement be made but rather that identification announcement be made which fully and fairly discloses the true identity of the person or persons or entity by whom or on whose behalf payment was made or promised, or from whom or on whose behalf services or other valuable consideration was furnished. If the station knows or by the exercise of reasonable diligence could know that a person or persons or entity is acting on behalf of another, the announcement(s) shall identify the person(s) or entity on whose behalf such action is being taken. If the entity on whose behalf such action is being taken is a corporation, committee, association, or other group, the announcement(s) shall divulge the name of such group. Additionally, a station broadcasting any matter on behalf of such group shall make available for public inspection at the place which the station has designated that its file is available for inspection under Section 1.526 of the rules (the station's main studio or other accessible place in the community of the station's license) a list of the chief executive officers, members of the executive committee, or members of the board of

directors of that entity. If the broadcast is network originated, the list may be retained at the network's headquarters office or at the location where the originating station maintains its public inspection file under Section 1.526.

34. Must the required sponsorship announcement on television broadcasts be made by visual means in order for it to be an "appropriate announcement" within the meaning of the Commission's rules?

Not necessarily. The Commission's rule does not contain any provision stating whether aural or visual or both types of announcements are required. The purpose of the rule is to provide a full and fair disclosure of the facts of sponsorship, and responsibility for determining whether a visual or aural announcement is appropriate lies with the licensee. (See *Commission telegram to Mr. Bert Combs*, FCC Public Notice of April 9, 1959, Memo No. 71945.)

G. *Controversial issues*. 35. (a) A trade association furnishes a television station with kinescope recordings of a Senate committee hearing on labor relations. The subject of the kinescope is a strike being conducted by a labor union. The station broadcasts the kinescope on a "sustaining" basis but does not announce the supplier of the film. The failure to make an appropriate announcement as to the party supplying the film is a violation of the Commission's sponsorship identification rules dealing with the presentation of program matter involving controversial issues of public importance. Moreover, the Commission requires that a licensee exercise due diligence in ascertaining the identity of the supplier of such program matter. An alert licensee should be on notice that expensive kinescope prints dealing with controversial issues are being paid for by someone and must make inquiry to determine the source of the films in order to make the required announcement. (See *KSTP, Inc.*, 17 R.R. 553 and *Storer Broadcasting Co.*, 17 R.R. 556a.) A station which has ascertained

the source of kinescopes is under an additional obligation to supply such information to any other station to which it furnishes the program.

(b) Same situation as above, except that the time for the program is sold to a sponsor (not the supplier of the film) and contains proper identification of the advertiser purchasing the program time. An additional announcement as to the supplier of the films is still required, for the reasons set forth above.

(c) Same situation as in (a) or (b), above, except that only excerpts from the film are used by a station in its news programs. An announcement as to the source of the films is required. (See *Westinghouse Broadcasting Co.*, 17 R.R. 556d.)

36. A church group plans to film the proceedings of its national convention and distribute film clips "dealing with numerous matters of profound importance to members of (its) faith" in order to "disseminate to the American people information concerning its objectives and programs." The groups request a general waiver under section 317(d) of the Communications Act so that it need not "waste" any of the short periods of broadcast time donated to it by making sponsorship identification announcements. In the below-cited case, the Commission did not grant such a waiver because of the absence of information indicating that the subject matter of the clips was not controversial and because the alleged "loss" of a few seconds of air time was not of decisional significance vis-a-vis Congressional and Commission policy relating to issues of public importance. (See *Petition of National Council of Churches of Christ*, FCC 60-1418.)

Adopted: May 1, 1963, and modified April 17, 1975.

XUM

V

**Title 40—Protection of Environment**  
**CHAPTER I—ENVIRONMENTAL**  
**PROTECTION AGENCY**

[FRL 418-5]

**PART 52—APPROVAL AND PROMULGA-**  
**TION OF IMPLEMENTATION PLANS**

**Maintenance of National Ambient Air**  
**Quality Standards**

On July 10, 1974, the Administrator proposed in the *Federal Register* (39 FR 25330) a list of areas that have the potential for violation of specified national ambient air quality standards (NAAQSs) by 1985 for all States except those in EPA's Region V (Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin). In the *Federal Register* of August 12, 1974 (39 FR 28906), the Administrator proposed a similar list for the Region V States. The identification of these "air quality maintenance areas" (AQMA) is required under 40 CFR 51.12 (e) and (f), published in the *Federal Register* of June 18, 1973 (39 FR 15834) and subsequently amended on May 8, 1974 (39 FR 16343). The preamble to the July 10, 1974, proposal contains detailed background information concerning the Administrator's proposed identification of these areas and their relationship to the implementation planning process; the reader can consult that preamble for this information.

In the *Federal Register* of April 29, 1975 (40 FR 18726), the Administrator published the full final identification of AQMA for the States of Alabama, Alaska, Georgia, Hawaii, Idaho, Louisiana, Maine, Mississippi, North Carolina, Oklahoma, Oregon, Rhode Island, South Carolina, Texas, Vermont, and Washington, and the territories of Guam, Puerto Rico, Virgin Islands, and American Samoa; and a partial final AQMA list for the State of Iowa. In the preamble to that rulemaking, the Administrator presented some background information pertaining to the maintenance of air quality standards and responded to general comments that had been received; the reader can also consult that preamble for this information.

In the *Federal Register* of June 2, 1975 (40 FR 13746), the Administrator published the full final identification of AQMA for the States of Colorado, Connecticut, Illinois, Indiana, Iowa (including the remaining AQMA), Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Mexico, North Dakota, South Dakota, Utah, Wisconsin, and Wyoming, and a partial final identification for the State of Ohio.

The action below presents the full final identification of AQMA for the States of Arizona, Arkansas, California, Delaware, District of Columbia, Florida, Kansas, Kentucky, Maryland, Missouri, Nevada, New Jersey, New York, Ohio (including the remaining AQMA), Pennsylvania, Tennessee, Virginia, and West Virginia. In addition, the action also adds one AQMA to the list for the State of Georgia, which had been published on

**RULES AND REGULATIONS**

April 29, 1975. The Administrator is taking the following action on these States:

(a) Approval of the supplemental information that the States submitted to the Administrator under 40 CFR 51.12 (e) and which the Administrator has determined to be adequate and in accordance with EPA's *Guidelines for Designation of Air Quality Maintenance Areas*. The approved supplemental information contains either the list of areas identified by the States or a justification why there are no such areas.

(b) Disapproval of plans for which States did not submit adequate supplemental information containing either a list of areas identified pursuant to 40 CFR 51.12 (e) or a justification why there are no such areas.

(c) Identification of areas that have the potential for violation of a national standard by 1985. In some cases, such identifications include, where applicable, the Administrator's own area identification, in addition to the areas identified by the States and approved by the Administrator. Where the Administrator disapproves a State's plan because of an inadequate submittal, the Administrator either identifies AQMA or indicates that there are no such areas under 40 CFR 51.12 (e) and (f).

This action completes the Administrator's identification of AQMA. The AQMA lists are being published later than the August 16, 1974, date for publication specified in the May 8, 1974, *Federal Register* notice referred to above because the task of area identification proved to be more difficult and time-consuming than had previously been anticipated. The Administrator regrets the delay but believes that a more appropriate list of AQMA will result from the additional time and effort expended.

For areas identified by the Administrator under 40 CFR 51.12 (e) and (f), the States are required to submit a detailed analysis of the impact on air quality of projected growth. Where the analysis indicates that the national air quality standards will not be maintained, the Administrator will require the appropriate States to submit plans containing measures to ensure maintenance of national standards during the ensuing period. Under the existing regulations, the AQMA identification-analysis-plan development procedure must be repeated at least every 5 years to ensure continuing maintenance of national standards.

Originally, 40 CFR 51.12 required the States to submit their AQMA analyses and plans where necessary by June 18, 1975. On June 19, 1975, (40 FR 25814), the Administrator revised these requirements and removed the submission date of June 18. Under the revision, the Administrator did not establish a new date for submission of the analyses and plans, but indicated that he would decide by July 1, 1976, which areas needed to submit AQMA plans and when the plans would have to be submitted. The reader can also consult that *Federal Register* action for more details.

**SUMMARY OF STATE ACTIONS**

In the rulemaking below, the Administrator is taking action on 19 State implementation plans. He is approving 8 plans under the air quality maintenance provisions of 40 CFR 51.12 (e) and disapproving 9. Of the remaining 2 State plans, Georgia has been previously approved, and Ohio has been previously disapproved. A total of 66 AQMA are being identified for at least one pollutant. Of these, 64 are identified for particulate matter, 19 for sulfur dioxide, 7 for carbon monoxide, 24 for photochemical oxidants, and 2 for nitrogen dioxide.

This rulemaking, in conjunction with the previous AQMA identification actions of April 29 and June 2, 1975, will result in action on all 55 State plans. A total of 33 State plans are approved and 18 are disapproved. (The remaining 4 State plans are neither approved or disapproved because they do not contain any Standard Metropolitan Statistical Areas (SMSAs), and the Administrator did not identify any AQMA in these 4 States.) With the publication of the enclosed action, EPA will have identified to date a total of 168 areas as AQMA for at least one pollutant. 159 areas are identified for particulate matter, 61 for sulfur dioxide, 24 for carbon monoxide, 49 for photochemical oxidants, and 5 for nitrogen dioxide.

A discussion of specific actions relating to each State covered in this action, including a general response to comments received, appears below.

**ARIZONA**

The State of Arizona held a public hearing on the identification of AQMA in Phoenix on April 12, 1974. The Administrator received the official submission of the State AQMA proposal on April 17, 1974, from the Director of the Arizona Department of Health Services (the designated representative of the Governor).

The identification submitted by Arizona was for carbon monoxide and photochemical oxidant in Maricopa County. On July 10, 1974 (39 FR 25330), the Administrator proposed to approve the State's submittal, and accept its AQMA. No comments were received on this proposal.

In the action below, EPA is approving the State submittal. Since July, 1974, however, new air quality data for photochemical oxidants has become available for the Tucson area. This data indicates that an attainment and maintenance problem exists for photochemical oxidants in the Tucson area. Thus, the Tucson SMSA (Pima County) is identified below as an AQMA for photochemical oxidants.

The July 10, 1974, proposal did not include identification of any areas in Arizona for particulate matter. However, national standards for particulate matter are chronically violated in many areas of the State. In the non-urban areas the violations are largely the result of naturally caused fugitive dust emissions. In the Phoenix and Tucson Metropolitan

areas, the high particulate concentrations are a function of man-made fugitive dust emissions. As man-made fugitive dust emissions are controllable to some degree, Maricopa and Pima counties are identified below as AQMA by EPA for particulate matter. EPA anticipates that this designation will facilitate research into the impact of urban growth on regional particulate concentrations and the development of reasonable and achievable control measures.

The State submittal and technical documents supporting these designation actions are available for public inspection at the U.S. EPA Region IX Office, and at the Arizona State Department of Health Services, 1740 West Adams Street, Phoenix, Arizona 85007.

**ARKANSAS**

The Arkansas Department of Pollution Control and Ecology submitted a statement to EPA on April 2, 1974, concluding that no areas would be designated as AQMA. The Department indicated that they had made an analysis following EPA's guidelines for designation and excluded all areas on the basis of the initial criteria.

EPA applied the guidelines to the SMSAs in Arkansas, and as a result, proposed to identify the Little Rock and Fort Smith SMSAs as AQMA for particulate matter in the *Federal Register* notice of July 10, 1974 (39 FR 25330). Air quality standards in both of these areas had been exceeded within the previous two years, and projections of air quality indicated that in 1985, the primary standard in Fort Smith and the secondary standard in Little Rock would still be exceeded.

EPA held a public hearing in Little Rock on August 14, 1974. The State opposed the identifications largely on the contention that the State implementation plan includes a provision for maintenance of standards. This provision, which is section 16(a) of the Arkansas Air Pollution Control Code, stipulates that within areas having high density of sources or receptors, "the Department may prescribe air quality control requirements that are more restrictive and more extensive than those provided in the regulations of general application within said areas." The State claimed that all problems in maintenance of particulate standards throughout the State were "extremely localized," and that AQMA were unnecessary to maintain the NAAQS.

On November 14, 1974, the Department forwarded a formal statement to EPA emphasizing its opposition to the proposed identification of AQMA in Arkansas and confirming its reliance on the State plan. The Department did, however, recognize "localized violations" of particulate standards. The Department provided additional information on sampler locations in the Fort Smith and Little Rock areas and detailed air quality data for particulate matter in Fort Smith during 1972 and 1973. The Department changed the location of a sampler in Fort Smith during 1972 and placed it adjacent

**RULES AND REGULATIONS**

to a ball park. The Department believed this was responsible for particulate levels that were unrepresentative of the area, since the ball park is considered as a source of wind-blown dust.

With additional data and information provided by the State, EPA has made a new evaluation of the proposed Fort Smith and Little Rock AQMA for particulate matter. For Fort Smith, EPA has concluded that certain air quality data on which the proposed identification was based are unrepresentative of the area. Thus, the Administrator is not identifying the Fort Smith area as an AQMA. He is identifying the Little Rock area because EPA has projected high air quality concentrations, the State must control localized violations, and the State has not presented a control strategy which assures that particulate standards will be maintained within the period 1975 to 1985. The comprehensive analysis required for the Little Rock area should allow the State to determine the main sources of particulate matter emissions and the control strategies available to maintain the secondary standard during the ten-year period.

EPA explained its position on both the Fort Smith and Little Rock areas to the Director of the Department of Pollution Control and Ecology in letters dated December 10, 1974, and January 28, 1975. After review of the State's implementation plan, the Administrator has concluded that the existing provisions in the plan are not adequate to ensure maintenance of the particulate matter standard in the Little Rock area.

EPA has carefully reviewed the analysis presented by the State, the record of the EPA public hearing, and the comments and additional information sent directly to the Regional Office. All of these have been considered in making a re-evaluation and in making the official identification herein. EPA has concluded that the State did not present adequate justification that there are no areas in Arkansas which have the potential for exceeding an air quality standard within ten years. Therefore, the Administrator is disapproving the State submittal because it lacked adequate justification and because the submittal was not an official submittal from the Governor.

The analysis and submittal of the State and technical support documentation of EPA are available for inspection during normal business hours at the Freedom of Information Center, U.S. EPA Region VI Office, and Arkansas Department of Pollution Control and Ecology, Air Division, 8001 National Drive, Little Rock, Arkansas 72209. A copy of the transcript of the public hearing held by EPA and other comments received are also available for inspection at the Region VI Office and at the Freedom of Information Center.

**CALIFORNIA**

The State of California proposed nine areas as AQMA and held a public hearing on the proposed identifications on June 13, 1974 in Tahoe, California.

The testimony revealed substantial support for the State identifications. Also, on June 13, 1974, the Chairman of the California Air Resources Board (ARB) officially transmitted the identifications to EPA. EPA reviewed the submittal, found it approvable, and on July 10, 1974 (39 FR 25330), proposed to approve the State's identifications.

Because of a misinterpretation of California's proposal, EPA listed seven (rather than nine) AQMA in its proposed approval of July 10, 1974. This proposal included non-contiguous areas in the same AQMA. On July 12, 1974, Governor Ronald Reagan officially submitted the ARB's identifications to EPA as Revision 5 of the State Implementation Plan. The ARB commented on the July 10, 1974, proposal and pointed out discrepancies between the proposed identifications and those adopted by the State. No other comments were received on the July 10, 1974, proposal.

The changes made to the identifications serve to clarify more precisely which areas of the State can be expected to violate the NAAQS. Therefore in the action below, EPA is approving the State's nine AQMA as submitted with one exception. EPA obtained additional information for Monterey County that revises the emissions inventory for the county. An analysis of the inventory and the control program leads EPA to conclude that Monterey County should not be identified as an AQMA for any of the applicable pollutants. Therefore EPA is not identifying Monterey County as an AQMA as proposed. Additionally, EPA is identifying portions of the San Joaquin Valley as an AQMA for particulate matter. The July 10, 1974, proposal did not include identification of San Joaquin, Stanislaus, Tulare, Fresno or Kern Counties of California for particulate matter. However, the NAAQS for particulate matter are chronically violated in these counties. Emissions contributing to these violations are from predominantly man-made and natural sources of fugitive dust. Since these emissions are controllable to some degree, these counties are identified below as AQMA by EPA for particulate matter. EPA anticipates that this designation will facilitate research into the impact of urban growth and agricultural practices on regional particulate concentrations and the development of reasonable and achievable control measures.

EPA's technical support documentation discusses these changes from the proposal in detail.

The State submittal, supporting information, and calculations on which the AQMA are based are available for public inspection at: the U.S. EPA Region IX Office; the U.S. EPA Regional Office Contact, Federal Building, Room 2033, 300 North Los Angeles Street, Los Angeles, California; and the California Air Resources Board, 1709 11th Street, Sacramento, California 95814. The ARB has also made its calculations available at the Air Pollution Control District offices throughout the State.

**RULES AND REGULATIONS**

**DELAWARE**

trator identifies the District of Columbia proposing AQMA. the Albany area

**RULES AND REGULATIONS**

on May 7, 1974 in Frankfort, at which the Commission received information

1974 proposed areas be identified as AQMA for the State of Maryland with

son City, Missouri. Written comments were solicited from the public and none

## DELAWARE

On April 1, 1974, the Administrator received from the Delaware Department of Natural Resources and Environmental Control a submittal indicating that no AQMA identifications for the State of Delaware were necessary. This submittal was procedurally inadequate, however, in that it was not formally submitted by the Governor of the State, nor did the State hold a public hearing on it.

After careful review of the Department of Natural Resources' submittal and the Administrator's own evaluation of the present air quality and expected future growth in the State, the Administrator proposed on July 10, 1974, (39 FR 25330) that no area in the State be designated as an AQMA.

This proposal was based on extensive application of EPA's *Guidelines for Designation of Air Quality Maintenance Areas*. This analysis indicated that no area in the State of Delaware need be designated as an AQMA.

EPA held a public hearing on the Administrator's proposal on August 21, 1974, in Wilmington. The date and location of this hearing appeared in the August 6, 1974, *Federal Register* (39 FR 28316). The same August 6, 1974, notice solicited public comment on the proposal. The only comment received was given at the public hearing, and this comment supported the proposal.

Considering the detailed analysis on which the proposal was based and the public comments, the Administrator is not identifying any AQMA in the State of Delaware.

The Administrator's technical support documentation on which this action is based is available for public inspection during normal business hours at the offices of EPA, Region III.

## DISTRICT OF COLUMBIA

On May 15, 1974, the Administrator received proposed AQMA identifications from the Department of Environmental Services for the District of Columbia. This submittal was procedurally inadequate, however, in that it was not formally submitted by the Mayor of the District. The District held a public hearing on April 5, 1974.

After careful review of the Department of Environmental Services submittal and the Administrator's own evaluation of the present air quality and expected future growth in the District, EPA proposed on July 10, 1974 (39 FR 25330) to identify the District of Columbia as a portion of the National Capital AQMA for particulate matter, sulfur dioxide and photochemical oxidants.

In the same July 10, 1974, notice, EPA solicited comments from the public, but no comments have been received. EPA also solicited comments from the Commissioner of the District of Columbia and the Federal Regional Council on August 7 and 27, 1974 respectively. No comments have been received from either source.

Considering the detailed analysis on which the proposal was based and the lack of public comments, the Adminis-

trator identifies the District of Columbia as an AQMA as proposed.

The Administrator's technical support documentation on which this action is based and a copy of the public hearing transcript are available for public inspection during normal business hours at the offices of EPA, Region III.

## FLORIDA

After holding a public hearing on May 21, 1974, in Orlando, the State of Florida Department of Pollution Control submitted to EPA an official identification of ten AQMA's on May 30, 1974. Comments at the State hearing generally supported the identifications. The ten areas identified by the State were proposed for identification by the Administrator on July 10, 1974 (39 FR 25330). No comments were received on the Administrator's proposal of July 10, 1974, for Florida.

On September 25, 1974, the State requested that EPA defer identification of seven of the areas pending the results of reanalysis; additional information relating to these deferrals was furnished by the State on November 21, 1974 and January 9, 1975.

The State completed their re-analysis and requested on March 31, 1975, that four AQMA's identified in its submittal of May 30, 1974 (Tallahassee, Pensacola, Ft. Lauderdale, Hollywood, and Miami), be deleted from the Administrator's listing. Additional information in support of these deletions was submitted on April 9, 1975. On April 15, 1975, the State requested that Orlando, Gainesville, and Melbourne-Titusville-Cocoa also be deleted. Information supporting these deletions was contained in the January 9, 1975 letter from the State. The information submitted by the State supporting these deletions showed in each case that the air quality data used to identify the area as an AQMA was not representative of the ambient air quality.

After review of all materials submitted, EPA is approving the identification of AQMA's as requested by the State of Florida. The State submittals and EPA's evaluation report discuss in detail the changes made in the AQMA identification from the July 10, 1974, proposal.

The State's submittals and EPA's technical support documentation for the identifications made in this notice are available at the office of the Florida Department of Pollution Control, 2562 Executive Center Circle East, Tallahassee, Florida 32301, and at the office of EPA Region IV.

Information as to other locations where the identification material may be reviewed is available from both of the above offices.

## GEORGIA

In the *Federal Register* of April 29, 1975 (40 FR 14726), the Administrator identified the Atlanta and Savannah AQMA's as proposed by the State, and Catoosa and Walker Counties as part of the Chattanooga Interstate AQMA. On March 10, 1975, the State advised EPA that after reviewing the data used for

proposing AQMA's, the Albany area (Dougherty County) should also have been included. EPA has reviewed all AQMA identification materials and is approving this identification of March 10 as submitted.

The State submittal and EPA's technical support documentation on which these identifications are based, are available for public inspection at the office of the Air Quality Control Section, Environmental Protection Division, Georgia Department of Natural Resources, 270 Washington Street, S.W., Atlanta, Georgia 30334, and at the office of EPA Region IV.

Information as to other locations where the designation material may be reviewed is available from both of the above offices.

## KANSAS

On March 28, 1974, AQMA designation material was received for the State of Kansas from the Kansas Department of Health. The State identified no AQMA's in this material. The State had evaluated the Kansas City, Topeka and Wichita areas and found that none of these areas had the potential for violation of an NAAQS within ten years. A public hearing on the materials was held by the State in Topeka on March 18, 1974.

On July 10, 1974 (39 FR 25330), EPA proposed that no AQMA's be identified for Kansas. EPA solicited written comments from the public, but none were received.

Further EPA analysis of the materials submitted by the State shows that there is a potential for violation of the NAAQS for particulate matter in Kansas City. The Administrator is therefore disapproving the State's determination that no areas of the State be designated as AQMA's and is identifying the Kansas portion of the Kansas City Standard Metropolitan Statistical Area (SMSA) as an AQMA for particulate matter.

The State submittal concerning AQMA identification, and EPA's technical support material for this rulemaking are available for public inspection at the office of the Kansas Department of Health and Environment, Forbes Air Force Base, Building 740, Topeka, Kansas 66620, and at the office of the U.S. EPA, Region VII.

## KENTUCKY

On July 10, 1974 (39 FR 25330), the Administrator proposed identification of the Louisville area as an AQMA for sulfur dioxide based on information provided by the Kentucky Department of Natural Resources and Environmental Protection. No comments were received on this proposal. The Department did not officially submit their material as a plan supplement at the time; therefore, the Administrator proposed to disapprove the plan for lack of the official submittal.

On January 8, 1975, the Department formally submitted an identification of the Louisville area as an AQMA for both sulfur dioxide and particulate matter. This had been recommended by the Kentucky Environmental Quality Commission following the State public hearing

on May 7, 1974 in Frankfort, at which the Commission received information which indicated a potential for violation of standards for particulate matter as well as for sulfur dioxide.

After reviewing all AQMA materials submitted by the State, the Administrator is approving the identification of Louisville as submitted.

The Administrator has also studied recent information concerning the Cincinnati and Evansville interstate areas. This new information shows that a potential for violation of standards for particulate matter exists. The Administrator is therefore identifying the Kentucky portions of the Cincinnati and Evansville interstate areas as AQMA's for particulate matter.

The Administrator is also identifying two counties of the Kentucky portion of the Cincinnati AQMA for photochemical oxidants in order to provide for an integrated regional program for analysis and control of the oxidant problem in the Cincinnati area. The technical support documentation discusses these identifications in more detail.

The information submitted by the State and EPA's technical support documentation are available for public inspection at the office of the Kentucky Division of Air Pollution, 311 East Main Street, Frankfort, Kentucky 40601, and at the office of the U.S. EPA Region IV.

## MARYLAND

The State of Maryland Bureau of Air Quality Control held a hearing on proposed AQMA's in Baltimore on April 18, 1974. The State never officially submitted these proposed identifications to EPA, however. After review of the draft proposals on which the State hearing was held, the Administrator proposed in the *Federal Register* of July 10, 1974 (39 FR 25330), to identify areas identical to those unofficially proposed by the State and subjected to the April 18, 1974, hearing. The State draft proposals applied *Guidelines for Designation of Air Quality Maintenance Areas*, but used the more restrictive State ambient air quality standards to determine if standards would be maintained in the 1975-1985 time period.

The Administrator asked for public comment on these proposals (39 FR 25330) and received comments from the Maryland State Chamber of Commerce and the Baltimore Gas and Electric Company. These comments called for careful review by EPA of the April 18, 1974, hearing transcript, closer evaluation of the current air quality trends in the State, which, they maintained, indicated a rapid improvement of all air quality problems in the State. The comments also suggested that the identification of AQMA's be based solely on national ambient air quality standards. The State Chamber of Commerce also commented on the inadequacy of the modeling techniques.

After careful review of all public comments, including those made at the April 18, 1974, hearing, it is the Administrator's judgment that the July 10,

1974 proposed areas be identified as AQMA's for the State of Maryland with one exception, described below. The detailed air quality analysis required for all AQMA's will determine whether a plan is needed for those areas. The identification of areas must include all areas for which there is the potential for violation of any standard. By its very nature, the identification process is conservative and might include areas for which a plan will not be needed after a more detailed analysis. Plans will only be required by EPA for those areas for which a detailed air quality analysis shows that a national standard is jeopardized. The Administrator believes, however, that this evaluation process is an excellent method for also establishing needs in areas where local standards are more stringent than Federal standards. Section 116 of the Clean Air Act makes clear that States may adopt and enforce standards that are stricter than federal requirements. Thus, Maryland is free to designate AQMA's based on its own standards.

EPA solicited comments on the proposal from the Governor of Maryland on August 7, 1974, and from the Federal Regional Council on August 27, 1974. No comments have been received from either source.

The Administrator is identifying as AQMA's the following areas: the Baltimore Air Quality Control Region (AQCR) for particulate matter, sulfur dioxide, and photochemical oxidants; the Maryland portion of the National Capital AQCR for particulate matter and photochemical oxidants; and the Potomac River Basin area for particulate matter. The rulemaking differs from the proposal in two respects: the Baltimore area and the Maryland portion of the National Capital area are not identified as AQMA's for nitrogen dioxide. The Administrator does not believe that there is a potential for failure to maintain the national standard for nitrogen dioxide in those areas. The technical support documentation contains a discussion of this conclusion.

The Administrator's technical support documentation on which the proposal was based is available for public inspection during normal business hours at the offices of EPA, Region III.

## MISSOURI

On May 6, 1974, the Administrator received AQMA identification material for the State of Missouri from the Missouri Air Conservation Commission. Public hearings were held by the State in Kansas City, Missouri, on March 27, 1974, and in St. Louis, Missouri, on April 24, 1974.

On July 10, 1974 (39 FR 25330), the Administrator proposed to approve the State's identification of the St. Louis Interstate AQMA for particulate matter and photochemical oxidants. Copies of the State's identification material were made available for public inspection at the U.S. EPA Region VII Office in Kansas City, Missouri, and the office of Missouri Air Conservation Commission in Jeffer-

son City, Missouri. Written comments were solicited from the public and none were received.

The Administrator has obtained additional air quality data for sulfur dioxide in the St. Louis area and after careful review of the State's submittal, is adding sulfur dioxide to the St. Louis Interstate AQMA designation. Also, an additional analysis of the Kansas City interstate area has shown that projected levels of particulate concentrations could exceed the standards in 1985. Accordingly, the Administrator is identifying the Kansas City area as an Interstate AQMA for particulate matter. EPA's technical support documentation discusses these identifications in detail.

The State submittal concerning AQMA identification and EPA's technical support material for this rulemaking are available for public inspection at the office of the Missouri Air Conservation Commission, Department of Natural Resources, 117 Commerce Drive, Jefferson City, Missouri, as well as at the office of the U.S. EPA Region VII.

## NEVADA

The State of Nevada did not submit to EPA an identification of Air Quality Maintenance Areas (AQMA's) or a justification showing that there were no such areas in the State. Therefore, EPA performed an analysis of the Reno and Las Vegas Standard Metropolitan Statistical Areas (SMSA's) in accordance with the procedures set forth in the document entitled *Guidelines for Designation of Air Quality Maintenance Areas*. In the *Federal Register* of July 10, 1974, (39 FR 25330) the Administrator proposed that the Las Vegas SMSA be identified as an AQMA for particulate matter, carbon monoxide, and photochemical oxidants, and announced that a hearing was to be held shortly.

On October 24, 1974 (39 FR 37784), after a reevaluation of the analysis of the Reno and Las Vegas SMSA's, the Administrator re-proposed that the Las Vegas SMSA be identified as an AQMA for particulate matter and photochemical oxidants and proposed that the Reno SMSA be identified as an AQMA for particulate matter (not in the July 10, 1974 proposal). The proposal to identify the Las Vegas SMSA as an AQMA for carbon monoxide was not repeated on October 24, 1974.

EPA held a public hearing in Las Vegas on December 6, 1974, and in Reno on December 13, 1974 to take testimony on the proposed AQMA identifications.

At both public hearings, EPA received testimony that recommended the restriction of the AQMA boundaries to the areas around the metropolitan areas. The boundaries of the AQMA's identified in the rulemaking below reflect the testimony received at the hearings.

Testimony presented in Las Vegas indicates that recent carbon monoxide air quality measurements exceed the levels prescribed by the national standards. EPA now believes that controls on carbon monoxide sources are no longer sufficient to either attain the national standards or to maintain the standards

in the period 1975-1985. The Las Vegas pollutants particulate matter, sulfur ox-

State of New York. Public hearings were

New York State Department of Environ-

1974. After careful review of the De-

The State subsequently held a public

in the period 1975-1985. The Las Vegas area is therefore identified as an AQMA for carbon monoxide.

The spokesman for the Nevada Bureau of Environmental Health presented testimony in opposition to the identification of AQMAS for both the Las Vegas and Reno SMSAs. The State contended that existing regulations, given sufficient time, would provide for maintenance of the national standards. No significant air quality data trend has been observed by EPA to support the State's contention, however.

The Administrator finds that the National Ambient Air Quality Standards (NAAQS) for particulate matter will be violated during the period 1975-1985 in both the Las Vegas and Reno areas, that the NAAQS for photochemical oxidant and carbon monoxide will also be violated in the Las Vegas area during the same period, and that the NAAQS will not be maintained during the same period in the respective areas. As a result, the area surrounding and including the Las Vegas metropolitan area is identified as an AQMA for photochemical oxidants, carbon monoxide and particulate matter and the area surrounding and including the Reno metropolitan area is identified as an AQMA for particulate matter.

The supporting information and analysis on which the Las Vegas proposed designation is based are available for inspection at the National Environmental Research Center, 944 E. Harmon Avenue, Las Vegas, Nevada 89109, and District Health Department of Clark County, 625 Shadow Lane, Las Vegas, Nevada 89106.

The supporting information and analysis on which the Reno designation is based is available at the Washoe County District Health Department, 10 Klrman Avenue, Reno, Nevada 89502.

In addition, the information and analyses on which both the Las Vegas and Reno proposed designations are based are available at the Nevada Bureau of Environmental Health, 201 S. Fall Street (Nye Bldg.), Carson City, Nevada 89701, and U.S. EPA Region IX Office.

NEW JERSEY

In this rulemaking the Administrator combines counties, previously proposed as individual AQMAS, into interstate AQMAS. On July 10, 1974 (39 FR 25330), the Administrator proposed a list of potential air quality maintenance areas (AQMAS) for the State of New Jersey. It was necessary for the Administrator to propose a list since New Jersey failed to submit, to EPA, an official list of potential AQMAS. To develop the proposed list, the EPA Regional Office worked closely with the State and obtained the detailed computations which the State performed. On August 12, 1974, in Trenton, New Jersey, EPA conducted a public hearing on the proposed list of air quality maintenance areas for the State of New Jersey. Comments and testimony at the hearing indicated public support for the proposed designation and recommended additional AQMA designations for the

pollutants particulate matter, sulfur oxides and photochemical oxidants in other New Jersey counties.

After the public hearings the Administrator reexamined the proposed AQMAS. As a result of this further analysis the Administrator has combined appropriate counties that share a common air shed into three interstate AQMAS. Almost all of these counties had been proposed as separate AQMAS. These designations represent a regional approach in metropolitan areas to facilitate intergovernmental cooperation and planning.

The Administrator in this action establishes the New Jersey-New York Interstate AQMA. The New Jersey portion includes the counties of Hudson, Essex, Union, Middlesex, Bergen, Passaic and Monmouth for the pollutants particulate matter, sulfur dioxide and photochemical oxidants; also included in this interstate AQMA are Morris and Somerset counties designated for particulate matter and photochemical oxidants. The Administrator had previously proposed Essex and Union counties to be joined in an AQMA. The other counties, now within this Interstate AQMA, were separate AQMAS. Somerset County was not previously proposed for designation. Hudson, Essex, Union, Middlesex, Bergen, Passaic and Monmouth were not previously designated for sulfur dioxide, Passaic and Morris were not previously designated for particulate matter. Monmouth had not been designated for photochemical oxidants.

The Administrator, in this action, also incorporates a second group of previously proposed AQMAS into an interstate AQMA, the Metropolitan Philadelphia Interstate AQMA. The counties and pollutants designated include Mercer, Burlington, Camden, Gloucester and Salem for the pollutants particulate matter, sulfur dioxide and photochemical oxidants. These counties had been proposed to be designated only for photochemical oxidants.

The third interstate AQMA designated in this action is the Allentown-Bethlehem-Easton Interstate AQMA. The New Jersey portion consists of Warren County designated for particulate matter. The Administrator is designating this an interstate AQMA to facilitate intergovernmental cooperation and planning between the States of New Jersey and Pennsylvania.

In addition to the AQMAS proposed July 10, 1975, the Administrator is designating Atlantic and Ocean counties each as AQMAS for particulate matter.

In order to be sure that a comprehensive analysis was undertaken for all possible problem areas, any county which had a projected concentration within ninety percent of the national standard was designated and will be subject to further review. The analyses upon which this rulemaking is based are available for public inspection at the offices of the U.S. EPA, Region II.

NEW YORK

On April 29, 1974, the Administrator received AQMA designations for the

State of New York. Public hearings were held during the period March 11-March 15, 1974 at various locations throughout the State. The State designated as AQMAS ten areas for particulate matter, three areas for sulfur dioxide, and one area each for nitrogen dioxide, carbon monoxide and photochemical oxidants.

On July 10, 1974 (39 FR 25330), the Administrator published the areas designated by New York State under the notice of proposed rulemaking section of the FEDERAL REGISTER. A 30-day public comment period was established to provide concerned individuals with the opportunity to comment on the proposed list of AQMAS. The public comment period ended on August 10, 1974 with no comments being received by the Administrator concerning the New York AQMA designations. The Administrator has reviewed the list of AQMAS submitted by New York and has determined that the State correctly specified which areas should be designated as AQMAS. A few minor boundary changes were made to include several towns within designated AQMAS. Consequently, the Administrator's final list of AQMAS for New York State remains substantially the same as the list submitted by the State on April 29, 1974. The submittal on which this rulemaking is based is available for public inspection during normal business hours at the offices of the U.S. EPA, Region II and at the offices of the New York State Department of Environmental Conservation, 50 Wolf Road, Albany, New York 12201. In addition, copies of information relating to the AQMAS are available for their respective areas at the following locations:

Ulster County Department of Health, Bureau of Sanitation Engineering, 244 Fair Street, Kingston, New York.

Dutchess County Department of Health, Division of Environmental Health, 22 Market Street, Poughkeepsie, New York.

Orange County Department of Health, Division of Environmental Health Services, 124 Main Street, Goshen, New York.

New York State Department of Environmental Conservation, Region 1, NYS/EC Building #40, SUNY, Stony Brook, New York.

New York State Department of Environmental Conservation, Room 128, 50 Wolf Road, Albany, New York.

New York State Department of Environmental Conservation, Region 3, 202 Mamawoneck Avenue, White Plains, New York.

Nassau County Department of Health, Bureau of Air Pollution Control, 240 Old County Road, Mineola, New York.

State of New York Offices, 11th Floor, 1700 Broadway, New York, New York.

Monroe County Department of Health, Bureau of Air Pollution Control, 111 Westfall Road, Rochester, New York.

Chautauqua County Department of Health, Switchboard Operator's Desk, 1st Floor, Health & Social Service Building, Mayville, New York.

New York State Department of Environmental Conservation, New York State Office Building, 6th Floor, 207 Genesee Street, Utica, New York.

New York State Department of Environmental Conservation, 3rd Floor, New York State Office Building, 333 East Washington Street, Syracuse, New York.

New York State Department of Environmental Conservation, Region 9, 584 Delaware Avenue, Buffalo, New York.

Niagara County Department of Health, Niagara Falls City Hall, Main Street, Niagara Falls, New York.

New York State Department of Environmental Conservation, New York State Office Building, 44 Hawley Street, Binghamton, New York.

Chemung County Department of Health, Environmental Health Section, Heritage Park, Elmira, New York.

OHIO

In the FEDERAL REGISTER of June 2, 1975, (40 FR 23746), the Administrator identified seven areas in Ohio (Akron-Canton, Cleveland, Columbus, Dayton, Mansfield, Toledo, Interstate, and Youngstown) as AQMAS, but indicated that other identifications for Ohio were still pending. In the action below Ohio's AQMA identification is completed with the addition of the Cincinnati Interstate AQMA and the Steubenville AQMA. For general information concerning the Ohio AQMA action, the reader is referred to the FEDERAL REGISTER of June 2, 1975 (40 FR 23746).

Identification of the Cincinnati Interstate AQMA reflects a change from the AQMA proposal of August 12, 1974 (39 FR 28906), in that Butler and Warren counties were added to the Cincinnati AQMA. The Steubenville area identification reflects the addition of Columbiana and Monroe counties to the AQMA as proposed. As explained in the FEDERAL REGISTER of June 2, the Administrator made these boundary changes in the Ohio identifications in order to keep AQMA geographic boundaries consistent with existing State district offices and local air pollution control agency jurisdictions as well as substate planning region boundaries.

Identification of the Cincinnati area as an interstate AQMA is directly associated with the determination by the Administrator that areas in Kentucky adjacent to the Cincinnati AQMA should also be identified as an AQMA. Discussion of the Administrator's determination with respect to the Kentucky identification may be found in the discussion for Kentucky in this preamble, as well as the technical support documentation for the Kentucky identification.

The technical support data for and comments received on the Ohio identifications are available for public inspection at the Ohio EPA, 361 E. Broad Street, Columbus, Ohio, as well as the EPA Region V Office.

PENNSYLVANIA

On March 18, 1974, the Administrator received from the Pennsylvania Department of Environmental Resources proposed AQMA identifications for the State of Pennsylvania. This submittal was procedurally inadequate, however, in that it was not formally submitted by the Governor of the State. A public hearing on the proposal was held by the State in Harrisburg, Pennsylvania, on June 19,

1974. After careful review of the Department of Environmental Resources' submittal and the Administrator's own evaluation of the present air quality and expected future growth in the State, the Administrator proposed on July 10, 1974, (39 FR 25330) to designate all twelve of the State of Pennsylvania's "Air Basins" as AQMAS.

In the same July 10, 1974, notice, EPA solicited comment from the public on the proposal. No comments have been received. EPA also requested both the Governor of Pennsylvania (on August 7, 1974) and the Federal Regional Council (on August 27, 1974) to comment on the proposal. No comments have been received from either source.

Given the detailed air quality analysis on which the proposal was based and the lack of public comments, the Administrator is identifying: (1) all 12 air basins in the State of Pennsylvania as AQMAS for particulate matter; this includes the Southeast Pennsylvania Air Basin, renamed as the Metropolitan Philadelphia Interstate AQMA, Pennsylvania Portion, and the Allentown-Bethlehem-Easton Air Basin, renamed as the Allentown-Bethlehem-Easton Interstate AQMA, Pennsylvania Portion; (2) the Allegheny County, Beaver Valley, and Monongahela Valley Air Basins and the Metropolitan Philadelphia area (Pennsylvania Portion) for sulfur dioxide; and (3) the Allegheny County Air Basin and the Metropolitan Philadelphia area (Pennsylvania Portion) for photochemical oxidants.

The only changes in AQMA identification from the proposal are the identification of the Metropolitan Philadelphia and the Allentown-Bethlehem-Easton areas as interstate AQMAS. The Administrator believes that because these areas share a common air shed and have similar regional growth characteristics with the adjacent areas in New Jersey, they should be identified as interstate AQMAS.

The Administrator's analysis and the Pennsylvania submittal, on which this action is based, are available for public inspection during normal business hours at the offices of EPA, Region III.

TENNESSEE

Because the Administrator did not expect the State to submit AQMA identification material prior to his proposal of AQMAS, the Administrator conducted a public hearing on May 3, 1974, in Nashville and proposed the Nashville, Chattanooga, Kingsport, and Memphis areas as AQMAS in the FEDERAL REGISTER of July 10, 1974 (39 FR 25330).

The comments received at the hearing supported the identifications of Nashville and Chattanooga as AQMAS but opposed the identifications of Kingsport and Memphis.

On July 2, 1974, the State Department of Public Health, Division of Air Pollution Control, officially submitted their identifications of the Nashville and Chattanooga areas as AQMAS.

The State subsequently held a public hearing on September 6, 1974, in Nashville, and comments received at the hearing generally supported the State's identifications. The State's analyses of the proposed Kingsport and Memphis AQMAS showed greater emissions reductions than originally projected in the EPA proposals. Accordingly, EPA is not identifying the Kingsport and Memphis areas as AQMAS, and is identifying the Chattanooga and Nashville areas as AQMAS for particulate matter as proposed. A detailed discussion of this change is found in the technical support documentation.

This promulgation includes a procedural disapproval of the State's submittal on the basis that it was submitted prior to the State public hearings and thus could not have accounted for public comment at that hearing. The AQMA identifications, however, are the same as those submitted by the State.

Copies of the State submittal, public hearing comments, and the technical support documentation for this action are available for public inspection at the Tennessee Department of Public Health, Division of Air Pollution Control, C2-212 Cordell Hull Building, Nashville, Tennessee 37219, in addition to the office of the U.S. EPA Region IV.

VIRGINIA

On May 7, 1974, the Administrator received from the Governor of Virginia proposed AQMA identifications for the State of Virginia. The State held public hearings on this submittal on April 16, 17, 18, and 19, 1974, in Richmond, Roanoke, Norfolk, and Falls Church respectively. After careful review of the State's submittal and the Administrator's own evaluation of the present air quality and expected future growth in the State, the Administrator concluded that the seven areas identified by the State of Virginia have the potential for violation of one or more national ambient air quality standards within 10 years. In the FEDERAL REGISTER of July 10, 1974 (39 FR 25330), the Administrator proposed to identify these areas as AQMAS.

In the same July 10, 1974, notice, the Administrator solicited public comment on the proposal, but EPA received no comments. EPA also requested the Governor of the Commonwealth of Virginia to comment on the proposal. The Governor's designee recommended approval of the proposal. Additionally, EPA solicited comment from the Federal Regional Council, but received no comments from them.

Considering both the detailed analysis on which the proposal was based and the comments received, the Administrator is identifying as AQMAS those areas and pollutants that were proposed on July 10, 1974, with one exception. In the Lynchburg AQMA, Lynchburg City was inadvertently omitted from the proposal; the action below includes Lynchburg City in the Lynchburg AQMA. The AQMAS identified below are the areas of the National Capital (Virginia Portion), Rich-

mond, Petersburg-Colonial Heights-

pollutants particulate matter, sulfur oxides and photochemical oxidants in other New Jersey counties.

(2) Tucson SMSA Air Quality Main-

(2) San Diego Air Basin Air Quality Maintenance Area.

Basin lying south of latitude 35°10' N and west of longitude 115°45' W.

ing the territorial area of all municipalities (as defined in section 302(f) of the

## RULES AND REGULATIONS

mond, Petersburg-Colonial Heights-Hopewell, Lynchburg, Hampton-Newport News, Norfolk-Portsmouth-Virginia Beach, and Roanoke for particulate matter, and the National Capital (Virginia Portion) for photochemical oxidants.

The State submittal and technical support documentation on which this action is based are available for public inspection during normal business hours at the offices of EPA, Region III, and at the Offices of the Virginia State Air Pollution Control Board, Room 1106, Ninth Street Office Building, Richmond, Virginia 23219.

## WEST VIRGINIA

On June 13, 1974, the Administrator received from the Governor of West Virginia proposed AQMA identifications for the State of West Virginia. The State held a public hearing on this submittal in Charleston on April 19, 1974. The State submittal indicated that no area in the State of West Virginia has the potential to violate any National Ambient Air Quality Standard in the 1975-1985 time period once the NAAQSs are attained. After preliminary review of the Governor's submittal and the Administrator's own evaluation of the present air quality and expected future growth in the State, the Administrator proposed, on July 10, 1974 (39 FR 25330), that no area in the State of West Virginia be identified as an AQMA. No comments were received on the proposal.

The Administrator has now completed his review of the West Virginia submittal and has concluded that no area in the State of West Virginia should be designated as an AQMA. The Administrator is approving the State submittal below.

The Administrator is concerned, however, over the continuing violations of the NAAQSs for particulate matter and sulfur dioxide in the West Virginia portion of the Steubenville-Wiarton-Wheeling Interstate AQCR and for particulate matter in the Kanawha Valley Intra-state AQCR. He has further determined that a detailed examination of the causes of these violations should be undertaken immediately. Upon completion of this analysis the Administrator will re-evaluate the need for plan revision for attainment and maintenance of the national standards in these areas.

The State submittal and the Administrator's evaluation are available for public inspection during normal business hours at the offices of EPA, Region III.

## AVAILABILITY OF STATE SUBMITTALS AND TECHNICAL SUPPORT DOCUMENTATION

State submittals and technical support documentation (including the Administrator's evaluation of State-submitted AQMA material) for the list of AQMA's will be available for public inspection during normal business hours at the Freedom of Information Center, EPA, Room 206, 401 M Street, S.W., Washington, D.C. 20460, and at each of the Regional Offices listed below. Each Regional Office will have only the material for the States within its respective region.

Region	States	Address
II	New Jersey, New York	26 Federal Plaza, Room 908, New York, N.Y. 10007.
III	Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia	Curtis Bldg., 6th and Walnut Sts., Philadelphia, Pa. 19106.
IV	Florida, Georgia, Kentucky, Tennessee	1421 Peachtree St., N.E., Atlanta, Ga. 30309.
V	Ohio	Federal Bldg., 230 South Dearborn St., Chicago, Ill. 60604.
VI	Arkansas	1600 Patterson St., Suite 1100, Dallas, Tex. 75201.
VII	Kansas, Missouri	1735 Baltimore Ave., Kansas City, Mo. 64108.
IX	Arizona, California, Nevada	100 California St., San Francisco, Calif. 94111.

The Administrator finds good cause for making this rulemaking effective immediately in order that the affected States may begin to develop detailed air quality maintenance area analyses if they have not already begun to do so.

(Secs. 110, 301 (a), Clean Air Act, as amended (42 U.S.C. 1857c-5, 1857g(a)))

Dated: August 27, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

## Subpart D—Arizona

1. In § 52.120, paragraph (c) is revised to read as follows:

§ 52.120 Identification of plan.

(c) Supplemental information was submitted on:

(1) March 1, March 2, and May 30, 1972, by the Arizona State Board of Health.

(2) April 11, May 10, September 11 and 21, and October 2, 1973, and April 17, 1974.

2. Section 52.143 is added as follows:

§ 52.143 Maintenance of national standards.

(a) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of the chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Phoenix SMSA Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, carbon monoxide, and photochemical oxidants.

(ii) Geographical composition of area: Maricopa County.

(2) Tucson SMSA Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area: Pima County.

## Subpart E—Arkansas

3. Section 52.181 is added as follows:

§ 52.181 Maintenance of national standards.

(a) The requirements of § 51.12 (e) of this chapter are not met because the State neither identified areas of the State which have the potential for violation of air quality standards within ten years nor provided an adequate justification that there are no such areas in the State.

(b) The area listed below is hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified national ambient air quality standard within 10 years. The identified area consists of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in Section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Little Rock Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area: Pulaski County Saline County

## Subpart F—California

§ 52.220 [Amended]

4. Paragraph (c) (1) in § 52.220 is amended by adding the date, "June 13, 1974," in proper chronological order.

5. Section 52.267 is added as follows:

§ 52.267 Maintenance of national standards.

(a) The areas listed below, which were identified by the State of California, are hereby identified by the Administrator under § 51.12 (e) and (f) as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Sacramento Valley Area Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Carbon monoxide and photochemical oxidants.

(ii) Geographical composition of area:

Sacramento County Yolo County

That portion of Solano County lying in the Sacramento Valley Air Basin, as defined in the plan.

That portion of Placer County lying in the Sacramento Valley Air Basin, as defined in the plan.

## RULES AND REGULATIONS

(2) San Diego Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, carbon monoxide, and photochemical oxidants.

(ii) Geographic composition of area: Portion of San Diego County lying in the San Diego Air Basin, as defined in the plan.

(3) San Francisco Bay Area Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, and photochemical oxidants.

(ii) Geographical composition of area:

Alameda County Contra Costa County Marin County Napa County San Francisco County Santa Clara County Santa Mateo County Those portions of Solano and Sonoma Counties lying in the San Francisco Bay Area Air Basin, as defined in the plan.

(4) San Joaquin and Stanislaus Counties Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area: San Joaquin County Stanislaus County

(5) Fresno County Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area:

Fresno County

(6) Kern County Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, photochemical oxidants and carbon monoxide.

(ii) Geographical composition of area: That portion of Kern County lying in the San Joaquin Valley Air Basin, as defined in the plan.

(7) Tulare County Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area: Tulare County.

(8) South Coast Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, carbon monoxide, photochemical oxidants, and nitrogen dioxide.

(ii) Geographical composition of area:

Orange County Ventura County

Those portions of Los Angeles, Riverside, San Bernardino, and Santa Barbara Counties lying in the South Coast Air Basin, as defined in the plan.

(9) Southeast Desert Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Photochemical oxidants.

(ii) Geographical composition of area: Coachella Valley portion of Riverside County, and that portion of San Bernardino County in the Southeast Air

Basin lying south of latitude 35°10' N and west of longitude 115°45' W.

## Subpart I—Delaware

Section 52.431 is added as follows:

§ 52.131 Maintenance of national standards.

(a) The requirements of § 51.12 (e) of this chapter are not met since the State neither identified areas of the State that have the potential for violation of air quality standards within 10 years nor provided a justification that there are no such areas in the State.

(b) Based upon information available to him, the Administrator does not identify any areas pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of national ambient air quality standards within 10 years.

## Subpart J—District of Columbia

7. Section 52.497 is added as follows:

§ 52.497 Maintenance of national standards.

(a) The requirements of § 51.12 (e) and § 51.5 of this chapter are not met since the District neither identified areas of the District that have the potential for violation of air quality standards within 10 years nor provided a justification that there are no such areas in the District.

(b) The area listed below is hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified area consists of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) National Capital Interstate Air Quality Maintenance Area (District of Columbia Portion).

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, and photochemical oxidants.

(ii) Geographical composition of area: District of Columbia

## Subpart K—Florida

8. Paragraph (c) of § 52.520 is amended by adding the dates May 30, September 25 and November 21, 1974, January 9, March 31, April 9 and April 15, 1975 in chronological order.

9. Section 52.529 is added as follows:

§ 52.529 Maintenance of national standards.

(a) The areas listed below which were identified by the State of Florida are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area, including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Albany Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Dougherty County

(2) Atlanta Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Clayton County Fulton County Cobb County Gwinnett County De Kalb County

(3) Chattanooga Interstate Air Quality Maintenance Area (Georgia Portion).

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Catoosa County Walker County

(4) Savannah Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur

dioxide, and photochemical oxidants.

(ii) Geographical composition of area:

Chatham County

That portion of Liberty County lying in the Savannah Air Basin, as defined in the plan.

That portion of Wayne County lying in the Savannah Air Basin, as defined in the plan.

That portion of McIntosh County lying in the Savannah Air Basin, as defined in the plan.

That portion of Glynn County lying in the Savannah Air Basin, as defined in the plan.

## RULES AND REGULATIONS

(1) Pollutant for which the area is

(ii) Geographical composition of area:

to § 51.12 (e) and (f) of this chapter as having the potential for violation of the

along the township line common to T. 22 S. and T. 23 S. to a point where the

the area identified for particulate matter and photochemical oxidants:

(i) Pollutants for which the area is identified: Particulate matter and sulfur

(d) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area: Cass County

## Subpart R—Kansas

Section 52.833 is added as follows:

52.833 Maintenance of national standards.

(a) The requirements of § 51.12(e) of this chapter are not met since the state did not provide adequate justification that certain areas did not have the potential for violation of an air quality standard within ten years.

(b) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within ten years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions including the territorial area of all municipalities (as defined in Section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delineated.

(1) Kansas City Interstate Air Quality Maintenance Area (Kansas Portion).

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area: Johnson County Wyandotte County

## Subpart S—Kentucky

§ 52.920 [Amended]

13. In § 52.920 paragraph (c)(2) is amended by inserting in proper chronological order the date January 6, 1975.

14. Section 52.929 is added as follows:

§ 52.929 Maintenance of national standards.

(a) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area, including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Cincinnati Interstate Air Quality Maintenance Area (Kentucky Portion).

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants (part).

(ii) (a) Geographical composition of area identified for particulate matter:

Boone County Kenton County Campbell County

(b) Geographical composition of area identified for photochemical oxidants:

Campbell County Kenton County

(2) Evansville Interstate Air Quality Maintenance Area (Kentucky Portion).

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area: Henderson County

(3) Louisville Interstate Air Quality Maintenance Area (Kentucky Portion).

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area: Jefferson County

## Subpart V—Maryland

15. Section 52.1115 is added as follows:

§ 52.1115 Maintenance of national standards.

(a) The requirements of § 51.12(e) of this chapter are not met since the State neither identified areas of the State that have the potential for violation of air quality standards within 10 years nor provided a justification that there are no such areas in the State.

(b) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Baltimore Air Quality Maintenance Area:

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, and photochemical oxidants.

(ii) Geographical composition of area:

Anne Arundel Harford County County Howard County Baltimore County Baltimore City Carroll County

(2) National Capital Interstate Air Quality Maintenance Area (Maryland Portion).

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area:

Montgomery County Prince Georges County

(3) Potomac River Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Allegany County In Washington County, Hagerstown City Garrett County

## Subpart AA—Missouri

§ 52.1320 [Amended]

16. § 52.1320 is amended by inserting the date, "May 6, 1974," in proper chronological order in paragraph (c)(1).

17. Section 52.1338 is added as follows:

§ 52.1338 Maintenance of national standards.

(a) The areas listed below are hereby identified by the Administrator pursuant

to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within ten years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial areas of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Kansas City Interstate Air Quality Maintenance Area (Missouri Portion).

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Cass County Jackson County Clay County Platte County

(2) St. Louis Interstate Air Quality Maintenance Area (Missouri Portion).

(i) Pollutants for which the area is identified: Particulate matter, photochemical oxidants and sulfur dioxide.

(ii) Geographical composition of area:

St. Louis City Jefferson County St. Louis County St. Charles County Franklin County

## Subpart DD—Nevada

18. Section 52.1483 is added as follows:

§ 52.1483 Maintenance of the national standards.

(a) The requirements of § 51.12(e) of this chapter are not met since the State neither identified areas of the State that have the potential for violation of the national air quality standards within 10 years nor provided a justification that there are no such areas in the State.

(b) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of given jurisdictions or described area, including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Las Vegas Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, photochemical oxidants, carbon monoxide.

(ii) Geographical composition of area:

that portion of Clark County beginning at the point where the township line common to T. 18 S. and T. 19 S., Mount Diablo Base and Meridian, intersects the range line common to R. 59 E. and R. 60 E., Mount Diablo Base and Meridian, and running along a line generally east by south to a point two miles south and two miles east of the point where said township line intersects the range line common to R. 63 E. and R. 64 E.; then along a line generally south by west to a point 1½ miles west of the point where the township line common to T. 22 S. and T. 23 S. intersects the range line common to R. 63 E. and R. 63½ E.; then west

along the township line common to T. 22 S. and T. 23 S. to a point where the township line intersects the range line common to R. 59 E. and R. 60 E.; then generally north along the range line common to R. 59 E. and R. 60 E.

(2) Reno Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

That portion of Washoe County which lies south of the township line common to T. 21 N. and T. 22 N., Mount Diablo Base and Meridian.

## Subpart FF—New Jersey

19. Section 52.1602 is added as follows:

§ 52.1602 Maintenance of national standards.

(a) The requirements of § 51.4 and § 51.12(e) of this chapter are not met since the State did not conduct an adequate public hearing on the identification of areas which have the potential for violation of an air quality standard within 10 years.

(b) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Allentown-Bethlehem-Easton Interstate Air Quality Maintenance Area (New Jersey Portion).

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of the area:

Warren County

(2) Atlantic Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of the area:

Atlantic County

(3) Metropolitan Philadelphia Interstate Air Quality Maintenance Area (New Jersey Portion).

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, and photochemical oxidants.

(ii) Geographical composition of the area:

Mercer County Gloucester County Burlington County Salem County Camden County

(4) New Jersey-New York Interstate Air Quality Maintenance Area (New Jersey Portion).

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide (part) and photochemical oxidants.

(ii) (a) Geographical composition of

## RULES AND REGULATIONS

the area identified for particulate matter and photochemical oxidants:

Hudson County Passaic County Essex County Monmouth County Union County Morris County Middlesex County Somerset County Bergen County

(b) Geographical composition of the area identified for sulfur dioxide:

Hudson County Bergen County Essex County Passaic County Union County Monmouth County Middlesex County

(5) Ocean Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of the area:

Ocean County

## Subpart HH—New York

20. In § 52.1670, paragraph (c) is amended by revising subparagraph (3) as follows.

§ 52.1670 Identification of plan.

(c) . . . . .

(3) October 26, and November 27, 1973, and April 29, 1974.

21. Subpart 52.1688 is added as follows:

§ 52.1688 Maintenance of national standards.

(a) The areas listed below which were identified by the State of New York are hereby identified by the Administrator pursuant to § 51.12 (e) and (f), of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Binghamton Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Broome County (part) Town of Conklin Binghamton City Town of Kirkwood Town of Vestal Town of Fenton Town of Union Town of Chenango Town of Bingham-Tioga County (part) Town of Owego

(2) New Jersey-New York Interstate Air Quality Maintenance Area (New York Portion).

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, nitrogen dioxide, carbon monoxide, and photochemical oxidants.

(ii) Geographical composition of area:

New York City Suffolk County Nassau County Westchester County Rockland County

(3) Niagara Frontier Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area: Erie County Niagara County

(4) Utica-Rome Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Herkimer County Town of Trenton (part) Town of Deerfield Town of Schuyler Town of Marcy Town of Frankfort Town of Whites-town Onondaga County Town of West-moerland Utica City Town of New Hart-ford Rome City Town of Lee Town of Floyd Town of Kirkland Town of Paris

(5) Elmira-Corning Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Chemung County Town of Big Flats (part) Steuben County Elmira City (part) Corning City Town of Southport Town of Ashland Town of Elmira Town of Erwin Town of Horse-heads

(6) Rochester Air Quality Maintenance Area.

(i) Pollutant for which the area is designated: Particulate matter.

(ii) Geographical composition of area:

Livingston County Town of East Bloomfield (part) Town of Caledonia Town of Aron Town of Lima Town of Canandaigua Ontario County Monroe County Canandaigua City Wayne County (part) Town of Ontario Town of Walworth Town of Victor Town of Macedon

(7) Jamestown Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Chautauque County Town of Ellery (part) Town of Busti Jamestown City Town of Klanton Town of Chaumont Town of Ellicott Town of North Harmony Town of Poland

(8) Syracuse Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Onondaga County

(9) Capital District Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

## RULES AND REGULATIONS

(ii) Geographical composition of area:

(ii) Geographical composition of area:

as having the potential for violation of the specified air quality standards with-

(9) Reading Air Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area: Arlington County Alexandria City

## RULES AND REGULATIONS

## (ii) Geographical composition of area:

Albany County, excluding the following:  
 Town of Berne  
 Town of Knox  
 Town of Rensselaerville  
 Town of Westerlo  
 Montgomery County (part)  
 Amsterdam City  
 Town of Amsterdam  
 Rensselaer County, excluding the following:  
 Town of Nassau  
 Town of Stephentown

## (10) Mid-Hudson Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

## (ii) Geographical composition of area:

Dutchess County, including the following:

Town of Pawling  
 Town of Dover  
 Town of Union Vale  
 Town of Amsterdam  
 Town of Washington  
 Town of Clinton

Ulster County, including the following:

Town of Woodstock  
 Town of Shandaken  
 Town of Hardenburgh

## Subpart KK—Ohio

22. Paragraph (b) of § 52.1883 is revised to read as follows:

## § 52.1883 Maintenance of national standards.

(b) The areas listed below are identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Akron-Canton Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area:

Portage County  
 Stark County

(2) Cincinnati Interstate Air Quality Maintenance Area (Ohio Portion).

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants.

## (ii) Geographical composition of area:

Butler County  
 Clermont County  
 Hamilton County  
 Warren County

(3) Cleveland Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area:

Cuyahoga County  
 Geauga County  
 Lake County  
 Lorain County

(4) Columbus Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Franklin County

(5) Dayton Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area:

Clark County  
 Greene County  
 Montgomery County

(6) Mansfield Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Richland County

(7) Steubenville Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area:

Belmont County  
 Jefferson County  
 Columbiana County  
 Monroe County

(8) Toledo Interstate Air Quality Maintenance Area (Ohio Portion).

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of the area:

Lucas County  
 Wood County

(9) Youngstown Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of the area:

Mahoning County  
 Trumbull County

## Subpart NN—Pennsylvania

23. Section 52.2036 is added as follows:

## § 52.2036 Maintenance of national standards.

(a) The requirements of §§ 51.4, 51.5, and 51.12(e) of this chapter are not met since the State did not conduct an adequate public hearing on the identification of areas which have the potential for violation of an air quality standard within 10 years and submit such identification by the Governor of Pennsylvania or his designee.

(b) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter

as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Allegheny County Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, and photochemical oxidants.

(ii) Geographical composition of area:

Coincident boundaries with Allegheny County Air Basin as defined in the plan.

(2) Allentown-Bethlehem-Easton Interstate Air Quality Maintenance Area (Pennsylvania Portion).

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with Allentown-Bethlehem-Easton Air Basin as defined in the plan.

(3) Beaver Valley Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area:

Coincident boundaries with Beaver Valley Air Basin as defined in the plan.

(4) Erie Air Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with the Erie Air Basin as defined in the plan.

(5) Harrisburg Air Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with Harrisburg Air Basin as defined in the plan.

(6) Johnstown Air Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with Johnstown Air Basin as defined in the plan.

(7) Lancaster Air Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with Lancaster Air Basin as defined in the plan.

(8) Montongahela Valley Air Basin Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter and sulfur dioxide.

(ii) Geographical composition of area:

Coincident boundaries with Montongahela Valley Air Basin as defined in the plan.

## (9) Reading Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with Reading Air Basin as defined in the plan.

(10) Scranton-Wilkes-Barre Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with Scranton-Wilkes-Barre Air Basin as defined in the plan.

(11) Metropolitan Philadelphia Interstate Air Quality Maintenance Area (Pennsylvania Portion).

(i) Pollutants for which the area is identified: Particulate matter, sulfur dioxide, and photochemical oxidants.

(ii) Geographical composition of area:

Coincident boundaries with Southeast Pennsylvania Air Basin as defined in the plan.

(12) York Air Basin Air Quality Maintenance Area.

(i) Pollutants for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Coincident boundaries with York Air Basin as defined in the plan.

## Subpart RR—Tennessee

24. Section 52.2232 is added as follows:

## § 52.2232 Maintenance of national standards.

(a) The requirements of §§ 51.4 and 51.12(e) are not met since the AQMA identifications were submitted by the State prior to the State public hearing and thus could not have accounted for public comment at that hearing.

(b) The areas listed below are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Chattanooga Interstate Air Quality Maintenance Area (Tennessee Portion).

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area:

Coincident boundaries with Chattanooga Air Basin as defined in the plan.

(2) Lynchburg Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Amherst County  
 Appomattox County  
 Campbell County  
 Lynchburg City

(3) National Capital Interstate Air Quality Maintenance Area (Virginia Portion).

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area:

Coincident boundaries with National Capital Air Basin as defined in the plan.

(4) Norfolk - Portsmouth - Virginia Beach Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Chesapeake City  
 Norfolk City  
 Portsmouth City  
 Suffolk City  
 Virginia Beach City

(5) Petersburg-Colonial Heights-Hopewell Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Prince George County  
 Petersburg City  
 Colonial Heights City  
 Hopewell City

(6) Richmond Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Charles City County  
 Chesterfield County  
 Goochland County  
 Hanover County  
 Henrico County  
 Powhatan County  
 Richmond City

(7) Roanoke Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Botetourt County  
 Craig County  
 Roanoke County  
 Roanoke City  
 Salem City

## (i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of the area:

Hamilton County

(2) Nashville Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Davidson County

Subpart VV—Virginia

§ 52.2420 [Amended]

25. In § 52.2420, paragraph (c) (2) is amended by the insertion, in proper chronological sequence, of the following date: May 7, 1974.

26. Section 52.2449 is added as follows:

## § 52.2449 Maintenance of national standards.

(a) The areas listed below, which were identified by the State of Virginia, are hereby identified by the Administrator pursuant to § 51.12 (e) and (f) of this chapter as having the potential for violation of the specified air quality standards within 10 years. The identified areas consist of the territorial area encompassed by the boundaries of the given jurisdictions or described area including the territorial area of all municipalities (as defined in section 302(f) of the Clean Air Act, 42 U.S.C. 1857h(f)) geographically located within the outermost boundaries of the area so delimited.

(1) Hampton-Newport News Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Gloucester County  
 James City County  
 York County  
 Hampton City  
 Newport News City  
 Williamsburg City

(2) Lynchburg Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Amherst County  
 Appomattox County  
 Campbell County  
 Lynchburg City

(3) National Capital Interstate Air Quality Maintenance Area (Virginia Portion).

(i) Pollutants for which the area is identified: Particulate matter and photochemical oxidants.

(ii) Geographical composition of area:

Coincident boundaries with National Capital Air Basin as defined in the plan.

(4) Norfolk - Portsmouth - Virginia Beach Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Chesapeake City  
 Norfolk City  
 Portsmouth City  
 Suffolk City  
 Virginia Beach City

(5) Petersburg-Colonial Heights-Hopewell Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Prince George County  
 Petersburg City  
 Colonial Heights City  
 Hopewell City

(6) Richmond Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Charles City County  
 Chesterfield County  
 Goochland County  
 Hanover County  
 Henrico County  
 Powhatan County  
 Richmond City

(7) Roanoke Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Botetourt County  
 Craig County  
 Roanoke County  
 Roanoke City  
 Salem City

27. In § 52.2520, paragraph (c) is amended by adding subparagraph (2) as follows:

§ 52.2520 Identification of plan.

(c) \* \* \*

(2) June 13, 1974.

28. Section 52.2526 is added as follows:

§ 52.2526 Maintenance of national standards.

(a) Under the requirements of § 51.12 (e) and (f) of this chapter, the Administrator, in agreement with the State of West Virginia, has identified no areas that have the potential for violation of the national ambient air quality standards within 10 years.

## (ii) Geographical composition of area:

Arlington County  
 Fairfax County  
 Loudoun County  
 Prince William County

Alexandria City  
 Fairfax City  
 Falls Church City

(4) Norfolk - Portsmouth - Virginia Beach Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Chesapeake City  
 Norfolk City  
 Portsmouth City  
 Suffolk City  
 Virginia Beach City

(5) Petersburg-Colonial Heights-Hopewell Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Prince George County  
 Petersburg City  
 Colonial Heights City  
 Hopewell City

(6) Richmond Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Charles City County  
 Chesterfield County  
 Goochland County  
 Hanover County  
 Henrico County  
 Powhatan County  
 Richmond City

(7) Roanoke Air Quality Maintenance Area.

(i) Pollutant for which the area is identified: Particulate matter.

(ii) Geographical composition of area:

Botetourt County  
 Craig County  
 Roanoke County  
 Roanoke City  
 Salem City

Subpart XX—West Virginia

27. In § 52.2520, paragraph (c) is amended by adding subparagraph (2) as follows:

§ 52.2520 Identification of plan.

(c) \* \* \*

(2) June 13, 1974.

28. Section 52.2526 is added as follows:

§ 52.2526 Maintenance of national standards.

(a) Under the requirements of § 51.12 (e) and (f) of this chapter, the Administrator, in agreement with the State of West Virginia, has identified no areas that have the potential for violation of the national ambient air quality standards within 10 years.

## PRIVACY ACT OF 1974

Notice of Systems of Records;  
Supplemental Listing

On August 13, 1975, in accordance with section 3 of the Privacy Act of 1974 (5 U.S.C. 552a(e) (4) and 11)) a proposed notice of systems of records maintained by this Department was issued and published in the FEDERAL REGISTER (40 FR 37640 (1975)). This notice supplements that proposed notice by listing additional systems of records which have been determined to be subject to the requirements of the Privacy Act and is subject to all of the provisions and explanations contained in the earlier notice, except as stated below.

Any interested person may submit written data, views, or arguments on this supplemental listing to the Privacy Act Working Group (Stop 223), Room 4418, United States Department of the Treasury, 1500 Pennsylvania Avenue, NW., Washington, D.C. 20220 on or before September 22, 1975. All written comments received from the public through said date will be considered by the Department before taking action on a final notice. The comments received also will be available for public inspection at the above address between the hours of 9 a.m. and 4 p.m. Monday through Friday (except holidays), as received and until 4 p.m. September 18, 1975.

Effective date: This notice shall be effective September 27, 1975.

Dated: August 22, 1975.

[SEAL] STEPHEN A. GARDINER,  
Acting Secretary of the Treasury.

The Department proposes to adopt the following notice of systems of records:

U.S. DEPARTMENT OF THE TREASURY  
ALPHABETICAL LISTING OF SYSTEMS OF  
RECORDS (ADDITIONS)

August 22, 1975.

## I. OFFICE OF THE SECRETARY

## OFFICE OF PERSONNEL (DEPARTMENTAL)

- 00.243 Job applications.

## THIRTEENTH NATIONAL BANK REGION

- 00.244 Job application forms.

## FIRST NATIONAL BANK REGION

- 00.245 Personnel files.

## SECOND NATIONAL BANK REGION

- 00.246 Personnel files (current employees).

## FIFTH NATIONAL BANK REGION

- 00.247 Personnel files.

## SEVENTH NATIONAL BANK REGION

- 00.248 Personnel files (active).

## EIGHTH NATIONAL BANK REGION

- 00.249 Personnel file.

## NINTH NATIONAL BANK REGION

- 00.250 Personnel file.

## TENTH NATIONAL BANK REGION

- 00.251 Personnel files (active).

## ELEVENTH NATIONAL BANK REGION

- 00.252 Personnel file.

## FOURTH NATIONAL BANK REGION

- 00.253 Personnel file.

## FIFTH NATIONAL BANK REGION

- 00.254 Personnel file.

## SEVENTH NATIONAL BANK REGION

- 00.255 Personnel file.

## FOURTH NATIONAL BANK REGION

- 00.256 Personnel records (active).

## SEVENTH NATIONAL BANK REGION

- 00.257 Personnel records (inactive).

## NINTH NATIONAL BANK REGION

- 00.258 Personnel files (inactive).

## TENTH NATIONAL BANK REGION

- 00.259 Personnel files (inactive).

## SECOND NATIONAL BANK REGION

- 00.260 Personnel files (former employees).

## FIRST NATIONAL BANK REGION

- 00.261 Time and leave register.

## TWELFTH NATIONAL BANK REGION

- 00.262 Travel advance list.

## TREASURY/OS 00.504

## SYSTEM NAME

Summer Employees Listing Treasury/OS.

## LOCATION

Office of the Secretary Personnel Division, Room 1330, Main Treasury Building.

## CATEGORY OF INDIVIDUAL

All Summer Employees within the Office of the Secretary, excluding OASIA.

## CATEGORY OF RECORD

Summer Employees' names, college majors, academic level, grade, position title and office.

## AUTHORITY

Chapter 410 of the Federal Personnel Manual, Subchapter 3, section 3-1, paragraph (b), Section (5).

## ROUTINE USES

Used to determine who is eligible for seminars offered by the Office of the Secretary and the Department. Used also in the preparation of the 113 D Statistics.

## NOTICES

tical Report for the Office of the Secretary. For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

Storage: Names listed on bond paper with respective information and stored in a file cabinet.

Retrievability: Alphabetical listing by name.

Safeguards: This list is used only by the Youth Employment Coordinator or others authorized by Personnel Officer.

Retention and Disposal: Records are kept for one year then are destroyed by burning.

## SYSTEM MANAGER

Carolyn C. Onufrak, Office of the Secretary Personnel Division, Room 1330, Main Treasury Building, 15th and Pennsylvania Avenues, NW., Washington, D.C. 20220.

## NOTIFICATION

See System Manager above.

## ACCESS

See System Manager above.

## CONTEST

See System Manager above.

## SOURCES

Information taken from Official Personnel Folder and SF-171.

## TREASURY/OS 00.505

## SYSTEM NAME

Upward Mobility Program; Counseling Application—Treasury/OS.

## LOCATION

Room 1330, Main Treasury Building, Personnel Division, Office of the Secretary, Department of the Treasury.

## CATEGORY OF INDIVIDUAL

Government employees occupying positions within the Office of the Secretary, occupying GS-7 and below or equivalent, and Wage Board employees below WP-9 and WG-7 positions.

## CATEGORY OF RECORD

Application form reflecting identification of employees, type of position, degree of education and skill, etc.

## AUTHORITY

Affirmative Action Plan.

## ROUTINE USES

Application will be used in conjunction with interviews on Upward Mobility Counseling, to give an idea on what type of training and/or experience the applicant has, and what career goals the applicant may have. For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

Storage—The alphabetized applications are presently kept with other Upward Mobility materials, but will be filed into the Official Personnel Files shortly.

Retrievability—The system is indexed by name.

Safeguards—The applications are kept in a locked file, and will ultimately be inserted into Official Personnel Files which are also kept in locked files.

Retention and Disposal—Maintained on left hand side of personnel folder and are retained until employee leaves Treasury.

## SYSTEMS MANAGER

Upward Mobility Counselor, Room 1325, Main Treasury Building, Office of the Secretary, Department of the Treasury, Washington, D.C.

## NOTIFICATION

Office of the Secretary, Personnel Division, Room 1330, Main Treasury Building, 15th and Pennsylvania Avenue, NW., Washington, D.C. 20220. The employee should submit name and social security number.

## ACCESS

Request for gaining access can be made orally. See access and notification above.

## SOURCES

The information reflected on these applications was obtained from personal data provided by each applicant.

## TREASURY/IRS 00.002

## SYSTEM NAME

Treasury/IRS Correspondence Files (inquiries about enforcement activities)—Treasury/IRS.

## LOCATION

National Office, Regional Offices, District Offices and Service Centers.

## CATEGORY OF INDIVIDUAL

Individuals for whom tax liabilities exist, individuals who have made a complaint or inquiry relative to an Internal Revenue tax matter, or individuals for whom a third party is interceding relative to an Internal Revenue tax matter.

## CATEGORY OF RECORD

Taxpayer name, address, taxpayer identification number (if applicable), information about tax matters (if applicable), chronological investigative history. Other information relative to the conduct of the case and/or the taxpayer's compliance history (if applicable).

## AUTHORITY

5 U.S.C. 301; 26 U.S.C. 7602; 26 U.S.C. 7801, 7802.

## ROUTINE USES

Information contained in this system of records may be disclosed to the Department of Justice in connection with actual or potential criminal prosecution or civil litigation, and in connection with requests for legal advice. Disclosure may be made to other agencies to the extent provided by law or regulation (including 26 U.S.C. 6103 and 26 CFR 301.6103 where applicable) and as necessary to report apparent violations of law to appropriate law enforcement agencies. Information may be disclosed to States, the District of Columbia, the Commonwealth of Puerto Rico, or possessions of the United States, to assist in the administration of tax laws. Disclosure may be made to other parties when necessary in

the administration and enforcement of law as authorized by 26 U.S.C. 7801 and 7802. Disclosure may be made during judicial processes. For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

Storage: Paper records.

Retrievability: Controlled items are generally retrievable by name; some items are not retrievable, depending upon the controls established locally.

Safeguards: Access controls will be not less than provided for by the Physical and Document Security Handbook, IRM 1(16)41.

Retention and Disposal: Disposition varies in accordance with the nature of the correspondence file, but is made in accordance with the Records Disposition Handbook, IRM 1(15)59.

## SYSTEMS MANAGERS

Assistant Commissioners, Regional Commissioners, District Directors and Service Center Directors of Internal Revenue.

## NOTIFICATION

Individuals seeking to determine if the system of records contains a record pertaining to themselves may inquire in accordance with instructions appearing at 31 CFR Part 1, Subpart C, Appendix B. Inquiries should be addressed to the District Director for each District whose records are to be searched. This system may contain some records which are exempt from the notification provisions of the Privacy Act. Requesters will not be advised of the existence of records exempt from the notification provisions.

## ACCESS

Individuals seeking access to any record contained in the system of records or seeking to contest its content, may inquire in accordance with instructions appearing at 31 CFR Part 1, Subpart C, Appendix B. Inquiries should be addressed to the District Director for each District whose records are to be accessed or contested. This system may contain some records which are exempt from the Access and Contest provisions of the Privacy Act. Taxpayers seeking to adjust records which affect the determination of a tax assessment or the balance due, should utilize existing procedures for doing so, as substantive tax matters are not subject to the amendment provisions of the Privacy Act.

## CONTEST

See Access above.

## SOURCES

This system of records contains investigatory material compiled for law enforcement purposes whose sources need not be reported.

A portion of this system of records is exempted elsewhere in the FEDERAL REGISTER.

## TREASURY/CUSTOMS 00.269

## NOTICES

## LOCATION

Financial Management Division, U.S. Customs Service, Region V, 701 Loyola Avenue, New Orleans, Louisiana 70113.

## CATEGORY OF INDIVIDUAL

All Region V personnel to whom travel and other disbursements are made. All individuals who provide goods and services to Region V.

## CATEGORY OF RECORD

Invoices and travel/other vouchers and supporting disbursements schedules.

## AUTHORITY

5 U.S.C. 301; Reorganization Plan No. 1 of 1950; Treasury Department Order No. 165, Revised, as amended.

## ROUTINE USES

The routine uses of the records contained in this system of records are as follows:

(a) Used to substantiate disbursements made;

(b) Disclosure to those officers and employees of the Customs Service and the Department of the Treasury who have a need for the records in the performance of their duties;

(c) Disclosures required in administration of the Freedom of Information Act (5 U.S.C. 552).

For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

**Storage**—File folders in unlocked file cabinets.

**Retrievability**—By name.

**Safeguards**—Usage limited to Regional personnel; cabinets are located in rooms which are locked during non-working hours.

**Retention & Disposal**—In accordance with Records Control Manual; records are disposed of when no longer needed.

## SYSTEM MANAGER

Director, Financial Management Division, U.S. Customs Service, Region V, 701 Loyola Avenue, New Orleans, Louisiana 70113.

## NOTIFICATION

Requests by an individual to be notified if the system of records contains records pertaining to him shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A). The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records

about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## ACCESS

Requests by an individual to be notified how he can gain access to a record pertaining to him contained in a system of records, and how he can contest its content shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A). The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## CONTEST

See Access above.

## SOURCES

Invoices and travel/other vouchers submitted by the individual.

TREASURY/CUSTOMS 00.270

## SYSTEM NAME

Background—Record File of Non-Customs Employees—Treasury/Customs.

## LOCATION

Offices of District Directors, Region IX, Chicago, Illinois—for addresses see Customs Appendix A.

## CATEGORY OF INDIVIDUAL

Present and past non-Customs personnel requiring a background investigation to gain admittance to restricted U.S. Customs premises.

## CATEGORY OF RECORD

Report of background investigations, names, addresses, social security numbers and date and place of birth, etc. of non-Customs employees.

## AUTHORITY

5 U.S.C. 301; Reorganization Plan No. 1 of 1950; Treasury Department Order No. 165, Revised, as amended.

## ROUTINE USES

The routine uses of the records contained in this system of records are as follows:

(a) Disclosure to those officers and employees of the Customs Service and the Department of the Treasury who have a need for the records in the performance of their duties which include ensuring the security of merchandise, contraband and information in Customs custody;

(b) Disclosures required in administration of the Freedom of Information Act (5 U.S.C. 552).

For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

**Storage**—Records are maintained in file folders and stored in file cabinets in each District Director's office within Region IX, Chicago, Illinois.

**Retrievability**—Each file is identified by the name of the non-Customs employee.

**Safeguards**—The file cabinets are maintained within the area assigned to the District Director. During nonworking hours the room and/or building in which the file cabinet is located is locked.

**Retention and Disposal**—These files are retained indefinitely. Employee name data is retained during the period the non-Customs employee requires admittance to restricted areas.

## SYSTEM MANAGER

District Director, as appropriate in Region IX, Chicago, Illinois.

## NOTIFICATION

Requests by an individual to be notified if the system of records contains records pertaining to him shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A), or to the Director, Classification and Value Division, Office of Regulations and Rulings, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229. The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature. If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining

access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## ACCESS

ing access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

Requests by an individual to be notified how he can gain access to a record pertaining to him contained in a system of records, and how he can contest its content shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A), or to the Director, Classification and Value Division, Office of Regulations and Rulings, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229. The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## CONTEST

See Access above.

## SOURCES

The information in this file originates from the individual non-Customs employee working for a private contractor who requires admittance to restricted U.S. Customs premises, from reports of background investigation which include interviews of Customs personnel and private parties and from other Customs internal documents.

## EXEMPTION

The Commissioner of Customs pursuant to this system of records are proposed to exempt this system of records from certain requirements of 5 U.S.C. 552a. The

provisions of 5 U.S.C. 552a from which this system of records are proposed to be exempted and the justification for the exemption is contained in a general notice which appears elsewhere in the FEDERAL REGISTER.

TREASURY/CUSTOMS 00.273

## SYSTEM NAME

Employee Debts—Treasury/Customs.

## LOCATION

Financial Management Division, U.S. Customs Service, John F. Kennedy Federal Building, Boston, Massachusetts 02203.

## CATEGORY OF INDIVIDUAL

Employees involved in transfer within the Government for which the Government is pursuing collection for overpayment of travel expenses or overpayment for maintaining uniforms.

## CATEGORY OF RECORD

Records reflecting the documents involved in the overpayment and correspondence with the employee involved and his representative.

## AUTHORITY

5 U.S.C. 301; Reorganization Plan No. 1 of 1950; Treasury Department Order No. 165, Revised, as amended.

## ROUTINE USES

The routine uses of the records contained in this system of records are as follows:

(a) Disclosure to those officers and employees of the Customs Service and the Department of the Treasury who have a need for the records in the performance of their duties;

(b) Disclosures required in administration of the Freedom of Information Act (5 U.S.C. 552);

(c) In the event that this system of records includes information which indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto;

(d) A record from this system of records may be disclosed as a "routine use" to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit;

(e) A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter;

(f) The system is used by the employees of the Payment Section to gather all the data necessary to collect debts due from present or past employees of Customs.

For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

**Storage**—Data is stored in a file folder located in a file cabinet under the physical security of the Operating Accountant.

**Retrievability**—Records are indexed by name.

**Safeguards**—The file is located within an office that is locked during non-working hours. The building is guarded by uniformed security police and only authorized persons are permitted entry to the building.

**Retention and Disposal**—The file is retained until the debt is collected and then destroyed. Unusual cases are retained indefinitely as a reference for similar type cases.

## SYSTEM MANAGER

Director, Financial Management Division, U.S. Customs Service, John F. Kennedy Federal Building, Boston, Massachusetts 02203.

## NOTIFICATION

Requests by an individual to be notified if the system of records contains records pertaining to him shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A), or to the Director, Classification and Value Division, Office of Regulations and Rulings, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229. The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating

## CATEGORY OF RECORD

File cabinet.

## RETRIEVABILITY

Denver, CO, United States Mint, 320 West Colfax Avenue.  
San Francisco, CA, United States Assay Office, 155 Hermann Street.

Personnel Officer, U.S. Old Mint, 88 Fifth Street, San Francisco, CA 94103.  
Officer-in-Charge, U.S. Bullion Depository, Fort Knox, Ky. 40121.

## NOTICES

that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## ACCESS

Requests by an individual to be notified how he can gain access to a record pertaining to him contained in a system of records, and how he can contest its content shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A), or to the Director, Classification and Value Division, Office of Regulations and Rulings, U.S. Customs Headquarters, 1301 Constitution Avenue, NW., Washington, DC 20229. The requestor will be notified of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## CONTEST

See Access above.

## SOURCES

The information contained in the system originates from the employee, other Regions of Customs, and the Payment Section of the Financial Management Division.

TREASURY/CUSTOMS 00.274

## SYSTEM NAME

Importers, Brokers, Carriers, Individuals and Sureties Master Files—Treasury/Customs.

## LOCATION

Financial Management Division, 7370 NW. 36th Street, Miami, Florida 33166.

## CATEGORY OF INDIVIDUAL

Brokers, Importers, Individuals, Carriers, and Sureties.

## CATEGORY OF RECORD

Copies of correspondence—incoming and outgoing, copies of bonds, entries, bills, data center listings.

## AUTHORITY

5 U.S.C. 301; Reorganization Plan No. 1 of 1950; Treasury Department Order No. 165, Revised, as amended.

## ROUTINE USES

The routine uses of the records contained in this system of records are as follows:

(a) Disclosure to those officers and employees of the Customs Service and the Department of the Treasury who have a need for the records in the performance of their duties;

(b) Disclosures required in administration of the Freedom of Information Act (5 U.S.C. 552);

(c) Used by Revenue technicians to retain in one place all correspondence with a debtor. Bonds, entries and bills when available are included in the file.

For additional routine uses see Treasury Appendix AA.

## RECORD MANAGEMENT POLICY AND PRACTICE

## RECORD MANAGEMENT POLICY AND PRACTICE

**Storage**—Files are maintained in an unlocked drawer within a metal file cabinet.

**Retrievability**—Alphabetical by name appearing on correspondence.

**Safeguards**—The metal container described above is maintained within the area assigned to the Financial Management Division within the Customs Service Building. During non-working hours the room in which the metal container is located is locked.

**Retention and Disposal**—These files are retained until there is no longer any space available for them within the metal container, at which time the oldest files are transferred to the Federal Records Center.

## SYSTEM MANAGER

Director of Financial Management, 7370 NW. 36th Street, Miami, Florida 33166.

## NOTIFICATION

Requests by an individual to be notified if the system of records contains records pertaining to him shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A). The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may

be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## ACCESS

Requests by an individual to be notified how he can gain access to a record pertaining to him contained in a system of records, and how he can contest its content shall be in writing and directed to the Regional Commissioner of the region in which the records are located (see Customs Appendix A). The requestor will be notified in writing of the procedures to be followed. Where the request is presented in person, the requestor shall present adequate identification to establish his identity, and a comparison of his signature and those in the records may be made where the records contain the necessary signature.

If an individual can provide no suitable documents for identification, he may be required to make a signed statement asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000.

Where the request is not presented in person, it shall be accompanied by a notarized statement executed by the requestor asserting identity and stipulating that he understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine up to \$5,000. A comparison of his signature and those in the records may be made where the records contain the necessary signature.

## CONTEST

See Access, above.

## SOURCES

Correspondence, Customs Service Data Center, Districts and Ports.

TREASURY/MINT 00.016

## SYSTEM NAME

Grievances, Union/Agency Negotiated—Treasury/Mint.

## LOCATION

Washington, D.C., Bureau of the Mint, Warner Building, 501-13th Street, N.W. Philadelphia, Pa., United States Mint, Independence Mall.

## NOTICES

Denver, CO, United States Mint, 320 West Colfax Avenue.

San Francisco, CA, United States Assay Office, 155 Hermann Street.

New York, N.Y., U.S. Assay Office, 32 Old Slip Street.

San Francisco, CA, U.S. Old Mint, 88 Fifth Street.

Ft. Knox, Ky., United States Bullion Depository.

West Point, N.Y., West Point Bullion Depository.

## CATEGORY OF INDIVIDUAL

Employees and former employees of the Bureau of the Mint.

## CATEGORY OF RECORD

This system of records contains information or documents relating to employee grievances filed under provisions of negotiated grievance procedures, including decision of appropriate third parties where applicable.

## AUTHORITY

Executive Orders 11491, 11616, 11636 and 11838; negotiated agreements between Mint and exclusively recognized labor unions.

## ROUTINE USES

a. To process an employee grievance, including submission to an arbitrator and appeal to the Federal Labor Relations Council.

b. To refer a question of grievability or arbitrability to appropriate officials of the Department of Labor.

c. To provide information or disclose to the appropriate Federal agency in connection with civil litigation involving the Bureau of the Mint.

d. For additional routine uses see Treasury Appendix AA.

## STORAGE

These records are maintained in file folders or binders.

## RETRIEVABILITY

These records are filed by the names of the individuals on whom they are maintained or by the subject of the grievance.

## SAFEGUARDS

Access to and use of these records are limited to those agency officials whose official duties require such access.

## RETENTION AND DISPOSAL

Retained in accordance with the Bureau of the Mint Records Control Schedules and destroyed in accordance with General Service Administration rules and regulations.

## SYSTEM MANAGER

For current and former employees:

Personnel Officer, Bureau of the Mint, Department of the Treasury, 15th & Pennsylvania Ave., NW., Washington, D.C. 20220.

Personnel Officer, U.S. Mint, Independence Mall, Philadelphia, Pa. 19106.

Personnel Officer, U.S. Mint, 320 Colfax Ave., Denver, Colorado 80204.

Personnel Officer, U.S. Assay Office, 155 Hermann Street, San Francisco, CA 94102.

Personnel Officer, U.S. Assay Office, 32 Old Slip Street, New York, N.Y. 10005.

Personnel Officer, U.S. Old Mint, 88 Fifth Street, San Francisco, CA 94103.

Officer-in-Charge, U.S. Bullion Depository, Fort Knox, Ky. 40121.

Administrative Officer, West Point Bullion Depository, West Point, N.Y. 10996.

## NOTIFICATION

Individuals who have filed a grievance are aware of that fact and have been provided a copy of the record. They may, however, contact the Personnel Officer indicated above regarding the existence of such records pertaining to them. It is necessary to furnish information sufficient to verify the identity of the requester such as full name, date of birth, a brief description of the grievance and the approximate date of submission.

## ACCESS AND CONTEST

Individuals who have filed a grievance about a decision or determination made by an agency or about conditions existing in an agency already have been provided a copy of the record. The contest, amendment, or correction of a grievance record is permitted during the prosecution of the grievance to whom the record pertains. However, after a grievance case has been closed, an individual may gain access to, or contest the official copy of the grievance record by writing the appropriate Personnel Officer indicated above. Individuals should provide their name; date of birth; a brief description of grievance and the approximate date of submission.

## CONTEST

See access above.

## SOURCES

The sources of these records are indicated below.

a. Individual to whom the record pertains.

b. Agency officials.

c. Affidavits or statements from employee(s).

d. Testimonies of witnesses.

e. Official documents and correspondence relating to the grievance.

lic Affairs), other military services, other Army staff agencies and subordinate commands for information about Medal of Honor recipients.

*Systems exempt from certain provisions of the act:* Parts of this system may be exempt under 5 U.S.C. 552a (j) or (k) as applicable. For additional information, contact the system manager.

**Categories of records in the system:** Criminal Investigation Reporting Files (Central Intelligence Division (CID) Files, Police Reports, Police Blotter Entries); General Court Martial Files; Legal Opinion Precedent Files (Military Justice—Youthful and Civilian Offender Files, Commissioner's Court—Adverse Action Files, Military Personnel—Officer and Enlisted Files, estate matters, personal and property injury matters, legal opinions by individual departmental officers and attorneys); Cadet Board Proceeding Files; Legal Assistance Card Files.

**Authority for maintenance of the system:** Title 10, United States Code (U.S.C.), Section 4334.

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** Department of Law—to aid in the preparation of legal opinions and legal assistance work, and to give appropriate guidance in military and civilian investigatory matters and areas of potential litigation.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Paper records in file folders. **Retrievability:** Filed alphabetically by last name of record subject.

**Safeguards:** Records are maintained in areas accessible only to authorized personnel that are properly screened, cleared, and trained.

**Retention and disposal:** Cadet Board Proceeding Files—retained in active file for five years before transfer to USMA Archives for permanent retention; General Court Martial Files—destroyed after three years; Summary and Special Court Martial Files—retained in active file for two years then transferred to the USMA Records Holding Area. Transferred to National Personnel Records Center (Military), 9700 Page Blvd., St. Louis, MO, 63132, after four years, destroyed after ten years; Legal Opinion Precedent Files—records are destroyed periodically when no longer of precedential value; Legal Assistance Card Files—destroyed after four years.

**System manager(s) and address:** Professor and Head of the Department of Law, United States Military Academy, West Point, New York 10996.

**Notification procedure:** Information can be obtained from System Manager.

**Record access procedure:** Written requests for information should contain the full name of the individual, current address and telephone number, and the case (control) number that appears with the office symbol, on all correspondence received from this office. For personal visits, the individual should be able to provide some acceptable identification, that is, driver's license, military identification card, and give some verbal information that could be verified with his "case" folder.

**Contesting record procedures:** The Department's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the System Manager.

**Record source categories:** CID investigation reports, civil and military authority investigation reports, civil and military police blotter entries, summary and special court martial proceedings, youthful and civilian offender misconduct reports, Commissioner's Court adverse action reports, correspondence from military and civilian sources regarding record subject, investigatory records relating to matters of potential litigation, cadet board proceeding investigatory reports.

**Systems exempt from certain provisions of the act:** Parts of this system may be exempt under 5 U.S.C. 552a (j) or (k), as applicable. For additional information, contact the System Manager.

A0412.05aDAIG

**System name:** Press Interest Reference Files.

**System location:** Primary system—Public Information Division, Office of the Chief of Information, Headquarters, Department of the Army (DAIO-PI), Washington, D.C. 20310.

**Decentralized segments:** New York Branch, Office of the Chief of Information, U.S. Army, 663 Fifth Avenue, New York, NY 10033; Los Angeles Branch, Office of the Chief of Information, U.S. Army, 11000 Wilshire Boulevard—Suite 10104, Los Angeles, CA 90024.

**Categories of individuals covered by the system:** Army members and civilians, active and retired and discharged, who are, have been, or are likely to again become the subject of press interest.

**Categories of records in the system:** File contains miscellaneous documents depending on the reason for the individual's coming to the attention of the press. Most common items are query sheets, fact sheets, statements of service, serious incident reports, copies or extracts from investigative reports, news clippings, memoranda and correspondence relating to the individual.

**Authority for maintenance of the system:** Title 10, United States Code, Section 3012.

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** To respond to queries from the press relating to the individual concerned and to respond to queries from the Office of the Assistant Secretary of Defense (Public Affairs) and other agencies or commands in the Army for information about the individual, particularly with respect to the press interest displayed.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Paper records in file folders. **Retrievability:** Filed alphabetically by last name of individual.

**Safeguards:** Building employs security guards. Records are maintained in security containers and accessible only to authorized personnel.

**Retention and disposal:** Records maintained as long as individual seems likely to be a recurring subject of press interest. They are routinely destroyed thereafter.

**System manager(s) and address:** The Office of the Chief of Information, Headquarters, Department of the Army, The Pentagon, Washington, D.C. 20310.

**Notification procedure:** Information may be obtained from: HQDA (DAIO-PI), Room 2E641, The Pentagon, Washington, D.C. 20310, Telephone: Area Code 202/695/5136.

**Record access procedure:** Requests from individuals should be addressed to: Headquarters, Department of the Army (DAIO-PI), Room 2E641, The Pentagon, Washington, D.C. 20310.

**Written requests should include a notarized statement of identity current address and telephone number.**

**Personal visits may be made to any of the three Army Information Offices (Washington, New York, or Los Angeles). Presentation of acceptable identification required.**

**Contesting record procedures:** The Agency's rule for contesting contents and appealing initial determinations by the individual concerned may be obtained from the system manager.

**Record source categories:** Query sheets and fact sheets filed by staff information officers; statements of service from the U.S. Army Military Personnel Center or National Personnel Records Center, serious incident reports through information channels from originating commands, clippings from published media; copies or extracts of investigative reports from investigating agencies to include U.S. Army Inspector General and Auditor General, U.S. Army Criminal Investigation Command, and U.S. Army Assistant Chief of Staff for Intelligence; memoranda and correspondence from miscellaneous sources relating to the individual case.

**Systems exempt from certain provisions of the act:** Parts of this system may be exempt under 5 U.S.C. 552a (j) or (k) as applicable. For additional information, contact the System Manager.

**System name:** Registration and Permit Files.

**System location:** Maintained at the installation level. Official mailing addresses are in the Department of Defense directory in the appendix.

**Categories of individuals covered by the system:** Any citizen registering restricted items of property on a military installation or desiring to engage in restricted activities on a military installation. Items/activities include but are not limited to privately owned firearms/weapons, pets and hunting and fishing.

**Categories of records in the system:** File contains the registration form for items of restricted property and the permit application for restricted activities.

**Authority for maintenance of the system:** Section 3012(g), Title 10 U.S. Code, "Secretary of the Army: powers and duties; delegation by."

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** Files contain information acquired to assist the commander in carrying out effective law

enforcement, troop safety, and crime prevention programs. Routine users within the agency include: commanders in exercising their authority under the provisions of chapter 47, Title 10, U.S. Code, "Uniform Code of Military Justice;" persons designated by the commander to assist him in carrying out his judicial and administrative responsibilities; U.S. Army Criminal Investigation Command; and law enforcement personnel of other Armed services when personnel of these services are involved. Information is furnished to criminal justice elements outside the agency for investigation and prosecution purposes when such cases fall within their jurisdiction or concurrent jurisdiction is applicable. These include: Federal Bureau of Investigation; U.S. Customs Service; Bureau of Alcohol, Tobacco and Firearms; U.S. District Courts; U.S. Magistrates; state and local law enforcement; "wildlife conservation" and public health agencies; and in overseas areas, host government law enforcement agencies.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Paper records in file folders. **Retrievability:** Filed alphabetically by name.

**Safeguards:** Only authorized personnel have access to files. Physical security measures include locked containers/storage areas, controlled personnel access, and continuous presence of authorized personnel.

**Retention and disposal:** Destroyed upon removal of the restricted property from the military installation or upon expiration of the permit.

**System manager(s) and address:** Deputy Chief of Staff for Personnel, Headquarters, Department of the Army, Washington, D.C. 20310.

**Notification procedure:** See Exemptions.

**Record access procedure:** See Exemptions.

**Contesting record procedures:** See Exemptions.

**Record source categories:** See Exemptions.

**Systems exempt from certain provisions of the act:** Parts of this system may be exempt under 5 U.S.C. 552a (j) or (k) as applicable. For additional information, contact the System Manager.

A0509.21aDAPE

**System name:** Local Criminal Information Files.

**System location:** Records are maintained at the installation initiating or collecting the documents. Official mailing addresses are in Department of Defense directory in the appendix.

**Categories of individuals covered by the system:** Any citizen or group of citizens who is suspected or involved in criminal activity directed against or involving the U.S. Army.

**Categories of records in the system:** Files contain reports and supporting documents of criminal activity directed against or involving the U.S. Army.

**Authority for maintenance of the system:** Section 3012(g), Title 10 U.S. Code, "Secretary of the Army: powers and duties; delegation by."

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** Files contain information acquired to assist the commander in carrying out effective law

enforcement, troop safety, and crime prevention programs. A0607.01aDAIG

**System name:** Accident and Incident Files.

**System location:** Data Processing Division, Management Information Systems Directorate, Army Agency for Aviation Safety (USAAAVS).

**Categories of individuals covered by the system:** Aviation Personnel; Flight crews, aviation ground support personnel, supervisory personnel, and others concerned with aircraft involved in accidents or incidents reportable to the Army. Non-Aviation Personnel: Military and civilian personnel who were injured or otherwise involved in an aircraft accident or incident reportable to the Army.

**Categories of records in the system:** File contains individual's background data (such as age, sex, flight qualifications, etc.), medical data (such as injuries and traumas), equipment data (such as helmet worn and its performance), psychological and physiological data, survival, rescue, and escape information, role or involvement in accident or incident.

**Authority for maintenance of the system:** 10 U.S.C. 3012.

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** USAAAVS—Information is collected for accident prevention purposes. Information on involved individuals is used in human behavior studies and factor analyses aimed at identifying and isolating the cause and effect of aviation mishaps, and in the administration of the Department of the Army Broken Wing Aviation Safety Award. Army aviation units are provided information for the issuance of safety awards. Aviator's commander is provided information for selection of instructor pilots and the issuance of individual awards. National Guard units are provided the aircraft accident history of applicants for appointment to aviation positions in the Guard. Information may be provided to appropriate individuals/organizations under the Freedom of Information Act. Information from accident reports is provided aircraft manufacturers solely for accident prevention purposes. Information from accident reports is used to promote aviation safety in articles published by USAAAVS and instructional classes taught by USAAAVS personnel. Various Department of Defense (DOD) Organizations, such as the Air Force and Naval Safety Centers and other Federal agencies, such as the Federal Aviation Administration, are provided information for the pursuit of aviation safety.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:** Aircraft accident reports are privileged documents and contain FOR OFFICIAL USE ONLY markings. The reports cannot be used as evidence or to obtain evidence in deter-

mining the misconduct or line-of-duty status of any personnel; as evidence before evaluation boards; or as evidence to

utilized by the Heads of Departments in evaluating cadets and in evaluating the relative suitability of potential in-

formation for the issuance of safety awards. Aviator's commander is provided information for selection of instructor pilots and the issuance of individual awards. National Guard units are provided the aircraft accident history of applicants for appointment to aviation positions in the Guard. Information may be provided to appropriate individuals/organizations under the Freedom of Information Act. Information from accident reports is provided aircraft manufacturers solely for accident prevention purposes. Information from accident reports is used to promote aviation safety in articles published by USAAAVS and instructional classes taught by USAAAVS personnel. Various Department of Defense (DOD) Organizations, such as the Air Force and Naval Safety Centers and other Federal agencies, such as the Federal Aviation Administration, are provided information for the pursuit of aviation safety.

**Systems exempt from**

mining the misconduct or line-of-duty status of any personnel; as evidence before evaluation boards; or as evidence to determine pecuniary liability (para 7-1d, AR 95-5).

**Storage:** Automated portions of the accident reports are maintained on magnetic tape and magnetic disk and can be made available on computer paper printouts. All portions of the accident report are permanently recorded on roll microfilm.

**Retrievability:** Primary access is through the mishap case number. However, a case may be accessed through a number of identifying elements, such as the date, time, and location of the mishap, the aircraft serial number, the type of aircraft, and similar characteristics. Cases may also be accessed by the name and/or social security account number of involved personnel.

**Safeguards:** Automated files are maintained in the Data Center, a restricted access area with controlled entrances and a sign in register. Only authorized personnel are permitted access. Microfilm and hard copy documents are stored in locked and secure areas.

**Retention and disposal:** Files are maintained indefinitely for use in historical statistical research.

**System manager(s) and address:** Commander, USAAVS.

**Notification procedure:** Information can be obtained by contacting USAAVS, ATTN: IGAR-D, Fort Rucker, AL 36360. Individuals should provide their full name, social security number, dates of military service and any other pertinent information, such as date and location of the mishap, etc.

**Record access procedure:** Individuals should provide their full name, social security number, dates of military service and any other pertinent information, such as date and location of the mishap, etc. This information should be provided to: USAAVS, ATTN: IGAR-D, Fort Rucker, AL 36360.

**Contesting record procedures:** The Agency's rules for contesting contents and appealing initial determinations may be obtained by writing to the SYSMANAGER.

**Record source categories:** Information is compiled from the Technical Report of U.S. Army Aircraft Accident (DA Form 2397 series) and supporting documents.

**Systems exempt from certain provisions of the act:** Parts of this system may be exempt under 5 U.S.C. 552a (j) or (k), as applicable. For additional information contact the System Manager.

A0014.01aNGB

**System name:** Equal Opportunity Investigative Files.

**System location:** Equal Employment Opportunity Branch, National Guard Bureau, NGB-EO, Nassif Building, Room 301, 5611 Columbia Pike, Falls Church, VA 22041.

**Categories of individuals covered by the system:** All National Guard Technicians and military members who have filed complaints of discrimination and those National Guard Technicians and

military members who are involved in these complaints.

**Categories of records in the system:** File contains: Formal complaints of discrimination, counselors reports, notification letters to the complainant, affidavits from the complainant and witnesses, decision on the cases, investigative reports, hearings, complaints examiners findings and recommendations and related correspondence.

**Authority for maintenance of the system:** Title VI Civil Rights Act 1964, Public Law 92-261, Nondiscrimination in the Federal Government.

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** The routine uses are to investigate complaints of discrimination, provide facts to the Adjutant General of a State for issuing a proposed disposition to the complainant, provide information to the Civil Service Commission Complaints Examiner in the Bureau or other agencies to be used in issuing final decision. Provide information to Civil Service Commission Appeals Review Board in making its determination, make data available to National Guard Bureau Legal Officers as required and provide data to the complainants to assist them in making their decisions to accept or reject proposals.

**Policies and practices for storing, retrieving, accessing, and disposing of records in the system:**

**Storage:** The investigative files are maintained as paper records in file folders.

**Retrievability:** Filed by name of complainant and investigation number.

**Safeguards:** Building employs security guards. Records are maintained in cabinets accessible only to authorized personnel that are properly screened, cleared and trained.

**Retention and disposal:** Records are permanent. They are retained in active file until the case is closed by final decision of the agency. Then forwarded to the Washington National Records Center, Suitland, Maryland.

**System manager(s) and address:** Chief, National Guard Bureau, Office of Minority Affairs.

**Notification procedure:** Information may be obtained from: NGB-EO, Room 301, Nassif Building, 5611 Columbia Pike, Falls Church, VA 22041, Telephone, Area Code 202/756-1563.

**Record access procedure:** Requests from individuals should be addressed to: National Guard Bureau, Office of Minority Affairs, Nassif Building, Room 301, 5611 Columbia Pike, Falls Church, VA 22041. For personal visits positive identification is required.

**Contesting record procedures:** The agency's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the SYSMANAGER.

**Record source categories:** Correspondence relating to the complaint, investigative reports by investigators and attached documents, hearing files and attached documents.

**Systems exempt from certain provisions of the act:** None.

A0703.07aDAPE

**System name:** Officer Availability and Civil School Mgt System.

**System location:** Adjutant General (AG) Data Processing Branch, Adjutant General Division, United States Military Academy, West Point, New York 10996.

**Categories of individuals covered by the system:** Any Army officer previously assigned, presently assigned, scheduled for assignment to the United States Military Academy. Additionally, any officer declared temporarily not available, or available for a specific academic year. When a new academic year is begun, these records are removed from the file.

**Categories of records in the system:** File contains name, rank, social security number, branch, status of officer, individual's desires regarding assignment, departments/activities interested in the officer, department/activity to which officer will be assigned, if applicable; school attending or attended for masters or PhD training, and Army Educational Requirements Board number used for schooling and utilization.

**Authority for maintenance of the system:** Section 4334(b), Title 10, Command and Supervision.

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** United States Military Academy—provide information to interested departments/activities on officer's desires and availability. Used as a means to verify status of officer.

Used to prepare requisitioning documents for use at the United States Military Academy and Headquarters, Department of the Army. Used to prepare reports to Headquarters, Department of the Army on utilization of officers. Headquarters, Department of the Army—uses information provided on the requisitioning document (name, rank, branch and social security number) to verify availability and begin preparation of orders for direct assignment or civil schooling. Uses information on utilization reports (name, rank, branch, social security number, Army Educational Requirements Board number assigned against) to verify that officer is being utilized properly (proper discipline).

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Computer Disk.

**Retrievability:** Filed by social security number.

**Safeguards:** Computer disk is maintained in vault when not being used. Disk is maintained in area accessible only to authorized personnel that are properly screened, cleared and trained.

**Retention and disposal:** All records of individuals declared temporarily not available or available and not assigned are destroyed annually. Records of individuals assigned to the United States Military Academy are destroyed on official confirmation of the assignment.

**System manager(s) and address:** Chief, Military Personnel Branch, Adjutant General, Division, United States Military Academy, West Point, New York 10996.

**Notification procedure:** Information may be obtained from: Superintendent, United States Military Academy, ATTN: MAAG-P, West Point, New York 10996.

**Record access procedure:** Requests from individuals should be addressed to: Superintendent, United States Military Academy, ATTN: MAAG-P, West Point, New York 10996. Written requests for information should contain the full name of the individual, current address and telephone number. For personal visits, the individual should be able to provide some acceptable identification, that is, a valid identification card, or driver's license.

**Contesting record procedures:** The agency's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the SYSMANAGER.

**Record source categories:** Commander, United States Army Military Personnel Center, 200 Stoval Street, Alexandria, Virginia 22332.

**Systems exempt from certain provisions of the act:** None.

**Categories of individuals covered by the system:** All currently employed Army and Air National Guard technicians employed under the provisions of 32 U.S.C. 709.

**Categories of records in the system:** Individuals abbreviated personnel records containing basic employment and historical information. Information other than that specified in National Guard Bureau publications will not be maintained in the system. In the event any other information is maintained, the State Adjutant General will be the responsible agent for such information.

**Authority for maintenance of the system:** Executive Order 9397, November 2, 1943.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Used for

providing employment statistics and basic personnel action and official strength accounting data needed in support of selected recurring civilian personnel reports required of the National Guard Bureau by the Departments of the Army and Air Force, Department of Defense, Department of Labor, the U.S. Civil Service Commission, and various staff offices of the National Guard Bureau; and to provide information releasable under Civil Service Commission rules or Freedom of Information Act to the public. Routine uses include strength accounting to insure employment within the Congressional Ceiling, and approved National Guard programs; grade control to insure Office of Management and Budget (OMB) guidelines are adhered to; salary data for current and projected fiscal guidance; technician training (type, cost, completion data); retirement data (age, length of service, retirement coverage) for employment guidance, control and program planning; determining compatibility of Technician Military and Civilian occupations, and production of suspense notices for performance ratings, trainee status, probationary trial period completion date, conversion to career date, conversion to permanent status withingrade due date, length of service due date, not to exceed date and mandatory retirement date. To provide individual records and reports to the Civil Service Commission and to State level Technician Personnel Offices; to provide records and information for internal audit and file maintenance.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:** Current and historical data are contained/stored on magnetic disk and tape subject to access only upon approval by the official custodian and by screened and approved employee(s) in performance of their official duties. Information other than that specified in National Guard Bureau publications will not be maintained in the system. In the event any other information is maintained, the State Adjutant General will be the responsible agent for such information.

**Storage:** Magnetic tapes, disks, computer printouts, microfiche and punch cards.

**Retrievability:** Information is accessed and retrieved by Organization Designation, State/City/County, Social Security Number (SSN), Manning Document, Function Code, Occupation Series, grade/step or similar workforce characteristics, i.e., Work Schedule, Employee Tenure, Physical Handicap Code, Sex, Minority Group, Type of Appointment, Date of Birth, Type of Personnel Action being effected and Retirement System coverage.

**Safeguards:** Accessed by custodians of the system, by employee(s) responsible for servicing the record system in performance of their official duties. Controlled by personnel screening and computer system software.

**Retention and disposal:** Source documents—Standard Form 50 is disposed of as directed by the Civil Service Commission Federal Personnel Manual. Updated

master files contained on either magnetic tape or disks, are maintained as permanent records. Work tapes or disks are cleaned (degaussed) immediately or within 45 days after creation. Computer printouts and microfiche containing selected workforce characteristics (no individual name or SSN contained) are retired to National Guard Records Storage in accordance with Department of the Army Regulation 340-18-8, 14 August 1969. Work copies of computer printouts are retained for 45 days and then destroyed by tearing, shredding, burning or macerating.

**System manager(s) and address:** Chief, Office of Technician Personnel, National Guard Bureau (NGB-TN), Defense Post Office Unit, 5611 Columbia Pike, Falls Church, VA 22041.

Decentralized system managers and addresses—Adjutant General State of Alabama, Attn: Technician Personnel Office, 1720 Federal Drive, PO Box 1311, Montgomery, AL 36102; Adjutant General State of Alaska, Attn: Technician Personnel Office, 610 Mackay Bldg., 338 Denali Street, Anchorage, AK 99501; Adjutant General State of Arizona, Attn: Technician Personnel Office, 5636 East McDowell Road, Phoenix, AZ 85008; Adjutant General State of Arkansas, Attn: Technician Personnel Office, Ft. **Notification procedure:** Information may be obtained from primary system manager or from the Decentralized System Managers.

**Record access procedure:** Individual requests should be addressed to appropriate Decentralized System Manager.

Written request should contain full name of individual, SSN, current address and telephone number. For personal visits requestor must provide name and SSN from an acceptable form such as Drivers License or employee identification card, and give some verbal information that can be verified from his record.

**Contesting record procedures:** The agency's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the system manager.

**Record source categories:** Information received from the employee official personnel folder, and Air Authorization Document, and automated interface with Army and Air Guard Military Personnel Systems.

**Systems exempt from certain provisions of the act:** None.

## A1011.04 DAPE

**System name:** USMA Institutional Research Survey File.

**System location:** Office of the Director of Institutional Research, United States Military Academy (USMA), West Point, New York 10996.

**Categories of individuals covered by the system:** United States Military Academy candidates, cadets and former cadets.

**Categories of records in the system:** Personnel survey data from questionnaires, inventories, psychological tests and similar instruments.

**Authority for maintenance of the system:** Section 4334, Title 10, United States Code.

**Routine uses of records maintained in the system, including categories of users and the purpose of such uses:** Director

of Institutional Research—To conduct institutional research relating to the United States Military Academy.

**Commandant of Cadets:** To evaluate and counsel cadets; to conduct institutional research.

**Surgeon:** To assist in the diagnosis and treatment of hospital patients; to conduct institutional research.

**Director of Admissions:** To evaluate candidate qualifications for admission.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Data are contained on magnetic tape, magnetic discs and punched cards. Selected data collection instruments and computer listings are also maintained.

**Retrievability:** Data are retrieved only as group data by class year, but are filed by class year and cadet number.

**Safeguards:** Data collection instruments, punched cards, and some magnetic tapes are kept in storage room controlled by Administrative Branch Chief or representative during working hours. Area is locked after working hours. Magnetic discs are protected by a user identification and password convention. These discs and some magnetic tapes are kept in the computer room where computer operator is on duty and admittance is to authorized personnel only. Remainder of the tapes are located in a locked vault in the Office of the Director of Institutional Research, under control of Chief, Data Support Branch.

**Retention and disposal:** Data collection instruments are destroyed after 5 years by shredding or burning. Magnetic disc and magnetic tape records are kept for an indefinite period; records are destroyed by conventional binary overwriting.

**System manager(s) and address:** Director of Institutional Research, United States Military Academy, West Point, New York 10996.

**Notification procedures:** Information can be obtained from system manager.

**Record access procedures:** Requests should be addressed to the system manager.

**Contesting record procedures:** The agency's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the system manager.

**Record source categories:** Questionnaires, inventories, psychological tests, and similar instruments administered to subject individuals and processed by the staff of the Office of the Director of Institutional Research.

**Systems exempt from certain provisions of the act:** None.

For the Adjutant General:

R. W. HAMPTON,  
Colonel, US Army, Director of  
Administrative Management,  
TAGCEN.

## INTERNATIONAL TRADE COMMISSION

## PRIVACY ACT OF 1974

## Notice of Systems of Records

Pursuant to Section 3, subsection (e) (4) of the Privacy Act of 1974, 5 U.S.C. 552a (e) (4), the United States International Trade Commission is required to publish Notices of Systems of Records for all systems of records on identifiable individuals maintained by the U.S.I.T.C. Accordingly, the U.S.I.T.C. has identified three systems of records which it maintains on individuals:

I. Employment and Financial Disclosure Records;

II. Budgetary and Payroll-related Records; and

III. Time and Attendance Records.

All other systems of records on identifiable individuals maintained by the U.S.I.T.C. are covered by the notices for government-wide systems of records to be published by the Civil Service Commission before August 27, 1975.

The requisite notices for the three U.S.I.T.C. systems are set forth below:

## I. System name:

EMPLOYMENT AND FINANCIAL DISCLOSURE RECORDS—U.S.I.T.C.

## LOCATION

Deputy Counselor for Employee Responsibilities and Conduct (Assistant to the General Counsel), Office of the General Counsel, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

## CATEGORY OF INDIVIDUAL

1. GS Employees: all current employees of the U.S.I.T.C. at grade 15 and above and all GS-14's employed by the U.S.I.T.C. who are in supervisory positions must file a Confidential Statement of Employment and Financial Interests for government employees.

2. Special Employees: all special employees of the U.S.I.T.C. must file a Confidential Statement of Employment and Financial Interests for Special Government Employees. "Special Government Employee" is defined at 18 U.S.C. 202 and includes, but is not limited to, experts, consultants and advisors hired for temporary duties either on a full-time or intermittent basis.

## CATEGORY OF RECORD

1. GS Employees: This system of records consists of a confidential statement of employment and financial interests. Employees of the U.S.I.T.C. required to file this statement must list the names of all corporations, companies, firms, or other business enterprises, partnerships, non-profit organizations, and educational or other institutions: (a) with which the employee is connected as an employee, officer, owner, director, member, trustee, partner, adviser, or consultant; or (b) in which the employee has any continuing financial interests, through a pension or retirement plan,

## NOTICES

41981

shared income, or other arrangement as a result of any current or prior employment or business or professional association; or (c) in which the employee has any financial interest through the ownership of stock, stock options, bonds, securities, or other arrangements including trusts.

An employee of the U.S.I.T.C. required to file this statement must also list the names of his creditors other than those to whom he may be indebted by reason of a mortgage on property which he occupies as a personal residence or to whom he may be indebted for current and ordinary household and living expenses such as household furnishings, automobiles, education, vacation and similar expenses.

Further, the U.S.I.T.C. employee required to file such a statement must list his interest in real property or rights in lands, other than property which he occupies as a personal residence. If any of the above information is to be supplied by other persons, e.g., trustee, attorney, accountant, relative, the employee must also list the names and addresses of such persons, the date upon which the employee requested that the information be supplied, and the nature of the subject matter involved.

2. Special Employees: this system of records consists of a confidential statement of employment and financial interests for special employees. The special appointee must disclose all other federal agencies and other organizational segments of the U.S.I.T.C. in which he is presently employed. He must also name all corporations, companies, firms, State or local Governmental organizations, research organizations, and educational or other institutions in which he is serving as employee, officer, member, owner, trustee, director, expert, adviser, or consultant, with or without compensation.

The Special Employee must also disclose his financial interests by listing the names of all corporations, companies, firms, or other business enterprises, partnerships, non-profit organizations, and educational or other institutions in which he has any financial interest in any amount through the ownership of stock, stock options, bonds, securities, or other arrangements including trusts.

## AUTHORITY

1. The Confidential Statement of Employment and Financial Interests for GS-employees is required by section 402 of Executive Order 11222, dated May 8, 1965, prescribing standards of ethical conduct for Government officers and employees.

2. The confidential statement of employment and financial interest for special Government employees is required by section 306 of Executive Order 11222.

## ROUTINE USES

These records and information in these records may be used:

a. By the Deputy Counselor for Employee Responsibilities and Conduct to determine whether or not an employee

has a direct or indirect financial interest which conflicts substantially, or appears to conflict substantially, with his U.S.I.T.C. duties or responsibilities.

b. By the Deputy Counselor to determine whether a U.S.I.T.C. employee has engaged in, directly or indirectly, a financial transaction as a result of, or primarily relying on, information obtained through U.S.I.T.C. employment.

c. For review by the Deputy Counselor. The Deputy Counselor is responsible for maintaining these records in confidence and may not disclose information from these records to other persons or agencies except as the Civil Service Commission or the Chairman of the U.S.I.T.C. may determine for good cause shown.

## RECORDS MANAGEMENT POLICY AND PRACTICE

**Storage:**—These records are maintained in folders.

**Retrievability:**—These records are indexed by the names of the individuals on whom they are maintained.

**Safeguards:**—These records are kept in a locked filing cabinet in the office of the Deputy Counselor for Employee Responsibilities and Conduct (Assistant General Counsel), who is the only official with authorized access to them. However, the Statements of Employment and Financial Interest of the Deputy Counselor (Assistant General Counsel) and of his immediate superior (the General Counsel) are submitted directly to the Counselor for Employee Responsibilities and Conduct (one of the U.S.I.T.C. commissioners).

**Retention and Disposal:**—These records are maintained by the Deputy Counselor while the employee is at the U.S.I.T.C. and for 5 years after the employee has left the U.S.I.T.C. Thereupon these records are destroyed.

## SYSTEM MANAGER

Deputy Counselor for Employee Responsibilities and Conduct (Assistant General Counsel), Office of the General Counsel, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

## NOTIFICATION

Director, Office of Personnel and Management Systems (Same address as above).

## ACCESS AND CONTEST

Director, Office of Personnel and Management Systems (Same address as above).

## SOURCES

Information in this system is supplied by the individuals to whom the records pertain.

## II. System name:

## BUDGETARY AND PAYROLL-RELATED RECORDS—U.S.I.T.C.

## LOCATIONS

1. For all budgetary and payroll-related records:

## NOTICES

Office of Financial Management, United States International Trade Commission, 701 E Street, N.W., Washington,

(11) The Comprehensive payroll lists an employee's gross pay, deductions, federal and state taxes, insurance, bonds,

schedules of the U.S.I.T.C. are applicable, such records are retained in accordance with the periods specified therein and

## AUTHORITY

5 U.S.C. 6101.  
G.S.A. Forms 873 and 856-B.

## NOTICES

41983

## SYSTEM MANAGER

Chief, Office of Financial Management, United States International Trade

Whereas the systems of records notices are effective as of the date of this publication for the purposes of 5 U.S.C. 552a

Office of Financial Management, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

2. For activity accounting sheets only: Office of Automatic Data Processing (Same address as above).

## CATEGORY OF INDIVIDUAL

1. Current U.S.I.T.C. employees (e.g. three-year budget cards).
2. Former U.S.I.T.C. employees (e.g. lump-sum leave payments records).

## CATEGORY OF RECORD

This system of records consists of 16 identifiable sub-systems: (1) action cards (of step increases and personnel actions); (2) three-year budget cards; (3) lump-sum leave payments; (4) reassignment and reclassification records; (5) overtime records; (6) financial statements; (7) leave without pay records; (8) records of separations; (9) records of new appointments; (10) the comprehensive payroll; (11) bond listing; (12) the master list of employees; (13) activity accounting sheets; (14) financial aid applications for non-government training; (15) travel vouchers and travel authorizations records.

(1) Action cards contain information as to the dates and amounts of step increases, salary adjustments and promotions.

(2) Three-year budget cards give an employee's basic salary for the preceding year, grade for the current year, dates and amounts of step increases, basic salary at the end of the current year, basic salary in the interim, the activity, division and grade number.

(3) Lump sum leave payments record the amount paid, the number of days involved and are indexed by name and date.

(4) Reassignment and reclassification records are indexed by name and include information on the date of increase, the annual rate, the accumulated increase, the added cost per pay period, the estimated cost, the accumulated cost and the division.

(5) Overtime records are indexed by division and by name and contain information as to an employee's social security number, grade and salary, and the number of hours overtime.

(6) Cost of intermittent employees and consultants records list the hours the individual worked and the amount paid.

(7) Financial statements contain information by division by name which is used in computing the budget.

(8) Leave without pay records list the cumulative amount by pay period and by name.

(9) Records of separations list the date, division, grade, annual salary, accumulated annual salary, rate per pay period, number of pay periods, fiscal year cost, accumulated fiscal year cost, and appointment action.

(10) Records of new appointments contain the same types of information as records of separations.

(11) The Comprehensive payroll lists an employee's gross pay, deductions, federal and state taxes, insurance, bonds, overtime, leave used and accumulated.

(12) The bond listing shows what an employee spent on bonds, the purchase price, denomination, the previous balance, the amount deducted each pay period.

(13) The masterlist of employees contains an employee's grade, current address, all deductions to pay, and the number of hours worked.

(14) Activity accounting sheets contain the employee's name, project number and title.

(15) Financial aid applications for non-government training contain the employee's name, course number, institution, course description, reimbursable costs, tuition, and a listing of all government-sponsored training at non-government facilities which the employee has taken for the past ten years.

(16) Travel vouchers and travel authorizations list expenses which an employee has incurred while travelling on U.S.I.T.C. business, dates, destinations and names.

## AUTHORITY

31 U.S.C. 1 et seq.  
O.M.B. Circular A-11, June, 1975.

## ROUTINE USES

These records are used only for the purpose of computing the budget and keeping a record of certain employees expenses. Certain of these records are also routinely kept by G.S.A. Disclosure of such records to C.S.C. auditors occurs periodically.

## RECORDS MANAGEMENT POLICY AND PRACTICE

Storage—These records are maintained on index cards or in file folders as the case may be. Activity accounting records are maintained in two locations within the agency: The Office of Financial Management and the Office of Automatic Data Processing. A.D.P. punches this information and feeds it, via the U.S.I.T.C. terminal, into the computer for the District of Columbia government. U.S.I.T.C. records in the custody of the D.C. government are maintained on tape in lockable cabinets.

Retrievability—These records are indexed by the names of the individuals on whom they are maintained. In certain instances the social security number and certain dates (e.g. date of step increase) are also used as identifiers.

Safeguards—These records are all kept in lockable metal filing cabinets or secured rooms. Only authorized employees are permitted access to them.

Retention and Disposal—These records are maintained for as long as necessary to fulfill their purpose. For instance, activity accounting records are only useful in computing costs of activities for a particular fiscal year, hence, these records are disposed of, or, in the case of tapes, erased at the end of each year. Where a general records retention and disposal schedule or the records control

schedules of the U.S.I.T.C. are applicable, such records are retained in accordance with the periods specified therein and are disposed of in accordance therewith.

## SYSTEM MANAGER

Chief, Office of Financial Management, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

## NOTIFICATION

Director, Office of Personnel and Management Systems (Same address as above).

## ACCESS AND CONTEST

Director, Office of Personnel and Management Systems (Same address as above).

## SOURCES

Information in this system largely comes from personnel forms completed by the individual and from the original comprehensive payroll, maintained by G.S.A.

## III. System name:

TIME AND ATTENDANCE RECORDS—U.S.I.T.C.

## LOCATIONS

Office of the Chairman  
Office of the Vice-Chairman  
Offices of the other Commissioners  
Office of the Secretary  
Office of the Executive Director  
Office of Financial Management  
Services Division  
Office of the Special Advisor—Trade Agreements  
Office of Economic Research  
Office of the General Counsel  
Office of Investigations  
Office of A.D.P.  
Office of Trade and Industry  
Support Division  
Accounting  
Suitland Office  
New York Office  
Agriculture Division  
Ceramics Division  
Chemicals Division  
Lumber and Paper Division  
Metals Division  
Sundries Division  
Textiles Division  
United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

## CATEGORY OF INDIVIDUAL

All current employees of U.S.I.T.C.

## CATEGORY OF RECORD

This system of records contains an employee's name, address, social security number, service computation date and leave category and is used to compute the employee's attendance by pay period. G.S.A. Form 873 is used to compute attendance on an annual basis and contains information as to the amount of annual leave, sick leave, comp. leave, L.W.O.P., A.W.O.L., military leave and other leave used. G.S.A. form 856-B is used to compute the same information for each two week pay period

## AUTHORITY

5 U.S.C. 6101.  
G.S.A. Forms 873 and 856-B.

## ROUTINE USES

These records are used for the purpose of computing time and attendance for U.S.I.T.C. employees. Such records are routinely sent to G.S.A., the agency which maintains the master records on federal employee attendance.

RECORDS MANAGEMENT POLICY AND PRACTICE  
Storage—These records are maintained on the two forms as aforementioned.

Retrievability—These records are indexed by the name and social security number of the employees on whom they are maintained.

Safeguards—While these records are in the custody of the various division heads within the U.S.I.T.C., they are maintained in lockable metal filing cabinets or in secured rooms.

Retention and Disposal—These records are retained and disposed of in accordance with general records schedules and the records control schedules, as applicable.

## SYSTEM MANAGER

Chief, Office of Financial Management, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

## NOTIFICATION

Director, Office of Personnel and Management Systems (Same address as above).

## ACCESS AND CONTEST

Director, Office of Personnel and Management Systems (Same address as above).

## SOURCES

The individual on whom the record is maintained supplies the data for this system.

PUBLIC COMMENT ON "ROUTINE USES"  
Written comments concerning the "routine use" sections of the above three U.S.I.T.C. systems of records notices are invited from interested persons pursuant to 5 U.S.C. 552a (e) (11). Comments may be presented in writing to the Office of the Secretary, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436. All comments received not later than September 22, 1975, will be considered.

Whereas the systems of records notices are effective as of the date of this publication for the purposes of 5 U.S.C. 552a (e) (4), the "routine use" sections of such notices will become effective on September 27, 1975, the effective date of the Privacy Act, 5 U.S.C. 552a, to give the public a chance to comment on the "routine uses" and to give the U.S.I.T.C. time in which to incorporate the public's suggestions. If the systems of records notices are adopted without change to the "routine uses" sections, the U.S.I.T.C. will publish a brief notice on September 27, 1975, stating that the systems of records declared in this notice are being adopted without change. Where significant changes in systems of records notices are made as a result of public comment on the "routine uses" sections thereof, the U.S.I.T.C. will publish a notice of those systems of records on September 27, 1975, incorporating any such changes.

Issued: August 22, 1975.

By order of the Commission.

KENNETH R. MASON,  
Secretary.

# FEDERAL POWER COMMISSION PRIVACY ACT OF 1974

## Notice of Existence and Character of Systems of Records

### Correction

In FR Doc. 75-22521 appearing at page 39369 in the issue for Wednesday, August 27, 1975, make the following changes:

1. On page 39369, second column, in the 12th line from the bottom, the line "Record source categories" and the line "Systems exempted from certain provisions of the Act" should be deleted.
2. On page 39369, following the deletion of the 12th and 11th lines from the bottom, the words "dicare Programs" should be deleted and the following should be inserted:

FPC-26

System name: Time Distribution Reports-FPC

System location: a. Official copies of these records are located in:

Office of the Comptroller  
Federal Power Commission  
825 North Capitol St., NE.  
Washington, DC 24026

b. Copies of these records are located in the following organizational units of the Federal Power Commission, 825 North Capitol St., NE., Washington, DC 24026:

Office of Special Assistant to the Commissioners  
Office of the Secretary  
Office of Administrative Law Judges  
Office of the General Counsel  
Office of Administrative Operations

# NATIONAL SECURITY COUNCIL PRIVACY ACT OF 1974 Notice of Systems of Records

Pursuant to 5 U.S.C. 552a(e)(4), I submit the following National Security Council notices of systems of records:

Interested persons are invited to submit written comments, suggestions or objections concerning the routine use portions of these notices to the Staff Secretary, National Security Council, Washington, D.C. 20506. All relevant material received before September 15 will be considered prior to final publication of the notices.

Dated: August 27, 1975.

Jeanne W. Davis,  
Staff Secretary.

## NSC 1.1.

System name: CENTRAL RESEARCH INDEX 1.1 -- NSC.

Security classification: TOP SECRET

System location: NSC STAFF SECRETARIAT, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

Categories of individuals covered by the system: U.S. GOVERNMENT OFFICIALS AND MEMBERS OF THE PUBLIC WHO CORRESPOND WITH OR PARTICIPATE IN FOREIGN POLICY DECISION MAKING WITH THE PRESIDENT OR HIS ASSISTANT FOR NATIONAL SECURITY AFFAIRS.

Categories of records in the system: COMPUTERIZED MANAGEMENT RECORDS OF MATERIAL PROCESSED THROUGH THE NSC STAFF SECRETARIAT FOR INDEXING, CONTROL, AND STAFFING.

Authority for maintenance of the system: 50 U.S.C. 401.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: REFERRAL TO GOVERNMENT AGENCIES AS PART OF STATUS DETERMINATIONS ON ACTION REQUESTS OF PARTICULAR AGENCIES.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: MAINTAINED IN COMPUTER STORAGE FORM.

Retrievability: INDEXED BY NAME OF PUBLIC CORRESPONDENT OR U.S. GOVERNMENT SOURCE OR PARTICIPANT.

Safeguards: SAFEGUARDED AS REQUIRED FOR THE CONTROL OF TOP SECRET MATERIALS PURSUANT TO EXECUTIVE ORDER 11652 (37 FR 5207, MARCH 10, 1972) AND AS DESCRIBED IN THE IMPLEMENTING NATIONAL SECURITY COUNCIL DIRECTIVE GOVERNING THE CLASSIFICATION, DOWNGRADING, DECLASSIFICATION AND SAFEGUARDING OF NATIONAL SECURITY INFORMATION OF MAY 17, 1972.

Retention and disposal: SYSTEM CONTAINS BOTH WORKING AND PERMANENT RECORDS. REFERENCES TO INSTITUTIONAL NSC FILES ARE MAINTAINED ON AN ACTIVE FILE WHILE RECORDS WHICH POINT TO PRESIDENTIAL DOCUMENTS ARE RETIRED AT THE CHANGE OF ADMINISTRATION.

System manager(s) and address: STAFF SECRETARY, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506. TELEPHONE: 202-395-3440.

Notification procedure: SAME AS THE ABOVE.

Record access procedures: SAME AS THE ABOVE.

Contesting record procedures: SAME AS THE ABOVE.

Record source categories: DOCUMENTS FURNISHED BY INDIVIDUALS.

Systems exempted from certain provisions of the act: THIS SYSTEM OF RECORDS IS THE INDEX FOR OTHER NSC FILES, EXCEPT AGENCY PERSONNEL RECORDS AND FILES, AND MAY BE EXEMPT FROM THE PROVISIONS OF THE PRIVACY ACT PURSUANT TO 5 U.S.C. 552A (K)(1).

## NSC 1.1.

System name: CENTRAL RESEARCH INDEX 1.1 -- NSC.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

System location: ADMINISTRATIVE OFFICE, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

System manager(s) and address: STAFF SECRETARY, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

Storage: PAPER RECORDS.

Retrievability: THE CENTRAL RESEARCH INDEX (NSC 1.1) IS USED TO IDENTIFY SPECIFIC RECORDS.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

**Storage:** PAPER DOCUMENTS IN FOLDERS FILES BY CONTROL NUMBER ASSIGNED UPON RECEIPT OF THE DOCUMENT. A WORKING COPY OF THE THE DOCUMENT IS MAINTAINED ON MICROFICHE.

**Retrievability:** THE CENTRAL RESEARCH INDEX (NSC 1.1) CONSTITUTES THE INDEX TO THIS FILE.

**Safeguards:** SAFEGUARDED AS REQUIRED FOR THE CONTROL OF TOP SECRET MATERIALS PURSUANT TO E.O. 11652 (37 FR 5207, MARCH 10, 1972) AND AS DESCRIBED IN THE IMPLEMENTING NATIONAL SECURITY COUNCIL DIRECTIVE GOVERNING THE CLASSIFICATION, DOWNGRADING, DECLASSIFICATION, AND SAFEGUARDING THE NATIONAL SECURITY INFORMATION OF MAY 17, 1972.

**Retention and disposal:** RECORDS ARE PERMANENT AND ARE RETAINED IN NSC FILES.

**System manager(s) and address:** STAFF SECRETARY, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506. TELEPHONE: 202-395-3440.

**Notification procedure:** SAME AS THE ABOVE.

**Record access procedures:** SAME AS THE ABOVE.

**Contesting record procedures:** SAME AS THE ABOVE.

**Record source categories:** CORRESPONDENCE WITH MEMBERS OF THE PUBLIC AND U.S. GOVERNMENT OFFICIALS.

**Systems exempted from certain provisions of the act:** (K) (1)

#### NSC 1.3.

**System name:** NSC MEETINGS REGISTRY 1.3 -- NSC.

**Security classification:** SECRET.

**System location:** NSC STAFF SECRETARIAT, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

**Categories of individuals covered by the system:** PARTICIPANTS IN MEETINGS OF THE NSC AND SUBORDINATE BODIES HELD SINCE JANUARY 20, 1969.

**Categories of records in the system:** IDENTIFIES U.S. GOVERNMENT OFFICIALS WHO ATTENDED OR PARTICIPATED IN THESE MEETINGS.

**Authority for maintenance of the system:** 50 U.S.C. 401.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** NONE.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** PAPER RECORDS.

**Retrievability:** THE CENTRAL RESEARCH INDEX (NSC 1.1) IS THE INDEX TO THIS FILE.

**Safeguards:** SAFEGUARDED AS REQUIRED FOR THE CONTROL OF TOP SECRET MATERIALS PURSUANT TO E.O. 11652 (37 FR 5207, MARCH 10, 1972) AND AS DESCRIBED IN THE IMPLEMENTING NATIONAL SECURITY COUNCIL DIRECTIVE GOVERNING THE CLASSIFICATION, DOWNGRADING, DECLASSIFICATION, AND SAFEGUARDING OF NATIONAL SECURITY INFORMATION OF MAY 17, 1972.

**Retention and disposal:** RECORDS ARE PERMANENT AND ARE MAINTAINED IN NSC FILES.

**System manager(s) and address:** STAFF SECRETARY, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

**Notification procedure:** SAME AS THE ABOVE.

**Record access procedures:** SAME AS THE ABOVE.

**Contesting record procedures:** SAME AS THE ABOVE.

**Record source categories:** RECORDS OF NSC MEETINGS.

**Systems exempted from certain provisions of the act:** (K) (1).

#### NSC 1.4

**System name:** AGENCY PERSONNEL RECORDS AND FILES 1.4 -- NSC.

**Security classification:** UNCLASSIFIED.

**System location:** ADMINISTRATIVE OFFICE, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

**Categories of individuals covered by the system:** EMPLOYEES APPOINTED TO THE NSC STAFF AND PAYROLLED FROM NSC FUNDS AND EMPLOYEES OF OTHER AGENCIES DETAILED, EITHER ON A REIMBURSABLE OR NON-REIMBURSABLE BASIS, TO THE NSC STAFF.

**Categories of records in the system:** FOR EACH EMPLOYEE PAYROLLED TO THE NSC STAFF, THE FOLLOWING INFORMATION IS MAINTAINED:

1. OFFICIAL PERSONNEL FOLDER WITH CONTENTS:
  - A. SF-86 SECURITY INVESTIGATION DATA FOR SENSITIVE POSITION.
  - B. SF-171 PERSONNEL QUALIFICATION STATEMENT.
  - C. SF-50 NOTIFICATION OF PERSONNEL ACTION.
  - D. SF-61 OATH OF OFFICE.
  - E. SF-176 LIFE INSURANCE ELECTIVE, DECLINATION OR WAIVER.
  - F. SF-2809-2810 HEALTH BENEFITS FORM.
  - G. TREASURY FORM TUS 426D (OR EQUIVALENT) - PAYROLL CHANGE SLIP, BI-WEEKLY.
  - H. MEMORANDA OF PERFORMANCE RATINGS TOGETHER WITH MEMOS REQUESTING PROMOTION.
- I. LETTERS OF COMMENDATION.
- J. TREASURY FORM TUS 492 - NOTICE OF LEAVE CATEGORY.
- K. SF-2815 EMPLOYEE SERVICE STATEMENT.
- L. SF-1150 RECORD OF LEAVE DATA.
2. SERVICE RECORD CARD - SF-7 HISTORY OF EMPLOYMENT WITH THE AGENCY.
3. RETIREMENT RECORDS - SF-2806 AND 2807, RECORDS OF RETIREMENT MONIES WITHHELD FROM INDIVIDUAL EMPLOYEE'S SALARY.
4. HEALTH BENEFITS - 2809, 2810, AND 2811, RECORD OF INDIVIDUAL'S ENROLLMENT IN ONE OF THE HEALTH PLANS AVAILABLE THROUGH U.S. GOVERNMENT.
5. SF-50 CHRONOS.
6. TERM OF SERVICE RECORDS.

**Authority for maintenance of the system:** 5 U.S.C. 401, U.S. CIVIL SERVICE COMMISSION AUTHORITY, AND, IMPLEMENTING REGULATIONS IN THE FEDERAL PERSONNEL MANUAL.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** AUTHORIZED INVESTIGATIVE PRE-EMPLOYMENT CHECKS.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** PAPER RECORDS IN PERSONNEL JACKETS.

**Retrievability:** INDEXED ALPHABETICALLY FOR OPF'S; SF-7'S; SF-2806, SF-113 - INDEXED BY MONTH AND YEAR.

**Safeguards:** FILED IN COMBINATION SAFES WHICH ARE ACCESSED ONLY BY ADMINISTRATIVE OFFICE PERSONNEL AND WHICH ARE SECURED EACH EVENING.

**Retention and disposal:** OPF RETAINED UNTIL EMPLOYEE LEAVES NSC STAFF BY TRANSFER AT WHICH TIME THE FILE IS SENT TO THE RECEIVING AGENCY. UPON RESIGNATION OR RETIREMENT THE FILE IS SENT TO THE FEDERAL RECORDS CENTER IN ST. LOUIS, MISSOURI. UPON DEATH APPROPRIATE FORMS ARE SUBMITTED AND DISTRIBUTED IN ACCORDANCE WITH CSC REGULATION AND THE REMAINDER OF THE FILE IS SENT TO THE FEDERAL RECORD CENTER IN ST. LOUIS, MISSOURI.

SF-7 RETAINED AS A PERMANENT SERVICE RECORD IN THE AGENCY.  
 SF-2806 AND 2807 FORWARDED TO CFC RETIREMENT OFFICE WHEN EMPLOYEE LEAVES BY TRANSFER, RESIGNATION, RETIREMENT, OR DEATH.  
 SF-113A COPY REMAINS IN AGENCY AND IS DESTROYED AFTER FIVE TO TEN YEARS.  
 TERM OF SERVICE RECORDS COPY REMAINS IN AGENCY FILES WHICH ARE PERIODICALLY PURGED AT THE DISCRETION OF THE ADMINISTRATIVE OFFICE PERSONNEL.

**System manager(s) and address:** STAFF SECRETARY, NATIONAL SECURITY COUNCIL, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, D. C. 20506.

**Notification procedure:** SAME AS ABOVE.

**Record access procedures:** SAME AS THE ABOVE.

**Contesting record procedures:** SAME AS THE ABOVE

**Record source categories:**

SF-171 FROM EMPLOYEE.

SF-186 FROM EMPLOYEE.

ALL OTHER FORMS SHOWN UNDER ITEM ONE ARE STANDARDIZED WITHIN THE U.S. GOVERNMENT AND ARE USED AS DIRECTIVES BY THE CIVIL SERVICE COMMISSION.

**Systems exempted from certain provisions of the act:** NONE.

#### NSC 2.1.

**System name:** PRESIDENTIAL CORRESPONDENCE FILES 2.1 -- NSC.

**Security classification:** UNCLASSIFIED.

**System location:** THE WHITE HOUSE OFFICE, WASHINGTON, D. C. 20500

**Categories of individuals covered by the system:** INDIVIDUALS WHO CORRESPOND WITH THE PRESIDENT OR THE ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS ON ISSUES OF FOREIGN POLICY AND NATIONAL SECURITY AFFAIRS WHOSE CORRESPONDENCE HAS BEEN REFERRED TO THE NSC SECRETARIAT FOR LOGGING, CONTROL, AND STAFFING.

**Categories of records in the system:** CORRESPONDENCE.

**Authority for maintenance of the system:**

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** REFERRAL TO OTHER AGENCIES FOR REQUIRED ASSISTANCE IN RESPONDING TO PUBLIC INQUIRIES.

**Systems exempted from certain provisions of the act:** THESE FILES ARE MAINTAINED BY THE WHITE HOUSE STAFF IN SUPPORT OF THE PRESIDENT AND ARE NOT COVERED BY THE PRIVACY ACT OF 1974 IN THAT UNDER THE PRIVACY ACT THE WHITE HOUSE IS NOT CONSIDERED AN AGENCY.

#### NSC 2.2.

**System name:** PRESIDENTIAL ADVISORY FILES 2.2 -- NSC.

**Security classification:** TOP SECRET.

**System location:** THE WHITE HOUSE, WASHINGTON, D. C. 20500.

**Categories of individuals covered by the system:** INDIVIDUALS, PRIMARILY U.S. AND FOREIGN GOVERNMENT OFFICIALS, WHO CORRESPOND WITH OR PARTICIPATE IN MEETINGS WITH THE PRESIDENT OR THE ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS ON MATTERS OF FOREIGN POLICY.

**Categories of records in the system:** CORRESPONDENCE AND RECORDS OF MEETINGS WITH THE PRESIDENT AND THE ASSISTANT FOR NATIONAL SECURITY AFFAIRS.

**Authority for maintenance of the system:**

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** NONE.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

[FR Doc.75-23203 Filed 8-28-75;9:58 am]

## U.S. INFORMATION AGENCY

## PRIVACY ACT OF 1974

## Notice of Systems of Records

## Correction

In FR Doc. 75-20454 appearing at page 39335 of the issue for Wednesday, August 27, 1975, the system of records which appears on page 39339 in the right-hand column, identified as "USI02", should be deleted and replaced with the following text.

## USIA-8

**System name:** Employee Administrative Files-IBS-USIA

**System location:** U.S. Information Agency, Broadcasting Service, "Voice of America", HEW North Building, 330 Independence Avenue, S.W., Washington, D.C. 20547.

U.S. Information Agency, Broadcasting Service, "Voice of America", Engineering Divisions, 25 'M' Street, S. W., Washington, D.C. 20547.

Also see Appendix II for locations of domestic relay stations.

**Categories of individuals covered by the system:** All "Voice of America" domestic employees and overseas American employees.

**Categories of records in the system:** Records and information pertaining to testing, recruitment and appointment of employees (application forms, fiscal documents covering related expenses); records concerning post-appointment changes in employee skills, qualifications, and experience; copies of SF-50 "Notice of Personnel Action" and payroll change slips.

**Authority for maintenance of the system:** Public Law 402, United States Information and Educational Exchange Act of 1948, as amended.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Files maintained for convenience due to physical separation from Personnel Office; provide necessary background/reference information for use by VOA Administrative Offices in meeting their daily responsibilities of advising on and co-ordinating programming, personnel and fiscal activities relating to recruitment, hiring and employment of staff employees. Also see Prefatory Statement of General Routine Uses.

Information is made available on a need-to-know basis to person-

nel of the U.S. Information Agency as may be required in the performance of their official duties.

These records are not normally available to individuals and agencies outside the U.S. Information Agency, but information may be released to other government agencies who have statutory or other lawful authority to maintain such information.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** All information is retained in document form in file folders.

**Retrievability:** Files are indexed alphabetically by employee name.

**Safeguards:** All files are locked in security-approved file cabinets. Access to files is permitted only to administrative staffs and other top management officials having a need-to-know such information in the normal performance of their duties.

**Retention and disposal:** Files may be retained for up to ten years after departure of employee, then destroyed in accordance with established USIA records disposal procedures. Copies of documents for which originals exist in Official Personnel Folders and which are removed from official personnel folders when an employee resigns, are also removed from administrative files and destroyed.

**System manager(s) and address:** Deputy Assistant Director (USIA), Broadcasting, (Administration), Room G-749, HEW North Building, 330 Independence Avenue, S.W., Washington, D.C. 20547.

**Notification procedure:** Assistant Director (USIA), Public Information, 1750 Pennsylvania Avenue, N.W., Washington, D.C. 20547.

**Record access procedures:** Requests from individuals should be addressed to: Assistant Director (USIA), Public Information, 1750 Pennsylvania Avenue, N.W., Washington, D.C. 20547.

**Contesting record procedures:** The Agency's rules for access and for contesting contents and appealing determinations by the individual concerned appear in the Rules Section of the Federal Register.

**Record source categories:** Information is received from employees (application forms); from employees' supervisors (employees' experience, performance, and recommendations for promotions, etc.); from organizational personnel and fiscal elements (SF-50 personnel actions, payroll change slips, etc.).

Notices  
Meeting. 42035

### DISEASE CONTROL CENTER

Notices  
Meeting:  
Immunization Practices Advisory Committee. 42043

### DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION

Notices  
Meetings:  
Computer Systems Technical Advisory Committee. 42041  
Numerically Controlled Machine Tool Technical Advisory Committee (4 documents). 42040-42042  
Semiconductor Technical Advisory Committee. 42042

### DRUG ENFORCEMENT ADMINISTRATION

Notices  
Registration; actions affecting: York Pharmacy, Inc. 42035  
Schedules of controlled substances; Applications. 42035

### EDUCATION OFFICE

Notices  
Meeting:  
Extension and Continuing Education, National Advisory Council. 42043

### ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

Notices  
Hearings:  
Hewlett-Packard Co. 42044  
ENVIRONMENTAL PROTECTION AGENCY  
Rules  
Air quality implementation plans; Prevention of air quality deterioration. 42011  
Virgin Islands. 42012

## Proposed Rules

Air pollution; standards of performance for new stationary sources:  
Fossil fuel-fired steam generators; opacity provisions. 42028

## Notices

Air pollution; standards of performance for stationary sources:  
Fossil fuel-fired steam generators. 42045

### FEDERAL AVIATION ADMINISTRATION

Rules  
Transition area. 41998  
Proposed Rules  
Airworthiness directive:  
Boeing. 42023  
Contact lenses; visual acuity requirements for medical certificates. 42024  
Transition area. 42025  
VOR Federal airways. 42025

### FEDERAL COMMUNICATIONS COMMISSION

Proposed Rules  
Cable television; application for authorization; correction. 42028  
Telemetry and remote control operations; second erratum. 42028

## Notices

Meetings:  
PBX Technical Standards Subcommittee. 42050  
Ship station licenses; frequency authorization. 42051

### FEDERAL COUNCIL ON THE AGING

Notices  
Meeting. 42043

### FEDERAL HOME LOAN BANK BOARD

Rules  
Federal Home Loan Bank System, Federal Savings and Loan Insurance Corporation, Federal Savings and Loan System:  
Operations; flood insurance. 41996

### FEDERAL INSURANCE ADMINISTRATION

Rules  
National flood insurance program:  
Areas eligible for sale of insurance. 42009

### FEDERAL POWER COMMISSION

Rules  
Information requests; extension of time for response. 42005  
Liquefied natural gas; inclusion of emergency sales under exemption provision. 42005

## Proposed Rules

Rate increase; filing provisions. 42029

## Notices

Environmental impact statements, availability:  
Arkansas Louisiana Gas Co. 42059  
Georgia Power Co. 42051  
United Gas Pipe Line Co. 42060

## CONTENTS

### Hearings, etc.:

Alabama Power Co., et al. 42059  
Algonquin Gas Transmission Co. 42051  
Boston Edison Co. 42051  
Calaveras County Water District. 42052  
Columbia Gas Transmission Corp. 42053  
El Paso Natural Gas Co. 42059  
Natural Gas Pipeline Co. of America (2 documents). 42053, 42054  
Niagara Mohawk Power Corp. (2 documents). 42054  
Northwest Pipeline Corp. (2 documents). 42055, 42060  
Pacific Power & Light Co. 42056  
Roberts, Jr., A. F. 42058  
Stephens, Autry Co., et al. 42058  
Transcontinental Gas Pipe Line Corp. (2 documents). 42056  
United Gas Pipe Line Co. 42057

### FEDERAL PREVAILING RATE ADVISORY COMMITTEE

Notices  
Meetings. 42060

### FEDERAL RESERVE SYSTEM

Proposed Rules  
Discrimination prohibited on basis of sex or marital status; consumer credit protection. 42030

### Title 3—The President

PROCLAMATION 4385

## National Hispanic Heritage Week, 1975

*By the President of the United States of America*

### A Proclamation

Men and women of Hispanic origin—Mexican Americans, Puerto Ricans, Cubans and other Spanish Speaking Americans—have contributed significantly to the growth of America. They have served with courage and distinction in our Armed Forces. In endeavors as varied as music, architecture, medicine, law, education, literature and religion, Hispanic-Americans have contributed wisdom, beauty and spiritual strength.

No manner of tribute to our country's Hispanic heritage could be more appropriate in this Bicentennial year than to acknowledge the importance of the Spanish contribution to the success of our own War of Independence. Spanish-led military forces protected the Colonies' southern front and kept the Mississippi River open for navigation and the delivery of supplies to the Americans in the southwest. Don Bernardo de Galvez, Spanish Captain General and Governor of Spanish Louisiana, led these successful campaigns and, in 1781, captured the heavily fortified city of Pensacola from the British.

The assistance to our Revolution from Galvez and the Hispanic troops he commanded has not always received the recognition it deserved in our history books. But the name Galvez has enjoyed commemoration through the Texas city we know as Galveston.

We can look forward to discovering other contributions from the Hispanic civilization so long and well established in our land and from the millions of Americans of Hispanic origin who enrich our society.

The Congress, by a joint resolution approved September 17, 1968 (82 Stat. 848), requested that a period in September be annually designated in recognition of that heritage.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby designate the week beginning Sep-

PROCLAMATION 4386

# Norwegian-American Day, 1975

*By the President of the United States of America*

## A Proclamation

One hundred and fifty years ago, 47 men, women and children arrived in New York harbor aboard the Norwegian sloop "Restaurationen." Although Norway's links to the New World date back to the 11th century, when Norse mariners led by Leif Erikson discovered Vinland, the arrival of the "Restaurationen" on October 9, 1825, marked the beginning of an important new era in the histories of both Norway and America.

The small group of debarking emigrants were the first of thousands—the earliest wave in a tide of settlers and pioneers who would help to tame a savage wilderness, clear the prairies and cultivate the soil.

Whole new communities would be founded by these Norwegian Americans. Their folklore, music, religious and ethnic traditions were to enrich the cultural heritage of the American people.

In 1975, as we observe the bicentennial of American independence, it is also fitting that we mark the 150th anniversary of the arrival of that first group of settlers from Norway, and express our thanks for the gifts of industry, character and love of the land that they brought with them to their new homes.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim Thursday, October 9, 1975, as Norwegian-American Day in recognition of the enormous contributions Americans of Norwegian ancestry have made, and continue to make, to our Nation and our way of life.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of September, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the two hundredth.

*Gerald R. Ford*

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

### Title 5—Administrative Personnel CHAPTER I—CIVIL SERVICE COMMISSION PART 213—EXCEPTED SERVICE

#### Department of the Army

Section 213.3107 is amended to show that Education Aid positions in the Defense Language Institute which require knowledge of a foreign language are excepted under Schedule A. This section is further amended to show the change in time limitation for foreign language subject-matter specialist positions under Schedule A in the Defense Language Institute from a total of 2 years to a total of 4 years.

Effective on September 10, 1975, § 213.3107 (g) (2) and (g) (5) is revised as set out below:

#### § 213.3107 Department of the Army.

(g) *Defense Language Institute.* . . . .  
(2) Clerical and Education Aid positions (except at the English Language School) whose incumbents are required to have a foreign language knowledge and whose duties require rapid and accurate typing, writing, proofreading or related skills used in the production of foreign language materials.

(5) Foreign language subject-matter specialist positions in the research and development program whose duties require native proficiency in a given foreign language to assist in the development and evaluation of instructional material and methods directly related to the teaching of foreign languages. Initial appointments under this authority may not exceed 1 year, but may be extended for no more than a total of 3 additional 1-year periods with prior approval of the Director, Defense Language Institute.

### Title 7—Agriculture SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

#### PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

##### Miscellaneous Amendments

Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended to add delegations of authority to the Assistant Secretary for International Affairs and

Commodity Programs and the Administrator, Foreign Agricultural Service, for certain foreign market promotion functions under the Egg Research and Consumer Information Act of 1974 and the National Wool Act of 1954, as amended. The amendments are as follows:

1. Section 2.21 is amended by revising paragraph (d) (10) to read as follows:

§ 2.21 Delegations of authority to the Assistant Secretary for International Affairs and Commodity Programs.

(d) *Related to Foreign Agriculture.* . . . .

(10) Plan and carry out programs and activities under the foreign market promotion authority of the Wheat Research and Promotion Act (Public Law 91-430, 7 U.S.C. 1292 note); the Cotton Research and Promotion Act (Public Law 89-502, 7 U.S.C. 2101-2118); Section 610 of the Agricultural Act of 1970 (Public Law 91-524, 7 U.S.C. 2119); the Potato Research and Promotion Act (Public Law 91-670, 7 U.S.C. 2611-2627); the Egg Research and Consumer Information Act of 1974 (Public Law 93-428, 7 U.S.C. 2701-2718); and the National Wool Act of 1954, as amended (7 U.S.C. 1781-1787). This authority includes determining the programs and activities to be undertaken and assuring that they are coordinated with the overall departmental programs to develop foreign markets for U.S. agricultural products.

2. Section 2.68 is amended by revising paragraph (a) (10) to read as follows:

§ 2.68 Administrator, Foreign Agricultural Service.

(a) *Delegations.* . . . .  
(10) Plan and carry out programs and activities under the foreign market promotion authority of the Wheat Research and Promotion Act (Public Law 91-430, 7 U.S.C. 1292 note); the Cotton Research and Promotion Act (Public Law 89-502, 7 U.S.C. 2101-2118); Section 610 of the Agricultural Act of 1970 (Public Law 91-524, 7 U.S.C. 2119); the Potato Research and Promotion Act (Public Law 91-670, 7 U.S.C. 2611-2627); the Egg Research and Consumer Information Act of 1974 (Public Law 93-428, 7 U.S.C. 2701-2718); and the National Wool Act of 1954, as amended (7 U.S.C. 1781-1787). This authority includes determining the programs and activities to be undertaken and assuring that they are coordinated with the overall departmental programs to develop foreign markets for U.S. agricultural products.

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953 (5 U.S.C. Appendix))

Effective Date: August 29, 1975.

Dated: September 5, 1975.

For Subpart C.

EARL L. BUTZ,  
Secretary of Agriculture.

Dated: September 2, 1975.

For Subpart H.

RICHARD E. BELL,  
Assistant Secretary for International Affairs and Commodity Programs.

### CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

(Avocado Regulation 17, Amendment 10)

#### PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

##### Maturity Requirements

This amendment revises the maturity requirements for the Waldin and Black Prince varieties of Avocados. Waldin avocados measuring  $3\frac{1}{16}$  inches or weighing 12 ounces and Black Prince Avocados weighing 23 ounces will be mature and can be shipped on September 8 instead of on September 15. Unseasonal growing conditions in the production area have caused avocados to mature earlier than in prior seasons. Weight or diameter and picking dates are indices used at harvest to assure that avocados are mature and will ripen satisfactorily after picking.

*Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida, effective under the applicable provision of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation of the Avocado Administrative Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the maturity requirements for the handling of avocados, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for the amendment stems from the current avocado crop maturity situation. Maturity studies on the specified varieties completed recently indicate that avocados of such varieties will be mature at the hereinafter specified dates, minimum weights, or diameters.

FEDERAL REGISTER, VOL. 40, NO. 176—WEDNESDAY, SEPTEMBER 10, 1975

### Title 9—Animals and Animal Products

style of canned ripe olives if such olives

Effective date. The foregoing amendments shall become effective September

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of the amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; § 915.317 Avocado Regulation 17.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 75-24026 Filed 9-9-75; 8:45 am]

#### PART 919—PEACHES GROWN IN MESA COUNTY, COLORADO

##### Expenses and Rate of Assessment

This document authorizes expenses of \$1,000 of the Administrative Committee, under Marketing Order No. 919, for the 1974-75 fiscal period and fixes the rate of assessment of \$0.00728 per cwt. of peaches handled in such period to be paid to the committee by each first handler as his pro rata share of such expenses.

On August 1, 1975, notice of rulemaking was published in the FEDERAL REGISTER (40 FR 32338) regarding proposed expenses and the related rate of assessment for the period December 1, 1974, through November 30, 1975, pursuant to the marketing agreement, as amended, and Order No. 919, as amended (7 CFR Part 919), regulating the handling of peaches grown in Mesa County, Colorado. This notice allowed interested persons 18 days during which they could submit written data, views, or arguments pertaining to these proposals. None were submitted. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Administrative Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 919.214 Expenses and rate of assessment.

(a) Expenses. Expenses that are reasonable and likely to be incurred by

and this amendment relieves restrictions on the handling of specified varieties of avocados.

Order. The provisions of subparagraph (a) (2) of § 915.317 (Avocado Regulation 17; 40 FR 24006; 26501; 28048; 29068; 29812; 30793; 32823; 33963; 36299; 38145) are amended by revising in Table I the dates applicable to the Waldin and Black Prince varieties so that after such revision the portion of Table I relating to such varieties of avocados reads as follows:

Variety	Date	Minimum weight or diameter	Date	Minimum weight or diameter	Date	Minimum weight or diameter	Date
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Waldin.....	8-11-75	16 oz. 3 1/8 in.	8-25-75	14 oz. 3 1/8 in.	9-8-75	12 oz. 3 1/8 in.	9-29-75
Black Prince.....	9-9-75	23 oz.	9-29-75	16 oz.	10-20-75		

the Administrative Committee during the period December 1, 1974, through November 30, 1975, will amount to \$1,000.

(b) Rate of assessment. The rate of assessment for said period, payable by each handler in accordance with § 919.41, is fixed at \$0.00728 per cwt. of peaches.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (7 U.S.C. 553) in that (1) shipments of peaches have already begun, (2) the relevant provisions of said marketing agreement and this part require that the rate of assessment herein fixed shall be applicable to all assessable peaches handled during the aforesaid period; and (3) such period began on December 1, 1974, and the rate of assessment herein fixed will automatically apply to all assessable peaches beginning with such date.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674).

Dated: September 5, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 75-24027 Filed 9-9-75; 8:45 am]

#### PART 932—OLIVES GROWN IN CALIFORNIA

##### Grade and Size Requirements

The following amendment of the Rules and Regulations prescribes the grade and size requirements for California olives processed during the 1975-76 crop year for use in the production of limited use styles (halved, quartered, segmented, sliced, chopped, or minced) of canned ripe olives. It relaxes the size requirements that would otherwise apply to such olives during said crop year pursuant to the provisions of the Federal marketing order for olives grown in California.

The publication hereof gives notice of the approval of amendment, as herein-after set forth, of the rules and regula-

tions (Subpart—Rules and Regulations; 7 CFR 932.108-932.161) currently effective pursuant to the applicable provisions of the marketing agreement, as amended, and Order No. 932, as amended (7 CFR Part 932), regulating the handling of olives grown in California, hereinafter referred to collectively as the "order." This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The amendment of said rules and regulations was unanimously recommended by the Olive Administrative Committee, established under said marketing agreement and order as the agency to administer the terms and provisions thereof.

The provisions of paragraphs § 932.52 (a) (2) and (a) (3) of the order specify, in terms of minimum weights for individual olives according to variety, the minimum sizes of processed olives that may be used in the production of Whole and Pitted styles of canned ripe olives. Section 932.52(a) (3) also provides that processed olives smaller than the sizes so prescribed, as recommended annually by the committee and approved by the Secretary, may be authorized for limited use (production of Halved, Quartered, Sliced, Segmented, or Chopped or Minced styles of canned ripe olives) but any such olives shall be not smaller than the applicable size specified in said paragraph (a) (3) except for the tolerances recommended to, and approved by, the Secretary. Pursuant thereto this amendment establishes, for olives from the 1975-76 crop the minimum sizes so specified in said § 932.52(a) (3) and includes a size tolerance of 25 percent for undersize Variety Group 1 olives and 20 percent for undersize Variety Group 2 olives.

This liberalization reflects the committee's appraisal of the 1975-76 olive crop and marketing conditions and are its recommendations for the minimum grade and sizes of olives that will provide consumers with good quality fruit of the styles specified herein and for improving returns to producers pursuant to the declared policy of the act.

It is hereby found that amendment of said rules and regulations, as herein-after set forth, is in accordance with the provisions of the marketing agreement and order, and will tend to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

A new § 932.153a is added reading as follows:

§ 932.153a Establishment of grade and size requirements for processed 1975-76 olives for limited use.

(a) Grade. On and after September 1, 1975, any handler may use processed olives of the respective variety groups in the production of limited use styles of canned ripe olives if such olives were processed after August 31, 1975, and meet the grade requirements specified in § 932.52(a) (1) as modified by § 932.149.

(b) Sizes. On and after September 1, 1975, any handler may use processed olives in the production of limited use

style of canned ripe olives if such olives were processed during the period September 1, 1975, through August 31, 1976, and meet the following requirements:

(1) The processed olives shall be identified and kept separate and apart from any olives processed before September 1, 1975, or after August 31, 1976;

(2) Variety Group 1 olives, except the Ascolano, Barouni, or St. Agostino varieties, shall be of a size which individually weigh 1/90 pound: *Provided*, That not to exceed 25 percent of the olives in any lot or sublot may be smaller than 1/90 pound;

(3) Variety Group 1 olives of the Ascolano, Barouni, or St. Agostino varieties shall be of a size which individually weigh 1/140 pound: *Provided*, That not to exceed 25 percent of the olives in any lot or sublot may be smaller than 1/140 pound;

(4) Variety Group 2 olives, except the Obliza variety, shall be of a size which individually weigh 1/180 pound: *Provided*, That not to exceed 20 percent of the olives in any lot or sublot may be smaller than 1/180 pound;

(5) Variety Group 2 olives of the Obliza variety shall be of a size which individually weigh 1/140 pound: *Provided*, That not to exceed 20 percent of the olives in any lot or sublot may be smaller than 1/140 pound.

It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure and postpone the effective date of this amendment until October 10, 1975 (5 U.S.C. 553), and good cause exists for making the provisions hereof effective at the time hereinafter set forth, in that (1) the time intervening between the date when the information upon which this amendment is based became available and the time such amendment must become effective in order to effectuate the declared policy of the act is insufficient; (2) the handling of the 1975 crop of olives is expected to begin on or about the effective time hereof; (3) compliance with the amended rules and regulations will require of handlers no special preparation thereof which cannot be completed by the effective time hereof; and (4) this amendment relaxes restrictions on the handling of olives.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

It is hereby certified that the economic and inflationary impact of regulation of olives throughout the 1975-76 crop year in the form of grade and size requirements has been carefully evaluated in accordance with OMB Circular A-107.

Dated: September 5, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 75-24028 Filed 9-9-75; 8:45 am]

#### Title 9—Animals and Animal Products

### CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

#### SUBCHAPTER E—VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS: ORGANISMS AND VECTORS

#### PART 112—PACKAGING AND LABELING

#### PART 113—STANDARD REQUIREMENTS

##### Miscellaneous Amendments

● Purpose. To change a reference to a product to conform with a name change and update a list of products authorized to be used as diluents. ●

The name "Pasteurella Bacterin" has been changed to indicate the microorganisms used in the formula. Reference to Pasteurella Bacterin in the label requirements prescribed in § 112.7(f) (1) is incorrect and is corrected by these amendments.

The name "Pasteurella Bacterin" is also incorrect in the list of bacterins authorized to be used as diluents for viral products prescribed in § 113.85(d). These amendments also correct this list.

These amendments further change the list of bacterins authorized to be used as diluents by adding two new bacterins licensed since the list was published. One of them is restricted to use with one or more of the other authorized bacterins.

1. § 112.7 is amended by revising paragraph (f) (1) to read:

§ 112.7 Special additional requirements.

.....

(f) .....  
(1) If in combination with Pasteurella Haemolytica Bacterin or Pasteurella Multocida Bacterin or both, revaccination at 2 to 4 weeks shall be recommended; except that, the revaccination recommendation may be limited to the Pasteurella fraction(s) if a single dose for the other fractions has been established as sufficient for primary immunization.

2. § 113.85 is amended by revising paragraph (d) to read:

§ 113.85 Bacterins, toxoids, and bacterin-toxoids.

.....

(d) Bacterins used as diluents. Bacterins authorized for use as diluents in combination packages include Leptospira Pomona Bacterin, Leptospira Canicola Bacterin, Leptospira Icterohaemorrhagiae Bacterin, Leptospira Grippotyphosa Bacterin, Pasteurella Haemolytica Bacterin, and Pasteurella Multocida Bacterin. Combinations of one or more of the bacterins listed in this paragraph may also be used. Leptospira Hardjo Bacterin may also be used if in combination with one or more of the other authorized bacterins. All serials and subserials of these bacterins shall be subject to the applicable requirements in paragraphs (e) and (f) of this section. (37 Stat. 9 CFR 151-158 U.S.C.)

Effective date. The foregoing amendments shall become effective September 11, 1975.

These amendments correct certain label requirements made necessary by a product name change and authorize the use of additional bacterins as diluents for viral fractions. These amendments should be made effective promptly to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning the amendments are impracticable and unnecessary, and good cause is found for making these amendments effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendments shall become effective upon issuance.

Done at Washington, DC, this 5th day of September 1975.

PIERRE A. CHALOUX,  
Acting Deputy Administrator,  
Veterinary Services, Animal  
and Plant Health Inspection  
Service.

[FR Doc. 75-24029 Filed 9-9-75; 8:45 am]

#### PART 113—STANDARD REQUIREMENTS

##### Miscellaneous Amendments

● Purpose. To make a correction and a conforming change in Standard Requirements. ●

On July 17, 1975, a notice of proposed amendments to Part 113 was published in the FEDERAL REGISTER, Volume 40, Number 138, page 30126.

These amendments correct the reference in § 113.99(c) (2) to the requirements for tetanus antitoxin prescribed in § 113.251 made necessary for the renumbering of § 113.76 as § 113.251.

These amendments make the requirements to be met by the controls in the potency test for tetanus toxoid conform to those in the potency test for tetanus antitoxin.

After due consideration of all relevant matters, including the proposals set forth in the aforesaid notices of rulemaking and the comments and views submitted by such persons, and pursuant to the authority contained in the Virus-Serum-Toxin Act of March 4, 1913 (U.S.C. 151-158), the amendments of Part 113, Subchapter E, Chapter 1, Title 9 of the Code of Federal Regulations, as contained in the aforesaid notices are hereby adopted and are set forth herein subject to the following noted modifications:

Comments were received from two people. A suggestion that the second sentence of paragraph (c) (2) of section 113.99 be reworded was accepted. A second suggestion that the time for deaths of controls in the potency test be extended to 24 hours was also accepted.

Paragraph 112.25 (d) (4) is changed as follows:

(37 Stat. 9 CFR 151-158 U.S.C.)

Loan Bank System, Federal Savings and

§ 545.8-4 of the Federal Regulations, and

The provisions of this section do not ap-

(Sec. 17, 47 Stat. 738, as amended; 12 U.S.C. 1437, Sec. 5, 48 Stat. 132, as amended; 12

Paragraph 113.251 (d) (6) is changed accordingly.

A suggestion that a retest after an unsatisfactory valid potency test was rejected as being unjustified.

Each word in the heading of § 113.99 and in the heading of § 113.251 should be capitalized.

1. Section 113.99 is amended by revising paragraphs (c) (2) and (4) to read: § 113.99 Tetanus toxoid.

(c) . . . .

(2) The pooled serum shall contain at least two antitoxin units per ml as determined by titrating it in the manner prescribed for tetanus antitoxin in § 113.251. A 1:20 dilution of the pooled serum shall be made. The dilution shall be held at 20° to 25° C for 30 minutes prior to combining with a test dose of toxin. The test dose of standard toxin shall be mixed in proper proportion with the diluted pooled serum, incubated at 20° to 25° C for 1 hour and injected subcutaneously into two guinea pigs.

(4) Controls shall be observed until all are dead, or for 6 days, the time of death being recorded in hours. For a satisfactory test, the controls must die with clinical signs of tetanus within 24 hours of each other and within an overall time of 60 to 120 hours with the mean time of death being approximately 96 hours. The clinical signs to be observed are increased muscle tonus, curvature of the spine, asymmetry of the body outline when the resting animal is viewed from above, generalized spastic paralysis, particularly of the extensor muscles, inability to rise from a smooth flat surface when the animal is placed on its side, or any combination of these signs. If the control guinea pigs do not respond in this manner, the entire test shall be repeated. In a valid test, if the animals injected with the serum dilution and toxin mixture do not survive as long as the control animals, the serial is unsatisfactory.

2. Section 113.251 is amended by revising paragraph (d) (6) to read: § 113.251 Tetanus antitoxin.

(d) . . . .

(6) Controls shall be observed until all are dead, or for 6 days, the time of death being recorded in hours. For a satisfactory test, the controls must die with clinical signs of tetanus within 24 hours of each other and within an overall time of 60 to 120 hours with the mean time of death being approximately 96 hours. The clinical signs to be observed are increased muscle tonus, curvature of the spine, asymmetry of the body outline when the resting animal is viewed from above, generalized spastic paralysis, particularly of the extensor muscles, inability to rise from a smooth flat surface when the animal is placed on its side, or any combination of these signs. If the control guinea pigs do not respond in this manner, the entire test shall be repeated.

(37 Stat. 9 CFR 151-158 U.S.C.)

Effective date. These amendments take effect October 13, 1975.

Done at Washington, D.C., this 5th day of September 1975.

PIERRE A. CHALOUX,  
Acting Deputy Administrator,  
Veterinary Services, Animal  
and Plant Health Inspection  
Service.

#### Title 12—Banks and Banking CHAPTER V—FEDERAL HOME LOAN BANK BOARD [No. 75-823]

#### FEDERAL HOME LOAN BANK SYSTEM, FEDERAL SAVINGS AND LOAN SYSTEM, AND FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

##### Amendments Relating to Flood Insurance

SEPTEMBER 3, 1975.

The following summary of the amendments adopted by this resolution is provided for the reader's convenience and is subject to the full explanation in the following preamble and to the specific provisions of the regulations.

##### I. Regulations Prior to Present Amendments.

On or after July 1, 1975, or on or after the end of one year from the time that a community is notified that it is formally identified as a flood-prone community, whichever is later, loans secured by improved real estate and mobile homes which are located in special flood hazard areas are prohibited unless the communities in which such areas are situated are then participating in the national flood insurance program.

##### II. Amended Regulations.

The July 1, 1975, deadline is extended to January 1, 1976, as to loans made to finance acquisitions of previously occupied residential dwellings. There is no extension as to other loans.

##### III. Reason for Amendments.

Conform the regulations to the provisions of section 202(b) of the Flood Disaster Protection Act of 1973 (Public Law 93-234), as amended by section 303 of the Emergency Housing Act of 1975 (Public Law 94-50).

Prior to the amendments made by this resolution, § 523.29(c) of the Regulations for the Federal Home Loan Bank System (12 CFR 523.29(c)) ("Bank Regulations"), § 545.8-4(c) of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 545.8-4(c)) ("Federal Regulations") and § 563.9-6(c) of the Rules and Regulations for Insurance of Accounts (12 CFR 563.9-6(c)) ("Insurance Regulations") provided in substance that on and after July 1, 1975, or on or after the end of one year from the time that a community is notified that it is formally identified by the Department of Housing and Urban Development as a flood-prone community, whichever is later, members of the Federal Home

Loan Bank System, Federal savings and loan associations, and State-chartered institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation shall not make, increase, extend or renew any loan secured by improved real estate or a mobile home located or to be located in an area that has been identified by the Secretary of Housing and Urban Development as an area having special flood hazards unless the community in which such area is situated is then participating in the national flood insurance program.

The principal purpose of the present amendments is to provide in the regulations, in conformity with section 303 of Public Law 94-50, an additional 6-month period for loans to finance acquisitions of previously occupied residential dwellings.

This Resolution also makes three technical changes whereby references to section 303 of the Emergency Housing Act of 1975 are added to § 523.29(a) of the Bank Regulations, § 545.8-4(a) of the Federal Regulations, and § 563.9-6(a) of the Insurance Regulations.

In meeting the Board's statutory responsibilities, the regulations set forth below substantially restate these statutory provisions. However, in order to supply as much guidance as possible at this time, it is the Board's present view that:

(1) The extended time applies only to conventional loans. It does not apply to loans insured or guaranteed by the Federal Housing Administration or the Veterans' Administration.

(2) The phrase "to finance the acquisition of" means the origination of a loan in connection with the sale of a dwelling and does not include the purchase, increase, extension or renewal of a loan.

(3) The phrase "previously occupied residential dwelling" includes any dwelling or dwelling unit intended and used primarily for residential purposes, including apartments occupied by tenants or lessees, single or multiple family residences, mobile homes, condominiums, and cooperatives. At the time the loan is made, the dwelling or dwelling unit whose acquisition is being financed by the loan must either be occupied or have been occupied as a residence by the owner or his tenant.

(4) For the purposes of this regulation, a loan to finance the acquisition of a previously occupied residential dwelling is made at the time a bona fide unconditional commitment is given by the lender. A commitment will be deemed unconditional if only standard conditions are contained therein. For example, if a commitment is given on December 1, 1975 to originate a "qualified" loan, with closing and disbursement scheduled for January 15, 1976, the funds may be disbursed on January 15, 1976, even if the community is not participating in the National Flood Insurance Program as of January 15, 1976.

The Federal Home Loan Bank Board hereby amends paragraphs (a) and (c) of § 523.29 of the Bank Regulations,

§ 545.8-4 of the Federal Regulations, and § 563.9-6 of the Insurance Regulations to read as set forth below, effective September 10, 1975.

Since the above amendments relieve restriction and conform the regulations to the present statutory provisions, the Board hereby finds that notice and public procedure with respect to said amendments are unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553 (b), and since publication of said amendment would, in the opinion of the Board, likewise be unnecessary for the same reason, the Board hereby provides that said amendment shall become effective as hereinbefore set forth.

1. Regulations for the Federal Home Loan Bank System.

##### § 523.29 Flood disaster protection.

(a) General. This section implements, in part, the provisions of subsections (b) and (c) of section 102, subsection (d) of section 201 and subsection (b) of section 202 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), subsection (a) of section 816 of the Housing and Community Development Act of 1974 (P.L. 93-383), and section 303 of the Emergency Housing Act of 1975 (P.L. 94-50). The provisions of this section do not apply retroactively to any loan or commitment related thereto. As used in this section, the term "loan" includes an installment sale contract.

(c) Community participation in insurance program. On and after July 1, 1975 (January 1, 1976, as to a loan to finance the acquisition of a previously occupied residential dwelling), or on or after the end of one year from the time that a community is notified that it is formally identified as a flood-prone community pursuant to the provisions of section 201 of the Flood Disaster Protection Act of 1973, whichever is later, a member, other than a savings bank whose accounts are insured by the Federal Deposit Insurance Corporation, shall not make (including purchase, except as provided in paragraph (e) of this section), increase, extend, or renew any loan secured by improved real estate or a mobile home located or to be located in an area that has been identified by the Secretary of Housing and Urban Development as an area having special flood hazards, unless the community in which such area is situated is then participating in the national flood insurance program.

##### 2. Rules and Regulations for the Federal Savings and Loan System.

##### § 545.8-4 Flood disaster protection.

(a) General. This section implements, in part, the provisions of subsections (b) and (c) of section 102, subsection (d) of section 201 and subsection (b) of section 202 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), subsection (a) of section 816 of the Housing and Community Development Act of 1974 (P.L. 93-383), and section 303 of the Emergency Housing Act of 1975 (P.L. 94-50).

The provisions of this section do not apply retroactively to any loan or commitment related thereto. As used in this section, the term "loan" includes an installment sale contract.

(c) Community participation in insurance program. On and after July 1, 1975 (January 1, 1976, as to a loan to finance the acquisition of a previously occupied residential dwelling), or on or after the end of one year from the time that a community is notified that it is formally identified as a flood-prone community pursuant to the provisions of section 201 of the Flood Disaster Protection Act of 1973, whichever is later, a Federal association shall not make (including purchase, except as provided in paragraph (e) of this section), increase, extend, or renew any loan secured by improved real estate or a mobile home located or to be located in an area that has been identified by the Secretary of Housing and Urban Development as an area having special flood hazards, unless the community in which such area is situated is then participating in the national flood insurance program.

##### 3. Rules and Regulations for Insurance of Accounts.

##### § 563.9-6 Flood disaster protection.

(a) General. This section implements, in part, the provisions of subsections (b) and (c) of section 102, subsection (d) of section 201 and subsection (b) of section 202 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), subsection (a) of section 816 of the Housing and Community Development Act of 1974 (P.L. 93-383), and section 303 of the Emergency Housing Act of 1975 (P.L. 94-50). The provisions of this section do not apply retroactively to any loan or commitment related thereto. As used in this section, the term "loan" includes an installment sale contract.

(c) Community participation in insurance program. On and after July 1, 1975 (January 1, 1976, as to a loan to finance the acquisition of a previously occupied residential dwelling), or on or after the end of one year from the time that a community is notified that it is formally identified as a flood-prone community pursuant to the provisions of section 201 of the Flood Disaster Protection Act of 1973, whichever is later, an insured institution shall not make (including purchase, except as provided in paragraph (e) of this section), increase, extend, or renew any loan secured by improved real estate or a mobile home located or to be located in an area that has been identified by the Secretary of Housing and Urban Development as an area having special flood hazards, unless the community in which such area is situated is then participating in the national flood insurance program.

(Sec. 17, 47 Stat. 738, as amended; 12 U.S.C. 1437, Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464, Secs. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071, Secs. 201(d) and 202(b) of the Flood Disaster Protection Act of 1973, 87 Stat. 982, as amended; 42 U.S.C. 4105, 4106).

By the Federal Home Loan Bank Board.

#### CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

##### PART 703—INVESTMENTS AND DEPOSITS

##### Certificates of Deposit

On page 27260 of the June 27, 1975, edition of the FEDERAL REGISTER (40 FR 27260) there was published a proposed revision of § 703.1 (12 CFR 703.1). The primary purposes of the proposal were (i) to update § 703.1 in light of amendments to 12 CFR 217.4(d) and 329.4(d) which deleted those provisions relating to payment of certificates of deposit before maturity in emergency situations and (ii) to place certificates of deposit purchased by Federal credit unions under the authority of section 107(8) (D) of the Federal Credit Union Act (12 U.S.C. 1757(8) (D)) within the scope of Part 703. Interested persons were given until July 26, 1975, to submit written comments, suggestions and objections regarding the proposed revision. As a result of the comments, the following change has been made:

The following sentence is added at the end of § 703.1(c): "For purposes of this paragraph, the word 'facility' means the home office of a Federal credit union or any suboffice thereof, including but not necessarily limited to a wire service, telephonic station or mechanical teller station."

Accordingly, with the above change, the proposed § 703.1 is adopted as set forth below, effective immediately.

(Sec. 120, 73 Stat. 635, (12 U.S.C. 1766) and Sec. 209, 84 Stat. 1014, (12 U.S.C. 1789))

HERMAN NICKERSON, JR.,  
Administrator.

SEPTEMBER 3, 1975.

##### § 703.1 Certificates of Deposit.

(a) A Federal credit union may invest in or make a deposit evidenced by a time certificate of deposit issued by any of those institutions enumerated in sections 107(8) (D) and 107(9) of the Federal Credit Union Act: Provided,

(1) That such Federal credit union itself makes the investment or deposit for which the certificate is issued; and

(2) That no consideration is received from a third party in connection with the making of the investment or deposit.

(b) A Federal credit union may contract with the issuing institution for payment of the whole or a portion of a certificate of deposit before maturity.

(c) Certificates of deposit issued by union" has been added following the

Title 14—Aeronautics and Space

The National Oceanic and Atmospheric Administration has established and maintained its own public reference fee schedule. The fee schedule established by the

(b) The organizational elements within NOAA are:

(1) The Office of the Administrator.

(c) Certificates of deposit issued by those state chartered financial institutions enumerated in § 107(9) of the Federal Credit Union Act may be obtained by a Federal credit union provided such institutions are operating in accordance with the laws of a state in which the Federal credit union maintains a facility. For purposes of the paragraph, the word "facility" means the home office of a Federal credit union or any suboffice thereof, including but not necessarily limited to a wire service, telephonic station or mechanical teller station.

(d) Negotiable certificates of deposit purchased under this authority may be sold by a Federal credit union to a third party before maturity subject to the appropriate regulations governing the issuing institution involved.

(e) The purpose of a certificate of deposit that does not meet the above provisions is not authorized for Federal credit unions.

[FR Doc. 75-23985 Filed 9-9-75; 8:45 am]

#### PART 760—FLOOD INSURANCE

On pages 29264-29265 of the July 11, 1975, edition of the FEDERAL REGISTER (40 FR 29264-29265) there were published amendments to Part 760 (12 CFR 760) of the National Credit Union Administration regulations in order that they might conform to the provisions of section 201(d) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234).

The Administrator of the National Credit Union Administration considers it necessary to further amend Part 760 (12 CFR 760) in order to conform those regulations to section 303 of the Emergency Housing Act of 1975 (Pub. L. 94-50), which section amends the Flood Disaster Protection Act of 1973, section 202(b). Therefore, pursuant to the authority conferred by section 120, 73 Stat. 635, 12 U.S.C. 1766, and section 209, 84 Stat. 1014, 12 U.S.C. 1789, the Administrator hereby amends Part 760 as set forth below, effective immediately.

The new section 202(b) of Pub. L. 93-234 provides that the effective date of regulations prohibiting the granting or renewal of any loan used to finance the acquisition of a previously occupied residential dwelling in a flood hazard area has been extended from July 1, 1975, to January 1, 1976. Part 760 has therefore been amended to reflect his change by adding at the end of § 760.2(a) the following: "except that a loan which is secured by such property as described above which has been previously occupied need not be in compliance with this regulation until on or after January 1, 1976."

Paragraph (a) of § 760.2 has been further amended to include certain wording inadvertently omitted from that section published at 40 FR 29264. The word "is" has been added after the word "it" in the third line of that section. The phrase "nor federally-insured State credit

union" has been added following the phrase "Federal credit union" in that section.

Due to the fact that the provisions of Pub. L. 94-50 became effective on July 2, 1975, and require a regulatory amendment in conformance with those provisions, and since the amendment is for the benefit of the public, the Administrator has determined that notice and public procedure as to this amendment is impracticable, unnecessary and contrary to the public interest as provided by 5 U.S.C. 553(b). Since publication of such amendment for the 30-day period prior to the effective date of such amendment, as provided by 5 U.S.C. 553(d), is not required for the same reason, the Administrator hereby provides that such amendment shall become effective as previously set forth herein.

(Sec. 120, 73 Stat. 635, (12 U.S.C. 1766) and Sec. 209, 84 Stat. 1014, (12 U.S.C. 1789))

HERMAN NICKERSON, Jr.,  
Administrator.

SEPTEMBER 3, 1975.

Part 760 of the rules and regulations relating to flood insurance, as it appeared in the FEDERAL REGISTER of July 11, 1975, is hereby amended as follows:

1. Section 760.2(a) is amended by adding the word "is" after the word "it" in the third line of that section.

2. Section 760.2(a) is further amended by adding the phrase "nor federally-insured State credit union" following the phrase "Federal credit union."

3. Section 760.2(a) is further amended by inserting the following after the last word of that section: "except that a loan which is secured by such property, as described above, which has been previously occupied need not be in compliance with this regulation until on or after January 1, 1976."

Section 760.2(a), as amended, reads as follows:

§ 760.2 Implementation.

(a) On and after July 1, 1975, (or on or after the end of one year from the time that a community is notified that it is formally identified as a flood-prone community, as provided below, whichever is later) no Federal credit union nor federally-insured State credit union shall make, increase, extend or renew any loan secured by improved real estate or a mobile home located or to be located in an area that has been identified by the Secretary of Housing and Urban Development as an area having special flood hazards unless the community in which such area is situated is then participating in the National Flood Insurance Program, except that a loan which is secured by such property, as described above, which has been previously occupied need not be in compliance with this regulation until on or after January 1, 1976.

[FR Doc. 75-23986 Filed 9-9-75; 8:45 am]

#### Title 14—Aeronautics and Space

#### CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 75-SW-36]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Designation of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate a 700-foot point-in-space transition area south of Galveston, Tex. (offshore).

On July 17, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 30127) stating the Federal Aviation Administration proposed to designate a transition area off the coast of Galveston, Tex.

Interested persons were offered an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.M.T., December 4, 1975, as hereinafter set forth. In § 71.181 (40 FR 441), the following transition area is added:

GALVESTON, TEX. (OFFSHORE)

That airspace extending upward from 700 feet above the surface within a 5-mile radius of coordinates latitude 28°53'00" N., longitude 94°43'00" W.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 8(c), Department of Transportation Act (49 U.S.C. 1855(c)))

Issued in Fort Worth, Tex., on August 29, 1975.

ALBERT H. THURBURN,  
Acting Director, Southwest Region.  
[FR Doc. 75-23961 Filed 9-9-75; 8:45 am]

#### Title 15—Commerce and Foreign Trade

#### CHAPTER IX—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

##### SUBCHAPTER A—GENERAL REGULATIONS

##### PART 903—PUBLIC INFORMATION

##### Specific Requirements

The Department of Commerce revised its rules concerning its responsibilities under the Freedom of Information Act (the "Act") 5 U.S.C. 552) to conform them to amendments to the Act contained in Public Law 93-502 (88 Stat. 1561) such revised rules being published on March 12, 1975, in the FEDERAL REGISTER (40 FR 11531).

The rules of the Department apply to all units in order to assure the maximum amount of uniformity and consistency within the Department in its implementation of the Act. However, individual units may decide to establish their own separate reference facilities although a central address is provided in Appendix B to Part 4 of this title for members of the public who are unfamiliar with the organization of the Department.

The National Oceanic and Atmospheric Administration has established and maintained its own public reference facility in the past and will continue to do so. Its designation and address remains the same. The address is given in § 903.5 (c).

The following regulations update the rules of the National Oceanic and Atmospheric Administration with respect to its responsibility under the Act to conform them to the amendments to the Act and to the Department's revision of its rules.

The regulations establish specific requirements for the making and processing of requests in order to insure compliance with the time limits imposed by the amendments to the Act. Thus, requests for records are required to be clearly marked and correctly addressed by the requester to the responsible organizational element, or if not known, to the NOAA Public Reference Facility so as to enable their timely processing. Although Agency personnel are to forward incorrectly marked and addressed requests promptly to the responsible element, the statutory time limits are not deemed to commence to run until such nonconforming requests either have been actually received at the facility or normally would have been received had due diligence been exercised on the part of receiving Agency personnel.

The rules permit only specifically designated officials to initially deny requests for records, whereas additional officials may approve making records available. The officials authorized to make initial denials are identified in § 903.11.

The determination of appeals from initially denied requests for records has been restricted to the head of the Agency. These determinations are final and a requester may go to court from an adverse determination.

The rules recognize that situations may arise when, despite the exercise of due diligence, the statutory time periods for reply to a request or for determination of an appeal may expire without action. In such cases, the requester is to be notified that it may deem the non-reply to its request to be an initial denial from which it may immediately appeal, and the nondetermination of the appeal to be an exhaustion of administrative remedies enabling the requester to bring immediate suit for judicial review. In each instance, the requester may be asked to defer such appeal or court action while the Agency continues its diligent efforts to process the request. In these instances, a proposed decision date will be furnished to the requester.

The rules make it clear that requests for records or information that are (a) customarily made available to the public as part of NOAA's regular information dissemination activities or (b) provided by the Agency under statutory authorities other than the Act, such as its user charge statute (15 U.S.C. 1525-1527), are not to be considered requests made under the Freedom of Information Act and

will be handled under different procedures and different fee schedules.

The fee schedule established by the Department of Commerce is binding on the Agency. This schedule was published in proposed form by the Department on January 16, 1975 (40 FR 2821) and incorporated, as amended to reflect certain comments, as § 4.9 of 15 CFR Part 4 published in the FEDERAL REGISTER, on March 12, 1975, as noted. This schedule is incorporated as § 903.10 for convenience of reference.

Because this revision pertains to matters of procedure and policy, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are inapplicable. Many of these provisions are necessary to achieve compliance with the amendments to the Freedom of Information Act (5 U.S.C. 552) and Department of Commerce regulations. However, in accordance with the spirit of the public policy set forth in 5 U.S.C. 553 interested persons may submit written comments on these amendments to the Office of the General Counsel, NOAA, U.S. Department of Commerce, Room 5807, Washington, D.C. 20230, no later than September 15, 1975. Arrangements to inspect copies of written comments may be made by writing or calling the Office of General Counsel, 202 967-4980. All comments received in this matter will be evaluated for possible changes in the rules.

In consideration of the above, Part 903 of Title 15, Code of Federal Regulations, is revised as set forth below.

ROBERT M. WHITE,  
Administrator.

Sec.	Scope and purpose.
903.1	Scope and purpose.
903.2	Policies.
903.3	Definitions.
903.4	Publication in the FEDERAL REGISTER.

AUTHORITY: 5 U.S.C. 522 as amended by P.L. 93-502; 5 U.S.C. 553; Reorg. No. 2 of 1965, 15 U.S.C. 311 nt; 32 F.R. 9734, 31 FR 10752.

##### § 903.1 Scope and purpose.

(a) This part revises the rules whereby the materials specified in 5 U.S.C. 552 (a) (2), and the records of all organizational elements within the National Oceanic and Atmospheric Administration (NOAA) requested under 5 U.S.C. 552 (a) (3) are to be made publicly available. This revision is to conform the rules to the requirements of the Freedom of Information Act (5 U.S.C. 552), as amended by Pub. L. 93-502.88, Stat. 1561, effective February 19, 1975.

(b) The organizational elements within NOAA are:

- (1) The Office of the Administrator.
- (2) The Assistant Administrator for Administration.
- (3) The National Weather Service.
- (4) The National Ocean Survey.
- (5) The Environmental Data Service.
- (6) The National Environmental Satellite Service.
- (7) The Environmental Research Laboratories.
- (8) The National Marine Fisheries Service.
- (9) The Associate Administrator for Environmental Monitoring and Prediction.
- (10) The Associate Administrator for Marine Resources.
- (11) The Assistant Administrator for Coastal Zone Management.
- (12) Director, NOAA Corps.
- (13) The Office of Sea Grant.
- (14) The Office of Programs and Budget.

##### § 903.2 Policies.

(a) Department of Commerce Administrative Order 205-12 attached as Appendix A to Part 4 of this title, contains the basic policies and other criteria to be considered in issuing and administering these rules. To the extent that these policies and criteria are not specified in this part or in any supplemental rules of units, they are incorporated by reference.

(b) Requests for records made under 5 U.S.C. 552(a) (3) apply only to existing records, and NOAA is not required, in response to a request, to create records by combining or compiling information contained in existing records, or otherwise to prepare new records. However, agency officials may, upon request, provide or create new information in record form pursuant to user charge statutes, such as 15 U.S.C. 1525-1527, or in accord with authority otherwise provided by law.

##### § 903.3 Definitions.

(a) To the extent that terms used in this part are defined in 5 U.S.C. 551, they shall have the same definition herein.

(b) As used in this part "Act" means the "Freedom of Information Act" as amended, 5 U.S.C. 552.

(c) The organizational elements identified in section 903.1 are defined in Department Organization Order 25-5B (39 FR 17786, as amended).

##### § 903.4 Publication in the Federal Register.

(a) Those materials which are required to be published in the FEDERAL REGISTER pursuant to the provisions of 5 U.S.C. 552(a) (1) have been and will continue to be published in the FEDERAL REGISTER in the form of or included in:

(1) Department Orders of the Department of Commerce, including any supplements and appendices thereto, Secretary of Commerce Circulars, and Department Administrative Orders.

(2) NOAA rules and regulations set copies of these materials can be provided in the NOAA Public Reference Facility

records and, therefore, not under the request, the initial denial, if any, and a statement as to the reasons why the request, the initial denial, if any, and a

(2) NOAA rules and regulations set forth in Chapter IX of Title 15 CFR and Title 50 CFR.

(3) Notices or otherwise in the FEDERAL REGISTER.

(4) Other publications, when incorporated by reference in the FEDERAL REGISTER with the approval of the Director of the FEDERAL REGISTER.

(b) Those materials which are published in the FEDERAL REGISTER pursuant to 5 U.S.C. 552(a) (1) will, to the extent practicable and to further assist the public, be made available for inspection and copying at the facility identified in § 903.5(c).

#### § 903.5 Availability of materials for inspection and copying; indexes.

(a) The Administrator has established and maintains a NOAA Public Reference Facility for the public inspection and copying of:

(1) Final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases;

(2) Statements of policy and interpretations adopted by NOAA and not published in the FEDERAL REGISTER;

(3) Administrative staff manuals and instructions to staff that affect a member of the public;

(4) A current index providing identifying information for the public as to any matter issued, adopted, or promulgated after July 4, 1967, and required to be made available or published by 5 U.S.C. 552(a) (2).

(5) Records of the final votes of each member in every proceeding of NOAA comprised of more than one member, if such final vote shall constitute the final decision of NOAA.

(6) Rules and decisions denying requests for records which otherwise implement or relate to the Act; and

(7) Materials published in the Federal Register pursuant to 5 U.S.C. 552(a) (1) and such additional materials as the NOAA Public Reference Facility may consider desirable and practicable to make available for the convenience of the public.

(b) NOAA may, to prevent a clearly unwarranted invasion of personal privacy, delete identifying details when it makes available or publishes an opinion, statement of policy, interpretation, staff manual or instruction, and will in each such case, explain in writing the justification for the deletion.

(c) The above materials may be inspected in the NOAA Public Reference Facility, Room 523, Building 5, 6010 Executive Boulevard, Rockville, Maryland 20852. Mail to this facility should be addressed as follows: Administrative Documentation Officer (AD161), National Oceanic and Atmospheric Administration, Rockville, Maryland 20852. The telephone number for the facility is Area Code 301, 496-8192. The facility is open to the public Monday through Friday of each week, except on official Federal holidays, between the hours of 9:00 a.m. and 4:30 p.m. There are no fees or formal requirements for such inspections. Photo

copies of these materials can be provided on demand at the prices established in § 903.10.

#### § 903.6 Arrangements for public inspection and copying of disclosable records.

(a) During inspection of the record at the NOAA Public Reference Facility, the requester may copy by hand or have copied any portion of the record, and may obtain certification of a machine-copied record, subject to the fees established in § 903.10.

(b) No changes or alterations of any type may be made to the record being inspected, nor may any matter be added to or subtracted therefrom. Papers bound or otherwise assembled in a record file may not be disassembled by requester during inspection. Staff of the facility shall provide assistance if disassembly of a record is necessary for copying purposes, and is authorized to supervise public inspection as necessary to protect the records. Title 18, United States Code, section 2701(a), makes it a crime to conceal, remove, mutilate, obliterate, or destroy any record filed in any public office, or to attempt to do any of the foregoing.

(c) If a requester does not want to inspect a record by personal visit to the NOAA Public Reference Facility, he may request that a copy thereof be mailed to him, upon payment of the copying and postage fees set forth in § 903.10.

(d) Copies of transcripts of public hearings will be made available for inspection when not in use.

#### § 903.7 Requests for records.

(a) Requests for information customarily made available by one of the organizational elements listed in § 903.1 should be directed to the appropriate office responsible for providing such information to the public. Such information offices are listed in one or more of the following: (1) Various guides and handbooks issued by the Department of Commerce and its operating units, (2) the U.S. Government Manual, and (3) the Department of Commerce Telephone Directory. The latter two publications are for sale by the Superintendent of Documents, Washington, D.C., 20402. Such information is not subject to the fee schedule set forth in section 903.10 of this part and may be subject to fees established under particular statutory authorities (e.g., 15 U.S.C. 1525-1527).

(b) If the appropriate information office is not known, the public should direct its inquiries to the NOAA Public Reference Facility identified in § 903.5(c) or the NOAA Office of Public Affairs, 6010 Executive Boulevard, Rockville, Maryland, 20852. This facility will route the request, if it appears to be for information regularly available, paragraphs (c) through (e) of this section.

(c) A request for a record (or information contained therein) which is not customarily made available to the public as part of the Agency's regular information services, or which is not available

in the NOAA Public Reference Facility shall be made in writing, with the envelope and the letter clearly marked "Freedom of Information Request" or "Request for Records" or the equivalent to distinguish it from other mail. Each such request, so marked, shall be addressed to the organizational element of the Agency identified in § 903.11 which the requester knows or has reason to believe is responsible for the records requested. If the requester is not sure which is the responsible organizational element, the request shall be addressed to the NOAA Public Reference Facility at the address specified in § 903.5(c).

(d) Any request for records deemed to be a Freedom of Information Request and which is not marked and addressed as specified in paragraph (c) of this section will be so marked and addressed by Agency personnel and forwarded immediately to the responsible organizational element. A request which is improperly addressed by the requester will not be deemed to have been "received," for purposes of the time period for processing a request for records set forth in 5 U.S.C. 552(a) (6), until the earlier of either (1) the time that forwarding of the request to the responsible organizational element has been effected, or (2) the time such forwarding would have been effected had due diligence been exercised by Agency personnel. In each instance when a request is so forwarded, the receiving element shall notify the requester that the request was improperly addressed and of the date the request was received.

(e) A request for records shall sufficiently identify the records requested to enable Agency personnel familiar with the subject matter to locate them with a reasonable amount of effort. The requester shall, to the extent possible, furnish specific descriptive information regarding dates and places the records were made, the file descriptions, subject matter, persons involved, and other pertinent details that will help identify the records. If the request relates to a matter in pending litigation, the court location and case shall be identified. When more than one record is requested, the request shall clearly describe each specific record, and the specific information requested which is contained in a record, so that its availability may be separately determined. Employees at the facility will assist the public to a reasonable extent in framing a request.

#### § 903.8 Initial determinations of availability of records.

(a) Upon receipt of a request for any record, the responsible element or the NOAA Public Reference Facility shall promptly log the receipt of the request, and within ten days of its receipt (excepting Saturdays, Sundays, and legal public holidays) shall initially determine:

(1) Whether the request is for records under the Act, is for materials available otherwise than under the Act, or is for information not contained in existing

records and, therefore, not under the Act. The responsible organizational element shall promptly notify the requester in writing how the request is being handled when it does not come within the Act.

(2) Whether the records requested are reasonably described and can be located on the basis of the information supplied by the requester. If any of the records requested cannot be identified and located from the information furnished, the responsible organizational element shall promptly so inform the requester in writing, specifying what additional identification is needed to assist in locating the record, and offering to assist the requester to reformulate the request. A categorical request, i.e., one for all records falling within a reasonably specific but broad category, shall be regarded as conforming to the statutory requirement that records be reasonably described, if the particular records can be identified, searched for, collected and produced without unduly burdening or disrupting the Agency's operations.

(3) Whether the records no longer exist, or are not in the Agency's possession. In each instance, the requester shall be promptly notified in writing.

(b) An authorized official shall review the request to determine the availability of the records requested.

(1) The determination shall be made within ten days (excluding Saturdays, Sundays and legal public holidays) of the receipt of the request (as defined in § 903.7(d)), unless the time is extended as provided in paragraph (b) (2) of this section.

(2) In unusual circumstances, an official authorized to make initial denials of requests may extend the time for initial determination for up to ten days (excluding Saturdays, Sundays and legal public holidays) by written notice to the requester setting forth the reasons for the extension and the date on which a determination is expected to be dispatched. Extensions of time for the initial determination and extension of time on appeal may not exceed a total of ten days, and time taken for the former counts against available appeal extension time. "Unusual circumstances" means, but only to the extent reasonably necessary to the processing of a particular request: (i) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request; (ii) the need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or (iii) the need for consultation, which shall be conducted with all practical speed, with another agency having a substantial interest in the determination of the request, or among two or more components of the agency having substantial subject-matter interest therein.

(3) If it is determined that the records requested are to be made available, and there are no further fees to be paid, the authorized official shall promptly notify

the requester as to where and when the requested records or copies may be obtained or otherwise provide them as agreed. If there are fees still to be paid by the requester, the requester shall be notified that upon payment the records will be made available immediately.

(4) Section 903.11 lists the limited number of officials who have been authorized to make initial denials of requests for records, except as may be subsequently authorized. A reply initially denying, in whole or in part, a request for records shall be in writing, signed by an authorized official, and it shall include:

(i) A reference to the specific exemption or exemptions of the Act authorizing the withholding of the records, stating briefly why the exemption applies and, where relevant, why a discretionary release is not appropriate.

(ii) The name and title or position of each official responsible for the denial authorized by section 903.11.

(iii) A statement of the manner in which any reasonably segregable portion of a record shall be provided to the requester after deletion of the portions which are determined to be exempt.

(iv) A brief statement of the right of the requester to appeal the determination, and the address to which the appeal should be sent, in accord with § 903.9 (a) and (b).

(5) (i) When no determination can be made within the initial ten day period or within any extension thereof authorized by 5 U.S.C. 552(a) (6) (B), despite the exercise of due diligence by the agency, an official authorized under section 903.11 to make initial denials shall, within such time period so notify the requester in writing and including:

(A) A statement of the reasons for the delay;

(B) The date a determination is expected;

(C) That such official was responsible for determining that due diligence was exercised and that no determination was possible;

(D) A statement that requester has a right either to treat the delay as an initial denial or to appeal in accordance with § 903.9 (a) and (b), in which case the address to which the appeal should be sent must be provided. The requester may be asked to forego an appeal until a determination is made. The Agency shall nevertheless continue to exercise due diligence in processing the request.

(ii) In each of the situations set forth in this section, the procedures relating to fees described in § 903.10 shall apply and be coordinated as appropriate.

#### § 903.9 Appeals from initial denials or untimely delays.

(a) When a request for records has been initially denied in whole or in part, or otherwise has not been timely determined, the requester may submit a written appeal within thirty calendar days after the date of the written denial or on the last day of the applicable time limit in a no determination situation. The appeal shall include a copy of the original

request, the initial denial, if any, and a statement as to the reasons why the records requested should be made available and why the initial denial, if that be the case, might be in error. No personal appearance, oral argument, or hearing on an appeal is provided.

(b) An appeal should be addressed to the Administrator, NOAA, 6010 Executive Boulevard, Rockville, Maryland, 20852. Both the appeal envelope and the letter shall be clearly marked "Freedom of Information Appeal" or "Appeal for Records" or the equivalent. An appeal not addressed and marked as provided herein will, upon recognition to be such by Agency personnel, will be so marked and forwarded immediately to the Administrator. An appeal incorrectly addressed will not be deemed to have been "received" for purposes of the time period for appeal set forth in 5 U.S.C. 552(a) (6), until the earlier of either (1) the time that forwarding to the Administrator has been effected, or (2) the time such forwarding would have been effected had due diligence been exercised by Agency personnel. In each instance when an appeal is so forwarded, the Administrator shall notify the requester that the appeal was improperly addressed and of the date the appeal was actually received or normally should have been received by him.

(c) An appeal shall be determined within twenty days (excluding Saturdays, Sundays, and legal public holidays) of its receipt, unless an extension of time is made in unusual circumstances, when the time for action may be extended up to ten days (excluding Saturdays, Sundays and legal public holidays) minus any days of extension granted at the initial request level. A notice of such extension shall be sent to the requester, setting forth the reasons and the date on which a determination of the appeal is expected to be sent. As used in this paragraph, "unusual circumstances" are defined in § 903.8(b) (2).

(d) If a decision on appeal is to make the records available to the requester in part or in whole, such records shall be promptly made available for inspection and copying as provided in § 903.6.

(e) If no determination of an appeal has been sent to the requester within the twenty day period or the last extension thereof, the requester is deemed to have exhausted his administrative remedies with respect to such request, giving rise to a right of judicial review as specified in 5 U.S.C. 552(e) (4). When no determination can be sent to the requester within the applicable time limit, the Administrator shall nonetheless exercise due diligence in continuing to process the appeal. When the time limit expires, the requester shall be informed of the reason for the delay, of the date when a determination may be expected to be made, and his right to seek judicial review. The requester may be asked to forego judicial review until the appeal is determined.

(f) A determination on appeal shall be in writing and, when it denies records

in whole or in part, the notice to the re-

NOAA shall be charged. Other services

(4) If the estimated fee (i) exceeds

Director, Environmental Research Labora-

tomobile's actual fuel economy perform-

vague and ill-defined terms as "saves

in whole or in part, the notice to the requester shall include: (1) Notation of the specific exemption or exemptions of the Act authorizing the withholding, a brief explanation of how the exemption applies, and when relevant, a statement as to why a discretionary release is not appropriate; (2) a statement that the decision is final; (3) advice that judicial review of the denial is available in the district in which the requester resides or has his principal place of business, the district in which the agency records are situated, or the District of Columbia, and (4) the names and titles or positions of each official responsible for the denial of the request.

(g) Final appeal decisions shall be indexed and kept available for public inspection and copying in the NOAA Central Public Reference Facility.

#### § 903.10 Fees and charges.

(a) *Fee schedule.* Unless waived or reduced as provided in paragraph (b) of this section, the following fees shall be charged in connection with requests for records subject to this part.

(1) Searches other than for computerized records. \$2.50 for each one-quarter hour (or fraction thereof) per person for time spent in trying to find the records requested. This includes the time spent by clerical, professional and supervisory personnel in examining records in order to find records which are within the scope of the request, and transportation of personnel and records necessary to the search.

(2) Searches for computerized records. Actual direct cost of the computer time to NOAA to use the equipment involved in the search, not to exceed \$270 per hour (\$4.50 per minute). This fee includes both machine time, and that of related operator and clerical personnel. If programming is necessary to conduct the search, there will be an additional fee of \$2.50 for each one-quarter hour (or fraction thereof) per person for programmer/analyst time. Computer printouts shall be 20 cents per page for the original and carbon copies concurrently printed.

(3) Copying of records. 7 cents per copy of each page up to 8 1/2" x 14", made by photocopy or similar process. Normally, only one copy will be provided. Added copies will be provided only upon a showing of demonstrated need.

(4) Copies of microfilm or microfiche.  
16 mm (100 ft. roll) —\$6.00  
35 mm (100 ft. roll) —\$7.00  
105 mm fiche —\$0.25 each  
Aperture cards —\$0.25 each  
\$0.25 per page for each microform frame printed on paper.

(5) Certification or authentication of records. \$3.00 per certification or authentication.

(6) Forwarding records to requesting party. Actual cost of postage, insurance and special fees, if their total exceeds \$1.00.

(7) Other costs. When other duplication costs not specifically identified in this paragraph (a) of this section are requested and provided, their direct cost to

NOAA shall be charged. Other services and materials requested which are not covered by this part are chargeable at actual cost to NOAA.

(b) *Waiver or reduction of fees.* A fee shall be waived or alternatively reduced for a request for records under this part where:

(1) A search fee totals \$10.00 or less. A copying fee totals \$1.00 or less. In determining total fees, the fees for other contemporaneous requests made by the same or related requesters shall be aggregated.

(2) Records requested by a Federal agency, Federal court, (excluding parties) Congressional committee or subcommittee, the General Accounting Office, or the Library of Congress are not made under the Act, and fees payable under this part do not apply.

(3) The records are requested by a State or local government, or intergovernmental agency, a foreign government, public international organization, or any agency thereof, for purposes that are determined to be an appropriate courtesy or in the public interest and will promote the objectives of the Act and the agency.

(4) It is determined either upon petition submitted by the requester, or by a responsible official on his own initiative, that waiver or reduction of the fee is in the public interest because furnishing the information in the records requested can be considered as primarily benefiting the general public. Any such petition shall specify the intended purpose to which the records requested will be put and why all of them are necessary, and any other relevant factors in order to show how the information furnished in all or part of the records will primarily benefit the general public.

(5) It is determined by NOAA, based upon a petition therefor, that the requester is indigent, that the request for records has a strong public interest justification, and that agency resources permit a waiver of the fee.

(c) *Payment of fees.* The following conditions for payment of fees charged under this section shall apply.

(1) A search fee provided in paragraph (a) of this section which exceeds \$50.00 is chargeable even when no record responsive to the request for records is found, or when the records requested are determined to be totally exempt from disclosure.

(2) If the requester has stated in or with his request that he is willing to pay an amount sufficient to cover the necessary search fee, a search may be made for the records without further notice to the requester, unless the requester is delinquent in making past payments, or the estimated search fee will exceed \$100.00.

(3) If the requester has stated in or with his request that he is willing to pay estimated fees up to a specified limit not exceeding \$100.00, a search may be made for the records without further notice if the estimated fees are less than the specified limit unless the requesting party is delinquent in making past payments.

(4) If the estimated fee (1) exceeds \$100.00 for a request covered within subparagraph (2) of this section, (ii) exceeds the specified limits covered within subparagraph (3) of this section, or (iii) otherwise exceeds \$50.00 and the requester has said nothing about payment or the requester is delinquent in past payments, the requester shall be notified immediately (by wire or confirmed telephone call) or the estimated total fee and shall be requested to prepay such fee before the search may be conducted or continued. The notice may advise the requester to confer with NOAA personnel so as to attempt to reformulate the request for records to reduce the fee.

(5) The administrative time deadlines prescribed in 5 U.S.C. 522(a) (6) shall be tolled from the time the notice described in paragraph (c) (4) of this section is sent to the requester until the time that payment of the estimated fee is received from the requester, unless the responsible official determines to postpone payment of the search fee until the search has proceeded further or has been completed.

(6) Where a specific fee is determined to be payable and notice thereof has been sent to the requester, the payment of such fee shall be received before the records requested, or any part thereof, are made available to the requester.

(7) Payments of fees shall be made preferably by check or money order payable to the U.S. Department of Commerce and, they shall be paid or sent to the unit stated in the billing notice or, if none, to the unit handling the request. Where appropriate, the responsible official may require that payment be made in the form of a certified check.

(8) If an advance payment of an estimated fee exceeds the actual total fee by \$1.00 or more, the difference shall be refunded to the requester. If the estimated fee is less than the actual fee later determined, any difference in excess of \$1.00 may be further billed to and is payable by the requester.

#### § 903.11 Officials authorized to make initial denials.

The following officials of the National Oceanic and Atmospheric Administration have been delegated authority to initially deny requests for records of their respective organizational elements. (The listings are subject to change because of organizational revisions or new delegations.)

Associate Administrator, 6010 Executive Boulevard, Rockville, Maryland 20852.  
Assistant Administrator for Administration, 6010 Executive Boulevard, Rockville, Maryland 20852.  
Director, National Weather Service, 8060 13th Street, Silver Spring, Maryland 20910.  
Director, National Ocean Survey, 6001 Executive Boulevard, Rockville, Maryland 20852.  
Director, Environmental Data Service, Page Building 2, 3300 Whitehaven Street, N.W., Washington, D.C. 20235.  
Director, National Environmental Satellite Service, Federal Office Building 4, Washington, D.C. 20233.

Director, Environmental Research Laboratories, Research Building 3, 3100 Marine Street, Boulder, Colorado 80302.

Director, National Marine Fisheries Service, Page Building 2, 3300 Whitehaven Street, N.W., Washington, D.C. 20235.

Associate Administrator for Environmental Monitoring and Prediction, 6010 Executive Boulevard, Rockville, Maryland 20852.

Associate Administrator for Marine Resources, 6010 Executive Boulevard, Rockville, Maryland 20852.

Assistant Administrator for Coastal Zone Management, Page Building 2, 3300 Whitehaven Street, N.W., Washington, D.C. 20235.

Director, NOAA Corps, 6010 Executive Boulevard, Rockville, Maryland 20852.

Director, Office of Sea Grant, Page Building 2, 3300 Whitehaven Street, N.W., Washington, D.C. 20235.

Director, Office of Programs and Budget, 6010 Executive Boulevard, Rockville, Maryland 20852.

#### Title 16—Commercial Practices

#### CHAPTER I—FEDERAL TRADE COMMISSION

#### SUBCHAPTER B—GUIDES AND TRADE PRACTICE RULES

#### PART 259—GUIDE CONCERNING FUEL ECONOMY ADVERTISING FOR NEW AUTOMOBILES

On September 24, 1974, by a notice of public hearing in the FEDERAL REGISTER (39 FR 34382) the Federal Trade Commission commenced a rulemaking proceeding concerning the advertising and promotion of the fuel economy of new automobiles. Included in the notice was a description of the subject matter involved in the proceeding, together with a detailed list of questions designed to elicit public comment.

In publishing the notice the Commission took note of the dramatic increase in the number of fuel economy claims then being made and of the proliferation of test procedures then being used as the basis for such claims. The Commission expressed the concern that the failure of advertisers to use a uniform test procedure, and to use a procedure that was fairly related to typical driving patterns, had the tendency and capacity unfairly and deceptively to deny consumers information which would enable them to compare advertised automobiles on the basis of fuel economy and to deceive consumers as to the fuel economy they would experience with the advertised automobile.

The record of the rulemaking proceeding confirms both the importance of fuel economy to consumers in their automobile purchasing decision, and the need for meaningful, usable fuel economy information.

As the extensive written and oral comments received in the rulemaking proceeding make clear, a uniform testing procedure is necessary to provide consumers with fuel economy information that they can use to compare competing cars. Moreover such a procedure must also accurately represent the actual driving patterns and conditions so as to provide a meaningful measure of the au-

tomobile's actual fuel economy performance. Since approximately half the mileage driven in each year is done in each of two general driving modes—city and highway driving—it is generally agreed that separate city and highway fuel economy results should be generated and disclosed.

The great weight of the comments submitted in the rulemaking proceeding, from governmental agencies, automobile manufacturers and consumer groups, supported the use of the test procedures developed by the Environmental Protection Agency. Fuel economy results derived from the EPA test procedure are in widespread use in labeling through the Voluntary Labeling Program, jointly sponsored by EPA and the Federal Energy Administration, and are also widely used in advertising. At the same time, however, the comments made it clear that the EPA test procedures have shortcomings, including the fact that they do not, for example, presently fully take into account the combined effects of aerodynamic and rolling resistance, effects which are most pronounced at higher speeds.

Since the closing of the record of the rulemaking proceeding on December 31, 1974, the Commission has become aware, through consumer complaints, and press reports, of an increasing criticism that the EPA test results, primarily those relating to highway mileage, may, at least with respect to certain cars, overstate fuel economy. The Commission's staff is presently inquiring into the extent and the basis for this criticism. In view of this criticism, as well as in view of other questions concerning the EPA test, the Commission has concluded that it would not be in the public interest at this time to promulgate a final trade regulation rule. At the same time, in view of the important public interest in providing meaningful fuel economy information through advertising, and the potential for deception raised by much fuel economy advertising, the Commission has determined, as an interim measure to issue a Guide concerning the use of fuel economy claims in advertising.

In issuing this interim Guide, the Commission expresses its concern that the advertising of fuel economy information only serves the public interest when such advertising is not deceptive. In order to avoid deception and/or unfairness in the advertising of fuel economy for automobiles, the Commission has concluded that fuel economy claims must include certain disclosures and qualifications. These include the following:

1. *Disclosure of EPA test results.* As the Commission recognized in its September 24, 1974, notice, the use in advertising of fuel economy results obtained from disparate test procedures may unfairly and deceptively deny to consumers information which will enable them to compare advertised automobiles on the basis of fuel economy. Moreover, even when no specific fuel economy figure is cited in advertising, the use of such

vague and ill-defined terms as "saves gas", or "gas stingy engine" may also be deceptive by implying the existence of some level of "good fuel economy" which may be perceived differently by different individuals. For these reasons the Commission has concluded that fuel economy claims should be accompanied by a disclosure of the appropriate EPA mileage figure. Section 259.2(a) of the Guide requires this disclosure.

Section 259.2(a) further requires that both city and highway fuel economy figures be disclosed. Where mileage claims are based on test conditions that are relatively favorable to the advertised car, the failure to reveal results that may be relatively less favorable to the advertised car may constitute a deceptive failure to disclose a material fact. Since non-highway driving accounts for over half of the total driving done each year, disclosure simply of the highway figure, without disclosure of the lower city number would be misleading. Because of the importance of both numbers and to guard against the over-emphasis of one figure to the exclusion of the other, the Guide requires that each number be disclosed in close conjunction with the other and with substantially equal prominence. For example, the Guide would not permit the bold display of a highway mileage result in a headline where the city figure is disclosed only in a footnote at the bottom of the page, or buried in a lengthy paragraph in the body copy.

2. *Qualification of EPA test.* As the record of the rulemaking proceeding made clear, neither the EPA test, nor indeed any mass vehicle testing program, is capable of predicting the precise mileage that will be obtained by each driver. On the contrary, because of significant differences among consumers in terms of driving habits, traffic patterns encountered, weather conditions, car loading and use and purchase of optional equipment, actual fuel economy obtained will vary significantly from individual to individual. In order to avoid the misleading suggestion that the very mileage figures cited in an advertisement will in fact be achieved by a given consumer, § 259.2(a) (2) of the Guide requires disclosure that the cited figures are estimates, and that actual mileage obtained by the consumer may be different, depending upon how and where the consumer drives, the condition of the car and its optional equipment. The importance of such a disclosure in preventing the citation of specific fuel economy figures from raising unrealistic consumer expectations is underscored by recent reports which suggest that, in some instances, the EPA "Highway" test results may overstate the actual fuel economy likely to be achieved by most drivers of some particular cars.

3. *Identification of advertised vehicle.* Section 259.2(b) of the Guide requires that where the advertised automobile is available in more than one engine size, transmission type or fuel system, such be disclosed in the advertisement. Each of these factors has a substantial effect on fuel consumption, and the EPA-FEA

"Mileage Guide" provides separate fuel economy figures for a "carline" (e.g., Pinto, Vega, etc.) represented by each of these different configurations. Failure to identify the advertised automobile in terms of these major fuel-economy-affecting variables could therefore be a significant source of deception, since a consumer viewing an advertisement containing highly advantageous fuel economy figures might assume that the advertised fuel economy relates to the most popular version of the advertised model, (e.g., with a relatively large engine and automatic transmission) rather than to a "special economy version" possibly which may be equipped with the smallest engine and manual transmission. That the consumer's impression will be corrected when he views the cars in the dealer's showroom, or consults a fuel economy list, does not of course excuse the initial deception. See, e.g., *Carter Products, v. FTC*, 323 F. 2d 823 (5th Cir. 1963).

Where the mileage figures cited in the advertisement are not derived from the "Mileage Guide" but are rather the result of tests conducted upon a specific automobile, § 259.2(d) requires that the disclosures required in § 259.2(b) be supplemented by a further clear and conspicuous disclosure of all optional equipment carried by the advertised car that has the effect of increasing fuel economy. It will also require the disclosure of the absence of commonly-used equipment (if any) the absence of which has the effect of increasing fuel economy. In the absence of these additional disclosures a consumer will have no way of determining whether the automobile he wishes to purchase is likely to achieve the advertised fuel economy. Since, moreover, the additional fuel economy advantage attributable to the optional equipment can be achieved only at the additional cost of the optional equipment, failure to disclose that the equipment is optional may falsely imply that a car with the advertised mileage can be bought for the price normally charged for a car with standard equipment. Cf., *General Motors Corp.*, 32 F.T.C. 807 (1941).

While the Guide is interpretive of laws administered by the Commission, and is thus advisory in nature, proceedings to enforce the requirements of law as explained in the Guide may be brought under the Federal Trade Commission Act (15 U.S.C. 41-58) which, briefly stated makes it illegal for one to engage in "unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce", as "commerce" is defined therein.

Inquiries and requests for copies of the Guide should be directed to the Division of National Advertising, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

Accordingly the Commission hereby issues the following Guide which amends Subchapter B, Guides and Trade Practice Rules, of 16 CFR Chapter I by adding a new Part 259, to take effect October 15, 1975, as follows:

Sec.  
259.1 Definitions.  
259.2 Advertising disclosures.

Authority: 38 Stat. 717, as amended (15 U.S.C. 41-58).

§ 259.1 Definitions.

For the purposes of this part the following definitions shall apply:

(a) "New automobile". Any passenger vehicle or light duty truck as those terms are defined in 40 CFR Part 85, 1974, as amended, the equitable or legal title to which has never been transferred by a manufacturer, distributor, or dealer to an ultimate purchaser. The term "manufacturer" shall mean any person engaged in the manufacturing or assembling of new automobiles, including any person importing new automobiles for resale and any person who acts for and is under the control of such manufacturer, assembler, or importer in connection with the distribution of new automobiles. The term "dealer" shall mean any person resident or located in the United States or any territory thereof or in the District of Columbia engaged in the sale or distribution of new automobiles to the ultimate purchaser. The term "ultimate purchaser" means, for purposes of this part the first person, other than a dealer purchasing in his capacity as a dealer, who in good faith purchases such new automobile for purposes other than resale including a person who leases such vehicle for his personal use.

(b) "Mileage Guide". The most recent publication of EPA and/or FEA which lists the relevant model year the estimated city and estimated highway fuel economy of new automobiles.

(c) "Estimated city fuel economy". The gasoline consumption or mileage of new automobiles as determined in accordance with the urban or city test procedure employed and published by the United States Environmental Protection Agency as described in 39 FR 36890, et seq. (1974) and subsequent revisions; and expressed in miles-per-gallon, to the nearest whole mile-per-gallon as measured, reported, published or accepted by the United States Environmental Protection Agency.

(d) "Estimated highway fuel economy". The gasoline consumption or mileage of new automobiles as determined in accordance with the highway test procedure employed and published by the United States Environmental Protection Agency as described in 39 FR 36890, et seq. (1974) and subsequent revisions; and expressed in miles-per-gallon, to the nearest whole mile-per-gallon as measured, reported, published or accepted by the United States Environmental Protection Agency.

§ 259.2 Advertising disclosures.

(a) No manufacturer or dealer shall make any representation in advertising concerning the fuel economy of any new automobile unless such representation is accompanied by the following clear and conspicuous disclosures:

(1) Both the estimated city fuel economy and the estimated highway fuel economy of such new automobile, with

the U.S. Environmental Protection Agency identified as the source of such figures. Each of these disclosures shall be made in close conjunction with the other and with substantially equivalent prominence;

(2) That the estimated city and estimated highway figures are only estimates, and that the actual fuel economy to be obtained by the consumer may be different and will depend upon the individual's driving habits, driving conditions and the car's condition and optional equipment;

(b) When a fuel economy representation is made for any new automobile which is available in more than one engine size, either in terms of numbers of cylinders or engine displacement, transmission type or fuel system, such cubic inch displacement, number of cylinders, transmission type or type of fuel system shall be clearly and conspicuously disclosed.

(c) If the fuel economy representation is based on data other than that published for the advertised automobile in the Mileage Guide, (1) the presence and/or use of any optional equipment (e.g., low rear axle ratio, overdrive transmission, radial tires, catalyst emission control system), which is likely to have the effect of increasing its estimated fuel economy performance shall be clearly and conspicuously disclosed and its availability shall be clearly and conspicuously disclosed as optional; and (2) the absence of any commonly used equipment (e.g., air conditioning), which is likely to have the effect of decreasing its estimated fuel economy performance shall be clearly and conspicuously disclosed.

Promulgated by the Federal Trade Commission September 10, 1975.

CHARLES A. TOBIN,  
Secretary.

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER B—CONSUMER PRODUCT SAFETY ACT REGULATIONS

PART 1116—POLICY AND PROCEDURES REGARDING SUBSTANTIAL PRODUCT HAZARDS

Postponement of Effective Date

On July 24, 1975 the Consumer Product Safety Commission published in the FEDERAL REGISTER (40 FR 30936) a statement of policy and procedures gov-

The Commission will regard the following disclosures as complying with § 259.2(a) (2):

For television and radio only: "Remember: These mileage results are estimates. The actual mileage you will get may be different."

For print (other than billboards) media only: "Remember: These mileage figures are estimates. The actual mileage you get will vary depending on the type of driving you do, your driving habits, your car's condition, and optional equipment."

For billboards: "Estimate Only. See EPA Mileage Guide for Details."

erning substantial product hazards under section 15 of the Consumer Product Safety Act (15 U.S.C. 2064). This statement, 16 CFR Part 1116, was to become effective on August 25, 1975. Although the Commission believes that notice and public comment on the statement of policy and procedures are not required by law, public comments on the statement were invited until September 22, 1975. The Commission has received a number of requests to extend the effective date of the statement. In order to be reasonable and fair to all persons and in order to allow an opportunity for full comment, the Commission has decided to postpone the effective date of Part 1116 until October 25, 1975. Analysis of the public comments received may result in the promulgation of appropriate amendments prior to the effective date of Part 1116.

The existing comment period from July 24, 1975 until September 22, 1975 has not been altered. Comments should be submitted, preferably in 5 copies, to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, by September 22, 1975. As stated in the preamble to Part 1116 (40 FR 30936), comments received after that date will be considered if practicable. Comments received by the Commission may be viewed during working hours in the Office of the Secretary, Room 1026, 1750 K. Street NW., Washington, D.C.

Therefore, pursuant to section 15 of the Consumer Product Safety Act (86 Stat. 1221) (15 U.S.C. 2064), 16 CFR Part 1116 (40 FR 30936) shall become effective October 25, 1975.

Dated: September 4, 1975.

SHELDON D. BUTTS,  
Acting Secretary, Consumer  
Product Safety Commission.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. RM75-15, Order No. 524-C]

PART 1—RULES OF PRACTICE AND PROCEDURE

Requests for Public Information

SEPTEMBER 3, 1975.

On February 10, 1975, the Commission issued Order No. 524 which conforms the Commission's rules to the basic requirements of Pub. L. No. 93-502, 88 Stat. 1561, amending 5 U.S.C. 552, the Freedom of Information Act. The Order was published on February 19, 1975 (40 Fed. Reg. 7251).

Among other things, the Order added subparagraph (f) (3) which deals with extension of the time limits within which the Director of Public Information and

the Chairman can respond to a request for records. The subparagraph will be revised to make it clear that such extensions cannot exceed ten working days in the aggregate with respect to a particular request and that the Secretary will be responsible for allocating distribution of the ten days on a case-by-case basis. (Attorney General's Dec. 11, 1974 "Preliminary Guidance" FOI Amdts. Mem., mimeo ed. pp. 3-4).

An additional change promulgated by this Order is the deletion of language which prescribes an outmoded procedure for disclosing information to the public.

The Commission finds:

(1) The revisions prescribed herein represent a procedural matter which does not require notice or hearing under 5 U.S.C. 553.

(2) Good cause exists that the revisions adopted herein become effective upon issuance of this order.

(3) The revisions of the Commission's rules prescribed herein are necessary and appropriate for the administration of the Federal Power Act and the Natural Gas Act.

The Commission, acting pursuant to the provisions of the Federal Power Act, as amended, particularly section 309 (49 Stat. 858-859; 16 U.S.C. 825h) and the Natural Gas Act, as amended, particularly section 16 (52 Stat. 830; 15 U.S.C. 717o), orders:

(A) Paragraph (d) of section 1.36 in Part 1, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations is revoked and reserved.

(B) Subparagraph (f) (3) of § 1.36 in Part 1, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 1.36 Public information and requests.

(f) Timetables and procedures in event of withholding of public records. . . .

(3) In unusual circumstances, the time limits prescribed in this section may be extended by the Secretary by written notice to the person making such request setting forth the reasons for such extension and the date on which a determination is expected to be dispatched. No such notice will specify a date that would result in an extension for more than ten working days in the aggregate. One ten-day extension may be invoked at the initial stage, or at the appellate stage, or divided between the two, so long as the total extended time does not exceed ten working days with respect to a particular request. The Secretary will be responsible for allocating distribution of the ten days on a case-by-case basis. "Unusual circumstances" as used in this paragraph means, . . . .

(C) The revisions adopted herein shall be effective upon issuance of this order.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMS,  
Secretary.

[FR Doc. 75-24053 Filed 9-9-75; 8:45 am]

[Docket No. R-386; Order No. 402-B]

PART 2—GENERAL POLICY AND INTERPRETATIONS

Order Amending Certain General Policies and Interpretations

SEPTEMBER 4, 1975.

By Order No. 402 issued May 6, 1970 (43 FPC 707), and published in the FEDERAL REGISTER on May 14, 1970 (35 F.R. 7511), as amended by Order No. 402-A issued June 3, 1970 (43 FPC 822) and published in the FEDERAL REGISTER on June 10, 1970 (35 F.R. 8927), in Docket No. R-386 the Commission promulgated as § 2.68 of its General Policy and Interpretations, 18 CFR 2.68, a statement of policy with respect to sales and deliveries of natural gas for resale in interstate commerce, by companies with exemptions under Subsection 1(c) of the Natural Gas Act, 15 U.S.C. 717(d), and certain companies exempt under Subsection 1(b) of the Natural Gas Act, 15 U.S.C. 717(b), to alleviate temporary emergencies. Section 2.68 provides that the designated exempt companies may make sales or deliveries of natural gas in interstate commerce for 60 consecutive days, without express Commission authorization and without jeopardizing their exempt status, to aid natural gas distribution companies and pipeline companies in need of temporary emergency gas supplies. The policy is established under that part of Subsection 7(c) of the Natural Gas Act, 15 U.S.C. 717f(c), which authorizes the Commission to exempt by regulation from the requirements of Section 7 temporary acts or operations for which the issuance of a certificate will not be required in the public interest.

On various occasions the Commission has interpreted Section 2.68 as being inapplicable to sales and deliveries of liquefied natural gas (LNG). *Distigas Corporation et al.*, Docket No. CP74-212, 61 FPC 820 (February 22, 1974), rehearing denied 51 FPC ----- (April 22, 1974); *Cape Cod Gas Company, et al.*, undocketed, 52 FPC ----- (August 9, 1974), rehearing denied 52 FPC ----- (September 12, 1974) and 52 FPC ----- (October 9, 1974); *Associated Gas Distributors, undocketed*, 53 FPC ----- (March 3, 1975).

By decision of June 3, 1975, in *Distigas of Massachusetts Corp. v. FPC*, No. 74-1369, the United States Court of Appeals for the First Circuit reversed and remanded to the Commission the Cape Cod order of August 9, 1974, wherein the Commission determined that certain

transactions could not be conducted within the contemplation of § 2.68. The Court cited five letter orders<sup>1</sup> in which the Commission had granted exemption to LNG transaction under § 2.68. In regard to these orders the Court stated at mimeo page 7 that:

... The letter rulings carried the force of law, and the Commission is not free to set policies in formal decisions and then vary from the policies in less formal rulings involving the same situation. The Commission's vacillating in applying section 2.68 has resulted in inconsistent treatment of similarly situated parties to the detriment of petitioners. [Footnote omitted.]

The above was set forth in response to the contention of the Commission in its brief (page 21) that:

... The Commission has interpreted, in its February 22, 1974, Order in *Distigas*, supra, that the emergency provision of its General Policy and Interpretations do not apply to LNG and petitioners were fully aware of the Commission's guideline in this matter when they filed their respective requests for preclearance and advice regarding their proposals.

The Commission further stated (at pages 22-23) in regard to the interpretation of § 2.68 that:

... [T]he Commission must attempt to establish a consistent course regardless of past inconsistencies and this is exactly what the Commission has done in its orders under review herein.

Nevertheless, the Court held that the Commission's procedures were insufficient and stated at mimeo page 8:

... In the circumstances, we think the Commission was not free to interpret Section 2.68, as now worded to exclude LNG transactions. Given the wording of the Section and the Commission's failure to establish excepting LNG, we think fairness and consistency require that Section 2.68 be applied according to its plain words and the Agency's more frequently expressed view of it.

We herein make the following updated findings and requisite interpretation of Section 2.68, in order to remedy the previous inconsistencies and to clarify § 2.68 to reflect the policies of the Commission. After due consideration, we find that the severe supply situation projected for almost every pipeline requires that LNG now be included in the 60 day exemption. We particularly note that in our June 11, 1975, order in *Alabama-Tennessee Natural Gas Company, et al.*, Docket Nos. RP74-42 et al., we found conditions for this coming winter severe enough on

<sup>1</sup> Three orders applying Section 2.68 to LNG transactions were issued in *Piedmont Natural Gas Co.*, Docket Nos. G-8110 and R-386 on December 27, 1974 and in *Valley Gas Co. and American LNG Co.* in Docket No. R-386 on April 18, 1974. These orders issued before the final Commission action in the April 22, 1974, order in *Distigas Corporation, et al.*, Docket No. CP74-212, denying rehearing of the determination that Section 2.68 is inapplicable to LNG transactions. Two additional orders applied Section 2.68 to LNG transactions in *Boston Gas Co. and Providence Gas Co.*, Docket No. R-386, on May 31, 1974 and *Commonwealth Gas Co.*, Docket No. R-368, on July 5, 1974.

fourteen major pipelines to require con- We believe that inclusion of LNG in the 60 day exemption will give these and other pipelines and distributors, the added flexibility and the additional sur- ferences in regard to each curtailment plan in order to anticipate and prevent as many upcoming problems as possible. plies to help meet existing obligations. We shall, therefore, include LNG in the emergency exemption of § 2.68.

We continue to have the concern, as expressed in previous instances, that the emergency procedures may be abused to the extent that particular sellers may engage in large and almost continuous sales in interstate commerce under the guise of this exemption. Therefore, we will allow a seller to take advantage of these procedures only if it submits in the report required by § 2.68 10 days after the sale commences, a sworn statement describing the emergency situation and that the sale is required to enable a pipeline or distributor to meet its existing obligations, and that without this sale those obligations will not be fulfilled. We herein further require that a seller of LNG under these procedures make only one sixty day emergency sale to any one pipeline or distributor customer or its affiliate. If more than one sale is made to a particular customer, or its affiliate, we shall require the seller to make application for a certificate of public convenience and necessity under Section 7 of the Natural Gas Act. Finally, if it appears to the Commission that a seller is engaged in continuous sales in interstate commerce, we will take such action as is necessary.

Inclusion of these acts under Section 2.68 will not be an abdication of our responsibility to the public. We note that pursuant to 49 U.S.C. § 1655(e) (4) the Department of Transportation (DOT) is vested with the duty to regulate the transportation of explosives and other dangerous articles in interstate commerce (whether by motor vehicle, rail or water) in accordance with the powers set forth in 18 U.S.C. §§ 831-837. Pursuant to this mandate DOT has established the Hazardous Materials Regulation Board which has promulgated regulations for the shipment of dangerous articles, including LNG, by either rail, water, or motor vehicle. 49 CFR Parts 170-189. The regulations apply to private as well as common and contract carriers.

#### The Commission finds:

(1) The interpretation adopted herein is necessary and appropriate in the administration of the Natural Gas Act.

(2) Since the interpretation adopted herein concerns a matter of general policy, compliance with the provisions of 5 U.S.C. 553 relating to notice and hearing is unnecessary.

(3) Good cause exist that the interpretation adopted herein becomes effective upon issuance of this order.

(4) Short-term transactions involving LNG are contemplated by the policy expressed in Section 2.68 of the Commission's General Policy and Interpretations. In order to properly express Commis-

sion policy, the following amendatory order is required. The Commission, acting pursuant to the authority granted by the Natural Gas Act, as amended particularly Section 1(b), 1(c), 7(c), 7(e), 16; 52 Stat. 821, 825, 830, 56 Stat. 83, 84, 68 Stat. 36; 15 U.S.C. 717(b), 717f(c), 717 (e), 717(o) thereof, and in accordance with 5 U.S.C. 553, orders:

(A) The interpretation adopted herein shall be effective upon the date of issuance hereof.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

#### Title 20—Employee Benefits

### CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

#### PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

##### Utilization Review: Notice of Intention To Amend Certain Provisions

Notice is hereby given that certain provisions of regulations published November 29, 1974 (39 FR 41604, 41610) governing the requirement for admission review in hospitals under the Medicare and Medicaid programs will be the subject of new proposed rulemaking.

The regulations here referred to were originally to have been effective on February 1, 1975. As a result of a preliminary injunction issued on May 27, 1975, by the United States District Court for the Northern District of Illinois in the case of *American Medical Association, v. Weinberger*, affirmed by the United States Court of Appeals for the Seventh Circuit on July 22, 1975, the effective date of the regulations was delayed until further notice (40 FR 33033, 33036).

The Department has now determined that changes should be made in the regulations, including provisions which are the subject of the preliminary injunction. These changes are currently being developed within the Department, and as soon as they are ready they will be published in a further notice of proposed rulemaking. The effective date of the provisions here described is postponed until after the completion of such rulemaking.

Accordingly, notice is hereby given that amended language for 20 CFR 405.1035 (e) and (f) and 45 CFR 250.19 (a) (1) (viii) will be published as proposed rulemaking and, at such time as a final rule is issued upon the basis of such notice, the present 20 CFR 405.1035 (e) and (f) and 45 CFR 250.19(a) (1) (viii) will be withdrawn and replaced by the new rule.

Dated: September 4, 1975.

STEPHEN KURZMAN,  
Acting Secretary.

[FR Doc. 75-23970 Filed 9-9-75; 8:45 am]

#### Title 21—Food and Drugs CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

##### SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

#### PART 510—NEW ANIMAL DRUGS

##### PART 540—PENICILLIN ANTIBIOTIC DRUGS FOR ANIMAL USE

#### Procaine Penicillin G

The Commissioner of Food and Drugs has evaluated a new animal drug application (65-383V) filed by Masti-Kure Products Co., Inc., Norwich, CT 06360, proposing safe and effective use of procaine penicillin G in oil for intramuscular infusion in treatment of mastitis in lactating cattle. The application is approved, effective September 10, 1975.

The Commissioner is amending Parts 510 and 540 (formerly Parts 135 and 135d) prior to recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802) to reflect this approval.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 510 and 540 are amended as follows:

1. Part 510 is amended in § 510.600 (formerly § 135.501) by adding a sponsor alphabetically to paragraph (c) (1) and numerically to paragraph (c) (2), as follows:

§ 510.600 Names, addresses, and code numbers of sponsors of approved applications.

(c) \* \* \*

(1) \* \* \*

Firm name and address:  
\* \* \*  
Masti-Kure Products Co., Inc.,  
166 Yantic St., Norwich, Conn.  
06360 \* \* \*

Drug listing No.  
011714

(2) \* \* \*

Drug Listing No. Firm name and address

011714.... Masti-Kure Products Co., Inc.,  
166 Yantic St., Norwich, Conn.  
06360.

2. Part 540 is amended in § 540.874a (formerly § 135d.14) by revising paragraph (c) (2) to read as follows:

§ 540.874a Procaine penicillin G in oil.

(c) \* \* \*

(2) Sponsor. See Nos. 010515 and 011714 in § 510.600(c) of this chapter.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))).

Effective date. This amendment shall become effective on September 10, 1975.

Dated: September 4, 1975.

C. D. VAN HOUWELING,  
Director, Bureau of  
Veterinary Medicine.

[FR Doc. 75-23972 Filed 9-9-75; 8:45 am]

#### PART 522—IMPLANTATION OR INJECTABLE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

##### Sulfadimethoxine Injection

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (41-245V) filed by Hoffmann-La Roche, Inc., Nutley, NJ 07110, proposing revised labeling for safe and effective use of 40 percent sulfadimethoxine injection in cattle which removes the requirement for dispensing of the drug on a prescription and adds an additional precaution statement. The supplemental application is approved.

The Commissioner is amending Part 522 (formerly Part 135b) prior to recodi-

fication published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802) to reflect the approval as set forth below. This amendment shall become effective September 10, 1975.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), § 522.2220 (formerly § 135b.15) is amended by revising paragraph (a) (3) (iii) (d) to read as follows:

§ 522.2220 Sulfadimethoxine injection.

(a) \* \* \*

(3) \* \* \*

(iii) \* \* \*

(d) Tissue damage may result from perivascular infiltration.

Effective date. This order shall be effective September 10, 1975.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)).

Dated: September 2, 1975.

C. D. VAN HOUWELING,  
Director, Bureau of  
Veterinary Medicine.

The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128).

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 39 FR 26186-93). A list of servicing companies is also available from the Federal

Insurance Administration (FIA), HUD, 451 Seventh Street, SW., Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would

be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. 551. The entry reads as follows:

**§ 1914.4 List of Eligible Communities.**

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	State map repository	Local map repository

#### Title 40—Protection of Environment [FRL 418-2]

#### CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY SUBCHAPTER C—AIR PROGRAMS PART 52—APPROVAL AND PROMUL- GATION OF IMPLEMENTATION PLANS Prevention of Significant Air Quality Deterioration

On December 5, 1974 (39 FR 42510) the Administrator of the Environmental Protection Agency published final regulations for the prevention of significant deterioration of air quality applicable in all 55 states and territories. The plan for preventing significant deterioration, as set forth on December 5, 1974, is implemented through a preconstruction review of major stationary sources to determine if construction of such sources in a particular area would cause a violation of specified air quality increments. On June 9, 1975 (40 FR 24534) the Administrator proposed the addition of ferroalloy production facilities to the list of sources subject to the preconstruction review. That notice also described the criteria the Administrator intends to use in adding further sources in the future. These criteria are:

(1) A new source performance standard for sulfur dioxide (SO<sub>2</sub>) or particu-

late matter has been established for the source or any facility of the source under Part 60 of this chapter, and (2) The established new source performance standard will allow any anticipated future plant affected by the standard to emit SO<sub>2</sub> or particulate matter in excess of 25 pounds per hour from the affected facility or facilities when operating at maximum design capacity.

As new source performance standards are proposed, they will be examined to determine if, based on the allowable emission limit and the expected size of new plants, the 25 pounds per hour criterion would be exceeded. Where the affected facility or facilities could exceed this criterion, the proposal of the new source performance standard will also include a proposal to add such plants to the list of sources subject to the significant deterioration review; however, only those new plants which will exceed the 25 pounds per hour emission limitation will be required to undergo the preconstruction review.

Only ferroalloy production facilities were proposed to be added at this time, since they are the only source not already subject to the significant deterioration regulation which meet the above criteria. No restrictions were placed on the size ferroalloy production facility subject to the review, since all plants from this source category affected by the

new source performance standard are expected to be of sufficient size to exceed the emission limitation criterion.

Only one comment, indicating agreement, was received on the June 9, 1975, proposal. Therefore, the Administrator is promulgating this action essentially as proposed, except for the addition of a provision making the preconstruction review for ferroalloy production facilities applicable only to such facilities commencing construction after October 5, 1975, instead of the June 1, 1975, date specified for the other 18 source categories. In the Administrator's judgement, it would be inequitable to make the regulation retroactive to June 1, 1975, for a source category that is only now being added to the list of sources subject to review.

Also in this notice, several minor corrections are being made to rectify errors that appeared in EPA's June 12, 1975, promulgation of miscellaneous amendments to the significant deterioration regulations.

These regulations will be effective October 5, 1975.

(Sections 110(c), 301(a) of the Clean Air Act as amended (42 U.S.C. 1857c-5(c) 1857g (a))

Dated: September 4, 1975.

JOHN QUARLES,  
Acting Administrator.

## Subpart A—General Provisions

Indirect source review regulation (40 CFR 42.101) of such an undefined class of ex-

Part 52 of Chapter 1, Title 40 Code of Federal Regulations is amended as follows:

also be sent to the Administrator through the appropriate regional office, and to all safety standard or the existence of a safety-related defect. These are in fact the main areas in which petitions have

## Subpart A—General Provisions

Subpart A, Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

## § 52.21 [Amended]

1. In § 52.21, paragraph (d) is revised by adding the phrase, "except as specifically provided below", after the end of the second sentence of paragraph (d) (1). Also in paragraph (d) (1), the following subdivision is added in proper order:

"(ix) Ferroalloy production facilities commencing construction after October 5, 1975.

FEDERAL REGISTER Doc. 75-15414, published on June 12, 1975, is corrected as follows:

2. On page 25006, § 52.21 is corrected by inserting the phrase "the air quality increments applicable in the area where the source will be located nor" after the word "violate" in the first sentence of paragraph (d) (2) (i). Also, the second sentence of paragraph (d) (2) (i) is corrected by changing the word following the date "January 1, 1975," from "or" to "of".

3. On page 25006, five asterisks should be inserted following the amendatory language of § 52.21 (d) (4) (iii), thus denoting that existing subparagraph (5) of paragraph (d), as promulgated on December 5, 1974 (39 FR 42510), remains unchanged.

## § 52.269 [Amended]

## § 52.985 [Amended]

4. On page 25007, §§ 52.269 and 52.985 are redesignated as §§ 52.270 and 52.986, respectively.

5. On page 25008, § 52.1161 is redesignated as § 52.1165.

[FRL 413-2]

# PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

## Revision to the Virgin Islands Implementation Plan

On May 31, 1972 (37 FR 10905), and March 8, 1973 (38 FR 6280), pursuant to section 110 of the Clean Air Act (42 U.S.C. 1857c-5(a)), and 40 CFR Part 51, the Administrator disapproved portions of the Virgin Islands implementation plan because the plan: (1) did not adequately provide a means for the preconstruction review of new or modified stationary sources if said construction or modification would interfere with the attainment and maintenance of national standards; and (2) did not provide for the preconstruction review or modification of indirect sources if said construction or modification would interfere with the maintenance of national standards.

On October 28, 1972 (37 FR 23092), the Administrator promulgated a regulation to correct the deficiency with regard to the preconstruction and modification review of stationary sources of air pollution. On February 25, 1974 (39 FR 7276) EPA promulgated a Federal

indirect source review regulation (40 CFR 52.22(b)) to be incorporated into the implementation plans of those States and territories (including the Virgin Islands) which had failed to submit their own approvable indirect source regulations. This regulation was amended on July 9, 1974 (39 FR 25293).

On February 12, 1974 the Governor of the Virgin Islands submitted proposed revisions to the Virgin Islands implementation plan which consisted of sections 206-30 (Review of new sources and modification) and section 206-31 (Review of new or modified indirect sources) of the Virgin Islands Air Pollution Control Code. Additional information was received from the Assistant Director of the Division of Environmental Health, Department of Conservation and Cultural Affairs on April 10, 1975. This information was intended to result in the revocation of the EPA disapproval notices of May 31, 1972 and March 8, 1973 by providing for a review procedure prior to construction of new or modified direct and indirect sources of air pollution.

These regulations were subject to Department of Health public hearings on September 10, and 11, 1973 and became legally effective in December, 1974 after their publication in the Virgin Islands Register, Volume XV, No. 1. The materials submitted in support of the plan revision include information submitted by the Governor on February 12, 1973 and information submitted by the Assistant Director, Department of Conservation and Cultural Affairs on April 10, 1975 as follows:

- (1) A notice of public hearings held on September 10 and 11, 1973;
- (2) A certification from the Assistant Director that public hearings were held on September 10 and 11, 1973;
- (3) Section 206-30 of the Virgin Islands Air Pollution Control Code;
- (4) Section 206-31 of the Virgin Islands Air Pollution Control Code;
- (5) Copies of sections 206-30 and 206-31 as received from the Equity Publishing Company showing that the regulations were published as part of the Virgin Islands Register, Volume XV, No. 1, dated December, 1974.

The Environmental Protection Agency published in the Federal Register of April 9, 1974 (39 FR 12872), a notice which announced receipt of the proposed revisions to the Virgin Islands plan and which provided the opportunity for a 30-day public comment period on these proposed revisions. The public comment period ended on May 9, 1974 and no comments were submitted to the Agency.

The Administrator has reviewed the proposed revisions and has determined that section 206-30 does not meet all of the EPA requirements regarding revisions to implementation plans and is, therefore, only approvable in part. While subsections 206-30(f) (1)-(5) clearly and specifically list many types of stationary sources which will be exempt from preconstruction review, subsection 206-30(f) (6) adds a general exemption for any sources which the Territory determines to be "of minor significance." EPA ap-

proval of such an undefined class of exempt sources would clearly be improper under section 110 of the Clean Air Act, since the Territory could in effect substantially amend its implementation plan on an ad hoc basis without EPA approval. Subsection 206-30(f) (6) is therefore being disapproved.

In addition, section 206-30 does not meet the public comment/agency analysis requirements of 40 CFR 51.18(h). The Administrator, as part of this notice is promulgating a regulation which will insure that the requirements of 40 CFR 51.18(h) are met.

Section 206-31, which requires the preconstruction review of indirect sources of air pollution, is being approved. It should be noted that the Federal indirect source regulation promulgated in 1974 for the Virgin Islands and most other States (40 CFR 52.22(b)) requires that large highways and airports be subjected to photochemical oxidant and nitrogen dioxide impact review, while the Virgin Islands regulation considers carbon monoxide impact only. The Administrator is taking no action to disapprove the Virgin Islands regulation in this regard, however, since the Federal regulation is currently not effective. See 40 FR 28064, July 3, 1975. Moreover, EPA must conduct additional rulemaking to set forth oxidant-nitrogen dioxide impact review procedures before the Federal regulation becomes effective as to highways and airports. See 40 FR 28065, July 3, 1975; 39 FR 25295, July 9, 1974. At such time as EPA completes its oxidant-nitrogen dioxide rulemaking and reinstates the provisions of 40 CFR 52.22(b) as to highways and airports, EPA would be required to promulgate such highway-airport review requirements into the Virgin Islands plan if the plan still does not contain such requirements.

It should also be noted that today's approval of the Virgin Islands indirect source regulation is in no way intended to compromise the validity of EPA's indefinite suspension of the parking-related aspects of its own indirect source regulation, 40 CFR 52.22(b), announced on July 3, 1975 (40 FR 28064). As stated in that announcement, the suspension related to the Federal review regulation only; the Administrator continues to encourage the States to develop their own indirect source regulations and to submit them to EPA for approval.

The Administrator will not subject the correction of section 206-30 promulgated below to additional rulemaking, since all that is involved is a technical correction to the Virgin Islands implementation plan which insures that the procedural requirements of 40 CFR 51.18(h) will be met.

**Effective date:** These revisions become effective October 10, 1975.

(42 U.S.C. 1857c-5 and 1857g(a))

Dated: September 4, 1975.

JOHN QUARLES,  
Acting Administrator.

[FR Doc. 75-23949 Filed 9-9-75; 8:45 am]

Part 52 of Chapter 1, Title 40 Code of Federal Regulations is amended as follows:

## Subpart CCC—U.S. Virgin Islands

In § 52.2770, paragraph (c) is amended by adding subparagraph (3) as follows:

## § 52.2770 Identification of plan.

(c) \* \* \*

(3) February 12, 1974 and April 10, 1975

Section 52.2775 is amended by revoking paragraph (a), (b), (c) and (d), and by adding paragraphs (e), (f), (g), (h) and (i) as follows:

## § 52.2775 Review of new sources and modifications.

(e) The requirements of 40 CFR 51.18 (h) are not met since section 206-30 of Chapter 9, Title 12 of the Virgin Islands' Code does not provide that information submitted by the owner or operator and the agency's analysis including its proposed approval/disapproval decision, be made available for public comment for a period of 30-days prior to final action.

(f) Subsection 206-30(f) (6) of section 206-30 of Chapter 9, Title 12 of the Virgin Islands' Code is disapproved since sources of minor significance are not identified in the regulation. Accordingly, all sources not listed in subsections 206-30(f) (1)-(5) will be subject to review in accordance with the requirements of section 206-30.

(g) Regulation for review of new sources and modifications.

(1) This requirement is applicable to any stationary source subject to review under section 206-30 of Chapter 9, Title 12 of the Virgin Islands' Code or 40 CFR 52.2775(f).

(2) Within 30 days after receipt of an application, the Commissioner of the Department of Conservation and Cultural Affairs, will notify the public, by prominent advertisement in the local news media, of the opportunity for public comment on the information submitted by the owner or operator.

(i) Such information, together with the Commissioner's analysis of the effect of the construction or modification on air quality including the Commissioner's proposed approval or disapproval, will be available in at least one location in the affected region.

(ii) Written public comments submitted within 30 days of the date such information is made available will be considered by the Commissioner in making his final decision on the application.

(iii) The Commissioner will make a final decision on the application within 30 days after the close of the public comment period. The Commissioner will notify the applicant in writing of his approval, conditional approval, or disapproval of the application and will set forth his reasons for conditional approval or disapproval.

(iv) A copy of the notice required by paragraph (h) (2) of this section shall

also be sent to the Administrator through the appropriate regional office, and to all other State and local air pollution control agencies having jurisdiction in the region in which such new or modified installation will be located. The notice shall also be sent to any other agency in the region having responsibility for implementing the procedures required under this section.

## CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-12; Notice 2]

## PART 552—PETITIONS FOR RULEMAKING, DEFECT, AND NONCOMPLIANCE ORDERS

## Procedures

This notice establishes a new regulation specifying the requirements for submission of petitions for rulemaking, and petitions for the commencement of defect or non-compliance proceedings in accordance with section 124 of the National Traffic and Motor Vehicle Safety Act, 15 U.S.C. 1410(a). It also describes the procedures the NHTSA will follow in acting upon such petitions.

The notice of proposed rulemaking on which this issuance is based was issued on May 16, 1975 (40 CFR 21486), in response to which eight comments were received. After careful consideration of those comments, the NHTSA has determined that no substantial change from the proposal is called for in the language of the rule.

Most of the comments received in response to the proposed regulation supported the establishment of some kind of regulation with respect to petitions for rulemaking. American Motors supported the proposal without qualification, while the other commenters suggested changes of varying import.

The Center for Auto Safety argued that the proposed rule was too narrow, as it did not deal with petitions to close defect investigations. Section 124 of the Act, upon which Part 552 is based, establishes formal requirements for petitions in the major areas of agency activity under the Act: petitions to "commence proceedings" concerning the issuance, amendment, or revocation of a motor vehicle safety standard, and petitions to "commence proceedings" concerning the issuance of an order with respect to the failure to comply with a

safety standard or the existence of a safety-related defect. These are in fact the main areas in which petitions have been received by the agency in the past. Section 124 indicates an intent of Congress to provide, and at the same time to limit, formal "petition treatment" to these areas. This treatment includes a statutory deadline for action, and FEDERAL REGISTER publication of reasons for denial. A corollary of this Congressional intent is that an informal response by the agency to other types of requests for action is satisfactory. Accordingly, such other requests will not be treated as petitions, but will be handled informally (as in the past) under existing correspondence or other appropriate NHTSA procedures.

The Center for Auto Safety also urged that, upon denial of a petition, the NHTSA should be required to provide the reasons for the denial in specific detail. This suggestion is outside the intent of the statutory provision, and without merit. A full discussion of the agency's reasons for denial of a petition is provided to the petitioner, and copies of such a denial letter are (except for confidential matter) generally available to any person upon request. This agency does not find any intent of Congress to require the full text of denial letters to be printed in the FEDERAL REGISTER. The NHTSA practice of publishing a summary of its reasons for a denial appears to satisfy both the letter and the spirit of section 124. The reason for the provision is to make the agency publicly accountable and "responsible" (from the title of the section) for its negative decisions, as it naturally is for its positive ones. A person who, put on notice by the Federal Register publication, wishes to delve more deeply into the background of the matter may readily do so by requesting further information from the agency.

General Motors objected to the use of the "reasonable possibility" standard in determining whether to grant or deny a petition because it would allow for the granting of virtually any petition. The NHTSA does not agree. It should be remembered that the grant of a petition under this part leads only to the commencement of agency action to gather information necessary to make a decision. The use of the modifier "reasonable" limits the discretion of the Administrator to grant only a petition for an order or rule that has a reasonable chance of being issued, not a petition for any order or rule that may conceivably be issued. The substitution of the term "reasonable probability," as urged by GM, would tend to transform a threshold decision as to whether or not the rule or order might issue into a determination of whether or not it should issue. Such a result would dilute the intent of both section 124 and Part 552 to provide means for interested parties, without access to complete data, to seek remedial action regarding what they consider to be defective or unsafe characteristics of motor vehicles.

GM also urged that a petitioner be required to state the reasons for the petition.

REGISTER space, this period is set at 45 days.

(b) Have, preceding its text, a heading that includes the word "Petition".

directs the Administrator to treat records so is in the public interest and con-

GM also urged that a petitioner be required to verify the facts alleged in the petition before any information requests are made to the manufacturer. Such a requirement would preclude the granting of a petition submitted by an individual or organization with limited resources. The technical review conducted by the Associate Administrator necessarily includes an analysis of the facts alleged in the petition. If he determines that the facts need verification by the petitioner, he has the discretion to request that the petitioner submit additional information. However, to require such information as a condition precedent to granting the petition would not only unduly burden the petitioner, but also would exceed the statutory requirement that the petition merely set forth the facts which it is claimed establish the necessity of an order, not that it prove those facts.

The Recreation Vehicle Industry Association (RVIA) objected to the provision denying cross examination of witnesses at hearings held on petitions under Part 552. It is well established that the NHTSA may hold informal hearings under the Traffic Safety Act, in cases such as *Automotive Parts & Accessories Ass'n, Inc. v. Boyd*, 407 F.2d 330, 334 (D.C. Cir. 1968). The purpose of an informal hearing is to permit the NHTSA to determine whether or not a petitioner has a valid complaint or request for rulemaking. This purpose is best served by allowing both sides to present information and arguments without the necessity for conforming to strict evidentiary rules. In addition, the drafters of section 124 intended to encourage the free use of the petition procedure in alerting the NHTSA to vehicle safety problems. The possibility of having to submit to rigorous cross-examination might deter many potential petitioners from utilizing this procedure. Accordingly, the provision allowing for an informal hearing has been retained intact.

The RVIA also urged that the manufacturer be allowed to respond to the petition before the Administrator decided whether to grant or deny it. Such a proposal misapprehends the purpose of the petition and ignores the opportunities a manufacturer has to respond to adverse information submitted in a petition. If the NHTSA denies the petition, there is no need for response as there is no action adverse to the manufacturer. If the petition is granted, the applicable rulemaking and investigatory procedures are commenced, with full opportunity for the manufacturer to present data and arguments against the proposed rule or order. As noted above, the purpose of the technical review is to facilitate a threshold decision as to whether an order or rule might issue, not whether it will. Thus it is not necessary to consider the comments of the manufacturer before deciding whether to grant or deny.

The proposed time for Federal Register publication of notice of a denial of a petition was 30 days. In order to allow time to prepare a monthly publication of a notice of denials, in the interest of efficiency and conservation of Federal

REGISTER space, this period is set at 45 days.

In light of the foregoing, Title 49, Code of Federal Regulation, is amended by the addition of a new Part 552, *Petitions for Rulemaking, Defect, and Noncompliance Orders*, to read as set forth below.

Effective date: October 13, 1975.

Issued on September 4, 1975.

JAMES B. GREGORY,  
Administrator.

Sec.	Scope.
552.1	Purpose.
552.2	General.
552.3	Requirements for Petition.
552.4	Improperly filed petitions.
552.5	Technical review.
552.6	Public hearing.
552.7	Determination whether to commence a proceeding.
552.8	Grant of petition.
552.9	Denial of petition.
552.10	

AUTHORITY: Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718, (15 U.S.C. 1392, 1407); Sec. 124, 152 Pub. L. 89-492, 88 Stat. 1470, (15 U.S.C. 1410a, 1412); delegation of authority at 49 CFR 151.

#### § 552.1 Scope.

This part establishes procedures for the submission and disposition of petitions filed by interested persons pursuant to the National Traffic and Motor Vehicle Safety Act and the Motor Vehicle Information and Cost Savings Act, to initiate rulemaking or to make a determination that a motor vehicle or item of replacement equipment does not comply with an applicable Federal motor vehicle safety standard or contains a defect which relates to motor vehicle safety.

#### § 552.2 Purpose.

The purpose of this part is to enable the National Highway Traffic Safety Administration to identify and respond on a timely basis to petitions for rulemaking or defect or noncompliance determinations, and to inform the public of the procedures following in response to such petitions.

#### § 552.3 General.

Any interested person may file with the Administrator a petition requesting him (1) to commence a proceeding respecting the issuance, amendment, or revocation of a motor vehicle safety standard, or (2) to commence a proceeding to determine whether to issue an order concerning the notification and remedy of a failure of a motor vehicle or item of replacement equipment to comply with an applicable motor vehicle safety standard or a defect in such vehicle or equipment that relates to motor vehicle safety.

#### § 552.4 Requirements for petition.

A petition filed under this part should be addressed and submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590. Each petition filed under this part must—

(a) Be written in the English language;

(b) Have, preceding its text, a heading that includes the word "Petition";

(c) Set forth facts which it is claimed establish that an order is necessary;

(d) Set forth a brief description of the substance of the order which it is claimed should be issued; and

(e) Contain the name and address of the petitioner.

#### § 552.5 Improperly filed petitions.

(a) A petition that is not addressed as specified in § 552.4, but that meets the other requirements of that section, will be treated as a properly filed petition, received as of the time it is discovered and identified.

(b) A document that fails to conform to one or more of the requirements of § 552.4(a) through (e) will not be treated as a petition under this part. Such a document will be treated according to the existing correspondence or other appropriate procedures of the NHTSA, and any suggestions contained in it will be considered at the discretion of the Administrator or his delegate.

#### § 552.6 Technical review.

The appropriate Associate Administrator conducts a technical review of the petition, to determine whether there is a reasonable possibility that the requested order will be issued at the conclusion of the appropriate proceeding. The technical review may consist of an analysis of the material submitted, together with information already in the possession of the agency, or it may also include the collection of additional information, or a public meeting in accordance with § 552.7.

#### § 552.7 Public meeting.

If the Associate Administrator decides that a public meeting on the subject of the petition would contribute to the determination whether to commence a proceeding, he issues a notice of public meeting for publication in the Federal Register to advise interested persons of the time, place, and subject matter of the public meeting and invite their participation. Interested persons may submit their views and evidence through oral or written presentations, or both. There is no cross examination of witnesses. A transcript of the meeting is kept and exhibits may be accepted as part of the transcript. Sections 556 and 557 of Title 5, United States Code, do not apply to meetings held under this part. The Chief Counsel designates a member of his staff to serve as legal officer at the meeting.

#### § 552.8 Determination whether to commence a proceeding.

At the conclusion of the technical review, the Administrator or his delegate determines whether there is a reasonable possibility that the order requested in the petition will be issued at the conclusion of the appropriate proceeding. If such a reasonable possibility is found, the petition is granted. If it is not found, the petition is denied. In either event, the petitioner is notified of the grant or denial not more than 120 days after receipt of the petition by the NHTSA.

#### § 552.9 Grant of petition.

(a) If a petition for rulemaking with respect to a motor vehicle safety standard is granted, a rulemaking proceeding is promptly commenced in accordance with applicable NHTSA and statutory procedures. The granting of such a petition and the commencement of a rulemaking proceeding does not signify, however, that the rule in question will be issued. A decision as to the issuance of the rule is made on the basis of all available information developed in the course of the rulemaking proceeding, in accordance with statutory criteria.

(b) If a petition with respect to a noncompliance or a defect is granted, a proceeding to determine the existence of the noncompliance or defect is promptly commenced by the initiation of an investigation by the Office of Standards Enforcement or the Office of Defects Investigation, as appropriate.

#### § 552.10 Denial of petition.

If a petition is denied, a Federal Register notice of the denial is issued within 45 days of the denial, setting forth the reasons for denial of the petition.

[FR Doc.75-23989 Filed 9-9-75;8:45 am]

[Docket No. 75-17; Notice 2]

#### PART 553—RULEMAKING PROCEDURES

This notice amends, 49 CFR Part 553, Rulemaking Procedures, by deleting those sections of the part which set out procedures by which interested persons may petition the NHTSA to undertake rulemaking. These procedures have been incorporated in a new Part 552, Petitions for Rulemaking, Defect, and Noncompliance Orders, of Title 49, Code of Federal Regulations, published today in a separate notice.

The amendments provide that the National Highway Traffic Safety Administrator may initiate rulemaking on his own motion, on the recommendation of other agencies of the Federal Government, or on petition by any interested person after a determination in accordance with Part 552 that grant of the petition is advisable (§ 553.11).

The amendment also reverses the order of sections dealing with initiation of rulemaking and notice of proposed rulemaking, presently set out in §§ 553.13 and 553.11, respectively, to more closely follow the chronology of the rulemaking process.

Only one comment, from American Motors Corporation, was received in response to the notice proposing these amendments (40 FR 25480, June 16, 1975). AMC asserted that the language of the new § 553.11 could be misinterpreted to mean that recommendations from other Federal agencies would be treated as another form of petition for rulemaking, rather than as input to the Administrator in making a determination whether or not to commence rulemaking on his own motion. The NHTSA does not agree that the language of § 553.11 is subject to such an interpretation, as it neither expressly nor impliedly

directs the Administrator to treat recommendations from other agencies as petitions. It merely continues the intent of the previous § 553.13 that the recommendations of other agencies may be considered by the Administrator in determining whether to initiate rulemaking proceedings in response to a petition from an interested party or on his own motion.

In light of the foregoing, 49 CFR Part 553, Rulemaking Procedures, is amended as follows:

1. Section 553.11 is revised to read as follows:

#### § 553.11 Initiation of rulemaking.

The Administrator may initiate rulemaking either on his own motion or on petition by any interested person after a determination in accordance with Part 552 of this title that grant of the petition is advisable. The Administrator may, in his discretion, also consider the recommendations of other agencies of the United States.

2. Sec. 553.13 is revised to read as follows:

#### § 553.13 Notice of proposed rulemaking.

Unless the Administrator, for good cause, finds that notice is impracticable, unnecessary, or contrary to the public interest, and incorporates that finding and a brief statement of the reasons for it in the rule, a notice of proposed rulemaking is issued and interested persons are invited to participate in the rulemaking proceedings under applicable provisions of the Acts.

#### §§ 553.31, 553.33 [Reserved]

3. Sections 553.31 and 553.33 are revoked and reserved.

Effective date: October 13, 1975.

(Sec. 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1407); delegation of authority at 49 CFR 151.)

Issued on September 4, 1975.

JAMES B. GREGORY,  
Administrator.

[FR Doc.75-23990 Filed 9-9-75;8:45 am]

[Docket 73-20; Notice 7]

#### PART 555—TEMPORARY EXEMPTION FROM FEDERAL MOTOR VEHICLE SAFETY STANDARDS

##### Termination of Temporary Exemption; Minor Amendments

This notice amends 49 CFR Part 555 to reflect the fact that the Administrator considers petitions to modify exemptions.

On July 7, 1975, the Administrator published notice (40 FR 28504) of a petition by General Motors Corporation to modify the temporary exemption previously granted Motor Coach Industries, Inc. Under § 555.8(c) the Administrator may receive petitions to terminate temporary exemptions, and, under § 555.8(d), he may terminate them. The Administrator's power with respect to temporary exemptions necessarily includes modification of an exemption when to

do so is in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act, or when the exemption is based upon misrepresentations. Accordingly § 555.8 (c) and (d) are amended to reflect this fact. In addition, the section references to processing of petitions (§ 553.31, § 553.35) are changed to Part 552 to reflect recent amendments (40 FR 42014). A new paragraph is added to specify that notices of termination or modification will appear in the FEDERAL REGISTER.

In consideration of the foregoing, in § 555.8 of Title 49, Code of Federal Regulations, paragraph (c) and the introductory phrase of paragraph (d) are revised, and paragraph (f) is added, to read:

§ 555.8 Termination of temporary exemption.

(c) Any interested person may petition for the termination or modification of an exemption granted under this part. The petition will be processed in accordance with the procedures of Part 552 of this chapter.

(d) The Administrator terminates or modifies a temporary exemption if he determines that—

(f) The Administrator publishes in the FEDERAL REGISTER a notice of

(1) A petition for termination or modification of an exemption and the action taken in response to it; and

(2) Any termination or modification of an exemption pursuant to the Administrator's own motion.

Effective date: September 10, 1975. Since the amendment reflects internal policy and procedure it may be made effective upon publication.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159, 15 U.S.C. 1410; Sec. 119, Pub. L. 89-563, 80 Stat. 718, 15 U.S.C. 1407; delegation of authority at 49 CFR 151.)

Issued on: September 4, 1975.

JAMES B. GREGORY,  
Administrator.

[FR Doc.75-23991 Filed 9-9-75;8:45 am]

#### Title 50—Wildlife and Fisheries

##### CHAPTER 1—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

##### SUBCHAPTER B—TAKING, POSSESSION, TRANSPORTATION, SALE, PURCHASE, BARTER, EXPORTATION, AND IMPORTATION OF WILDLIFE

##### PART 20—MIGRATORY BIRD HUNTING

##### Final Regulations Frameworks for 1975-76 Hunting Seasons on Lesser Sandhill (Little Brown) Cranes; Amendment

On August 15, 1975, a document was published in the FEDERAL REGISTER (40 FR 34361) proposing to amend Part 20 of Title 50, Code of Federal Regulations. Included in that document were Proposed Regulations Frameworks for 1975-76 Hunting Seasons on Waterfowl, Coots, and Gallinules; Cranes in Parts of North

Dakota, South Dakota, New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming; and for Common Snipe in the Pacific Flyway.

On August 21, 1975, an amendment to the lesser sandhill (little brown) crane portion of the above proposal was published in the *FEDERAL REGISTER* (40 FR 36572), with a 10-day public comment period allowed, ending August 31, 1975. The amendment included summarized information on the status of lesser sandhill (little brown) cranes and justification for the proposed crane hunting season permit system, daily bag and possession limits for lesser sandhill cranes in the States of North Dakota and South Dakota, and the addition of paragraph (g) to § 20.106 of Subchapter B, Chapter I, Title 50, Code of Federal Regulations, specifying Federal permit requirements for hunting lesser sandhill cranes in portions of Colorado, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

Final rule making on the August 15, 1975, proposal (40 FR 34361) was published in the *FEDERAL REGISTER* on September 5, 1975 (40 FR 41096). In that document, in the lesser sandhill crane portion of the final frameworks, it was noted that proposed additions to the lesser sandhill (little brown) crane section regarding daily bag and possession limits in North and South Dakota, plus the requirement for a Federal sandhill crane hunting permit, were published in the *FEDERAL REGISTER* dated August 21, 1975 (40 FR 36572).

The purpose of this document is to issue final rule making on the lesser sandhill (little brown) crane portion of the regulations frameworks for the 1975-76 hunting season and to amend Subchapter B, Chapter I, to Title 50, Code of Federal Regulations, by adding paragraph (g) to § 20.106.

In this connection, the *Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75-54)* was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the *FEDERAL REGISTER* on June 13, 1975 (40 FR 25241).

#### Comments

Two comments were received in response to the proposed amendment. One comment made on behalf of an organization questioned whether the hunting of lesser sandhill cranes should be permitted, but supported the Federal hunting permit requirement if the proposed season is authorized. The same organization suggested that illustrations depicting flying and standing sandhill cranes and whooping cranes be provided to enable hunters to distinguish between the two species. The other comment made on behalf of an organization opposed harvesting lesser sandhill cranes because (1) the interest in sandhill crane hunting has been relatively light, indicating no good reason for the season; and (2) doubt remains on the suitability of the

season, so the safest course would seem to be to eliminate the doubt by eliminating the season. This second comment also supported the requirement for a Federal crane permit if a crane season is allowed and suggested a \$5 charge be placed on each permit for the purpose of providing revenue for crane management.

#### Response

In response to these comments, attention is called to the fact that detailed information regarding the status and hunting of sandhill cranes was presented in the *Final Environmental Statement for the Issuance of Annual Hunting Regulations Permitting the Sport Hunting of Migratory Birds (FES 75-54)*. The Service currently does not have authority to levy a charge for lesser sandhill crane hunting permits. The relationship between gross income and cost of administering a fee collection program appears, in this instance, to be unfavorable. Hunters are routinely advised by the Service and State conservation agencies not to fire upon unidentified birds. As pointed out in the proposed amendment, seasons for lesser sandhill cranes are set specifically to avoid areas and times when whooping cranes might be present.

In addition to proposing that all hunters of sandhill cranes be required to obtain Federal crane hunting permits, it has been determined for law enforcement purposes that such hunters should be required to possess the permits while engaged in sandhill crane hunting and to display them upon request of authorized law enforcement officials. Consequently, the final regulations provide that, "Each hunter participating in the lesser sandhill (little brown) crane hunting season must obtain and carry in his possession while hunting lesser sandhill cranes a Federal lesser sandhill crane permit available without cost from conservation agencies in the States where crane hunting seasons are allowed. The permit must be displayed to an authorized law enforcement official upon request."

Comments on the Service's regulations proposals are available for public inspection during normal business hours at the Service's Office of Migratory Bird Management, Fish and Wildlife Service, Room 2257, U.S. Department of the Interior, 18th and C Streets, Washington, D.C.

The Fish and Wildlife Service is of the view that, although the rulemaking process for migratory bird hunting must by its nature operate under severe time constraints, every attempt should be made to give the public the greatest possible opportunity to comment on the regulations; thus, when the August 21, 1975, proposed rulemaking was published, the Service established the longest period considered possible for public comment. In doing this, the Service recognized that at the end of the period, time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the Service is of the opinion that the States would have insufficient time to select

their season dates, shooting hours, and bag limits; to communicate those selections to the Service; and finally to establish and publicize the necessary regulations and procedures to implement their decisions. The Service therefore finds that "good cause" exists within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and these regulations will therefore take effect immediately upon publication.

After due consideration of the comments received, the U.S. Fish and Wildlife Service, under authority of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat 755; 16 U.S.C. 703-711), prescribes final regulations frameworks for the lesser sandhill (little brown) cranes for the 1975-76 hunting season in parts of North Dakota, South Dakota, New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming as follows:

*Final Regulations Frameworks for 1975-76 Hunting Seasons on Lesser Sandhill (little brown) Cranes in Parts of North Dakota, South Dakota, New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming.*

The States of Colorado, New Mexico, Oklahoma, Texas, Montana and Wyoming may select a season on the lesser sandhill (little brown) crane with a daily bag limit of 3 and a possession limit of 6 between October 4, 1975, and January 18, 1976, as follows:

(a) 36 consecutive days from October 4 through November 8, 1975, in the Central Flyway portion of Colorado except the San Luis Valley area.

(b) 93 consecutive days between October 25, 1975, and January 31, 1976, in the New Mexico Counties of Chaves, Curry, De Baca, Eddy, Lea, Quay, and Roosevelt, and in that portion of the State of Texas lying west of a line running south from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, along U.S. Highway 87 and including all of Howard and Lynn Counties to U.S. Highway 277 at San Angelo, and along U.S. Highway 277 to the International Toll Bridge in Del Rio.

(c) 58 consecutive days on or after November 29, 1975, in that portion of Oklahoma lying west of U.S. Highway 81, and in that portion of Texas lying east of a line running south from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, then along U.S. Highway 87 to San Angelo, and lying west of a line running north from San Angelo along U.S. Highway 277 to Abilene, along State Highway 351 to Albany, along U.S. Highway 283 to Vernon, and then along U.S. Highway 183 east to the Oklahoma border.

(d) 37 consecutive days to open with the goose season in Phillips County, Montana.

(e) 30 consecutive days on or after October 11, 1975, in Platte and Gosheen Counties, Wyoming.

The States of North and South Dakota may select a season of 30 consecutive days within a November 8-December 7, 1975, framework, with a daily bag limit

of 3 and a possession limit of 6, in the following areas: in the North Dakota Counties of Kidder, Stutsman, Benson, Emmons, Pierce, McLean, Sheridan, and Burleigh; and in part of South Dakota described as follows: from the North Dakota border, south on U.S. Highway 83 to U.S. Highway 212, west on U.S. Highway 212 to the Promise Road, north on the Promise Road to State Highway 20, north on State Highway 20 to U.S. Highway 12, northwest on U.S. Highway 12 to State Highway 63, north on State Highway 63 to the North Dakota border.

Every hunter participating in the lesser sandhill (little brown) crane hunting season must obtain and carry in his possession while hunting lesser sandhill cranes a Federal lesser sandhill crane hunting permit available without cost from conservation agencies in the States where crane hunting seasons are allowed. The permit must be displayed to an authorized law enforcement official upon request.

Effective date: September 10, 1975.

LYNN A. GREENWALT,  
Director, U.S. Fish and  
Wildlife Service.

SEPTEMBER 5, 1975.

Accordingly, Subchapter B, Chapter I to Title 50, Code of Federal Regulations, is amended by adding paragraph (g) to § 20.106 as follows:

§ 20.106 Seasons, limits and shooting hours for lesser sandhill (little brown) cranes.

(g) Every hunter participating in the lesser sandhill (little brown) crane hunting season must obtain and carry in his possession while hunting lesser sandhill cranes a Federal lesser sandhill crane hunting permit available without cost from conservation agencies in the States where crane hunting seasons are allowed. The permit must be displayed to an authorized law enforcement official upon request.

[FR Doc.75-24067 Filed 9-9-75;8:45 am]

#### PART 28—PUBLIC ACCESS

Agassiz National Wildlife Refuge, Minn.  
The following special regulation is issued and is effective on September 10, 1975.

§ 28.28 Special regulations; public access; for individual wildlife refuge areas.

##### MINNESOTA

#### AGASSIZ NATIONAL WILDLIFE REFUGE

Public access to a 75 yard wide retrieval zone on Agassiz National Wildlife Refuge, Minnesota, for the purpose of picking up legally shot waterfowl, snipes, and rails from 12:00 noon to 4:00 PM October 1, 1975 and from one half hour before sunrise to 4:00 PM October 2, 1975 to November 16, 1975, all dates inclusive.

This open area comprises 55 acres and is delineated on a map available at the refuge headquarters at Middle River, Minnesota, and from the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Access shall be in accordance with applicable State and Federal regulations subject to the following special conditions:

1. Access only for the retrieval of legally downed waterfowl, snipes, and rails will be authorized in that portion of Agassiz National Wildlife Refuge designated as a retrieval zone and so marked by signs.

2. Shooting both across and inside the boundaries of Agassiz National Wildlife Refuge is prohibited.

3. No firearms of any kind will be allowed within the retrieval zone.

The provisions of this special regulation supplement the regulations which govern access on wildlife refuges generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through November 15, 1975.

JOSEPH KOTOK,  
Refuge Manager, Agassiz National Wildlife Refuge, Middle River, Minnesota 56737.

AUGUST 19, 1975.

#### PART 32—HUNTING

Sand Lake National Wildlife Refuge, S. Dak.

The following special regulation is issued and is effective on September 10, 1975.

§ 32.12 Special regulation; migratory game birds; for individual wildlife refuge areas.

##### SOUTH DAKOTA

#### SAND LAKE NATIONAL WILDLIFE REFUGE

Public hunting of waterfowl on the Sand Lake National Wildlife Refuge is permitted only on the areas designated by signs as open to hunting. These open areas, totalling 165 acres, are designated on a map available from the refuge headquarters and from the Area Manager, U.S. Fish and Wildlife Service, P.O. Box 250, Pierre, South Dakota 57501.

Hunting shall be in accordance with all applicable State regulations concerning the hunting of waterfowl subject to the following conditions:

(1) The open season for hunting geese on the refuge is from October 4, 1975 through December 14, 1975, inclusive. The open season for hunting ducks and coots on the refuge is from October 4, 1975 through December 2, 1975, inclusive.

(2) Hunting will be from established blind sites only, without cost, with each site restricted to not to exceed two hunters, and on a first-come, first-served basis. Blind sites and their use are more specifically described on a map and a list of regulations available at each of the hunting sites.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 14, 1975.

WILLIAM C. BAIR,  
Refuge Manager, Sand Lake National Wildlife Refuge.

SEPTEMBER 2, 1975.

#### PART 32—HUNTING

Bear River Migratory Bird Refuge, Utah

The following special regulation is issued and is effective on September 3, 1975.

§ 32.12 Special regulation; migratory game birds; for individual wildlife refuge areas.

##### UTAH

#### BEAR RIVER MIGRATORY BIRD REFUGE

The public hunting of ducks, coots, mergansers and whistling swans on the Bear River Migratory Bird Refuge, Utah, is permitted from October 4, 1975 through January 4, 1976, inclusive; and geese from October 11, 1975 through December 14, 1975, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 12,855 acres, is delineated on maps available at refuge headquarters, Brigham City, Utah, and from the Area Office, Fish and Wildlife Service, Federal Building, Salt Lake City, Utah 84111. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of ducks, geese, coots, mergansers and whistling swans subject to the following special conditions:

(1) *Steel shot.* The exclusive use of steel shot is required on all days in both Hunting Area A and Area B for the entire season. The possession of lead shot on the refuge is prohibited, and having lead shot in one's possession will be considered prima facie evidence that the person possessing such shot is engaged in hunting with same.

(2) *Hunting areas.* No hunting is permitted from roadways or within 100 yards of any roadway in Area A. No hunting is permitted from roadway or adjacent area as posted by signs in Area B.

(3) *Boat use.* The use of boats is permitted except that airthrust boats and aircycles may not be used in Unit 2 on weekends and holidays. Airthrust boats and aircycles may be launched only from designated boat ramps. Boats may be left at designated areas 1 week prior to and during the hunting season. All boats and trailers must be removed within 2 weeks after the close of the hunting season.

(4) *Parking.* Hunters may park cars only at designated areas within the refuge.

(5) *Hunter check station.* Each hunter who enters Area A is required to register at the checking station and check out

before leaving the refuge. Those hunt-

cartridge or ammunition in its chamber,

Refuge, Oklahoma, but only on the area

tions covering the hunting of geese sub-

(4) Two or three hunters will be per-

The provisions of these special regu-

before leaving the refuge. Those hunting in Area B are not required to register on entering or leaving the refuge.

(6) *Routes of travel.* To reach open hunting areas, travel is permitted on foot or bicycle over roads between Units 1 and 2 and Units 2 and 3. Travel by boats from checking station using the canal between Units 1 and 2 or down main river channel into Unit 2, or using the canal between Units 2 and 3. Travel by boats and trailers over dike roads to designated parking and launching areas. Airthrust boats and aircycles may use designated travel lanes across a closed portion of the refuge leading to the open area south and southwest of the refuge.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in 50 CFR Part 32, and are effective through January 4, 1976.

NED I. PEABODY,  
Refuge Manager, Bear River  
Migratory Bird Refuge, Brigham  
City, Utah.

#### PART 32—HUNTING

Cabeza Prieta National Wildlife Refuge,  
Ariz.

The following special regulations are issued and are effective on September 10, 1975.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

##### ARIZONA

CABEZA PRIETA NATIONAL WILDLIFE  
REFUGE

The public hunting of bighorn sheep on the Cabeza Prieta National Wildlife Refuge, Arizona, is permitted except in those areas designated by signs as closed to hunting. The bighorn sheep season extends from December 6 through December 21, 1975, inclusive. The open bighorn sheep area, comprising 641,420 acres, is delineated on maps available at refuge headquarters, Yuma, Arizona, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State regulations covering the hunting of bighorn sheep subject to the following special conditions:

(1) Bighorn sheep limited to four (4) permits issued by the Arizona Game and Fish Department.

(2) Bighorn sheep hunters may hunt in those areas designated on their permits.

(3) Possession or transportation of any loaded firearm or strung bow within or on any motorized vehicle or its attachments is prohibited. A loaded firearm shall mean any firearm containing any

cartridge or ammunition in its chamber, magazine or clip.

(4) Possession or transportation of any uncased firearm within or on any motorized vehicle or its attachments is prohibited. An uncased firearm shall mean any firearm not encased in any holster, scabbard, or gun case (soft or hard).

(5) Travel by vehicle is restricted to those roads and/or trails designated by the Refuge Manager. Maps showing these designated routes of travel are available to holders of Arizona Game and Fish Department permits to hunt sheep in this area.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 21, 1975.

##### HAVASU NATIONAL WILDLIFE REFUGE

The public hunting of bighorn sheep on the Havasu National Wildlife Refuge, Arizona, will not be permitted. The Arizona Game and Fish Department will not be issuing bighorn sheep permits for hunt unit 16A for the 1975-1976 hunting season.

##### ARIZONA AND CALIFORNIA

IMPERIAL NATIONAL WILDLIFE REFUGE

The public hunting of deer on the Imperial National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 7,000 acres, is delineated on maps available at refuge headquarters, Martinez Lake, Arizona, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: Arizona—from November 14 through November 23, 1975, inclusive; California—from September 27 through November 2, 1975, inclusive. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions:

(1) Except as provided under the special regulations covering the hunting of small game, doves and migratory waterfowl on the Imperial National Wildlife Refuge, possession of any firearms other than a legal deer hunting firearm, as defined by State hunting regulations, is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 23, 1975.

##### OKLAHOMA

SALT PLAINS NATIONAL WILDLIFE REFUGE

The public hunting of deer is permitted on the Salt Plains National Wildlife

Refuge, Oklahoma, but only on the area designated by signs as open to hunting. This open area, comprising 2,341 acres, is delineated on maps available at refuge headquarters, 14 miles north of Jet, Oklahoma, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Participants are to be selected on the basis of a special drawing and applications are to be submitted to the Oklahoma Department of Wildlife Conservation, 1801 North Lincoln, Oklahoma City, Oklahoma 73105. Application may be made by letter and must contain the applicant's name, address, Oklahoma hunting license number, applicable deer hunting tag number, and driver's license number. Applications will be accepted beginning September 1 and ending at 5 PM September 30, 1975 for all seasons. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions:

(1) The bow hunting season is October 25 and 26 and November 1 and 2, 1975.

(2) The modern gun hunting season is November 22, 23, 25, 26, 29 and 30, 1975.

(3) The primitive firearms hunting season is December 8 and 9, 1975.

(4) Hunters must check in at the refuge office prior to entering the assigned hunting area and must check out at the refuge office upon leaving the area.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 9, 1975.

JERRY L. STEGMAN,  
Acting Regional Director,  
Albuquerque, New Mexico.

SEPTEMBER 3, 1975.

#### PART 32—HUNTING

Shiawassee National Wildlife Refuge, Mich.

Section 32.12 is amended as follows:

§ 32.12 Special regulations; Migratory game birds; for individual wildlife refuge areas.

##### MICHIGAN

SHIAWASSEE NATIONAL WILDLIFE REFUGE

Public hunting of geese on the Shiawassee National Wildlife Refuge, Michigan, is permitted from waterfowl opening hour to 12 noon each odd numbered day from October 1, through November 29, 1975, excluding November 15. The hunting area comprising approximately 1200 acres is delineated on maps located at the refuge headquarters, Saginaw, Michigan, and at the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State and Federal regula-

tions covering the hunting of geese subject to the following special conditions:

(1) Hunting shall be by Federal permit and only from assigned blinds and pits. Blind assignments will be determined by legal drawings.

(2) Certain designated blinds will be restricted to the use of 12 gauge shotguns and steel shot only.

(3) A fee of two dollars per hunter will be charged for the privilege of hunting.

(4) Two or three hunters will be permitted in each blind or pit.

(5) Hunter applications cards must be postmarked on or before September 15, 1975, and only successful applicants will be notified.

(6) After completion of the days hunt, all hunters must proceed to refuge headquarters for check-out and the submission of geese for examination.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuges generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 29, 1975.

CHARLES A. HUGHLETT,  
Acting Regional Director.

### DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[ 25 CFR Part 43h ]

#### PROCEDURAL RULES FOR DISENROLLMENT OF ALASKA NATIVES

##### Notice of Proposed Rulemaking

CROSS REFERENCE: For a document issued by the Department of the Interior affecting both the Bureau of Indian Affairs and the Office of Hearings and Appeals on the subject of procedural rules for disenrollment of Alaska natives, see FR Doc. 75-23967 published elsewhere in this issue under the Office of Hearings and Appeals, Department of the Interior.

Office of Hearings and Appeals

[ 25 CFR Part 43h ]

[ 43 CFR Part 4 ]

#### PROCEDURAL RULES FOR DISENROLLMENT OF ALASKA NATIVES

##### Notice of Proposed Rulemaking

The Department of the Interior is proposing amendments to Part 43h of Title 25 CFR, Preparation of a Roll of Alaska Natives, and Part 4 of Title 43, Department Hearings and Appeals Procedures, to provide procedures for disenrollment of persons on the roll who are found to be ineligible under the Alaska Native Claims Settlement Act, 43 U.S.C. 1601-1624.

A roll of Alaska Natives eligible to receive benefits under the Alaska Native Claims Settlement Act was prepared pursuant to section 5 of the act. That roll was approved on December 17, 1973. The approval was conditional and assumed that the roll, as then comprised, was subject to correction based upon appeals or other legal determinations of individual eligibility.

To assure the accuracy and integrity of the roll, these regulations are proposed, providing due process for administrative determinations of persons who have been erroneously included on the roll of Alaska Natives.

The proposed amendments to the enrollment regulations provide, at § 43h.15, that the enrollment coordinator shall take appropriate measures to ascertain the propriety of the enrollment of Natives where it appears that an ineligible person may have been included on the roll. This proposed amendment also provides for the initiation of contest proceedings by the coordinator pursuant to procedures established in proposed amendments to 43 CFR Part 4.

The proposed amendments include a new Subpart K to 43 CFR Part 4, to provide special procedural rules applicable to contest proceedings to disenrolled Na-

tives. The procedure for hearings in connection with disenrollment proceedings is in accordance with Title 5 U.S.C. 556.

Under the proposal, where the enrollment coordinator concludes that an individual was improperly enrolled he shall initiate a contest proceeding by filing a complaint with the Office of Hearings and Appeals. Each contest shall be assigned to an Administrative Law Judge for consideration.

The proposed § 4.1005 of Title 43 CFR provides for service of the complaint and all other documents upon all parties by personal delivery, first-class, registered or certified mail, return receipt requested, or by such other means as the judge may order. This latter provision is included to enable the judge, under the circumstances of a particular case, to order alternative measures to assure that the contestee receives actual notice of the proceeding. While service by first-class mail is permitted, the proposal provides that no default will be entered without proof of actual service, service by publication or satisfactory proof of inability to serve. It is intended that service by first-class mail will generally be used for service of documents after the complaint has been served and the correct current address of the parties is known.

The proposed § 4.1002(b) of Title 43 CFR would provide alternative provisions for service in a foreign country. These alternatives are provided to enable the selection in a given case of an appropriate means of service that will give actual notice to an Alaska Native residing in a foreign country.

The proposed § 4.1002(c) would provide for service by publication where the contestant after diligent search and inquiry is unable to locate the contestee. Precisely what constitutes diligent search and inquiry may vary from case to case, particularly in different parts of Alaska. At the very least, it should include the mailing of a registered or certified letter to the last known address, an attempt to verify the address with village or regional corporations in which the individual may be enrolled and with other local authorities who could be of assistance in finding such person. Where an individual is believed to reside at more than one location, diligent search and inquiry should include efforts to contact the individual at each location.

The proposed § 4.1002(d) provides for service of copies of complaints upon village and regional corporations who may then intervene in the contest.

Sections 4.1003 and 4.1004 provide requirements for the complaint and answer.

Under the proposed § 4.1006 an order to show cause why the name of the con-

testee should not be stricken from the rolls may be issued if the contestee does not file an answer as required by these regulations. The judge may decide the contest without a hearing where the pleadings do not raise a genuine issue of material fact. Except for good cause shown, hearings should be conducted in the state of Alaska as near as possible to the residence of the contestee. It is intended that in order to afford due process of law in deciding the contest, hearings should be conducted in a location as convenient as possible for the contestee. The exception for good cause is primarily intended to allow disenrollment hearings outside of Alaska in cases where the contestee resides in a state other than Alaska or in another country, but closer to the other 49 states.

The proposed §§ 4.1007 through 4.1009 provide procedural rules for disenrollment proceedings before the Administrative Law Judge. Under the proposed § 4.1009-8(c) the decision of the judge shall become final after 30 days unless an appeal to the Director, Office of Hearings and Appeals is taken.

The proposed § 4.1010 provides for appeals to the Director, Office of Hearings and Appeals to be governed by the general rule for appeals contained in Subparts B and G of Part 4, Title 43 CFR.

It is hereby determined that the publication of this rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), is required. It is further determined that publication of this rulemaking is not a major Federal action significantly affecting the economy and that no detailed economic impact statement is required. These conclusions have been reached on the basis that these regulations merely establish procedures in accordance with due process of law for the orderly determination of rights, and do not attempt to alter existing relationships between men and their environment, and do not impact upon the economy.

Interested persons are invited to submit comments on these proposed regulations on or before October 10, 1975. All comments should be addressed to the Office of the Secretary of the Interior, U.S. Department of the Interior, Washington, D.C. 20240.

In consideration of the foregoing, it is proposed to amend Part 43h of Chapter I, Title 25 of the Code of Federal Regulations, as follows.

KENT FRIZZELL,  
Acting Secretary of the Interior.  
SEPTEMBER 5, 1975.

FEDERAL REGISTER, VOL. 40, NO. 176—WEDNESDAY, SEPTEMBER 10, 1975

### PROPOSED RULES

(4) The address to which papers shall

(f) The Administrative Law Judge may aid in the disposition of the

### PROPOSED RULES

1. Chapter I of Title 25 of the Code of Federal Regulations, Part 43h is amended by adding a new § 43h.15 as follows:

#### § 43h.15 Disenrollment.

(a) Where it appears to the coordinator, based upon review of records within the office of the Area Director and the office of the Enrollment Coordinator, or based upon information otherwise available to him, that a person who has been placed on the roll of Alaska Natives may be ineligible for inclusion on the roll, the coordinator shall cause to be made such investigation as is necessary to determine whether the person is eligible to be on the roll of Alaska Natives.

(b) Where the coordinator concludes that the enrollment of a person as an Alaska Native was improper he shall initiate a contest by filing a complaint with the Office of Hearings and Appeals, 4015 Wilson Boulevard, Arlington, Virginia 22203. The procedures governing disenrollment contests are contained in 43 CFR Part 4, Subpart K.

2. In Subtitle A, Title 43 of the Code of Federal Regulations, Part 4 is amended by adding a new Subpart K as follows:

#### Subpart K—Special Procedural Rules Applicable To Contest Proceedings To Disenroll Alaska Natives

##### § 4.1000 Applicability.

This subpart provides procedures for review of the roll of Alaska Natives to assure the accuracy and integrity of the roll. The purpose of this subpart is to guarantee due process in eliminating from the rolls persons who are ineligible under the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1604). All hearings to be held pursuant to this subpart shall be conducted in accordance with 5 U.S.C. 556.

##### § 4.1001 Definitions.

(a) The definitions provided in 25 CFR 43h.1 are incorporated in this subpart.  
(b) "Director" means the Director, Office of Hearings and Appeals.

##### § 4.1002 Initiation of Proceedings to Contest.

(a) As provided in 25 CFR 43h.15, where the enrollment coordinator concludes that the enrollment of a person as an Alaska Native was improper he shall, as the contestant, initiate a contest by serving a copy of the complaint on the contestee whose enrollment is being challenged and filing the complaint with the Office of Hearings and Appeals, 4015 Wilson Boulevard, Arlington, Virginia 22203. An Administrative Law Judge shall be assigned to the case. The complaint filed with the Office of Hearings and Appeals shall be accompanied by a certificate stating that service has been made in accordance with § 4.1005 (a) and (b).

(b) Alternative provisions for service in a foreign country.

(1) *Manner.* When service is to be effected upon the contestee in a foreign country, it is sufficient if service of the summons and complaint is made:  
(i) In the manner prescribed by the law of the foreign country for service in that country in an action in any of its courts of general jurisdiction; or  
(ii) As directed by the foreign authority in response to a letter rogatory, when service in either case is reasonably calculated to give actual notice; or  
(iii) Upon an individual, by delivery to him personally; or  
(iv) By any form of mail requiring a signed receipt, to be addressed and dispatched by the clerk of the court to the party to be served; or  
(v) As directed by order of the Administrative Law Judge.

(2) *Return.* Proof of service may be made as prescribed by § 4.1005(b) of this subpart, or by the law of the foreign country, or by order of the Administrative Law Judge.

(c) *Service by publication.*  
(1) *When service may be made by publication.* When the contestant has made diligent search and inquiry to locate the contestee, and cannot locate him, the contestant may proceed with service by publication after first filing with the Office of Hearings and Appeals an affidavit which shall:

(i) State that the contestee could not be located after diligent search and inquiry made within 15 days prior to the filing of the affidavit;  
(ii) Be corroborated by an affidavit of a resident of the village, if any, to which the contestee is enrolled, which states that the affiant has no knowledge of the contestee's whereabouts or which gives his last known address or, if such affidavit can not be secured, contestant's affidavit shall include a statement of good cause why the affidavit of a village resident could not be secured;

(iii) Be corroborated by an affidavit of an officer of the regional corporation in which the contestee is a stockholder which recites the information available in records and files of the regional corporation as to the whereabouts of the contestee;  
(iv) State the last known address of the contestee; and  
(v) State in detail the efforts and inquiries made to locate the party sought to be served.

(2) *Contents of published notice.* The published notice must give the names of the parties to the contest, the nature of the complaint, the office in which the contest is pending, and a statement that upon failure to file an answer in such office within 45 days after the completion of publication of such notice, the allegations of the complaint will be taken as confessed. The published notice shall also contain a statement of the dates of publication.

(3) *Publication, mailing and posting of notice.* (i) With respect to Natives who are

(A) Permanent residents of one of the twelve regions established pursuant to 43 U.S.C. 1606(a), notice by publication shall be made by publishing notice at least once a week for 5 successive weeks in a newspaper of general circulation in the region in which the contestee is a stockholder.

(B) Not permanent residents of one of the twelve regions established pursuant to 43 U.S.C. 1606(a), notice by publication shall be made by publishing notice at least once a week for 5 successive weeks in a newspaper of general circulation in the community where the contestee was last known to reside.

(ii) Within 15 days after the first publication of a notice, the contestant shall send a copy of the notice and the complaint by registered or certified mail, return receipt requested, to the contestee at his last known address and also to the contestee in care of the post office nearest the village or city in which the contestee is enrolled or is last known to have resided. The return receipts shall be filed in the Office of Hearings and Appeals.

(iii) A copy of the notice as published shall be posted in a conspicuous place in the village, if any, in which the contestee is enrolled, within 15 days after the first publication of the notice, or where good cause is shown, such as the remote location of the village or weather conditions restricting travel, within a reasonable time after first publication of the notice.

(4) *Proof of service by publication.* (i) Proof of publication of the notice shall be made by filing in the Office of Hearings and Appeals a copy of the notice as published and the affidavit of the publisher or foreman of the newspaper publishing the same showing the publication of the notice in accordance with paragraph (c) (3) of this section.

(ii) Proof of posting of the notice shall be by affidavit of the contestant as to the steps taken to post the notice.

(iii) Proof of the mailing of notice shall be by affidavit of the person who mailed the notice to which shall be attached the return receipt.

(d) The contestant shall serve copies of the complaint on the village corporation, if any, to which the contestee is enrolled, and regional corporation in which the contestee is a stockholder within 30 days after the filing of the complaint. Upon petition filed within 45 days after service of the complaint on the village or regional corporation, the Administrative Law Judge hearing the case shall recognize such village or regional corporation or both as intervenors in the contest. As intervenors, such village or regional corporation may participate fully as parties to the contest.

§ 4.1003 Complaint.

(a) Contents of complaint. The complaint shall contain the following information:

(1) The name and address of the contestee;  
(2) A statement in clear and concise language of the facts and law that form the basis for the contest;

(3) A request that the name of the contestee be stricken from the roll of Alaska Natives;

(4) Permanent residents of one of the twelve regions established pursuant to 43 U.S.C. 1606(a), notice by publication shall be made by publishing notice

FEDERAL REGISTER, VOL. 40, NO. 176—WEDNESDAY, SEPTEMBER 10, 1975

### PROPOSED RULES

DEPARTMENT OF AGRICULTURE

public inspection at the office of the

will present their cases. The burden of

(4) The address to which papers shall be sent for service on the contestant; and

(5) A notice that, unless the contestee files an answer to the complaint with the Office of Hearings and Appeals, 4015 Wilson Boulevard, Arlington, Virginia 22203, within 45 days after service of the complaint, the allegations of the complaint may be taken as confessed.

(b) The Administrative Law Judge hearing the contest may in his discretion, after due notice to the contestee and opportunity to object, grant leave to permit the contestant to amend the complaint.

#### § 4.1004 Answer.

Within 45 days after service of the complaint, the contestee shall file with the Office of Hearings and Appeals, an answer specifically responding to the allegations of the complaint. The answer shall state the address to which all notices or other papers shall be sent for service upon contestee.

#### § 4.1005 Service.

(a) Copies of the complaint and all briefs and other documents filed with the Office of Hearings and Appeals must be served upon all parties. All documents filed with the Office of Hearings and Appeals shall contain a certificate stating the names of all persons served with copies.

(b) Whenever the regulations in this part require that a document be served upon a person, service may be made by personal delivery or by mailing the document first-class or by registered or certified mail, return receipt requested, to his address of record or by such other means as the judge may order. Service may be proved by an acknowledgment of the person served, or by a certificate of service, stating the time and manner of service, signed by the person making service. No default will be entered without proof of actual service, service in accordance with § 4.1002 (b) or (c) of this subpart, or satisfactory proof of inability to serve.

(c) When an attorney has entered an appearance for a contestee, such attorney will be recognized as responsible for the case on behalf of his client, and service of any document relating to the proceeding shall be made upon such attorney. The requirement of service of any document on a party may be fully satisfied by making service upon such attorney, unless otherwise ordered. When more than one attorney has entered an appearance for a contestee, service upon one of the attorneys will be sufficient.

(d) A document will be deemed to have been served on the date of personal service, or, if service was made by mail, on the date of posting, or, with respect to service by publication, on the date of the last publication.

(e) The filing of any pleading, document or other paper shall be deemed to have been made on the date of postmark, except when there is no postmark, in which case it shall be the date of receipt in the proper office.

(f) The Administrative Law Judge hearing the contest may in his discretion, for good cause shown, extend the time for filing or serving any document in a contest.

#### § 4.1006 Action by the Office of Hearings and Appeals.

(a) If an answer is not filed as required, the Administrative Law Judge shall issue an order to show cause why the name of the contestee should not be stricken from the roll of Alaska Natives. If the order to show cause is not satisfied as provided in the order, the contestee will be deemed to have waived his right to hearing, the allegations of the complaint will be taken as admitted by the contestee and the judge will decide the case without the necessity of a hearing.

(b) If an answer is filed and the judge determines that the complaint and answer do not raise a genuine issue of material fact, the judge may decide the contest without a hearing. Before issuing the decision, the Administrative Law Judge may request such additional briefs or documents as may be appropriate.

(c) If an answer is filed and the pleadings raise a genuine issue of material fact, unless all parties waive a hearing, the contest shall be set for hearing by the Administrative Law Judge. Except for good cause shown, all disenrollment hearings shall be conducted within the State of Alaska, as near as practicable to the residence of the contestee.

#### § 4.1007 Amendment of answer.

At the hearing, any allegation not denied by the answer may be deemed admitted. The Administrative Law Judge may permit the answer to be amended after due notice to contestant and opportunity to object.

#### § 4.1008 Summary disposition.

Where a party fails to respond to a prehearing order, the Administrative Law Judge shall issue an order to show cause why the contest should not be decided as prayed by the opposing party. If the order to show cause is not satisfied as provided in the order, the Administrative Law Judge may decide the contest without proceeding to hearing. Where a party fails to appear at a hearing, the Administrative Law Judge may dispose of the case against the interest of the party that failed to appear.

#### § 4.1009 Proceedings before the Administrative Law Judge.

##### § 4.1009-1 Prehearing conferences.

(a) The Administrative Law Judge may in his discretion, on his own motion or on motion of any of the parties, direct the parties or their representatives to appear at a specified time and place for a prehearing conference to consider: (1) The simplification of the issues, (2) the necessity of amendments to the pleadings, (3) the possibility of obtaining stipulations, admissions of fact and agreements to the introduction of documents, (4) the limitation of the number of witnesses, and (5) such other matters as

may aid in the disposition of the proceedings.

(b) The Administrative Law Judge may issue an order which recites the action taken at the conference, the amendments allowed to the pleadings, and the agreements made as to any of the matters considered, and which limits the issues for hearing to those not disposed of by admissions or agreements. Such order shall control the subsequent course of the proceedings before the Administrative Law Judge unless modified for good cause by subsequent order.

##### § 4.1009-2 Notice of hearing.

The Administrative Law Judge shall fix a place and date for the hearing and notify all parties in writing at least 30 days in advance of the date set, unless all parties request or consent to an earlier date. The notice shall include (a) the time, place, and nature of the hearing, (b) the legal authority and jurisdiction under which the hearing is to be held, and (c) the matters of fact and law asserted.

##### § 4.1009-3 Postponements.

(a) Postponements of hearings will not be allowed upon the request of any party except upon a showing of good cause. A request for a postponement shall be served upon all parties to the proceeding and filed in the office of the Administrative Law Judge at least 10 days prior to the date of the hearing.

(b) The request for a postponement shall state in detail the reasons why a postponement is necessary. If a request is based upon the absence of witnesses, it shall state what the substance of the testimony of the absent witnesses would be. No postponement will be granted if the adverse party or parties file with the Administrative Law Judge within 5 days after the service of the request a statement admitting that the witnesses on account of whose absence the postponement is desired would, if present, testify as stated in the request, and both parties stipulate that the statement is true.

##### § 4.1009-4 Consolidation and separation.

Under appropriate circumstances, the Administrative Law Judge may consolidate several contests, or separate a single contest into component parts, each of which may be processed as a separate contest.

##### § 4.1009-5 Authority of Administrative Law Judge.

The Administrative Law Judge is vested with general authority to conduct the hearing in an orderly and judicial manner, including authority to administer oaths, to call and question witnesses, and to make a decision. Unless otherwise provided in this subpart, procedures and practice shall be governed by the general rules in Subparts A and B of this part.

##### § 4.1009-6 Burden of proof.

The contestant will present his case first, following which the other parties

will present their cases. The burden of proof shall be on the contestant.

#### § 4.1009-7 Evidence.

(a) All oral testimony shall be under oath and witnesses shall be subject to cross-examination. The Administrative Law Judge may question any witness. Documentary evidence may be received if pertinent to any issue. The Administrative Law Judge will terminate examination and exclude testimony which is irrelevant and immaterial.

(b) Objections to evidence will be ruled upon by the Administrative Law Judge. Where a ruling of an Administrative Law Judge sustains an objection to the admission of evidence, the party affected may insert in the record, as a tender of proof, a summary written statement of the substance of the excluded evidence, and the objecting party may then make an offer of proof in rebuttal.

#### § 4.1009-8 Proposed findings and conclusions; decision by Administrative Law Judge.

(a) At the conclusion of the testimony the parties at the hearings shall be given a reasonable time by the Administrative Law Judge, considering the number and complexity of the issues and the amount of testimony, to submit to the Administrative Law Judge proposed findings of fact and conclusions of law and reasons in support thereof or to stipulate to a waiver of such findings and conclusions.

(b) The Administrative Law Judge shall rule upon proposed findings and conclusions submitted by the parties and such ruling shall be shown in the record. The Administrative Law Judge will render a written decision in the case which shall become a part of the record and shall include a statement of his findings and conclusions, as well as the reasons or basis therefor, and his rulings upon the findings and conclusions proposed by the parties if such rulings do not appear elsewhere in the record. A copy of the decision will be served upon all parties to the case.

(c) The decision of the Administrative Law Judge shall become final upon the expiration of 30 days after its issuance unless an appeal to the Director is taken in accordance with § 4.1010.

#### § 4.1010 Appeal to the Director.

Any party, including the coordinator, adversely affected by the decision of the Administrative Law Judge may appeal to the Director within 30 days after the date of the decision of the Administrative Law Judge. Unless otherwise provided, such appeals shall be governed by the general rules in Subparts B and G of this part. No further hearing will be allowed in connection with the appeal but the Director, after considering the evidence, may remand any case for further hearing if he considers such action necessary to develop the facts.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### [ 7 CFR Part 927 ]

**BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIR-GEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA**

#### Expenses, Rate of Assessment, and Carryover of Unexpended Funds

This notice invites written comments relative to the proposed Control Committee expenses of \$95,125 and an assessment rate of \$0.015 per standard western pear box or equivalent quantity of regulated winter pears to support committee activities during the 1975-76 fiscal period under Marketing Order No. 927. The committee has also proposed that unexpended assessment income from 1974-75 and prior years be carried over as a reserve.

Consideration is being given to the following proposals submitted by the Control Committee, established pursuant to the marketing agreement, as amended, and Order No. 927, as amended (7 CFR Part 927), as the agency to administer the terms and provisions thereof. Said agreement and order regulate the handling of Beurre D'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Beurre Clairgeau varieties of pears grown in Oregon, Washington, and California, and are effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The proposals are as follows:

(a) That expenses which are reasonable and necessary to be incurred by the Control Committee, during the period July 1, 1975, through June 30, 1976, will amount to \$95,125.

(b) That the rate of assessment for such period, payable by each handler in accordance with § 927.41, be fixed at \$0.015 per standard western pear box of pears, or an equivalent quantity of pears in other containers or in bulk.

(c) That unexpended assessment funds in excess of expenses incurred during the fiscal period ended June 30, 1975, and prior years be carried over as a reserve in accordance with the applicable provisions of § 927.42.

Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order.

All persons who submit written data, views, or arguments in connection with the aforesaid proposals shall file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112A, Washington, D.C. 20250, not later than September 26, 1975. All written submissions made pursuant to this notice will be made available for

public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: September 3, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

**MILK IN THE LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA**

**Decision on Proposed Amendments to Marketing Agreement and to Order**

#### Correction

In FR Doc. 75-23443 appearing on page 40843 in the issue of Thursday, September 4, 1975, make the following correction:

In column 2 on page 40848 the amendatory language preceding § 1046.13 should be corrected and a paragraph (b) should be inserted as set forth below:

3. In § 1046.13, paragraphs (b) and (c) are revised as follows:

§ 1046.13 Producer milk.

(b) Diverted by a handler from a pool plant pursuant to § 1046.7(a) to another pool plant for any number of days of the month. Milk so diverted shall be deemed to have been received by the diverting handler at the location of the pool plant from which diverted.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

[Docket No. 75-NW-26-AD]

#### [ 14 CFR Part 39 ]

**BOEING MODEL 737 SERIES AIRPLANES**  
**Notice of Proposed Airworthiness Directive**

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Boeing Model 737 series airplanes, serial numbers 19437 to 20544, inclusive, that have been modified in accordance with Boeing Service Bulletins 52-1004 and/or 52-1034. There have been many reports of inability to open overwing hatches from outside the airplane. A plug type emergency exit hatch is located on each side of the fuselage in the overwing area. The hatch may be opened from the inside of the airplane by means of a manually operated pull type handle. On earlier production airplanes, a hinged cover over the handle afforded both interior trim and exit hatch operating instructions. With that cover, a two-step operation

ing sequence was required; one step to closing date for comments, in the Rules light of comments received. All com-

reports by FAA medical personnel. This corrective lenses while exercising the

[ 14 CFR Part 71 ]

ing sequence was required; one step to lower the handle cover and a second step to pull the hatch handle. To afford a one-step method of hatch opening, the hinged handle cover was replaced with a one piece molded handle cover assembly clamped to the hatch handle. Pulling the handle cover releases the hatch latch. The attaching clamp is screwed into inserts potted into a block bonded to the top of the handle cover assembly. A nylon block is bonded to the lower portion of the handle cover assembly to act as a ramp to prevent interference with the handle cutout in the hatch lining when the hatch is opened. A retrofit equivalent of the production change was offered through Boeing Service Bulletin 737-52-1004. Ultimately, certain difficulties developed, and in order to prevent the separation of the overwing emergency hatch handle cover from the hatch handle assembly causing confusion and possible blockage during an emergency egress, AD 70-18-16, Amendment 39-1077, required rework of the hatch handle cover in accordance with Boeing Service Bulletin 737-52-1034. Recently, operational checks of emergency escape hatches on a large number of airplanes on which the original hinged door covering the latch release handle had been replaced by a cover attached to the release handle per Boeing Service Bulletin 737-52-1004, revealed that many hatches could not be opened reliably from outside the airplane because of interference between the cover and the hatch lining. The interference resulted from insufficient cover rotation early in the unlatching sequence. Inadvertent omission of the spacers or washers installed between the cover attach clamp flanges when performing hatch maintenance or adjustment can adversely affect cover rotation. In all instances, however, these hatches could be reliably opened from inside the airplane.

Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed airworthiness directive would require modification of the existing emergency escape hatch handle cover installation in accordance with Boeing Service Bulletin 737-52-1054, or later approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Northwest Region, Office of Regional Counsel, Attention: Airworthiness Rules Docket, 9010 East Marginal Way South, Seattle, Washington 98108. All communications received on or before November 1, 1975, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this Notice may be changed in the light of comments received. All comments will be available, both before and after the

closing date for comments, in the Rules Docket for examination by interested persons.

In consideration of the foregoing, it is proposed to amend § 39.13 of the Federal Aviation Regulations by adding the following new airworthiness directive:

**BOEING:** Applies to all Boeing Model 737 series airplanes, serial numbers 19437 to 20544, inclusive, that have been modified in accordance with Boeing Service Bulletins 52-1004 and/or 52-1034, certificated in all categories. Compliance required as indicated unless already accomplished.

To eliminate possible interference between the escape hatch handle cover and the hatch lining and ensure that the hatch may be easily opened from outside the airplane, accomplish the following:

A. Within 30 days time in service from the effective date of this AD, unless already accomplished within the last 120 days, perform inside/outside operational check of the overwing exits and visually inspect condition of hatch handle cover assembly for wear, abrasion, and corrosion. Remove and replace as necessary.

B. Within 60 days time in service from the effective date of this AD, unless already accomplished, accomplish hatch handle cover rework in accordance with Boeing Service Bulletin 737-52-1054, or later approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington, September 2, 1975.

J. H. TANNER,  
Acting Director, Northwest Region.

#### [ 14 CFR Part 67 ]

[Docket No. 14971; Notice No. 75-33]

#### VISUAL ACUITY REQUIREMENTS FOR MEDICAL CERTIFICATES; USE OF CONTACT LENSES

##### Notice of Proposed Rule Making

The Federal Aviation Administration is considering amending Part 67 of the Federal Aviation Regulations to permit the use of contact lenses (as well as eyeglasses) to satisfy the distant visual acuity requirements of that part.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Northwest Region, Office of Regional Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, S.W., Washington, D.C. 20591. All communications received on or before November 10, 1975, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in

light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

This notice is issued in response to a petition for rulemaking submitted by the Aircraft Owners and Pilots Association (AOPA) by letter dated March 8, 1974. A partial grant of that petition was issued by the Administrator on August 20, 1975 and this notice is issued pursuant to that grant.

Sections 67.13(b)(1) and 67.15(b)(1) of the Federal Aviation Regulations currently require applicants for first-class and second-class medical certificates to have distant visual acuity of 20/20 or better in each eye separately, without correction, or of at least 20/100 in each eye separately, corrected to 20/20 or better with corrective glasses. In the latter case the applicant may be certificated only on the condition that he wears those corrective glasses while exercising the privileges of his airman certificate. Section 67.17(b)(1) requires applicants for third-class medical certificates to have a distant visual acuity of 20/50 or better in each eye separately, without correction, or if the vision in either eye, or both eyes, is poorer than 20/50 and is corrected to 20/30 or better in each eye with corrective glasses, the applicant may be certificated on the condition that he wears those corrective glasses while exercising the privileges of his airman certificate.

The Aircraft Owners and Pilots Association petitioned for amendment of the medical standards of Part 67, specifically to authorize the use of contact lenses for meeting visual requirements for all classes of airman medical certificates. In support of its petition, AOPA contends that experience has shown that the use of contact lenses produces no sudden unpredictable hazards to flight, and that once in place, a contact lens is not easily dislodged. AOPA also points out that in some situations contact lenses are superior to glasses because they do not obstruct the peripheral visual field as do spectacle frames, and further that contact-lens use is more compatible with the wearing of certain protective equipment.

The FAA recognizes the increasing popularity and use of contact lenses in the United States, and certain advantages of these lenses over spectacles. While the medical standards of Part 67 of the Federal Aviation Regulations specifically provide that acceptable vision correction shall be achieved through the use of glasses, Statements of Demonstrated Ability (special issuances) have been issued to applicants pursuant to § 67.19 of the Federal Aviation Regulations, permitting the use of contact lenses to correct distant visual acuity. Contact lenses that correct near visual acuity have not been considered acceptable for aviation duties. To date, these special issuances have been granted only upon submission of detailed reports by eye specialists and after review of these

reports by FAA medical personnel. This administrative procedure frequently delays the initial medical certification of applicants who wish to wear contact lenses to meet distant visual acuity standards.

In FAA experience, these evaluation reports have had limited value in uncovering significant pathology or evidence of complications that would contraindicate the use of contact lenses in the performance of aviation duties. In addition, the agency is unaware of any accidents or incidents in which the use of contact lenses by airmen was a contributing factor.

The FAA believes that the use of contact lenses to correct distant visual acuity will not adversely affect safety, and that the administrative delay experienced by applicants in obtaining special issuances under § 67.19 may be avoided by amending Part 67 to permit the use of contact lenses as well as eye glasses.

This amendment is proposed under sections 313(a), 601, and 602 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1422) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend §§ 67.13(b)(1), 67.15(b)(1) and 67.17(b)(1) of Part 67 of the Federal Aviation Regulations to read as follows:

#### § 67.13 First-class medical certificate.

• • • • •

##### (b) Eye:

(1) Distant visual acuity of 20/20 or better in each eye separately without correction; or of at least 20/100 in each eye separately corrected to 20/20 or better with corrective lenses (glasses or contact lenses) in which case the applicant may be qualified only on the condition that he wears those corrective lenses while exercising the privileges of his airman certificate.

• • • • •

#### § 67.15 Second-class medical certificate.

• • • • •

##### (b) Eye:

(1) Distant visual acuity of 20/20 or better in each eye separately, without correction; or of at least 20/100 in each eye separately corrected to 20/20 or better with corrective lenses (glasses or contact lenses), in which case the applicant may be qualified only on the condition that he wears those corrective lenses while exercising the privileges of his airman certificate.

• • • • •

#### § 67.17 Third-class medical certificate.

• • • • •

##### (b) Eye:

(1) Distant visual acuity of 20/50 or better in each eye separately, without correction; or if the vision in either or both eyes is poorer than 20/50 and is corrected to 20/30 or better in each eye with corrective lenses (glasses or contact lenses), the applicant may be qualified on the condition that he wears these

corrective lenses while exercising the privileges of his airman certificate.

Issued in Washington, D.C., on September 2, 1975.

H. L. REIGHARD, M.D.,  
Federal Air Surgeon, AAM-1.

#### [ 14 CFR Part 71 ]

[Airspace Docket No. 75-SO-102]

#### TRANSITION AREA

##### Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Campbellsville, Ky., transition area.

Interested persons may submit such written data, views or arguments as they desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before October 5, 1975 will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Campbellsville transition area would be designated as:

That airspace extending upwards from 700 feet above the surface within a 6.5-mile radius of Taylor County Airport (Lat. 37°21'05" N., Long. 85°18'45" W.); within 3 miles each side of the 229° bearing from the Arista RBN (Lat. 37°21'19" N., Long. 85°18'54" W.), extending from the 6.5-mile radius area to 8.5 miles southwest of the NDB.

The proposed designation is required to provide controlled airspace protection for IFR operations at Taylor County Airport. A prescribed instrument approach procedure to this airport, utilizing the Arista (Private) Nondirectional Radio Beacon, is proposed in conjunction with the designation of this transition area.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on August 29, 1975.

GORDON W. BECKER,  
Acting Director, Southern Region.  
[FR Doc.75-23964 Filed 9-9-75; 8:45 am]

#### [ 14 CFR Part 71 ]

[Airspace Docket No. 75-SO-104]

#### VOR AIRWAY

##### Proposed Extension

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would extend V-321 from Columbus, Ga., direct to Albany, Ga.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before October 5, 1975 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, S.W., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would extend V-321 from Columbus, Ga., to Albany, Ga. This direct route would improve traffic flow between these locations when either R-3002B or R-3002C is not in use for their established purpose. A minimum en route altitude of 5,000 feet would permit flight above R-3002A which has a ceiling of 4,000 feet MSL.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on September 4, 1975.

WILLIAM E. BROADWATER,  
Chief, Airspace and Air  
Traffic Rules Division.

#### CONSUMER PRODUCT SAFETY COMMISSION

##### [ 16 CFR Part 1014 ]

#### PRIVACY ACT

Proposed Policies and Procedures Implementing the Privacy Act of 1974

Notice is hereby given that the Consumer Product Safety Commission proposes to amend Title 16, CFR, by adding Part 1014 to implement the provisions of the Privacy Act of 1974 (Pub. L. 93-579).

These regulations set forth the procedures whereby individuals can request information about and gain access to Commission records pertaining to themselves. Internal regulations on the collection and storage of personal information

<sup>1</sup>Map filed as part of the original document.

tion will be published as an addendum to these regulations at a later date.

Accordingly, under provisions of the Privacy Act of 1974 (5 U.S.C. 552a, Pub. L. 93-579) and of the OMB Guidelines issued pursuant to its terms (40 FR 28948, July 9, 1975), the Commission proposes to add a new Part 1014 to Title 16, Chapter II, Subchapter A, as follows:

**PART 1014—POLICIES AND PROCEDURES IMPLEMENTING THE PRIVACY ACT OF 1974**

- Sec.  
1014.1 Purpose and scope.  
1014.2 Definitions.  
1014.3 Procedures for requests pertaining to individual records.  
1014.4 Requirements for identification of individuals making requests.  
1014.5 Disclosure of requested information to individuals.  
1014.6 Request for correction or amendment to a record.  
1014.7 Agency review of request for correction or amendment of a record.  
1014.8 Appeal of initial denial of correction or amendment.  
1014.9 Disclosure of record to a person other than the individual to whom it pertains.  
1014.10 Fees.  
1014.11 Penalties.  
1014.12 Specific exemptions.

AUTHORITY: Privacy Act of 1974 (5 U.S.C. 552a).

**§ 1014.1 Purpose and scope.**

This part sets forth the regulations of the Consumer Product Safety Commission implementing the Privacy Act of 1974 (Pub. L. 93-579). The purpose of these regulations is to inform the public about records maintained by the Commission which contain personal information about individuals, and to inform those individuals how they may seek access to and correct records concerning themselves. These regulations do not apply to requests for information made pursuant to the Freedom of Information Act (except where such disclosures would constitute an invasion of privacy of an individual).

**§ 1014.2 Definitions.**

As used in this part:

- (a) "Individual" means a person who is a citizen of the United States or an alien lawfully admitted for permanent residence.  
(b) "Privacy Act" means the Privacy Act of 1974 (Pub. L. 93-579).  
(c) "Record" means any item of personal information relating to an individual, such as educational, employment, financial or medical information.  
(d) "Statistical record" means a record in a system or records maintained for statistical research or reporting purposes only and not used in whole or in part in making any determination about an identifiable individual.  
(e) "System or records" or "records system" means a group of records maintained by the Commission from which information may be retrieved by the name of an individual or some other individual identifier.

(f) "Maintain" includes the collection, use, storage, and dissemination of information.

**§ 1014.3 Procedures for requests pertaining to individual records.**

(a) Any individual may request the Commission to inform him or her whether a particular record system named by the individual contains a record pertaining to him or her. The request may be made by mail or in person during business hours (8:30 a.m. to 5 p.m.) at the Office of the Secretary, Consumer Product Safety Commission, Suite 1025, 1750 K Street, NW., Washington, D.C. 20207.

(b) An individual who believes that the Commission maintains a record pertaining to him or her but who cannot determine which record system may contain the record, may request assistance by mail or in person at the Office of the Secretary during business hours.

(c) A Commission officer or employee or former employee who desires to review or obtain a copy of a personnel record pertaining to him or her may make a request by mail or in person at the Office of the Director, ORU, Room 432, 5401 Westward Avenue, Bethesda, Md. 20207.

(d) Each individual requesting the disclosure of a record or a copy of a record shall furnish the following information to the extent known with the request to the Office of the Secretary or to the Director of the Office of Resource Utilization, as applicable:

- (1) A description of the record sought;
  - (2) The approximate date of the record;
  - (3) The name or other description of the record system containing the record;
  - (4) Proof as required in section 1014.4 that he or she is the individual to whom the requested record relates; and
  - (5) Any other information required by the notice describing the record system.
- (e) An individual personally inspecting his or her records may be accompanied by other persons of his or her choosing. The individual shall sign a written statement authorizing disclosure of the record in the other person's presence.

(f) Any individual who desires to have a record concerning himself or herself disclosed to or mailed to another person may authorize that person to act as his agent for that specific purpose. The authorization shall be in writing, signed by the individual, and shall be notarized. An agent requesting the review or copy of another's record shall submit with the request the authorization and proof of his or her identity as required by § 1014.4(c).

(g) The parent of any minor individual or the legal guardian of any individual who has been declared by a court of competent jurisdiction to be incompetent, due to physical or mental incapacity or age, may act on behalf of that individual in any matter covered by this part. A parent or guardian who desires to act on behalf of such individual shall present suitable evidence of parentage or guardianship, by birth certificate, certified copy of a court order, or similar documents,

and proof of the individual's identity in a form that complies with § 1014.4(c).

(h) An individual may request an accounting of all disclosures made to other persons or agencies of his or her record, except those disclosures made to law enforcement agencies pursuant to section (b) (7) of the Privacy Act (5 U.S.C. 552a (b) (7)). A request for accounting, whenever made, shall be treated as a request for disclosure of records.

**§ 1014.4 Requirement for identification of individual making requests.**

The following proof of identity is required for requests for records made pursuant to § 1014.3:

(a) An individual seeking a record about himself or herself in person may establish his or her identity by the presentation of a single document bearing a photograph (such as a passport or driver's license) or by a presentation of two items of identification which do not bear a photograph but do bear a name and address. An individual who cannot provide documentation of his or her identity may provide a written statement affirming his or her identity and the fact that he or she understands the penalties for making false statements (18 U.S.C. 1001 and 5 U.S.C. 552a(i) (3)).

(b) An individual seeking a record by mail shall include a statement signed by the individual and properly notarized, that he or she appeared before a notary public and submitted proof of identity acceptable to the notary public.

(c) Requests made by an agent, parent, or guardian shall, in addition to establishing the identity of the minor or other person he or she represents as required by subparagraphs (a) and (b), establish his or her agency, parentage, or guardianship by documentation.

(d) In any case in which the Commission determines that the proof of identity is not adequate, it may request the individual to submit additional proof of identity.

**§ 1014.5 Disclosure of requested information to individuals.**

(a) Upon submission of proof of identity, the Office of the Secretary or the Director of Resource Utilization, as applicable, shall promptly allow the individual to see and/or have a copy of the requested record or send a copy of the record to the individual by mail, as requested by the individual. If the individual asks to see the record, the record should be made available for review and/or copying at the location where the record is maintained, in the Office of the Secretary or the Director of Resource Utilization or at the nearest Area Office.

(b) If the Secretary or Director of Resource Utilization, as applicable, should determine, for any reason, that the requested records are exempt from disclosure, a notice of denial shall be sent to the requester stating the reasons for denial, and the requester's right to appeal the denial in accordance with the procedures set forth in § 1014.8 of these regulations.

**§ 1014.6 Request for correction or amendment to a record.**

(a) Any individual who has reviewed a record pertaining to himself or herself may request the Commission official who furnished the record to correct or amend all or any part of the record.

(b) Each request for a correction or amendment of a record shall be in writing and shall contain the following information:

- (1) The name of the individual requesting the correction or amendment;
- (2) The name or other description of the system of records in which the record sought to be amended is maintained;
- (3) The location of that record in the system of records to the extent that it is known;
- (4) A copy of the record sought to be amended or a description of that record;
- (5) A statement of the material in the record that should be corrected or amended;
- (6) A statement of the specific wording of the correction or amendment sought; and
- (7) A statement of the basis for the requested correction or amendment including any material that the individual can furnish to substantiate the reasons for the amendment sought.

(c) The responsible Commission official will promptly review the request and either make the requested correction or amendment or notify the individual of his or her refusal to do so, including in the notification the reasons for the refusal, and the appeal procedures provided by § 1014.8.

(d) The responsible Commission official will make each requested correction or amendment to a record if that correction or amendment will correct anything that is not accurate, relevant, timely, or complete, within the record. A copy of each corrected or amended record shall be furnished to the individual that requested the action. If an accounting of disclosure has been made, all previous recipients of the record shall be notified of the correction and its substance.

(e) The responsible Commission official will make each requested correction or amendment to a record if that correction or amendment will correct anything that is not accurate, relevant, timely, or complete, within the record. A copy of each corrected or amended record shall be furnished to the individual that requested the action. If an accounting of disclosure has been made, all previous recipients of the record shall be notified of the correction and its substance.

**§ 1014.7 Agency review of request for correction or amendment of record.**

(a) Not later than 10 working days after the receipt of the request for the correction or amendment of a record under § 1014.6, the responsible Commission official shall acknowledge receipt of the request and inform the individual whether further information is required before the correction or amendment can be considered.

(b) The responsible Commission official will promptly review the request and either make the requested correction or amendment or notify the individual of his or her refusal to do so, including in the notification the reasons for the refusal, and the appeal procedures provided by § 1014.8.

(c) The responsible Commission official will make each requested correction or amendment to a record if that correction or amendment will correct anything that is not accurate, relevant, timely, or complete, within the record. A copy of each corrected or amended record shall be furnished to the individual that requested the action. If an accounting of disclosure has been made, all previous recipients of the record shall be notified of the correction and its substance.

(d) The responsible Commission official will make each requested correction or amendment to a record if that correction or amendment will correct anything that is not accurate, relevant, timely, or complete, within the record. A copy of each corrected or amended record shall be furnished to the individual that requested the action. If an accounting of disclosure has been made, all previous recipients of the record shall be notified of the correction and its substance.

**§ 1014.8 Appeal of initial denial of correction or amendment.**

(a) Any individual whose request for a correction or amendment to a record is denied, in whole or in part, may appeal that decision within 30 working days to the Executive Director, Consumer Product Safety Commission, Washington, D.C. 20207.

(b) The appeal shall be in writing and shall:

- (1) Name the individual making the appeal;

(2) Identify the record sought to be corrected or amended;

(3) Name or describe the record system in which the record is contained;

(4) Contain a short statement describing the correction or amendment sought;

(5) State the name and location of the Commission official who initially denied the correction or amendment; and

(6) State the date of the initial denial.

(c) Not later than 30 working days after the date on which the appeal is received, the Executive Director shall complete a review of the appeal and make a final decision thereon. However, for good cause shown, the Chairman of the Commission may extend the 30-day period. If the Chairman so extends the period, he or she shall promptly notify the individual requesting the review that the extension has been made.

(d) If after review of an appeal request, the Executive Director also refuses to amend the record in accordance with the request, he or she shall send a written notice to the requester containing the following information—

- (1) The decision and the reasons for the decision;
- (2) The right of the requester to institute a civil action in a Federal District Court for judicial review of the decision; and
- (3) The right of the requester to file with the Executive Director a concise statement setting forth the reasons for his or her disagreement with the denial of the correction or amendment. A copy of the statement of disagreement shall be filed with the record in issue, and the record in issue shall be so marked as to indicate that there is a disagreement. The Executive Director shall make the statement of disagreement available to prior recipients of the disputed record to the extent that an accounting of disclosure was maintained, and to any person to whom the record is later disclosed, together with a brief statement, if deemed appropriate, of the reasons for denying the requested correction or amendment.

(e) The responsible Commission official will make each requested correction or amendment to a record if that correction or amendment will correct anything that is not accurate, relevant, timely, or complete, within the record. A copy of each corrected or amended record shall be furnished to the individual that requested the action. If an accounting of disclosure has been made, all previous recipients of the record shall be notified of the correction and its substance.

(f) The responsible Commission official will make each requested correction or amendment to a record if that correction or amendment will correct anything that is not accurate, relevant, timely, or complete, within the record. A copy of each corrected or amended record shall be furnished to the individual that requested the action. If an accounting of disclosure has been made, all previous recipients of the record shall be notified of the correction and its substance.

**§ 1014.9 Disclosure of record to person other than the individual to whom it pertains.**

(a) Any person or agency (other than an officer or employee of the Commission who has a need for individual records in the performance of his or her duty) seeking disclosure of personal records of another individual shall submit a request in writing to the Office of the Secretary, Consumer Product Safety Commission, 1750 K Street, NW., Washington, D.C. 20207. The request must specify the records sought and must include either the written request or consent of the individual whose records are being sought or a statement specifying the provision of section (b) of the Privacy Act (5 U.S.C. 552a(b)), pursuant to which the record should be disclosed.

(b) The Secretary shall determine whether or not the requested disclosure is proper and so notify the requester. If the Secretary determines that the record may be disclosed he or she shall in-

form the requester where and when the records may be viewed or shall mail copies of the records. Unless disclosure is made under the Freedom of Information Act, 5 U.S.C. 552, the Secretary shall log the disclosure in such a manner that the individual to whom the records pertain can be informed of all disclosures to third parties made by the Commission. If the Secretary determines that the record may not be disclosed, he or she shall notify the requester in writing of the reasons for the denial and of the requester's right to appeal the decision to the Executive Director in accordance with the procedures set forth in § 1014.8.

**§ 1014.10 Fees.**

The Commission shall not charge an individual for the costs of making a search for a record, the costs of reviewing or copying a record, or the cost of correcting or amending a record.

**§ 1014.11 Penalties.**

Any person who makes a false statement in connection with any request for a record, or an amendment thereto, under this part, is subject to the penalties prescribed in 18 U.S.C. 494, 495 and 1001; and 5 U.S.C. 552a(i) (3).

**§ 1014.12 Specific exemptions.**

(a) *Injury Information.* (1) The Bureau of Epidemiology maintains the National Electronic Injury Surveillance System (NEISS), by which selected hospitals located throughout the United States furnish injury data to the Commission on product-related injuries requiring emergency room treatment. The NEISS is supplemented by Accident Reports (in-depth investigations) which are conducted on a sample of injuries reported through NEISS. In addition, BEP compiles death certificates (furnished by selected state and local governments) for which the external cause of death is selected types of accidental injury. The purpose of these records system is to compile accident statistics for analyzing the incidence and severity of product related injuries.

(2) Inasmuch as the maintenance of the record systems listed in paragraph (a) (1) of this section is authorized by section 5 of the Consumer Product Safety Act (15 U.S.C. 2054) and the data are used solely as statistical records, the records in these record systems are exempted from disclosure pursuant to 5 U.S.C. 552a(k) (4), except that accident or investigation reports made by the Commission employees are disclosable in accordance with paragraph (a) (3) of this section.

(3) Section 25(c) of the Consumer Product Safety Act (15 U.S.C. 2074(c)) provides that accident or investigation reports made by an officer or employee of the Commission shall be made available to the public in a manner which will not identify any injured person or any person treating him or her without the consent of the person so identified. Consequently, an accident or investigation report which identifies individuals is available to the injured party or the person

In Part I, Section 2.106, the frequency table is corrected to read as follows: treating him or her but would not be available for disclosure to a third party without the consent of the injured party or person treating him or her.

(4) Since accident or investigation reports are compiled only for statistical purposes and are not used in whole or in part in making any determination about an individual, they are exempted from the requirement to correct or amend a record as provided by section (d) (2) of the Privacy Act (5 U.S.C. 552 (d) (2)). Exceptions from this subparagraph, insofar as they relate to amendments or additions, may be allowed by the Executive Director.

Interested persons are invited to submit written comments regarding this proposal on or before September 10, 1975. Comments received after this date will be considered to the extent practicable. Comments and any accompanying data or material, preferably in five copies, should be submitted to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

Received comments may be seen in the Office of the Secretary, 10th Floor, 1750 K Street, NW., Washington, D.C., during

Band MHz	Service	Class of station(s)	Frequency MHz	Nature of services (of stations)

#### ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 60]

[EPL 414-5]

#### STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

##### Opacity Provisions for Fossil Fuel-Fired Steam Generators

On November 12, 1974, (39 FR 39872), the Environmental Protection Agency promulgated certain revisions to new source performance standards regulating opacity and to "Method 9—Visual Determination of the Opacity of Emissions from Stationary Sources". These regulations stipulated that the determination of compliance would be based on 24 consecutive readings taken every 15 seconds, i.e., 6-minute averages. Instantaneous

emissions of opacity greater than allowed by the standard do not constitute violations. However, previously promulgated opacity standards for fossil fuel-fired steam generators specified time exemptions in addition to the 20 percent opacity limit that governs during normal operation. Thus, under current regulations (40 CFR 60.42(a) (2)) owners or operators of steam generators are obligated to meet both the 20 percent limit based on 6-minute averages and the 40 percent limit based on 2-minute averages. In promulgating the regulations on November 12, 1974, EPA noted its intention to propose further revisions to Method 9 including a revised method of enforcing opacity standards in those instances where emissions could be expected to be intermittent in nature. Since intermittent emissions due to sootblowing are not an operational problem for steam generators fired with gaseous or solid fossil fuels, EPA is now proposing to delete the 40 percent opacity, 2-minute average requirement for these affected facilities and to revise the requirements for reporting of continuous monitoring system opacity data.

Available data concerning opacity from steam generators have been reviewed, particularly with respect to the challenge to the opacity standards for coal-fired steam generators, (Appalachian Power Company et al. vs. Environmental Protection Agency, 486 F. 2d 427, September 10, 1973). It is apparent that with the November 1974 changes to Method 9, the 2-minute exception allowed under § 60.42(b) is unnecessary for steam generators fired with solid and gaseous fossil fuels. All such sources which meet the mass emission standards should be able to comply with the 6-minute average, 20 percent opacity limit. In the case of solid fuels, it is necessary to employ high-efficiency particulate collectors to meet the limits of § 60.42(a). The proper design, installation, and operation of these collectors essentially guarantees that particulate emissions will not exceed 20 percent opacity when observations are made over 6-minute periods in accordance with Method 9. The bases for these conclusions are set forth in EPA's Proposed Response to the Remand Order by the U.S. Court of Appeals for the District of Columbia in Appalachian Power Company et al. vs. EPA, 486 F. 2d 427 (September 10, 1973) which response is included elsewhere in this FEDERAL REGISTER. In the unlikely event that a coal-fired plant which meets the particulate matter mass emission standard cannot meet the 6 minute average 20 percent opacity standard, relief is available under 40 CFR 60.11(e) (39 FR 39872 et seq., November 12, 1974).

In the case of natural gas fire steam generators, no visible emissions are encountered during normal firing. Neither is it necessary to operate soot blowers during natural gas firing since when natural gas is burned under proper combustion conditions, particulate matter does not accumulate on surfaces of heat transfer tubes.

Only in the case of oil-fired steam generators are there uncertainties as to the need for exceptions from or revisions to the opacity standard to accommodate soot blowing. Preliminary investigations indicate that there are little or no visible emissions from new oil-fired steam generators except during startup, shutdown, unpreventable malfunction (not violations per 40 CFR 60.11), or during soot blowing. The latter have the potential for increasing opacity emissions over 1 to 2 minute intervals. Review, again on a preliminary basis, indicates that soot blowing of oil-fired utility boilers is not likely to cause measurable opacity increases simply because a large number of soot blowers are employed and are operated on a frequent schedule. For instance, each soot blower may be actuated automatically six times or more during an average 24-hour period. When soot blowers are operated at this frequency, resultant incremental particulate emissions are usually inconsequential in their effect on opacity. In addition, large new oil-fired utility boilers frequently are equipped with particulate collectors which will be especially effective on the heavier concentrations produced during soot blowing. Steam generator manufacturers have contended that small oil-fired boilers affected by the standards may require relief from the continuous opacity provision to allow removal of soot from the boiler tubes on an infrequent basis, i.e., once or twice per day. Due to the latter uncertainty, the Administrator has decided against removal of the 2-minute exception for oil-fired boilers at this time. The Administrator intends to further review the need for specific time exceptions and at a latter date to propose revisions to the oil-fired steam generator standards.

In addition to proposing to delete the 40 percent opacity, 2-minute average for solid and gaseous fuels, these regulations also contain provisions revising the requirements for reporting of continuous monitoring system opacity data. These revised requirements, which are consistent with the proposed opacity standards, propose that all 6-minute averages in excess of 20 percent opacity be reported quarterly for gaseous, liquid, and solid fuel combustion except that one 6-minute average per hour of 21 to 27 percent opacity need not be reported for liquid fuels. This exception for liquid fuels reflects the equivalent amount of relief provided by the 2-minute, 40 percent opacity limit that can be applied once per hour, i.e., 40 percent opacity for 2 minutes and 20 percent opacity for 4 minutes averages to no more than 27 percent opacity for 6 minutes. Although this exemption from reporting of one 21 to 27 percent 6-minute average per hour may also exempt from reporting a few 6-minute periods when the facility was not in compliance with the 20 or 40 percent opacity standards (e.g., 15 percent opacity for 5 minutes plus 85 percent opacity for one minute), this approach will be adequate for EPA purposes of monitoring routine emissions of the facility.

By this notice, the Administrator is inviting comment on the proposed revisions to § 60.42(a) (2) and § 60.45(g) (1) and at the same time is soliciting comment on the need for short-term exceptions to opacity standards for oil-fired boilers. Submittals should, wherever possible, be supported with data and/or calculations.

Comments on the proposed revision should be submitted, in triplicate, to the Emission Standards and Engineering Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Mr. Don R. Goodwin. All comments postmarked no later than October 28, 1975, will be considered.

Copies of comments received will be available for public inspection during normal business hours at the EPA Freedom of Information Center, Room 202 West Tower, 401 M Street, SW., Washington, D.C. 20460.

This amendment is proposed under the authority of section 111 of the Clean Air Act, as amended (42 U.S.C. 1857c-6).

Dated: September 2, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended by amending Subpart D as follows:

1. Section 60.42(a) (2) is revised to read as follows:

§ 60.42 Standard for particulate matter.

(a) . . . .

(2) Exhibit greater than 20 percent opacity except that for steam generators fired with liquid fossil fuel a maximum of 40 percent opacity shall be permissible for not more than 2 minutes in any hour.

2. Section 60.45(g) (1) is revised to read as follows:

§ 60.45 Emission and fuel monitoring.

(g) . . . .

(1) Opacity. Excess emissions are defined as any 6-minute period during which the average opacity of emissions exceeds 20 percent opacity except that one 6-minute average per hour of 21 to 27 percent opacity need not be reported for affected facilities firing liquid fossil fuels.

[FR Doc. 75-23951 Filed 9-9-75; 8:45 am]

#### FEDERAL POWER COMMISSION

[18 CFR Part 35]

[Docket No. RM76-6]

#### REGULATIONS UNDER THE FEDERAL POWER ACT

##### Notice of Proposed Rulemaking

SEPTEMBER 3, 1975.

Notice is hereby given pursuant to Section 553 of Title 5 of the United States Code and Sections 205, 206, 301, 304 and 309 of the Federal Power Act (52 Stat. 822, 830, 76 Stat. 72; 15 USC 717c and 717o) that the Commission is proposing to amend § 35.13 of its Regulations un-

der the Federal Power Act, in the manner set forth below. The change would clarify the provision regarding proposed rate increase filings which requires a public utility to file a statement showing its cost of service for the most recent twelve consecutive months for which actual data are available. The change would incorporate into the provision the additional requirement that the base period end no earlier than four months prior to the date of filing of the proposed rate increase.

In its present form, the provision requiring a cost of service statement for twelve months of actual experience does not specify how current the actual data must be. Our experience indicates that the modifying phrase, "for the most recent twelve consecutive months for which actual data are available," is ambiguous and has given rise to varying constructions. In particular, a utility may process cost of service data on a calendar year basis as a result of a calendar year basis of bookkeeping. Their filing reflects this method which results in less recent data than if the company had utilized a split test year cost of service. The most recent calendar year data available is frequently too stale and outdated to accurately represent current or future conditions. Furthermore, even with regard to companies not utilizing a calendar year basis of bookkeeping, that actual data which they consider to be "available" is a subjective judgment and open to interpretation. Actual data may be available quite soon after the fact, however not in the form suitable for filing as a cost of service statement.

We believe the proposed change should develop a standard of uniformity in the filing requirements, reduce the ambiguity created by varying interpretations placed on them, and more accurately project future conditions. For those purposes, we find it reasonable and appropriate to require that the twelve consecutive months of actual experience constituting the test year for cost of service should end no earlier than four months prior to the date of filing.

The proposed amendment to Section 35.13 of the Commission's Regulations under the Federal Power Act would be issued under the authority granted the Federal Power Commission by the Federal Power Act, particularly Sections 205, 206, 301, 304 and 309 (52 Stat. 822, 830, 76 Stat. 72; 15 USC 717c, 717o).

Any interested person may submit to the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, not later than 45 days from the issuance of this order, data, views, comments, and suggestions, in writing, concerning the proposed amendments. An original and 14 conformed copies should be filed with the Commission. Submissions to the Commission should indicate

<sup>1</sup> Section 35.13(b) (4) (iii) of the Regulations reads:

"The statement of the cost of service should contain unadjusted system costs for the most recent twelve consecutive months for which actual data are available (Period I) including return, taxes, depreciation, and operating expenses. . .

force of a previously issued credit card; or the continuance of existing credit

eral agency which administers compliance with this law concerning this

availability of procedures to compel payment; and the credit history of the payor.

the name, address and telephone numbers of the person to whom correspondence in regard to the proposal should be addressed. Responses to the submittals shall be filed no later than 30 days thereafter, in the same form and number as the original submittals. All submittals and responses will be placed in the Commission's public files and will be available for inspection in the Commission's Office of Public Information, 825 North Capitol Street, Washington, D.C. 20426, during regular business hours.

All statements and submittals in response to this notice shall be under oath, acknowledged by a notary public or comparable official, as follows: ----- being duly sworn, deposes and says that he is (title and organization, if filing in a representative capacity) that he is authorized to verify and file this document, that he has examined the statements contained in the submittal or response, and that all such statements are true and correct to the best of his knowledge, information, and belief. The participants preparing statements and submittals, other than prepared data sheets in response to this rulemaking shall insert line numbers on each page in the left-hand margin.

Accordingly, it is proposed to amend Section 35.13 of the Commission's Regulations under the Federal Power Act, Chapter 1, Title 18 of the Code of Federal Regulations as follows:

Section 35.13(b)(4)(iii) of the Regulations under the Federal Power Act (Title 18, Part I, Subchapter B of the Code of Federal Regulations) is hereby amended, to read:

§ 35.13 Filing of changes in rate schedules.

(b) . . . . .  
(4) . . . . .  
(iii) The statement of the cost of service should contain unadjusted system costs for the most recent twelve consecutive months for which actual data are available (Period I) including return, taxes, depreciation, and operating expenses, and an allocation of such costs to the service rendered; *Provided, however*, that the last day of the 12 months of actual experience shall not be more than four months prior to the date of filing the proposed change in rates and charges.

The Secretary shall cause prompt publication of this notice in the FEDERAL REGISTER.

By Direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-24052 Filed 9-9-75; 8:45 am]

#### FEDERAL RESERVE SYSTEM

Board of Governors

[ 12 CFR Part 202 ]

#### CONSUMER CREDIT PROTECTION ACT

Equal Credit Opportunity Act; Supplemental Notice of Proposed Rulemaking

In the April 25, 1975 Issue of the FEDERAL REGISTER (40 FR 18183), the Board

published a proposed rule which would prohibit discrimination on the basis of sex or marital status with respect to any aspect of a credit transaction. Numerous comments were received and public hearings were held on May 28 and 29, 1975. In response to the comments received in writing and those presented at the hearings, the Board has revised the proposed rule. Pursuant to the authority of section 703 of the Equal Credit Opportunity Act (Pub. L. 93-495), which amends the Consumer Credit Protection Act (15 U.S.C. § 1601 et seq.), the Board hereby publishes the revised proposed Part 202 (Regulation B) for comment as follows:

Sec.  
202.1 Authority, scope and purpose.  
202.2 General rule.  
202.3 Definitions.  
202.4 Applications.  
202.5 Evaluation of applications.  
202.6 Furnishing of credit information.  
202.7 Request for signature of spouse or other person.  
202.8 Separate accounts: Relation to State law.  
202.9 Preservation of records.  
202.10 Exceptions.  
202.11 Administrative enforcement.  
202.12 Penalties and liabilities.  
202.13 Transition periods.

#### § 202.1 Authority, scope and purpose.

*Authority, scope and purpose.* (1) This Part comprises the regulations issued by the Board of Governors of the Federal Reserve System pursuant to the Equal Credit Opportunity Act (Pub. L. 93-495; 88 Stat. 1521 et seq.). This Part applies to all persons who regularly extend, offer to extend, arrange for or offer to arrange for the extension of credit for any purpose whatsoever and in any amount.

(2) This Part implements the Act, the purpose of which is to require that financial institutions and others engaged in the extension of credit shall make that credit equally available to all credit-worthy persons without regard to sex or marital status.

#### § 202.2 General rule.

A creditor shall not discriminate against any applicant on the basis of sex or marital status with respect to any aspect of a credit transaction.

#### § 202.3 Definitions.

For purposes of this Part, unless the context indicates otherwise, the following definitions apply:

(a) "Act" means the Equal Credit Opportunity Act (Pub. L. 93-495; 88 Stat. 1521 et seq.).

(b) "Account" means an extension of credit.

(c) "Applicant" means any person who applies to a creditor directly for an extension of credit, or who applies to a creditor indirectly by using an existing credit plan to obtain an amount exceeding a previously established credit limit. With respect to any creditor the term also includes any person to whom credit is or has been extended by that creditor.

(d) "Application" means an oral or written request by an applicant for an extension of credit which is made in accordance with procedures established

by a creditor for the type of credit requested. The term does not include the use of a credit card to obtain an amount of credit not exceeding a previously established credit limit.

(e) "Application form" means a document, furnished by a creditor to be completed by an applicant, which requests information from the applicant to be used in evaluating creditworthiness. The term does not include a document filled out by a creditor which an applicant signs.

(f) "Arrange for the extension of credit" means to provide or offer to provide credit which is or will be extended by another person under a business or other relationship pursuant to which the person arranging such credit participates in the decision to extend credit to an applicant. The term does not include participation in a credit transaction which is limited to honoring a credit card.

(g) "Consumer credit" means credit offered or extended to an individual in which the property or service which is the subject of the transaction is primarily for personal, family or household purposes.

(h) "Contractually liable" means expressly obligated to repay a debt by reason of having signed an agreement to that effect.

(i) "Credit" means the right granted by a creditor to an applicant to defer payment of a debt, or to incur debt and defer its payment or to purchase property or services and defer payment therefor.

(j) "Credit card" means any card, plate, coupon book or other single credit device existing for the purpose of being used from time to time upon presentation to obtain property or services on credit.

(k) "Creditor" means any person who regularly extends credit or arranges for the extension of credit. The term includes assignees, transferees or subrogees of an original creditor who participate in the decision to extend credit, but does not include a person whose only participation in a credit transaction is to honor a credit card.

(l) "Credit transaction" means every aspect of an applicant's dealings with a creditor including, but not limited to, solicitation of prospective applicants by advertising or other means; information requirements; investigatory procedures; standards of creditworthiness; terms of credit; furnishing of credit information and collection procedures.

(m) "Discriminate against" means to treat an applicant or prospective applicant less favorably than others.

(n) "Extension of credit" means the granting of credit in any form and includes, but is not limited to, credit granted in addition to any existing credit or credit limit; credit granted in the form of a credit card, whether or not the card has been used; the refinancing of any credit; the consolidation of two or more obligations; the issuance of a new credit card in place of an expiring credit card or in substitution for an existing credit card; the continuing in

force of a previously issued credit card; or the continuance of existing credit without any special effort to collect at or after maturity.

(o) "Marital status" means the state of being unmarried, married, or separated, as defined by applicable State law. For purposes of this Part, the term "unmarried" includes a person who is divorced or widowed.

(p) "Open end credit" means credit extended pursuant to a plan under which the creditor may permit the applicant to make purchases or obtain loans, from time to time, directly from the creditor or indirectly by use of a credit card, check or other device, as the plan may provide. The term does not include negotiated advances under an open end real estate mortgage or a letter of credit.

(q) "Person" means a natural person, a corporation, government or governmental subdivision or agency, trust, estate, partnership, cooperative or association.

(r) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

#### § 202.4 Applications.

(a) *General.* A creditor may request any information in an application not prohibited by the Act or this Part.

(b) *Discouraging applications.* A creditor shall not make any statements to applicants or prospective applicants which would discourage a reasonable person from applying for credit or pursuing an application for credit on the basis of sex or marital status.

(c) *Application forms.* Where application forms are used by a creditor, such forms shall:

(1) Ask whether the account which the applicant is requesting is one which the applicant's spouse may use or for which the applicant's spouse will be contractually liable ("use" of an account throughout this Part refers only to open end accounts);

(2) Ask the spouse's name and address, if the applicant indicates that a spouse may use the account or will be contractually liable for it;

(3) If the application form asks the applicant's marital status, use only the terms "married," "unmarried" or "separated." However, an inquiry as to the payment of alimony, child support or maintenance or reliance upon the receipt of such payments is not prohibited by this section;

(4) Where an applicant is requested to designate a title (such as Mr., Mrs., Ms. or Miss), state prominently that the designation of such title is optional;

(5) Have printed upon them in a type size no smaller than that used throughout most of the application form the following statement:

The Federal Equal Credit Opportunity Act requires that all creditors, including banks, savings and loan associations, small loan companies, retail stores and others, make credit equally available to all creditworthy customers without regard to sex or marital status. The fed-

eral agency which administers compliance with this law concerning this (bank, store, etc.) is (name and address of the appropriate agency).

(d) *Oral applications.* (1) Where a creditor does not use application forms, the creditor shall:

(i) fulfill the requirements of § 202.4 (c) (1), (2), (3) and (4) orally or in writing;

(ii) fulfill the requirements of § 202.4 (c) (5) in writing, except that where application is made by telephone, compliance with this subsection may be accomplished orally or in writing.

(2) Where oral application is made for an amount of credit to exceed an existing limit on an applicant's open end account, the requirements of § 202.4(c) do not apply.

(e) *Designation of name.* A creditor shall not prohibit an applicant from using any particular name on the basis of the applicant's sex or marital status.

#### § 202.5 Evaluation of applications.

(a) *General.* A creditor may consider any information not prohibited by the Act or this Part and may deny the credit requested if an applicant is unable or unwilling to provide the information necessary to an evaluation of creditworthiness.

(b) *Information about a spouse.* (1) A creditor may request and consider any information concerning the spouse of a married or separated applicant which may be considered about the applicant when the application indicates that the spouse may use the account or is contractually liable upon the account.

(2) A creditor may request only the name and address of the spouse of a married or separated applicant when the application indicates that the spouse will not use the account and is not contractually liable upon the account. However, a creditor may consider information about the payor of alimony, child support or maintenance where an application indicates reliance upon such payments as a basis for creditworthiness.

(c) *Alimony, child support and maintenance obligations.* A creditor may ask and consider whether and to what extent an applicant is obligated to make alimony, child support or maintenance payments.

(d) *Alimony, child support and maintenance income.* (1) A creditor may ask whether all or a part of the income upon which an applicant is relying as a basis for the credit requested is derived from alimony, child support or maintenance payments.

(2) Where an application indicates reliance on alimony, child support or maintenance payments, a creditor shall consider such payments as income to the extent that such payments are likely to be consistently made. Factors which a creditor may consider in determining the likelihood of consistent payments include, but are not limited to, whether the payments are received pursuant to a written agreement or court decree; the length of time the payments have been received; the regularity of receipt; the

availability of procedures to compel payment; and the credit history of the payor, where available to the creditor under the Fair Credit Reporting Act or other applicable laws.

(e) *Discounting income.* A creditor shall not discount the income (including part-time income) of an applicant or an applicant's spouse on the basis of sex or marital status.

(f) *Credit scoring.* A creditor shall not assign a value to sex or marital status in a credit scoring system or other method of evaluating applications.

(g) *Telephone listing in applicant's name.* A creditor shall not assign a value to the existence of a telephone listing in the name of an applicant in a credit scoring system or other method of evaluating applications. A creditor may consider the existence of a telephone in the applicant's home.

(h) *Childbearing: continued ability to pay.* A creditor shall not request information about birth control practices or childbearing capability. However, a creditor may request and consider information concerning the probable continuity of an applicant's ability to repay.

(i) *Change of name or marital status.* In the case of an existing open end account, a creditor shall not take any of the following actions solely on the basis of a change of name or marital status in the absence of evidence of inability to repay:

(1) Require a reapplication;  
(2) Terminate the account; or  
(3) Require a change in the terms of the account.

(j) *Credit history.* Where an applicant's credit history would be considered by the creditor in evaluating an applicant of similar qualifications for a similar type and amount of credit, a creditor shall:

(1) Consider the credit history of accounts designated as accounts which may be used by both spouses or for which both are contractually liable, and accounts reported in the applicant's(s') name or names as listed in the application, whether such information is obtained from consumer reporting agencies or others; and

(2) Consider the credit history, when available, of any account established prior to November 1, 1976, which an applicant can demonstrate reflects accurately his/her willingness or ability to repay.

(k) *Delay in evaluating applications.* A creditor shall not fail to act upon, or unreasonably delay a decision upon an application in whole or in part on the basis of sex or marital status. In the event a creditor is unable to obtain adequate credit information, a request by the creditor for additional information does not constitute unreasonable delay under this section.

(l) *Use and retention of prohibited information.* A creditor may not use any information prohibited by the Act or this Part in evaluating applications. However, where such information was obtained prior to November 1, 1976, retention of such information in the

creditor's files does not violate the Act or this Part.

(m) *State property laws.* Consideration or application of State property laws directly or indirectly affecting creditworthiness shall not constitute discrimination for purposes of this Part.

(n) *Notification of action taken.* A creditor shall within a reasonable time notify the applicant of action taken upon the application. Where such notification is in writing it shall have printed upon it in a type size no smaller than that used throughout most of the notice the statement contained in Section 202.4(c)(5) of this Part.

#### § 202.6 Furnishing of credit information.

(a) *Accounts established after November 1, 1976.* A creditor, when furnishing information to consumer reporting agencies or others concerning any account established after November 1, 1976, which the application indicates may be used by both spouses or upon which both spouses are contractually liable, shall designate the account to reflect the fact of participation of both spouses and shall report the designation and furnish all information concerning the account in the names of both spouses.

(b) *Accounts established prior to November 1, 1976.* (1) Unless already following the procedures specified in subsection (a) as to all existing accounts established prior to November 1, 1976, a creditor shall mail to all spouses or, at the option of the creditor, to all individuals who are contractually liable on such accounts the notice set out below, accompanied by a return envelope addressed to the creditor. Such notice may be mailed with a billing statement and all such notices shall be mailed by November 1, 1976, or within 60 days after an account is established, whichever is later, and shall provide as follows:

#### CREDIT HISTORY FOR MARRIED PERSONS

The Federal Equal Credit Opportunity Act forbids all creditors from discriminating on the basis of sex or marital status in any aspect of a credit transaction. The Act gives every married person the right to have information concerning all the credit accounts held or used jointly with a spouse reported to credit bureaus and creditors in the names of both the wife and husband. Accounts of married persons opened before November 1976—even those opened in the names of both spouses—are customarily reported in only the husband's name. This is generally true regardless of who has been paying the bills or whose income was used to obtain the account. As a result, most married women do not have a credit history in their own names, although their husbands do. If a woman ever needs to obtain credit on her own, for example, when divorced or widowed, a credit history is usually necessary.

If you would like to have the credit information concerning your account with us reported in both your name and the name of your spouse, please check the box, fill out and sign the statement below and return it to us in the enclosed envelope.

☐ When you furnish credit information on this account, please report all information concerning it in both our names. We would like our names written as follows:

Signature of either husband or wife

(2) A creditor, when furnishing information to consumer reporting agencies or others concerning any account established prior to November 1, 1976, shall designate the account to reflect the fact of participation of both spouses and shall report the designation and furnish all information concerning the account in the names of both spouses beginning no later than 90 days after receipt of a request to do so.

#### § 202.7 Request for signature of spouse or other person.

(a) *General.* Except as otherwise provided herein, a creditor may require the signature of a spouse or other person on a credit instrument if such a requirement is imposed on all similarly qualified applicants who apply for a similar type and amount of credit without regard to sex or marital status.

(b) *Unsecured credit in community property states.* Where a married applicant applies for unsecured credit in a community property State, a creditor may request or require the signature of a non-applicant spouse if:

(1) the applicable State law denies the applicant power to manage or control sufficient community property to qualify for the amount of credit requested under the creditor's standards of creditworthiness; and

(2) the applicant does not have sufficient separate property to qualify for the amount of credit requested without regard to any community property.

#### § 202.8 Separate accounts: Relation to state law.

(a) *Separate extension of consumer credit.* Any provision of State law which prohibits the separate extension of consumer credit to each spouse shall not apply in any case where each spouse voluntarily applies for separate credit from the same creditor. In any case where such a State law is pre-empted, each spouse shall be solely responsible for the debt so contracted. In a community property State, the creditor may enforce an obligation of one spouse alone under this section as separate post-nuptial debts are enforced under applicable State law.

(b) *Finance charges and loan ceilings.* When each spouse separately and vol-

untarily applies for and obtains a separate account with the same creditor, the accounts shall not be aggregated or otherwise combined for purposes of determining permissible finance charges or permissible loan ceilings under the laws of any State or of the United States. Permissible loan ceilings under the laws of any State or of the United States shall be construed to permit each spouse to be separately and individually liable up to the amount of the loan ceiling less the amount for which both spouses are jointly liable. For example, in a State with a permissible loan ceiling of \$1,000, if a married couple were jointly liable for \$250, each spouse could subsequently become individually liable for \$750.

#### § 202.9 Preservation of records.

(a) For a period ending twelve months after the date a creditor takes final action on an application, the creditor shall retain for each applicant, in original form or a copy thereof:

(1) any application form and all other written information used in evaluating creditworthiness;

(2) any statement submitted by the applicant alleging discrimination prohibited by the Act and this Part.

(b) Any creditor who has actual notice that it is under investigation for violation of this Part by an enforcement agency charged with monitoring compliance with this Act, or who has been served with notice of an action filed pursuant to § 202.12 of this Part shall retain such information until final disposition of the matter or such earlier time as may be ordered by the agency or court.

#### § 202.10 Exceptions.

(a) *Business or securities credit.* As to all credit transactions involving other than consumer credit, and as to all credit transactions that are subject to regulation under section 7 and/or 11 of the Securities Exchange Act of 1934, a creditor shall only be required to comply with §§ 202.1, 2, 3, 4(b), 5(k), 10, 11, 12 and 13.

(b) *Good faith compliance.* It shall not be a violation of § 202.4 of this Part if the creditor shows by a preponderance of the evidence that at the time of the alleged violation the creditor maintained reasonable procedures to assure compliance with that section.

#### § 202.11 Administrative enforcement.

(a) As set forth more fully in section 704 of the Act, administrative enforcement of the Act and this Part with respect to certain creditors is assigned to the Comptroller of the Currency, Board of Governors of the Federal Reserve System, Board of Directors of the Federal Deposit Insurance Corporation, Federal Home Loan Bank Board acting directly or through the Federal Savings and Loan Insurance Corporation, Administrator of the National Credit Union Administration, Interstate Commerce Commission, Civil Aeronautics Board, Secretary of Agriculture, Farm Credit Administration, Securities and Exchange Commission and the Small Business Administration.

(b) Except to the extent that administrative enforcement is specifically committed to other authorities, section 704 of the Act assigns enforcement of the Act and this Part to the Federal Trade Commission.

#### § 202.12 Penalties and liabilities.

(a) Sections 706 (a) through (e) of the Act provide for civil liability for actual and punitive damages against any creditor who fails to comply with the Act and this Part. Section 706(b) places a \$10,000 limitation on the amount of punitive damages an aggrieved applicant may seek in an individual capacity and section 706(c) limits a creditor's class action liability for punitive damages to the lesser of \$100,000 or 1% of the creditor's net worth at the time the action is brought. Section 706(d) provides that an aggrieved applicant may seek equitable relief in the nature of a permanent or temporary injunction, restraining order, or other action. Section 706(e) further provides for the awarding of costs and reasonable attorney's fees to an aggrieved applicant who brings a successful action under sections 706 (a) through (d).

(b) Section 706(f) relieves a creditor from civil liability resulting from any act done or omitted in good faith in conformity with any rule, regulation or interpretation by the Board of Governors of the Federal Reserve System notwithstanding that after such act or omission has occurred, such rule, regulation or interpretation is amended, rescinded or otherwise determined to be invalid for any reason.

(c) Without regard to the amount in controversy, any action under this title may be brought in any United States district court, or in any other court of competent jurisdiction, within one year from the date of the occurrence of the violation. For purposes of this Part the violation shall be deemed to occur when the applicant receives notice of a denial.

#### § 202.13 Transition periods.

(a) Except as otherwise specified below, the provisions of this Part take effect on October 28, 1975.

(b) Sections 202.5 (a)-(i), (k) and (l) and 9 of this Part take effect on January 31, 1976.

(c) Section 202.4 of this Part takes effect on June 30, 1976.

(d) Section 202.5(j) and 6 of this Part take effect on November 1, 1976.

*Notice and Comments.* Interested persons are invited to submit relevant written data, views, and arguments concerning this proposal. Any such material should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than September 26, 1975. Such material will be made available for public inspection and copying upon request, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information. All views previously expressed in written comments on the pending proposal are under consideration by the Board and are

available for inspection and copying in Room 1020 of the Board's building.

This notice is published pursuant to section 553(b) of Title 5, United States Code, and § 262.2(a) of the Rules of Procedure of the Board of Governors of the Federal Reserve System (12 CFR 262.2 (a)).

By order of the Board of Governors, September 5, 1975.

[SEAL] THEODORE E. ALLISON,  
Secretary of the Board.

### INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1307]

[Ex Parte No. MC-97]

### MOTOR COMMON CARRIERS OF PROPERTY ON RESIDENTIAL AND REDELIVERED SHIPMENTS

#### Proposed Investigation Into Practices

SEPTEMBER 4, 1975.

● *Purpose.* The purpose of this document is to institute a proceeding to investigate motor common carrier charges for residential and redelivered shipments.

This rulemaking proceeding is instituted on our own motion to consider the propriety and lawfulness of certain practices of many of the Nation's motor common carriers of property in assessing additional charges (a) on shipments from or to a residence, apartment, church, or school, and other similarly specified types of premises, and (b) for the redelivery of such shipments, when no prior notice has been afforded receivers that an attempt would be made to deliver traffic, and to determine if new rules are necessary to govern such charges, if found lawful and proper.

This Commission has received numerous complaints from shippers and receivers of freight consigned to places such as private homes and apartment houses. Some of these have resulted in the institution of formal proceedings investigating specific situations. In addition, this Commission also has acted on its own motion, principally through our Suspension and Fourth Section Board, to investigate the lawfulness and reasonableness of certain rates and charges for such services and the conditions for their application as published in the governing tariffs.

Members of the average family lack familiarity with the rights and responsibilities of freight shippers and receivers and of freight carriers. This investigation would provide us with a basis for assuring that the public's rights are fully protected and that our regulatory responsibilities are fulfilled.

Section 216(b) of the Interstate Commerce Act requires every motor common carrier of property to provide safe and adequate service, equipment, and facilities for the transportation of property in interstate or foreign commerce. It also requires such carriers to establish, ob-

serve, and enforce just and reasonable regulations and practices relating thereto. Each certificate of public convenience and necessity contains a condition that the holder shall render reasonably continuous and adequate service to the public. Section 217(b) of the statute directs that the provisions of the carriers' tariffs filed with this Commission be strictly observed and that no carrier shall charge, demand, collect, or receive a greater or less or different compensation for transportation service than the applicable charges specified in its tariffs.

The first question requiring consideration in the light of the foregoing statutory provisions is whether it is lawful and in the public interest to allow carriers to charge more, by whatever amount or means of computation, for pickup or delivery at certain described types of premises based solely upon their nature, without any apparent regard for the relative difficulty involved in serving such locations. Appendix A sets forth representative tariff provisions which provide for assessment of such additional charges. If, for example, a private residence and a store are adjacent to each other, and neither has facilities designed specifically for freight handling, the propriety and lawfulness of charging for what is purported to be an extra service at the one but not the other would seem open to question. Similarly, it appears doubtful that a school with a receiving platform for truck delivery would be more difficult to serve than a similarly-equipped commercial plant across the street. Furthermore, commercial operations are more likely to be located in congested urban areas, while premises to which the involved charges apply would presumably be situated in less heavily traveled residential settings. Thus, at first impression, it is open to question whether extra charges for pickup or delivery at schools, homes, and other such premises are more costly to the carrier and, even if it were to be shown that on an average it is more costly to serve most of those shippers or receivers whose facilities fall within this specified class, consideration must be given to the fact that line-haul rate tariffs traditionally have and should include the cost for one, pickup and delivery. Resolution of the foregoing matters obviously requires consideration of a number of legal and policy questions and the availability for analysis of substantial factual material, especially cost data. This proceeding should serve as a vehicle whereby a record may be developed which is sufficient to resolve these questions.

The second major area of consideration in this proceeding is the justness and reasonableness of the assessment of separate additional charges for redelivery to the types of locations described above, when a subsequent attempt to deliver a shipment becomes necessary. It appears that such tariff provisions are in use generally because of the possibility that the consignee may be unavailable to accept delivery of a tendered shipment. Based on communications and complaints from affected members of the

public, it does not appear to be common

vate residences, apartments, churches,

This notice of proposed rulemaking is

notices

## PROPOSED RULES

public, it does not appear to be common practice in the industry to afford receivers at private residences, etc., notice of arrival of shipments prior to the dispatching of a truck to the destination premises. Apparently, the reason carriers decline to provide this notification prior to delivery service is because it is usual practice, after the arrival at a destination terminal of an intercity (or line-haul) truck, to move ordinary shipments immediately to terminal delivery loading docks for transfer to local delivery vehicles. When notification to the receiver prior to delivery is required, shipments often are moved from points of unloading to specified "hold" areas. Only after notification, which may occur some time subsequent to the commencement of other delivery operations in instances where a line-haul trailer has arrived during night hours, are shipments moved from the holding area to the delivery area for loading into delivery vehicles. Additionally, in instances where large shipments are involved, such shipments frequently are left in linehaul trucks until notification and delivery arrangements have been made. While such rehandling of shipments and detention of vehicles may add to the carrier's costs, the assessment of additional charges (both because of the nature of the destination premises, and for redelivery, if necessary) could place an extreme cost burden on the party required to pay such amounts.

It seems in order, then, that an inquiry be made into whether redelivery charges are justified, particularly in the absence of prior notification to a receiver at a nonbusiness location. This inquiry should include specific consideration of the amount of traffic transported by each carrier maintaining such charges; the comparative cost of holding freight and giving notification prior to tender for delivery; the experience of carriers in completing residential and other related types of delivery at issue here in instances where no prior notice is given consignees; and a comparison of the cost of affording prenotification with the cost of redelivering shipments where no notice has been afforded. Consideration should likewise be afforded the question of whether, because of increasing computerization in the industry, it may be possible for carriers to provide prenotification while shipments to consignees such as here involved are still en route, thus eliminating the need to segregate and "hold" shipments pending notification of residential receivers of traffic. Finally, if it be determined that carriers should be required to notify certain types of consignees before tendering shipments for delivery, consideration should be given to appropriate rules to govern such a notification requirement.

It is, therefore, both desirable and necessary at this time to investigate the nature and scope of carrier rules and practices with respect to the assessment of pickup, delivery, notification, and redelivery charges in connection with motor common carrier services to pri-

vate residences, apartments, churches, schools, and similarly categorized locations. Our investigation, among other things, shall include a determination of the propriety of adopting the proposed regulations set forth below, as well as whether this Commission should take such other and further action as the facts developed in this investigation may justify or require.

Oral hearing does not appear necessary at this time, and none is contemplated, unless a need therefor should later appear. Anyone wishing to present views and evidence, either in support of or in opposition to the action proposed in this notice, may do so by submitting written statements of fact, views and arguments on the subjects mentioned above or any other subjects pertaining to this proceeding. All motor common carriers of property operating in interstate or foreign commerce within the United States and subject to the Interstate Commerce Act will be made respondents to this proceeding and the Bureau of Enforcement of this Commission will be authorized and directed to participate in this proceeding.

Respondents, and parties interested in presenting views and evidence, or in otherwise participating in this proceeding shall be required by the order entered concurrently herewith to notify this Commission by filing with the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before September 26, 1975, the original and one copy of a declaration of intent to participate. (This Commission seeks to conserve time, to avoid unnecessary expense to the public, and to require the service of pleadings only upon those who intend to take an active part in the proceeding. Therefore, the declaration of intent to participate should include a statement of the extent of the desired participation. That statement should include an indication of: (1) Whether the participant merely desires to receive copies of Commission releases in this proceeding, (2) whether that person wishes to receive and/or file initial and reply statements, (3) if as described in (2), whether the filing party will consolidate or is capable of consolidating his or her interest with that of other interested parties by filing joint statements in order to limit the number of copies of pleadings that need be served, such consolidation of interests being strongly urged by the Commission, and (4) any other pertinent information which will aid in limiting the service list to be issued in this proceeding). Upon receipt of the foregoing declarations of intent to participate, this Commission shall then prepare and make available to all such persons a list containing the names and addresses of all parties desiring to participate in this proceeding and upon whom copies of all statements must be served. At the time of service of this service list, a time will be fixed within which initial statements and replies must be filed.

This notice of proposed rulemaking is issued under the authority of sections 552, 553, and 559 of the Administrative Procedure Act (5 U.S.C. 552, 553, and 559). An order will be entered concurrently herewith providing for statutory notification of the general public of the initiation of this proceeding by the mailing of a copy of this notice to the Governor of every State, to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation and to various consumer groups, by depositing a copy of this notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy to the Director, Division of the Federal Register, for publication in the Federal Register as notice to all interested persons. Written material or suggestions submitted will be available for public inspection at the Offices of the Interstate Commerce Commission, 12th & Constitution Avenue, Washington, D.C., during regular business hours.<sup>1</sup>

[SEAL]

ROBERT L. OSWALD,  
Secretary.

§ 1307.35 Terminal and Special Services.

(e) Assessment of charges on shipments originating at or destined to private residences and other types of premises.

(1) Tariffs of for-hire motor common carriers shall not provide for the application of rates or the imposition of charges, by whatever means, for movements to or from, for example, private residences, apartments, churches, schools, camps, and other such locations, which differ from otherwise applicable rates from or to other locations such as businesses, warehouses, and other generally recognized commercial locations.

(2) Before attempting delivery to residential and other related types of premises such as those described in (1), the carrier must reach agreement with the consignee or consignor regarding the date and time (approximate) of such delivery. This arrangement for delivery may be accomplished through a notation by the consignor on the bill of lading, or by oral or written arrangement between the carrier and the consignee. In any case, some mutually agreed-upon arrangement for delivery must be made before tender of delivery is initially attempted.

(3) If the carrier complies with the regulation described in (2), and, through the fault of the consignee, is unable to tender delivery as scheduled, a reasonable charge to cover the service described in (2) and additional costs of renotification, arrangement, and redelivery may be assessed. The requirements of (2) regarding prior arrangement for tender of delivery are similarly applicable when redelivery is necessary.

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE  
ADVISORY COMMITTEE ON TRANSNATIONAL ENTERPRISES—WORKING GROUP ON INFORMATION DISCLOSURE

## Notice of Meeting

The Working Group on Information Disclosure of the Department of State Advisory Committee on Transnational Enterprises will hold its first meeting on Wednesday, September 24 at 10:00 a.m. in Room 1207 of the Department of State, 2201 C St., NW., Washington, D.C. The meeting will be open to the public.

The purpose of the working group's meeting will be to discuss the matter of voluntary disclosure to the public by transnational enterprises of information relative to their operations.

Among the items on the agenda are:

(1) Organization of the Working Group.

(2) Organization of work program.

(3) Discussion of information disclosure by transnational enterprises.

Requests for further information on the meeting should be directed to Stephen Bond, Department of State, Office of the Legal Adviser, 2201 C Street, NW., Washington, D.C. 20520. He may be reached by telephone on (area code 202) 632-0349.

Members of the public wishing to attend the meeting must contact Mr. Bond's office in order to arrange entrance to the State Department building.

The Chairman will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: September 4, 1975.

STEPHEN R. BOND,  
Executive Secretary, Committee  
on Transnational Enterprises.

## YORK PHARMACY, INC.

## Notice of Hearing

Notice is hereby given that on May 27, 1975, the Drug Enforcement Administra-

tion, Department of Justice, issued to York Pharmacy, Inc., Honolulu, Hawaii, an Order to Show Cause as to why the Drug Enforcement Administration registration No. AY1080910, issued to the Respondent pursuant to section 303 of the Controlled Substances Act (21 U.S.C. 823) should not be revoked.

Thirty days having elapsed since said Notice was received by Respondent and written request for a hearing having been filed with the Drug Enforcement Administration, Notice is hereby given that a hearing in this matter will be held commencing at 9:00 a.m. local time on Thursday, September 11, 1975, in the Magistrate's Hearing Room, Third Floor, Federal Building, Honolulu, Hawaii.

Dated: September 5, 1975.

HENRY S. DOGIN,  
Acting Administrator,  
Drug Enforcement Administration.

Drug Enforcement Administration  
MANUFACTURE OF CONTROLLED  
SUBSTANCES

## Notice of Application

Section 303(a) (1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a) (1)) states: "The Attorney General shall register an applicant to manufacture controlled substances in schedules I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes;"

Pursuant to § 1301.43 of Title 21 of the Code of Federal Regulations (CFR), notice is hereby given that the following manufacturers made application to the Drug Enforcement Administration to be registered as bulk manufacturers of the basic class of controlled substances listed below.

#### DEPARTMENT OF THE INTERIOR

Bureau of Land Management  
MISSOULA DISTRICT OFFICE  
MONTANA

Notice of Restriction of Use of Motorized Vehicles on National Resource Lands and Roads

Notice is hereby given that use of motorized vehicles on certain national

resource lands (public lands and roads) in the Chamberlain Creek-Elevation Mountain and Marcum Mountain areas is restricted, in accordance with the provisions of 43 CFR Parts 8010.4 and 6251.4. These restrictions do not apply to emergency, law enforcement, and Federal or other government vehicles while being used for official or emergency purposes, or vehicles authorized by permit or contract.

The areas and roads affected by this designation and restriction notice are located approximately thirty-seven and fifty-one air miles east of Missoula, Montana, in the Blackfoot River drainage. Areas and roads will be posted by signs at common points of vehicular access.

The use of national resource lands by motorized vehicles in these areas has reduced or destroyed wildlife habitat, damaged soils, and vegetation, and will have significant adverse effects on a scientific study. It is concluded that vehicle use restrictions of these areas and roads is necessary to prevent further destruction of wildlife habitat, soils, and vegetation, and to protect a scientific study. General restriction of motorized vehicle use is an established land use management guideline in the BLM's Blackfoot and Hoodoo Planning Units, in which these areas and roads are located. Public meetings were held in Missoula and Ovando, Montana, specifically to discuss the restricted areas and roads described in this notice to motorized vehicles.

The specific use restrictions are as follows:

1. Blackfoot Special Management Area (Bear Creek, Chamberlain Creek and Elk Creek drainages)—Open to motorized vehicle use December 1 through August 31, annually; Closed to motorized vehicle use September 1 through November 30, annually.

2. Chamberlain Elk Logging Study Area—Logging and Administrative motorized vehicle use only. Closed to all other motorized vehicle use.

3. McElwain Creek Fire Road—Open to over-the-snow vehicles, only, January 1 through April 30, annually; Closed to all motorized vehicle use (except fire control vehicles) May 1 through December 31, annually.

4. Marcum Mountain Area—Open to motorized vehicle use May 1 through August 31, annually; Closed to all vehicle use Sept. 1 through April 31, annually.

Maps showing the areas described above, and stipulations of these restrictions are

available at the Missoula District Office, BLM, 1819 Holborn Street, Missoula, Montana 59801, and in the BLM Montana State Office, 316 North 26th Street, Billings, Montana 59101.

This notice is effective immediately.

CARL LIND,  
Acting District Manager,  
Missoula District Office.

#### Bureau of Mines

#### AVAILABILITY OF MINERALS DATA Schedule for Pre-Publication Release of Statistical Information

In adherence to section 103 of the Budget and Accounting Procedures Act of September 12, 1950 (31 U.S.C. 18b), and Office of Management and Budget Circular A-91, Revised, this notice provides public announcement of the time when monthly and quarterly data collected and published by the Bureau of Mines can be orally released to the public before publication in response to telephone inquiries.

The table below indicates the mineral commodity of each monthly and quarterly statistical release of the Bureau of Mines, a description of the information contained in the release, the commodity specialist responsible for the report, his telephone number, and the approximate number of weeks after the reference period of the data when they may be obtained by the public by telephone call to the respective commodity specialist. These reports are mailed to all persons asking to be placed on the mailing list for the report. Requests for individual copies, or to receive particular surveys regularly on the mailing list, should be addressed to the Publications Distribution Branch, Bureau of Mines, 4800 Forbes Avenue, Pittsburgh, Pennsylvania 15213.

However, with recognition of the need for the data as soon as possible by some of the public, the Bureau of Mines will respond to telephone calls for oral release of the data wanted in accordance with the schedule indicated in the table below.

Dated: September 2, 1975.

HARRY C. MCKITTRICK,  
Deputy Assistant Secretary  
of the Interior.

**Fish and Wildlife Service**  
**COYOTE DAMAGE CONTROL: CATTLE, SHEEP AND GOATS**  
**Report on Emergency Use of M-44 Devices During June 1975**

Notice is hereby given on the emergency use of M-44 devices by the Department of Interior's operational predator damage control program for the month of June. This use is in compliance with the experimental use permit (No. 6704-

M-44, emergency use, June 1975

State	Number of counties	Number of ranches	Number of cattle, sheep, and goats protected	Number of M-44's used
Arizona.....	3	16	1,241	218
Idaho.....	2	6	4,159	112
Montana.....	18	28	30,009	583
New Mexico.....	11	23	13,743	739
Oregon.....	8	31	3,517	227
Texas.....	30	136	40,471	1,403
Utah.....	2	4	512	96
Total.....	74	244	83,683	3,317

One or more coyotes were taken with this device on 68 of the 244 emergency areas, but losses were not necessarily halted in each case. During this month, 152 coyotes were taken by this device. Other species taken with the device during this period include 4 foxes, 2 feral dogs, 14 skunks and 20 opossums, 2 raccoons and 1 badger.

All of the above use of M-44 devices as a supplemental tool to attempt to resolve coyote depredation on cattle, sheep and goats was conducted by trained Service personnel in accordance with the *Procedure For Advance Identification and Approval of Areas For the Possible Emergency Use of Sodium Cyanide Delivered by the M-44 Device for the Control of Depredating Canids*, as it appears in the FEDERAL REGISTER,

Volume 39, No. 120, Thursday, June 20, 1974.

F. V. SCHMIDT,  
 Acting Director,  
 U.S. Fish and Wildlife Service.

**National Park Service**  
**NORTH ATLANTIC REGIONAL ADVISORY COMMITTEE**  
**Notice of Meeting**

Notice is hereby given in accordance with the Federal Advisory Committee Act, Public Law 92-463, that a meeting of the North Atlantic Regional Advisory Committee will be held on September 25

and 26, 1975, at Gateway National Recreation Area, New York and New Jersey.

The purpose of the North Atlantic Regional Advisory Committee is to provide the free exchange of ideas between the National Park Service and the public, and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the North Atlantic Region of the National Park Service.

The members of the Advisory Committee are as follows:

Mr. John N. Cole, Topsham, Maine.  
 Mrs. George Downing, Providence, R.I.  
 Mrs. Helen Fenske, Green Village, N.J.  
 Dr. Charles H. W. Foster, Needham, Mass.

Mr. George T. Hamilton, Lee, N.H.  
 Dr. John P. Keith, New York, N.Y.  
 Mr. Frederick R. Micha, Ontario, N.Y.  
 Dr. William A. Niering, Gales Ferry, Conn.

Mr. William B. Pinney, Montpelier, Vt.  
 The first day of the meeting, September 25, 1975, will be devoted to a tour of Gateway National Recreation Area. Transportation space will not be available for members of the public. However, anyone providing their own transportation is welcome to accompany the tour. A schedule may be obtained by writing the Regional Director, North Atlantic Region, National Park Service, 150 Causeway Street, Boston, Massachusetts 02114.

The formal meeting of the group will be at Howard Johnson at J.F.K. Airport, 135-30 140 Street, Jamaica, New York 11436, September 26, 1975, from 9:00 a.m. to 4:00 p.m.

The matters to be discussed at this meeting include:

1. Comments by the Regional Director about matters relevant to the North Atlantic Region.

2. Report of subcommittee on their visit to Springfield Armory National Historical site.

3. The role of the National Park Service in urban park and recreation.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited and it is expected that not more than 30 persons will be able to attend the session. Any member of the public may file with the committee a written statement concerning the matters to be discussed. Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact John C. Raftery, Associate Regional Director, North Atlantic Regional office at 617-223-3763. Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of the North Atlantic Region, 150 Causeway Street, Boston, Massachusetts.

Dated: August 25, 1975.

DENIS P. GALVIN,  
 Acting Regional Director,  
 North Atlantic Region.

**Office of the Secretary**  
**[ORDER NO. 2978]**  
**OUTER CONTINENTAL SHELF**  
**Protection of Coral Reefs**

**Sec. 1 Purpose.** The purpose of this order is to conserve and prevent the waste of the coral reefs located on the Outer Continental Shelf of the United States by extending to them immediate protection. These reefs are unique formations and their associated marine life is of great scientific interest and value to students of the sea and it is in the public interest to protect these formations of great scientific and aesthetic importance for the benefit and enjoyment of the people. There is an immediate threat to these coral reefs resulting from their being subject to commercial exploitation that places them in danger of being destroyed. In order to meet this emergency situation and to afford the coral reefs on the Outer Continental Shelf immediate protection, this order is issued pursuant to the authority conferred upon this Department pursuant to the Act of August 7, 1953 (67 Stat. 462; 43 U.S.C. 1331 et seq.) and applies to all viable coral communities, as defined herein, located on the Outer Continental Shelf.

**Sec. 2 Removal or Destruction of Natural Features and Marine Life.** No person shall destroy, injure, deface, mar, move, dig, harmfully disturb or remove any coral that is part of a viable coral community. No person shall cut, carve, injure, mutilate, move, displace or break off any bottom formation or growth located in or associated with a viable coral community.

**Sec. 3 Dredging, Filling, Excavating and Building Activities.** No dredging, excavating, filling, or construction operations of any kind are permitted in or on

a viable coral community or in such locations that said activity would have a direct adverse effect upon a viable coral community. No materials of any sort may be deposited in or on a viable coral community nor may any building or structure of any kind, whether permanent or temporary, be constructed or built on a viable coral community.

**Sec. 4 Exceptions.** Exceptions to sections 2 and 3 of this order may be granted by the Director, Bureau of Land Management, for the purposes of exploring for or developing other natural resources, for scientific or educational purposes, for the national defense, and for salvaging or examining wrecks or other objects. Nothing contained in sections 2 and 3 shall apply to limit activities taken to save human lives or property jeopardized at sea or to limit activities authorized by this Department.

**Sec. 5 Criminal Penalty.** Any person who knowingly and willfully violates any part of this order shall be deemed guilty of a misdemeanor and punishable by a fine of not more than \$2,000 or by imprisonment for not more than six months, or by both such fine and imprisonment, and each day of violation shall be deemed a separate offense (43 U.S.C. 1334(a)).

**Sec. 6 Definitions.** (a) A viable coral community, as used in this order, means living coral and all dead coral formations that are part of a coral reef or other ecological community containing living corals.

(b) *Outer Continental Shelf*, as used in this order, is defined in 43 U.S.C. 1331 (a).

**Sec. 7 Preparation of Regulations.** The Director, Bureau of Land Management, is directed to prepare rules and regulations governing the protection and conservation of the coral reefs on the Outer Continental Shelf and to obtain the views of the public in the preparation of such rules and regulations.

**Sec. 8 Effective Date.** This order shall become effective upon the date of its publication in the FEDERAL REGISTER. Its provisions shall remain in effect until final regulations become effective, or until it is amended, superseded, or revoked, whichever occurs first. However, in the absence of the foregoing action, the provisions of this order shall terminate and be considered obsolete on September 30, 1976.

Dated: September 2, 1975.

**FLUE-CURED TOBACCO ADVISORY COMMITTEE**

**Notice of Meeting**

The Flue-Cured Tobacco Advisory Committee meeting will be held on September 25, 1975, at 1 p.m., in the Tobacco Division, AMS, Laboratory,

Room 223, Flue-Cured Tobacco Cooperative Stabilization Corporation, 1306 Annapolis Drive, Raleigh, North Carolina 27605.

The purpose of this meeting is to discuss readjustments in the culling schedules for markets remaining open in the flue-cured area in anticipation of closing out Area A, Georgia-Florida markets. Also, other matters as specified in 7 CFR Part 29, Subpart G, § 29.9404 will be discussed.

The meeting is open to the public but space and facilities are limited. Public participation will be limited to written statements submitted before or at the meeting unless their participation is otherwise requested by the Committee Chairman. Persons, other than members, who wish to address the Committee at the meeting should contract Mr. J. W. York, Director, Tobacco Division, Agricultural Marketing Service, 300 12th Street SW., United States Department of Agriculture, Washington, D.C. 20250 (202) 447-2567.

Dated: September 9, 1975.

WILLIAM H. WALKER III,  
 Deputy Administrator, Program Operations, Agricultural Marketing Service.

**Foreign Agricultural Service**  
**WHITE OR IRISH POTATOES**  
**1975 Production Estimate**

Headnote 2 of Subpart A of Part 8 of Schedule 1 of the Tariff Schedules of the United States (TSUS) provides that, if for any calendar year the production in the United States of white or Irish potatoes, including seed potatoes, according to the estimate of the Department of Agriculture made as of September 1, is less than 21 billion pounds, an additional quantity of potatoes equal to the amount by which such estimated production is less than 21 billion pounds shall be added to the 45 million pounds for which duty at 37.5 cents per 100 pounds is provided by TSUS item 137.25 for the year beginning the following September 15.

The estimate of the Department of Agriculture, made as of September 1, 1975, is that for the calendar year 1975 the production in the United States of white or Irish potatoes, including seed potatoes, will exceed 21 billion pounds.

Issued at Washington, D.C., this 5th day of September 1975.

BRUCE K. MEERER,  
 Acting Administrator,  
 Foreign Agricultural Service.

#### Rural Electrification Administration

##### BRAZOS ELECTRIC POWER COOPERATIVE, INC.

#### Draft Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration intends to prepare a draft environmental impact statement in accordance with section 102 (2) (C) of the National Environmental Policy Act of 1969, in connection with an anticipated loan guarantee for Brazos Electric Power Cooperative, Inc., P.O. Box 6296 Waco, Texas 76706 and South Texas Electric Cooperative, Inc., P.O. Box 2485, Victoria, Texas 77901. This loan will provide for the construction of a 400 MW lignite generating unit to be located in Atascosa and McMullen counties, 254 miles of related 345 kV transmission line, 175 miles of related 138 kV and 69 kV transmission line. The related substation capacity will be one 400 MVA-345/138 kV and three 30/40/50 kVA-138/69 kV.

Interested persons are invited to submit comments which may be helpful in preparing the draft environmental impact statement.

Comments should be forwarded to the Assistant Administrator-Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, with a copy to the borrower whose address is given above.

Additional information may be obtained at borrower's office during regular business hours.

Dated at Washington, D.C. this 3 day of September, 1975.

RICHARD F. RICTER,  
Acting Administrator.

#### Soil Conservation Service

##### ALTAMONT MULTIPURPOSE RESERVOIR RESOURCE CONSERVATION & DEVELOPMENT (RC&D) MEASURE, KANS.

#### Notice of Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8(b) (3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974;

#### NOTICES

the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for Altamont Multipurpose Reservoir RC&D Measure, Labette County, Kansas.

The environmental assessment of this federal action indicates that the measure will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the measure. As a result of these findings, Mr. Robert K. Griffin, State Conservation, Soil Conservation Service, 760 S. Broadway, Salina, Kansas 67401, has determined that the preparation and review of an environmental impact statement is not needed for this measure.

The measure plan concerns land treatment and construction of a multipurpose reservoir including storage capacity for municipal-industrial water supply, recreation water supply, and floodwater detention. Recreation facilities are planned adjacent to the lake. The dam will be earth fill with a vegetated emergency spillway.

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA, 760 S. Broadway, Salina, Kansas 67401.

The negative declaration is available for single copy requests from the above address.

No administrative action on implementation of the proposal will be taken until September 25, 1975.

(Catalog of Federal Domestic Assistance Program No. 10.901, National Archives Reference Services.)

Dated: August 28, 1975.

R. C. BARNES,  
Acting Deputy Administrator  
for Field Services, Soil Conservation Service.

#### DEPARTMENT OF COMMERCE

##### Domestic and International Business Administration

##### NUMERICALLY CONTROLLED MACHINE TOOL TECHNICAL ADVISORY COMMITTEE

#### Notice of Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that a meeting of the Definitions Subcommittee of the Numerically Controlled Machine Tool Technical Advisory Committee will be held on Friday, October 10, 1975 at 11:30 a.m. in Room 4833, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Numerically Controlled Machine Tool Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) (Supp. III, 1973) and the Federal Advisory Committee Act. The Definitions Subcommittee of the Numerically Controlled Machine Tool Technical Advisory Committee was initially established on July 10, 1973. On July 15, 1975, the Director, Office of Export Administration approved the reestablishment of this Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to numerically controlled machine tools, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Definitions Subcommittee was formed to provide universally acceptable numerically controlled nomenclature for machine tool systems.

The Subcommittee meeting agenda has four parts:

#### GENERAL SESSION

- (1) Opening remarks by the Subcommittee Chairman.
- (2) Presentation of papers or comments by the public.
- (3) General review of current definitions.

#### EXECUTIVE SESSION

- (4) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available to the public. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on December 16, 1974, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3100,

Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1620, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202/967-4196.

In accordance with paragraph (4) of the Order of the United States District Court for the District of Columbia in *Aviation Consumer Action Project, et al., v. C. Langhorne Washburn, et al.*, September 10, 1974 as amended, September 23, 1974 (Civil Action No. 1838-73), the Complete Notice of Determination to close portions of the series of meetings of the Numerically Controlled Machine Tool Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER (40 FR 6804, appearing in the issue of February 14, 1975).

Dated: September 5, 1975.

RAUFER H. MEYER,  
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.75-24001 Filed 9-9-75; 8:45 am]

##### NUMERICALLY CONTROLLED MACHINE TOOL TECHNICAL ADVISORY COMMITTEE

#### Notice of Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that a meeting of the Numerically Controlled Machine Tool Technical Advisory Committee will be held on Friday, October 10, 1975 at 2:00 p.m. in Room 4833, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Numerically Controlled Machine Tool Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) (Supp. III, 1973) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to numerically controlled machine tools, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

#### NOTICES

The Committee meeting agenda has five parts:

#### GENERAL SESSION

- (1) Opening remarks by the Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Discussion of work program of the Committee.
- (4) Reports of Subcommittees: (a) New Technology; (b) Foreign Availability; (c) Definitions.

#### EXECUTIVE SESSION

- (5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available to the public. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on December 16, 1974, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3100, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1620, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202/967-4196.

In accordance with paragraph (4) of the Order of the United States District Court for the District of Columbia in *Aviation Consumer Action Project, et al., v. C. Langhorne Washburn, et al.*, September 10, 1974 as amended, September 23, 1974 (Civil Action No. 1838-73), the Complete Notice of Determination to close portions of the series of meetings of the Numerically Controlled Machine Tool Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER (40 FR

6804, appearing in the issue of February 14, 1975).

Dated: September 5, 1975.

##### COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

#### Notice of Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that a meeting of the Computer Systems Technical Advisory Committee will be held on Tuesday, October 14, 1975 at 9:30 a.m. in Room 6802, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) (Supp. III, 1973) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee meeting agenda has five parts:

#### GENERAL SESSION

- (1) Opening remarks by the Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Reports on Meetings of Subcommittees: (a) Technology Transfer; (b) Foreign Availability; (c) Licensing Procedures; (d) Hardware.
- (4) Discussion and adoption of definitive work programs of the Subcommittees.

#### EXECUTIVE SESSION

- (5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available to the public. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Assistant Secretary of Commerce for

#### SEMICONDUCTOR TECHNICAL ADVISORY COMMITTEE

##### Notice of Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that a meeting of the Semiconductor Technical Advisory Committee will be held on Wednesday, October 15, 1975, at 9:30 a.m. in Room 5230, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Semiconductor Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration, approved the recharter and extension of the Committee for two

additional years, pursuant to Section 5 (c) (1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c) (1) (Supp. III, 1973) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to semiconductor products, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee meeting agenda has four parts:

#### GENERAL SESSION

- (1) Opening remarks by the Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Discussion of integrated circuits.

#### EXECUTIVE SESSION

- (4) Discussion of matters properly classified under Executive Order 11652 dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available to the public. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on December 16, 1974, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All matters have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3100, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1620, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202/967-4196.

In accordance with paragraph (4) of the Order of the United States District Court for the District of Columbia in *Aviation Consumer Action Project, et al., v. C. Langhorne Washburn, et al.*, Sep-

tember 10, 1974, as amended, September 23, 1974 (Civil Action No. 1838-73), the Complete Notice of Determination to close portions of the series of meetings of the Semiconductor Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER (40 FR 18, appearing in the issue of January 2, 1975).

#### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

##### Center for Disease Control

#### IMMUNIZATION PRACTICES ADVISORY COMMITTEE

##### Notice of Meeting

In accordance with section 10(a) (2) of the Federal Advisory Committee Act (Public Law 92-463), the Center for Disease Control announces the following Committee meeting:

Name: Immunization Practices Advisory Committee.

Dates: October 6-7, 1975.

Place: Room 207, Building 1, Center for Disease Control, 1600 Clifton Road NE, Atlanta, Georgia 30333.

Time: 8:30 a.m.

Type of Meeting: Open.

Contact Person: H. Bruce Dull, M.D., Executive Secretary of Committee Building 1, Room 2118, Center for Disease Control, 1600 Clifton Road NE, Atlanta, Georgia 30333; phone: AC/404 633-3311, Extension 3701.

Purpose: The Committee is charged with advising on the appropriate uses of immunizing agents for public health practice.

Agenda: The Committee will consider the use of immune serum globulins in the management of hepatitis-B antigen carriers who may represent a source of infection. It will also continue its regular review of recommendations on the use of vaccines in public health practice.

Agenda items are subject to change as priorities dictate.

The meeting is open to the public for observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: September 2, 1975.

DAVID J. SENCER,  
Director,  
Center for Disease Control.

#### FEDERAL COUNCIL ON THE AGING

##### Notice of Meeting

The Federal Council on the Aging was established by the 1973 amendments to the Older Americans Act of 1965 (Pub. L. 93-29) for the purpose of advising the President, the Secretary of Health, Education, and Welfare, the Commissioner on Aging, and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to Pub. L. 92-463 that the Council will meet on September 26, 1975 from 9:30 a.m. to 5 p.m. in Room 4563, Donohoe Building, 400 Sixth St. SW., Washington, D.C., and on September 27, 1975 from 9 a.m. to 3 p.m. at the Sheraton Park Hotel, 2660 Woodley Road, NW., Washington, D.C. The agenda will consist of: review of President's response to FCA first annual report, review of pending Federal legislation affecting the elderly, status of implementation of recent Federal legislation affecting the elderly, FCA involvement with statement on rights and responsibilities of older Americans, briefing on SSI overpayment situation, status

of study on interrelationships of benefit programs, status of study on the combined impact of all taxes on the elderly, a briefing on physical activity for the aging, development of FCA recommendations for national policy for services to the frail elderly, final plans for the September 28 FCA hearing on older women, plans for annual report to the President and proposed FCA schedule for 1976.

For further information on the Council contact: Cleonice Tavani, Executive Director, FCA, 400 Sixth Street, SW., Washington, D.C. 20201, telephone (202) 245-0441.

The meeting will be open for public observation.

CLEONICE TAVANI,  
Executive Director,  
Federal Council on the Aging.

#### Office of Education

#### NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION

##### Public Meeting; Correction

In the FEDERAL REGISTER of August 28, 1975, on page 39539 there was an announcement of a meeting of the National Advisory Council on Extension and Continuing Education to be held September 23-25, 1975, in New York, N.Y. The announcement stated that the meeting of September 23, 1975, would begin at 9:00 a.m. in the Key Room of the Biltmore Hotel and that later the group would join the meeting of State Title I Administrators and State Advisory Council Representatives at the Belmont Plaza Hotel. Now it has been decided that all meetings of the Advisory Council held on Tuesday, September 23, will be in the Belmont Plaza Hotel. The meeting will convene at 9:00 a.m. in the Crystal Room and adjourn at 10:30 a.m. to meet with the Title I group in the Baroque Room. Meetings that afternoon will alternate between these two rooms.

All meetings on September 24-25 will be held in the Key Room of the Biltmore Hotel as previously stated.

LYNN H. DAVIS,  
Executive Director.

##### Request for Information on Certain Chemical Agents; Extension of Time

On June 23, 1975, a notice was published in the FEDERAL REGISTER (40 FR 26390) setting forth a list of chemical substances which have reportedly produced observed or suspected carcinogenic responses in animals. Persons having information pertinent to the establishment of a safe and healthful work environment involving any of the listed sub-

stances were requested to submit such information and accompanying documentation to the National Institute for Occupational Safety and Health within 90 days.

Due to the complexity of the list (approximately 1500 chemicals and their synonyms) and the broad range of chemicals used in many manufacturing processes, a number of organizations have verbally requested additional time in which to compare the list to those chemicals in use and to compile and submit their data.

In view of this, the Institute is hereby extending the period for submitting information on the listed substances until December 19, 1975.

Dated: September 4, 1975.

JOHN F. FINKLEA,  
Director, National Institute for Occupational Safety and Health

#### CIVIL AERONAUTICS BOARD

[Docket 27573; Agreement C.A.B. 25207 R-1 through R-6; Agreement C.A.B. 25281 R-1 through R-12; Order 75-9-12]

#### TRAFFIC INTERNATIONAL AIR TRANSPORT ASSOCIATION RELATING TO CARGO RATES

##### Order Relating to Cargo Rates

Issued under delegated authority: September 4, 1975.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreements were adopted at the Composite Cargo Traffic Conference held in Nice during May/June 1975, and encompass the overall cargo rate structure within Conference 3 (Asia/Australia/Intrapacific), and between Traffic Conference 3 and Traffic Conference 2 (Europe/Africa/Middle East).

The agreements, proposed for effectiveness from October 1, 1975 through September 30, 1977, directly affect air transportation as defined by the Act only insofar as they involve the U.S. points Guam and American Samoa. The Board will herein approve or disclaim jurisdiction, where appropriate, the subject resolutions insofar as they relate to traffic wholly between foreign points. Insofar as the resolutions directly affect the above-named U.S. points, they will be disposed of in the context of our action on the separate, overall transpacific cargo agreements now pending before the Board.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14:

1. It is not found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act insofar as they would establish rates and charges wholly between foreign points:

Agreement CAB	IATA No.	Title	Application
2537:			
R-1.....	002	Standard Revalidation Resolution.....	3.
R-2.....	022a	TC3 Special Rules for Sales of Cargo Air Transportation (Revalidating and Amending).....	3.
R-3.....	022un	TC3 Special Rules for Sales of Cargo Air Transportation (New).....	3.
R-4.....	501	Minimum Charges for Cargo (Revalidating and Amending).....	3.
R-5.....	553	TC3 General Cargo Rates.....	3.
R-6.....	590	Specific Commodity Rates Board.....	3.
2538:			
R-1.....	001c	Cargo Tie-In Resolution.....	2/3; 1/2/3.
R-2.....	001xx	Review of Bulk Utilization Charges (New).....	2/3; 1/2/3.
R-3.....	062	Standard Revalidation Resolution.....	2/3.
R-4.....	014w	Special JT23 and JT123 Cargo Construction Rule (Revalidating and Amending).....	2/3; 1/2/3.
R-5.....	022b	JT23/JT23 Special Rules for Sales of Cargo Air Transportation (Revalidating and Amending).....	2/3; 1/2/3.
R-6.....	022mm	JT23/JT123 Special Rules for Sales of Cargo Air Transportation (New).....	2/3; 1/2/3.
R-7.....	022vv	JT23/JT23 Special Rules for Sales of Cargo Air Transportation (New).....	2/3; 1/2/3.
R-8.....	115g	JT23/JT123 Meeting Rates, Charges and Practices (New).....	2/3; 1/2/3.
R-9.....	501	Minimum Charges for Cargo (Revalidating and Amending).....	2/3; 1/2/3.
R-10.....	535	Charges for Bulk Utilization—JT23 (Revalidating and Amending).....	2/3.
R-11.....	555	JT23 and JT123 General Cargo Rates.....	2/3.

2. It is not found that the following resolution, incorporated in Agreement C.A.B. 25281 as indicated, affects air transportation within the meaning of the Act:

Agreement CAB	IATA No.	Title	Application
25281:			
R-12.....	590	Specific Commodity Rates Board (Revalidating and Amending)....	2/3; 1/2/3.

Accordingly, it is ordered, That:

1. Those resolutions set forth in finding paragraph 1 above be and hereby are approved insofar as they would establish rates and charges wholly between foreign points; and

2. Jurisdiction be and hereby is disclaimed with respect to the resolution set forth in finding paragraph 2 above.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

#### ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[Docket No. P-153-1]

#### HEWLETT-PACKARD CO.

##### Notice of Hearing

On July 30, 1975, the Hewlett-Packard Company, 1501 Page Mill Road, Palo Alto, California 94304 (hereinafter, the "applicant") filed an application pursuant to section 153 of the Atomic Energy Act of 1954, as amended (hereinafter, the "Act"), requesting the Energy Research and Development Administration (hereinafter, the "Agency") to issue a license for the use of the invention or discovery covered by U.S. Patent 3,601,609, Ionization Detection Device Using a Nickel-63 Radioactive Source, issued on August 24, 1971 to William L. Yauger, Jr. Section 153 of the Act provides that the Agency shall within thirty (30) days after the filing of such application, make available to the patent owner the information contained in said application, and shall give notice of a hearing to be held within sixty (60) days after the filing of such an application.

Accordingly, pursuant to section 153 d. of the Act, notice is hereby given to the applicant; and, to Tracor, Inc., 6500

Tracor Lane, Austin, Texas 78721, and any other person whose interest may be affected, that a hearing will be held at 10 a.m. local time, on September 23, 1975, in the conference room, 6th Floor, ERDA Building, 20 Massachusetts Avenue NW., Washington, D.C., before a panel of the Patent Compensation Board of ERDA, to consider the following issues:

1. Whether the applicant is qualified under Section 153 c. of the Act to apply for such a license.

2. Whether the Agency should issue a nonexclusive license to the applicant to use the invention or discovery covered by U.S. Patent No. 3,601,609. Pursuant to section 153 e. of the Act, such a license can only be issued if the Agency finds that:

a. The invention or discovery covered by the patent is of primary importance in the production or utilization of special nuclear material or atomic energy;

b. The licensing of such invention or discovery is of primary importance to the conduct of the activities of the applicant;

c. The activities to which the patent license are proposed to be applied by such applicant are of primary importance to the furtherance of policies and purposes of this Act; and

d. Such applicant cannot otherwise obtain a patent license from the owner of the patent on terms which the Agency deems to be reasonable for the intended use of the patent to be made by such applicant.

Section 153 g. of the Act provides that the owner of the patent shall be entitled to a reasonable royalty fee from the licensee for any use of an invention or discovery licensed under section 153 of the Act. In the absence of an agreement between the owner and the licensee, the royalty will, if the license is granted and upon a proper request, be determined in a separate proceeding pursuant to section 157 of the Act.

Any answers to this notice, must be filed by the parties within twenty (20) days of the issuance of this notice.

Papers required to be filed in this proceeding may be filed by mail or telegram addressed to the Chairman, Patent and Development Administration, Washington, D.C. 20545.

Dated at Germantown, Md., this 29th day of August 1975.

ROBERT C. SEAMANS, JR., Administrator.

For U.S. Energy Research and Development Administration.

ROBERT W. FRI, Deputy.

#### ENVIRONMENTAL PROTECTION AGENCY

[FRL 414-61]

#### NEW SOURCE PERFORMANCE STANDARDS FOR FOSSIL FUEL-FIRED STEAM GENERATORS

##### EPA Response to Remand

On September 10, 1973, the U.S. Court of Appeals for the District of Columbia

remanded to EPA certain of the new source performance standards for fossil fuel-fired steam generators under section 111 of the Clean Air Act. EPA has reviewed its standards for these plants pursuant to the remand and tentatively concluded that the standards other than the opacity standard should not be revised.

EPA has prepared the draft response set forth below. Comments on this draft should be submitted to the Emission Standards and Engineering Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Mr. Don R. Goodwin, on or before November 10, 1975. After reviewing such comments, EPA will publish its final response.

The Environmental Protection Agency (EPA) promulgated new source performance standards for power plants on December 23, 1971 (40 CFR 60.40 et seq.). These standards were issued in accordance with Section 111 of the Clean Air Act as amended (42 U.S.C. 1857 c-6). The standards were challenged in part by certain industrial groups, and reviewed by the United States Court of Appeals for the District of Columbia. In the Court's decision, the case was consolidated with another case involving the standards for sulfuric acid plants (Essex Chemical Corporation, et al. v. Ruckelshaus, Appalachian Power Company et al. v. EPA; 486 F.2d 427, September 10, 1973). The Court found that the record generally supported the standards, but remanded the record to EPA for further consideration of specific issues. EPA's response regarding power plant standards is given below; the response dealing with sulfuric acid plant standards will be made separately.

The specific power plant issues remanded to EPA for further consideration are:

(A) The reasonableness of the opacity standards;

(B) The need for provisions that unavoidable excesses of the standards during startup, shutdown, or malfunctions, would not be considered violations.

(C) The adverse environmental effects of setting a standard that requires coal fired power plants to use a lime slurry scrubbing system.

EPA has made a thorough evaluation of the remanded issues and the Administrator's response follows.

##### A. Opacity Standards.

On June 29, 1973, the U.S. Court of Appeals for the District of Columbia remanded to EPA the new source performance standards for Portland Cement plants (40 CFR 60.62) promulgated by EPA under section 111 of the Clean Air Act (42 U.S.C. 1857c-6) (Portland Cement Association v. Ruckelshaus, 486 F.2d 375). One of the issues remanded in that case was the appropriateness of opacity standards. In the Essex Chemical case the Court noted the similarity of the opacity challenges and remanded the record for additional consideration regarding the reasonableness of opacity standards.

Since the record was remanded in *Portland Cement* for a similar reconsideration of the opacity standard, and since the challenges

basically are directed at the test itself rather than particular standards set thereunder, we do not believe that the reconsideration will require much more effort on the part of the EPA than is already required by *Portland Cement*. (Court's footnote 11)

On November 12, 1974, EPA responded to the remand (39 FR 39872). Copies of the remand response are available from the Emissions Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Mr. Don R. Goodwin.

In the *Portland Cement* response, EPA reconsidered the use of opacity standards and concluded that they are a reliable, inexpensive, and useful means of ensuring that control equipment is properly maintained and operated at times when performance tests are not being conducted. EPA also made certain changes to the general provisions and opacity test method to minimize the possibility that a plant which meets the mass emission or concentration standard applicable to the source and is properly maintained and operated would be in violation of the applicable opacity standard. The changes are applicable to new fossil fuel-fired steam generators and all other sources for which opacity standards have been promulgated or proposed under section 111. The court which remanded to EPA the opacity standard for fossil fuel-fired steam generators has sustained EPA's position that opacity standards are a reasonably accurate means of measuring and controlling pollution. *Portland Cement Association v. Train*, No. 72-1073 decided May 22, 1975. The Agency's response to the remand and the subsequent decision in the *Portland Cement* case dispose of the issue of the validity of the opacity test method. This response considers related aspects of opacity not covered in the *Portland Cement* response which are specific to fossil fuel-fired steam generators.

The principal revisions to the regulations (40 CFR Part 60, Standards of Performance for New Stationary Sources) which apply to all opacity standards herein are: (a) Method 9 (the opacity test method) has been changed to base compliance on the average of one or more sets of 24 consecutive observations; (b) Method 9 now defines the possible error associated with a set of opacity observations; and (c) § 60.11(e) has been added to provide a generally applicable mechanism for any owner or operator to petition the Administrator to obtain a higher opacity standard for any facility that demonstrates compliance with the mass emission standard concurrent with failure to attain the promulgated opacity standard.

The revision to Method 9 to clarify the time over which opacity observations are made (six minutes) was included to require sufficient observations to ensure acceptable accuracy within the 7.5 percent opacity error range referenced in Method 9. The use of sets (the average of 24 observations, each taken at 15 second intervals) of opacity data will preclude a single high reading from being cited as a violation. Section 60.11(e) pro-

vides accommodation for those source owners and operators who install unusually large diameter stacks or whose source particulate emissions have unusually small mean particle diameters which could cause the opacity of the emissions to be greater than is typical for most other plants in the source category. This provision allows the promulgated opacity standards to be based on typical parameters for well controlled new installations rather than on the most extreme set of conditions. This provision alone ensures that no owner of an affected facility would be deemed in violation if the facility were not able to meet the current promulgated opacity standard while meeting the mass emission standard. However, EPA additionally has reevaluated the promulgated standard applicable to power plants to determine whether the general standard can be met by most new plants.

The opacity standard for power plants limits opacity to 20 percent opacity except that a maximum of 40 percent opacity shall be permissible for not more than two minutes in any hour. 40 CFR 60.42(a)(2). The purpose of the two minute exception is to accommodate a limited number of oil-fired boilers that blow soot intermittently rather than continuously. (Soot blowing is the practice of blowing steam over the boiler's heat transfer tubes to remove soot.) The accumulated soot in such boilers tends to increase particulate emissions when blown free.

Now that the current test method for opacity makes it clear that instantaneous opacity readings are not a basis for finding a violation of opacity standards, the need for the two minute exception must be reconsidered. It is EPA's belief that the requirements of a six minute reading period eliminates the need for the two minute exception, since new plants can and do attain opacity levels sufficiently below 20 percent that any increase due to soot blowing will not result in the six minute average exceeding 20 percent opacity.

The two minute exception was included primarily to ensure that the opacity standard could be met by new or modified oil-fired boilers. Soot blowers in coal-fired units operate for periods much longer than two minutes in any hour and properly designed and operated dust collectors can adequately collect the dislodged particulate matter. According to reevaluating the achievability of the opacity standard by coal-fired power plants, EPA tested plants to determine if the 20 percent opacity standard can be met over the six minute testing period required in Test Method 9, without any special allowances being made for soot blowing.

Extensive opacity measurements were made on stacks of 15 coal-fired steam generators.<sup>1</sup> Six of the stacks were at plants operated by the Tennessee Valley Authority (TVA). The other nine were located in the State of Ohio. All measurements were made using Method 9. At all but one stack, multiple observers (either two or four) made readings for 2 to 4

hours. All of the TVA plants were operated at or near capacity, but some of the Ohio plants were at reduced capacity. In all, the readings spanned 92 observer-hours; 6-minute averages ranged from 6.46 to 18.8 percent opacity at the TVA plants, and from zero to 19.2 percent opacity at the Ohio plants. These results, compiled by numerous qualified observers from many stacks, confirm that EPA's 20 percent opacity limitation is achievable at coal-fired plants without the need for a special allowance for soot blowing. In the event, however, that a new or modified plant meets the mass emission standard but fails to meet the opacity standard, the operator may petition EPA for a less stringent opacity standard. [40 CFR 60.11(c)]. For the foregoing reasons, EPA is proposing in this issue of the *FEDERAL REGISTER* to eliminate the two minute exception applicable to coal-fired plants.

Although this remand response is addressed to the standards which have been challenged (those for coal-fired power plants), EPA believes that oil-fired boilers can also meet the 20 percent opacity limit over a six minute period without the need for a special allowance for soot blowing. Before proposing deletion or other revision of the two minute exception applicable to oil-fired steam generators, EPA is soliciting information and comment from interested parties.

#### B. STARTUP, SHUTDOWN, MALFUNCTION PROVISIONS.

Sources in compliance during normal operation may unavoidably exceed standards during periods of startup, shutdown, or malfunction. Provisions for dealing with these situations were not contained in the power plant standards when promulgated. EPA subsequently proposed such provisions in the *FEDERAL REGISTER*, August 25, 1972. In reviewing the standards, the Court found that provisions for startup, shutdown, and malfunctions appeared necessary to preserve the reasonableness of the standards. In their remand, the Court noted that EPA's proposed provisions should play an integral role in any reconsideration of the standards.

EPA improved the original provisions as a result of public comments. Final provisions were promulgated October 15, 1973 in the *FEDERAL REGISTER*. They stipulate that during a startup, shutdown, or malfunction, performance tests are not to be conducted, and opacity limitations do not apply. The effect of the provisions is to suspend standards during startup, shutdown, and malfunction. Operators are required, however, to minimize emissions to the extent possible during such periods. Operators must also report the excess emissions and corrective actions taken. No petitions were filed to challenge these provisions. The absence of any challenge should indicate that startups, shutdowns, and malfunctions are no longer an issue.

#### C. ENVIRONMENTAL IMPACT OF SLUDGE DISPOSAL.

1. Background and Conclusions. With respect to the disposal of sludge from lime slurry scrubbing systems, the Court stated in its decision:

A lime slurry scrubbing system is the anticipated "best system" for use in coal-fired steam generators which burn coal of such a high sulfur content that separate control mechanisms are necessary to meet the standard.<sup>4</sup> This scrubbing system, like the sodium sulfite-bisulfite system used in sulfuric acid plants, produces significant quantities of sludge byproduct which present substantial disposal problems. The counter productive environmental effects of the system were noted in comments to the EPA,<sup>5</sup> but the Administrator's consideration of the issue, at least as it appears on the record, is insufficient. The only statement in the Background Information for Proposed New-Source Performance Standards concerning such is merely an admission of the problem:

Lime-scrubbing systems are essentially throwaway processes that produce significant quantities of solid waste. For a 3.0-percent-sulfur coal, the additional wastes are roughly equal to the ash generated from burning coal.<sup>6</sup>

Consequently, the record is remanded for further consideration and explanation by the Administrator of the adverse environmental effects of requiring a 1.2 lbs./million standard for those coal-fired steam generator plants which must use a lime slurry scrubbing system as the only means of achieving the standard.<sup>7</sup> (Footnotes by the Court)

#### (a) Problem Discussion.

Large quantities of sludge will be generated from lime or limestone scrubbing systems. Unless properly disposed of, the sludge will adversely affect the environment. Major areas of concern are:

(1) The necessity of disposing of large quantities of solid wastes;

(2) Possible water pollution (both surface and groundwater);

(3) Possible land deterioration if sludge remains in a semi-solid state.

By the time new source performance standards were proposed, techniques for disposing of municipal wastes and sludges had been used for many years.<sup>8</sup> Physical, chemical, and biological criteria were available to evaluate water pollution. Techniques for dewatering various industrial sludges, lining ponds, and treating liquid effluents were in use.<sup>9</sup> The deleterious effects of leaching and runoff were recognized and disposal methods had been devised.<sup>10</sup> Additional technology for handling scrubber sludge

<sup>4</sup> See Background Information Document, supra note 45, J.A. at 34. It is possible through the burning of generally unavailable low sulfur content coal to meet the sulfur dioxide emission standards without the assistance of any control mechanisms. *Id.* at 29.

<sup>5</sup> See Comments of Edison Electric Institute in No. 72-1079, J.A. at 130; Comments of Babcock & Wilcox Co. in No. 72-1079, J.A. at 171.

<sup>6</sup> Background Information Document, supra note 45, J.A. at 35.

<sup>7</sup> We want to reiterate, see note 40 supra, that we express no view as to what the standards ultimately should be with regard to such plants. Perhaps some flexible standard should be adopted which recognizes that the lime slurry scrubber system should be used only where necessary to meet the EPA's primary ambient air standards, or perhaps in balance the counter productive effects of the system are outweighed by the need for cleaner air. We only want to be sure in view of the significant problem posed in the record that the Administrator has acted reasonably in promulgating the standard.

has recently become available, and will be discussed later.

(b) EPA Consideration of Sludge Impact.

As directed by the Court, EPA has thoroughly reconsidered the environmental impact of sludge resulting from lime and limestone scrubbing systems. Information available at the time of standards promulgation has been reassessed, along with the following subsequent information:

(1) the Essex Chemical decision.

(2) the testimony at EPA's national hearings on power plant sulfur dioxide regulations.<sup>9</sup>

(3) the findings of the EPA Sulfur Oxide Throwaway Sludge Evaluation Panel (SOTSEP).<sup>11</sup>

(4) an EPA contract study by Radian Corporation on sludge disposal options.<sup>12</sup>

(5) an EPA contract study by Aerospace Corporation on sludge disposal.<sup>13</sup>

(6) the record of adjudication hearings held in Ohio on sulfur dioxide emission regulations.<sup>14</sup>

At the national hearings on power plant regulations,<sup>9</sup> witnesses were heard and over 3,000 pages of testimony were taken. The report of the Hearing Panel is thus based on extensive participation by interested parties representing all segments of society outside of EPA. The SOTSEP report represents a multi-disciplinary effort within EPA to collect and review all information available to the Agency with respect to the disposal of sludge from scrubbers.

The Radian Report is a general study of technology for disposal of sludge created by lime and limestone FGD systems at steam-electric power plants. The Aerospace study characterizes power plant sludge and evaluates disposal methods. The Ohio adjudication hearings were in response to requested variances from sulfur dioxide emission regulations, and dealt in part with sludge disposal.

(c) EPA Conclusions.

EPA recognizes that large quantities of sludge will be produced by lime or limestone scrubbing systems. Disposal methods must therefore be carefully selected to minimize adverse effects on the environment. Based on available information, methods of disposing of sludge in an environmentally acceptable manner are now offered commercially at reasonable cost. In these methods the sludge is fixated (hardened) and used as landfill.

EPA considers permanent land disposal of raw (unfixated) sludge to be environmentally unsound, because it indefinitely degrades large quantities of land. Although EPA has no regulatory authority to prevent raw sludge disposal, EPA anticipates States and local jurisdictions to require treatment of sludge. In some instances, States have already prohibited the disposal of untreated sludge.

Commercial processes to fixate sludge are now offered at reasonable cost by several industrial waste handling concerns. The processes involve addition of suitable chemicals to react with the sludge. The reactions are similar to those employed in the formation of cement and transform the sludge into a hard, durable

See footnotes at end of document.

mass. Full scale operations have been started by at least two plants, and are being planned at several others.

The fixated sludge can be deposited as landfill material on or off the power plant property. Landfill material such as fixated sludge is frequently needed to reclaim land areas degraded by industrial and commercial operations. In many areas of the United States, for example, power plants obtain their coal from nearby strip mines. Large quantities of fill material are needed to restore the mined areas to a useful condition.

Fixation of the sludge will greatly reduce its environmental impact. Land degradation can be avoided by covering the fixated sludge with earth when the disposal area is full. Ground water pollution, a potential problem if soluble chemical materials are leached from the sludge, is also minimized by fixation. If the small amount of leachate from fixated sludge is a problem at a specific plant, the landfill can be constructed with a drainage system to collect and isolate the leachate.

Sludge disposal has been considered in comparison with the alternative of uncontrolled sulfur dioxide emissions. The possibility of adverse health effects associated with fixated sludge disposal is heavily outweighed by the knowledge of serious human health effects directly and indirectly caused by sulfur dioxide.

In some cases, installation of lime or limestone scrubbers may be impractical because of geographic location, space availability, or other considerations. Alternative control methods that do not produce sludge, however, are available; these include regenerable FGD systems, fuel switching, and fuel cleaning techniques.

In summary, it is concluded that the adverse environmental impact of sludge disposal can be avoided at reasonable cost by fixating the sludge, or by using alternative control systems that do not generate sludge.

#### II. Problem Perspective.

Lime and limestone flue gas desulfurization (FGD) systems generate large volumes of sludge. Other United States industries, including uncontrolled coal-fired power plants, are faced with similar problems of waste disposal.

It is estimated that an average of 24,000 megawatts on new fossil fuel capacity will come into operation each year after 1975. Of this, about 14,500 megawatts will be coal-fired.<sup>15</sup> Many of these plants will not be able to comply with federal new source performance standards through the use of low sulfur fuel, so FGD systems will be needed.

Assuming that by 1980 approximately 25,000 megawatts of new electric generating capacity will be equipped with lime or limestone scrubbers to meet new source performance standards, an estimated 12 million tons per year of sludge (dry excluding fly ash) will be produced.<sup>16, 17</sup> Although the anticipated tonnages are large, such volumes of waste are not unique to utilities or American industry in general. In 1969, there were an estimated 138 million tons per year of

solid wastes produced due to the mining, cleaning, and burning of coal in the United States. This included 21 million tons of fly ash and 11 million tons of bottom ash and boiler slag, and 103 million tons of coal cleaning and preparation plant wastes.<sup>18, 19, 20</sup> These amounts have increased substantially since 1969.

In 1967, the phosphate rock industry generated approximately 36 million tons of sludge (dry basis). The sludge contained many of the elements occurring in power plant sludge. In addition, approximately 25 million tons of waste gypsum were produced in 1973. This waste is primarily CaSO<sub>4</sub>, one of the constituents of lime and limestone sludge.<sup>21</sup>

In 1968, an estimated 194 million tons of household, commercial, and industrial wastes were collected and disposed of.<sup>22</sup> waste material single largest inorganic waste material category is mine tailings. In 1968, the generation of this waste material was about 1100 million tons,<sup>23</sup> approximately 100 times that predicted from FGD systems installed to meet new source performance standards by 1980. This amount has grown since 1968.

As indicated above, the generation of large quantities of waste materials is not unique insofar as lime and limestone scrubbing systems are concerned. Other sources must dispose of comparable or larger volumes of waste materials. Pounding and landfill have been the most widespread methods of disposal.

The amount of land potentially affected by the disposal of sludge is small in comparison to the total land area used by an electric utility plant. The land usage for a typical 1000 megawatt plant is shown below.<sup>24</sup>

Item	Distribution of land usage	
	With limestone flue gas desulfurization for SO <sub>2</sub> and particulate, ponded untreated sludge	With particulate control only, ponded ash
	Percent	Percent
Surface mining.....	40.9	41.2
Processing.....	5	5
Rail transport.....	6.5	6.4
Plant site.....	1.0	1.0
Plant site waste (combustion and pollution control).....	11.1	1.3
Transmission lines.....	50.0	50.6
Total.....	100.0	100.0
Total acres.....	34,289	34,021

<sup>1</sup> Sludge including ash.

<sup>2</sup> Ash only.

As the table indicates, the power industry uses land extensively. Land needed for sludge disposal is a small percentage of the total land used. If the large areas required for mining, and transmission lines can be acquired, it is reasonable that land required for disposal sites could also be obtained, especially since this land can be reclaimed if sludge disposal is carried out properly.

Another comparison to make from the above table, is the large area allocated to surface mining relative to waste dis-

the standards during startups, shutdowns, or malfunctions. The reasonableness of the standards is thereby preserved.

The sludge disposal issue was remanded because the court record showed insufficient evidence that the issue had been adequately considered. EPA has conducted an extensive reevaluation of sludge disposal, including national hearings, an agency panel report, and two independent contractor studies. The evidence indicates that power plant scrubber sludge can be treated and disposed of in an environmentally acceptable manner at reasonable cost.

Dated: September 2, 1975.
